Exports of domestic products gained considerably under some heads and lost only slightly under others. Exports of manufactured products increased by $[illegible] in October and $8,011,[illegible]78 in the seven months. Exports of agricultural products dropped by $14,[illegible] in October and by $33,447,[illegible] in the seven months, the heaviest decrease in the list. War conditions and difficulties in the shipment of the new crop and agricultural products are influences affecting these returns, though the waiting European markets can absorb all Canadian surplus, and this will give to future returns an upward movement. Under animals and their products, there is an increase of $1,949,694 for October and $10,635,151 for the seven months. Under fisheries, the decreases are $747,754 and $1,406,415; under mines, $[illegible],684 and $2,561,795, while under forest products decreased by $170,377 in the seven months and increased by $430,648 in October.

IMPORTANT CHANGES IN THE BANKING WORLD

Senator Jaffray, Peleg Howland, Edward Hay and W. Moffat Become President, Vice-President, General Manager and Assistant of Imperial Bank—George Burn, of Ottawa, will probably head Canadian Bankers' Association.

As was forecasted in *The Monetary Times* last week, Hon. Robert Jaffray has been elected to the presidency of the Imperial Bank, filling the vacancy caused by the death of Col. D. R. Wilkie. Senator Jaffray is one of Scotland's pushful sons, having been born on a farm near Bannockburn. He entered business in Edinburgh and came to Canada in 1852. For ten or more years, the retail and wholesale grocery business claimed the attention of an energetic man. From then onward his activities widened, and Hon. Robert Jaffray has been a prominent figure in business and public life of Canada, as director of the Canada Life Assurance Company, General Electric Company, British America Assurance Company, Toronto General Trusts, Canada Loan and Savings Company, Nova Scotia Steel and Coal Company, and several other important corporations.

MR EDWARD HAY, TORONTO,
Appointed general manager of the Imperial Bank this week.

MR. GEORGE BURN, OTTAWA,
He will likely become president of the Canadian Bankers' Association.

MR. PELEG HOWLAND, TORONTO,
Elected vice-president of the Imperial Bank this week.

Besides being president of the Imperial Bank, he is president of the Land Security Company, and the Globe Printing Company. He was made senator in 1906. The appointment as president of the bank has met with general approval, and the traditions of the office will be upheld in a worthy manner.

Senator Jaffray has had a long and intimate experience of Canadian business. An acquaintance discussing the appointment said, "Senator Jaffray is a very sensible man, a good business man, and is honest and trustworthy in every way."

Mr. Peleg Howland.

Mr. Peleg Howland on Wednesday was elected vice-president of the Imperial Bank in succession to Hon. Robert Jaffray, who has become president of the bank. Mr. Howland has been one of the active directors of the bank, and is head of the wholesale hardware house of H. S. Howland, Sons & Company, Limited, Toronto. He is a good merchant, a director who directs, and a good citizen. His success in business and finance has kept company with a retiring disposition. Mr. Howland is president also of the General Accident Assurance Company of Canada, another successful enterprise with which he is associated.

Mr. Edward Hay.

The most natural selection of a general manager for the Imperial Bank, to succeed the late Colonel D. R. Wilkie, was that of Mr. Edward Hay. He has acted for many years as assistant general manager of the bank, and during that time proved himself an able executive and a good banker. The late Mr. Wilkie thought a great deal of Mr. Hay, trusted him in every way, and allotted to him much responsible work. Mr. Hay is a man without fads, and will prove a capable executive of a bank which has a long-standing reputation for substance and safety.

Mr. George Burn.

Mr. George Burn, who is likely to become president of the Canadian Bankers' Association in succession to the late Colonel Wilkie, is an able banker and an estimable man. For many years he has been general manager of the Bank of Ottawa and senior vice-president of the Canadian Bankers' Association. Mr. Burn is an unusually modest man, and does not care for the limelight. He is always willing, however, to give his views on banking and economic topics to those who seek them, but he is very seldom seen in print—that is, in conjunction with his name. The probable elevation of Mr. Burn to the presidency of the Bankers' Association is generally considered a very proper one, and an appointment that will give eminent satisfaction.

Mr. Burn was born in the highlands of Scotland, and obtained his first knowledge of banking in the Royal Bank of Scotland. Canada calling him, he joined the staff of the Royal Canadian Bank, Toronto, and later was accountant of the Exchange Bank, Montreal. In 1880, Mr. Burn was appointed general manager of the Bank of Ottawa, in which capacity he still officiates. He is connected with various financial corporations, and is prominently identified with philanthropic enterprises.

Mr. W. Moffat.

Mr. W. Moffat is another Imperial Bank man whose modesty has kept him away from the public eye. For some years he has been chief inspector of the bank, and this week was appointed assistant general manager. He has had a long banking career, and is familiar with the methods which have placed the Imperial Bank in the strong position in which it stands to-day. His appointment is based on the principle of promotion for men of the right calibre and ability.

TAXING LIFE INSURANCE

By their decision to fight the taxation of life insurance in Ontario, the Canadian Life Insurance Officers' Association are making a stand against the penalizing by governments of thrift and foresight. The existing Ontario laws will be appealed against by the companies on constitutional grounds. Whatever may be the result of legal engagement, the moral claim is clear. The principle of taxing life insurance premiums is unjustifiable. If the companies can prove the tax is also unconstitutional, so much the better.

The opinion has been held both in high and low places, for many years past, that life insurance taxation is decidedly unfair: Daniel Webster made this statement on insurance taxation: "Because the life insurance premium is itself a tax—voluntarily paid by the insured to the end that those dependent upon him may not become a public charge after his death. Therefore the taxation of life insurance funds is in reality a tax upon a tax."

Those with sufficient prudence to insure are doubly burdened. They must pay their share of the taxation necessary to provide for the destitute (for whose care no life insurance was arranged) and they must pay a further tax for arranging that their own dependent ones do not become a public charge.

Senator Sherman of the United States Senate has said that instead of placing burdens on life insurance the government ought to exempt it and the companies writing it from taxation.

The taxation imposed upon Canada's life insurance companies has become a serious matter. The life companies' funds have been heavily taxed because they are easily reached. The question is not one only for the life companies; it is one for every man and woman who carries life insurance. The policyholder is directly affected by this taxation, which is increasing at an alarming rate. Only those who believe that their thrift and foresight in taking out life insurance should be penalized by governments will support the taxation.

CANADA AND THE LONDON MARKET

Great hopes should not be raised as to floating Canadian loans in London immediately after the war. At the same time, there are good prospects for a certain amount of financing there. While the war lasts, Canada will get what money it requires for naval and military purposes, through the Bank of England. The provincial governments are financing temporarily, municipalities are doing the same and selling a few of their permanent securities, and corporations, generally speaking, are not in need of funds for a while. Discussing the outlook, the London Financial News says that while it is true that the amount of money available for investment in Canada and elsewhere may be reduced considerably, and that Canadian municipalities and provincial governments are expected to exercise economy in budgeting for the early future, it is hardly correct to suggest, as has been done, that Canadian borrowers must needs go to the United States for future accommodation.

When the war is over there is no doubt that investors in Europe will find ample means of employment of their surplus funds and rates of interest will probably be high; but Canadian investments should find favor, inasmuch as the Dominion stands to reap many benefits from the war without having suffered so severely as European countries during the struggle. Canada will have to pay fairly high rates of interest, no doubt; but it would be a mistake to think that investors will be so entirely preoccupied with war loans that Canada will be left out of all reckoning.

Money may not be over-plentiful immediately after the war, but Canada can reasonably anticipate receiving a fair share of it, having regard to the resources of the Dominion, to say nothing of the closer bond of kinship that exists with Great Britain as an outcome of Canada's response to the Empire's call in the hour of danger.

Sir George Paish, in an interview accorded Mr. Victor Ross, of Toronto, spoke somewhat in the same strain. He thinks that the Dominion government stands a good chance of securing money for general capital expenditure in London next year, but that other borrowers will probably have to look to the United States for such funds as they require. "Britain's ability to loan," he added, "of course, depends very largely upon the ability of the rest of the world to meet their obligations to her. While she is at present spending at the rate of about one-half of her savings upon the war, she has her own capital requirements for commercial purposes to meet, and the extent to which she will measure up to her recent position as a leading country is contingent upon a number of developments in the international position."

The United States will help with Canada's financing probably as soon as that country has got over its little scare. In the meantime, Canada is doing very well and the outlook is good.

◆

Talk confidence and act the same way.

* * * *

That Dominion cabinet chatterer would make a good toy for the top of the Christmas tree.

* * * *

The war is making us realize that the best kind of prosperity is based on production, not borrowed money.

* * * *

It might be as well to pay a little more constructive attention to the present, leaving the future to take care of itself.

BRITISH MONEY FOR CANADA

Premier Asquith, explaining last week the proposed disposition of the £350,000,000 British war loan, said that £30,250,000 would be accounted for by loans to the self-governing dominions of Canada, South Africa, Australia, and New Zealand, countries which under ordinary circumstances would be compelled to borrow in the London market. The Imperial Government has undertaken the responsibility of raising loans for these dominions.

As *The Monetary Times* has noted previously, such arrangements made by the Imperial government do not mean that Canadian municipalities and corporations will be able to resume their pilgrimage in great numbers to the London money market during the war. That impression, which seems to be the popular one, is dispelled finally by a British Treasury memorandum issued last week which, as a Canadian Associated Press message says, makes clear the purpose for which advances are to be made to the dominion governments under the vote of credit out of any war loans to be raised by the government. Apprehension existed among some members of the Imperial parliament that these advances might be made use of for the purpose of financing state undertakings, for which funds would not be obtainable on the London market at ordinary rates.

The Treasury memorandum states that the object of these advances is to provide funds to meet naval and military expenditure incurred by the dominions and other charges directly due to the crisis.

They are not intended to be applied to financing development services. It is further explained that the sums advanced are to be applied primarily to meet the obligations of the dominions in the United Kingdom in respect of debt, services and purchases in the English market, thus setting free, in so far as these obligations represent expenditure not arising out of the crisis, a corresponding sum in the dominions for local war expenditure.

Save in very exceptional circumstances, where separate naval or military operations are being carried on by the dominion itself, no part of the advances is to be used for cash remittances from the United Kingdom.

In short, we must realize that the struggle for the life of the British Empire has first call upon the money markets.

FIRE LOSSES IN THE WEST

Fire losses in the prairie provinces this year have been so numerous that in the opinion of several western underwriters the matter should be investigated thoroughly. The provincial governments do not appear to feel any heavy responsibility for investigating the causes of this loss of national wealth so long as insurance companies pay the losses. It is too big a question for any one individual to deal with. A correspondent of *The Monetary Times* suggests that there should be a permanent commission appointed to investigate the whole matter of loss by fire, trying to devise some means of reducing it. The loss last year in Canada was about $[illegible],000, according to records of *The Monetary Times*. This year the losses will be as great if not greater than last year. If, through the labors of a commission, such as suggested, the loss could be reduced even by ten per cent., it would be well worth while.

RUNNING CIVIC RAILWAYS

Says the Edmonton Journal: "*The Monetary Times*, in commenting on Commissioner Harrison's suggestion to have skating rinks and amusement parks established at points on the Edmonton street railway system, says that 'investors who hold Edmonton bonds may view civic skating rinks with suspicion.' Do the holders of the bonds of privately owned systems also view with suspicion such means of increasing revenue when they are resorted to by the companies? What is good policy in the one case should be in the other. If the city is to retain its street railway, it must pursue what have been shown to be good administrative methods elsewhere."

Answering the question, the holders of bonds or stock of privately owned systems do also view with suspicion such means of increasing revenue. There are cases in corporation spheres where such methods have proved very unsatisfactory and unremunerative. What is a poor policy for corporation ownership in this case is equally as poor for municipal ownership. Hence the suggestion that the city of Edmonton should ponder well about the civic skating rink.

Let it go at "Me, Kitchener and Joffre."

* * * *

The subscription of £600,000,000 to the £350,000,000 British war loan makes the German war loan look like thirty marks.

BRITISH COLUMBIA PERMANENT LOAN COMPANY

In the midst of the high finance tangle now being unwound in Vancouver, it is refreshing to note the action of the directors of the British Columbia Permanent Loan Company. With so many unsatisfactory rumors in circulation in the district, and in view of conditions in Canada generally, the directors deemed it wise to turn the company's deposits into the local banks.

"We regret very much," the directors told the depositors, "that conditions have made this change in our business necessary, but you can well understand how, with a great part of our funds invested in first mortgages on homes, the payments on which extend over a period of years, we could not, with safety, invest the money to your credit because you might call for it any day. We believe that our action is a wise one, both for you and for the company."

It may be hoped that a straightforward policy, such as indicated in this action, will solve any further problems which may arise.

SAVINGS DEPARTMENT

Interest allowed on deposits at all Branches of Bank from date of Deposit

BANK OF MONTREAL'S STATEMENT

The annual returns of the Bank of Montreal, the first issued since the election of Mr. H. V. Meredith to the presidency and of Sir Frederick Williams Taylor to the general managership, shows that with all the difficulties of the past twelve months, this stalwart institution has continued its conservative and substantial advance.

Profits of $2,496,451 resulted from the year's operations of the Bank of Montreal. While this amount was $151,951 lower than in the previous year's return, it was sufficient to pay dividends and bonuses totalling $1,920,000, or 12 per cent. on the capital stock, to allow for an appropriation of $290,000 to bank premises account and $100,000 to the Canadian Patriotic Fund, and there was $186,452 carried forward to profit and loss account. Earnings on the capital stock were at the rate of 15.6 per cent., against 16.6 per cent. in 1913.

Comparisons of the results obtained by the bank in the past two years are as below:—

	1914.	1913.
Previous balance	$1,046,217	$ 802,814
Stock premium	......	.....
Profits	2,496,451	2,648,402
	$3,542,669	$3,451,217
Less:		
Dividend	$1,920,000	$1,920,000
Bank premises	290,000	485,000
Rest account	......	......
Com. account	......	......
Patriotic fund	100,000	......
Total deduc.	$2,310,000	$2,405,000
Balance	$1,232,669	$1,046,217

Cash holdings equal to 19 per cent. of public liabilities, while quick assets were equal to 55.1 per cent.

Specie holdings on October 31st last were $15,452,810, an increase within the year of about $4,450,000; holdings of Dominion notes, $25,208,942, an increase of upwards of $14,000,000, while the deposit in the central gold reserve was $1,500,000. These three cash items foot up a total of $42,161,752, against direct liabilities to the public of $221,350,378.

Call loans abroad amount to $41,50[illegible],122, and $15,[illegible] is the total of balances due by banks and banking correspondents elsewhere than in Canada. Securities total $1[illegible],658,003.

Current loans and discounts in Canada and abroad, with a loan of $5,000,000 to the Dominion Government and $9,017,[illegible]24 to municipalities is $120,071,427. Only $5,756,003 of loans of this description are outside of Canada.

There was an increase of more than $10,000,000 in savings deposits, and a net gain in aggregate deposits of the public of close to $8,000,000.

OCTOBER BANK STATEMENT

The October bank statement shows that savings deposits had an increase of $1,405,000 in October and the demand deposits increased $4[illegible],000. Call loans elsewhere show that the banks were able to withdraw over $8,000,000 from New York, despite statements regarding their inability to do this. Current loans in Canada were less by $10,000,000. The note circulation of the banks increased by $3,378,000 in October. During the month the central gold reserve was increased by $2,050,000.

The principal items of the bank statement follow. The full statement with an analysis will appear in next week's issue of *The Monetary Times*.

	Oct 31, '14.		Changes during Oct., '14.		Changes during year ended Oct. 31, '14.

◆

CANADIAN COMPANIES MAY ESTABLISH IN AUSTRALIA

Several Canadian manufacturing firms may establish branch plants in Australia if the necessary raw materials and local conditions are favorable. The question of reciprocity between the two countries will probably be considered again by the governments concerned. These were two interesting statements made by Mr. Shoobridge, of Tasmania, in an interview with *The Monetary Times* this week. Mr. Shoobridge is making a tour of Canada and the United States on behalf of the Australian government, gathering data, with a view to having new industries started in the Commonwealth. He is particularly interested in the pulp and paper, aluminum, and certain chemical industries. Three companies operating in Canada will investigate the question of raw materials available, water power, sites, etc., and if inquiries result favorably, branch industries will be established in Australia. The companies are Price Brothers & Company, pulp and paper manufacturers, Quebec; the Northern Aluminum Company, manufacturing in Canada, but with head office at Pittsburgh; and the Canada Carbide Company.

Mr. Shoobridge was favorably impressed with the efficiency and modern methods of Canadian manufacturing plants, and in this direction he thinks that Canada is ahead of Australia.

When Sir George Foster visited Australia recently with a view to negotiating for better trade relations, the government had a majority of only one, which made practical discussion [illegible] impossible. The so-called labor party, which Mr. Shoobridge [illegible] there to what we know as progressives, [illegible] in power, with a substantial majority. While Premier Fisher would not commit himself on the matter, Mr. Shoobridge is of opinion that the question of reciprocal trade relations between Canada and Australia will be the subject of [illegible] negotiations.

Mr. Shoobridge thinks that Canada has borrowed quite [illegible] and would do well to follow the lead of Australia in paying for more things out of revenue. The cost of the Australian fleet, for instance, was borne in this way. The visitor from Tasmania also thinks that farmers [illegible] money cheaply enough, and that the [illegible] itself in producing more stuff.

NEW BRUNSWICK INVESTIGATION

Commission Makes Report—Premier Flemming Says He Will Fight Matter in Legislature

The report of the Royal Commission, which investigated charges made against Premier Flemming, of New Brunswick, has been made public. It is in two sections, the first dealing with the alleged extortion of money from the holders of Crown lands, and the second dealing with the charges in connection with the Valley Railway.

The Royal Commission finds in regard to the timber charges:—

That the $71,000 collected from the lumbermen after a conference between Messrs Flemming, E. R. Teed, of Woodstock, and W. H. Berry (chief lumber scaler for the province) was secured by extortion.

In the latter it was found that some sums of money were diverted and improperly charged, and that Mr. Flemming compelled one contractor to pay him $2,000.

Money Was Extorted.

The Commissioners say:—

"Having in view the testimony given by the different contributors, the only conclusion that seems possible to us is that the money was actually extorted."

As to the nature of the transaction, the Royal Commissioners say:—

"It is difficult to imagine anything more reprehensible or blameworthy than that an official of the department interested should present such a demand. To those dependent upon the renewal of their timber licenses it is not only an extortion of the most effective nature, but it appears the more harsh and cruel inasmuch as it is produced by one to whom it is unsafe to make protest, and for a purpose repugnant to many of the contributors."

Did Not Find Evidence.

The Commission does not find evidence actually to prove that Flemming personally directed the extortion. While the Commission says there is a great deal to support the view that Flemming could not possibly be in ignorance of Berry's activities and of the methods he employed, the Commission does not find such sufficiency of proof as would justify it in declaring that the personal direction of the extortion by Mr. Flemming was actually established.

The charges of Mr. Dugal in connection with the Valley Railway were, in the main, two—that a large amount of money intended for the construction of the railway was diverted from its proper channel, and that contractors under the St. John and Quebec Railway Company were compelled to pay, and did pay, large sums to members of the local Government in the year 1912. The Royal Commission finds that some sums of money were diverted and improperly charged; that many indefensible payments were made, and that Flemming compelled contractor Kennedy, to Kennedy and McDonald, to pay him $2,000.

Prudential Trust Company.

The Commission finds that $100,000 of the $350,000 borrowed by Gould and his associates from the Prudential Trust Company did not go into the railway, and must not be charged against the bonds. It finds that the Prudential Trust Company did nothing improper in any way. It finds that the ten per cent. which the construction company was getting from the railway company was an improper transaction. It is found improper that one Gould company should make a profit out of another Gould company, and that the profit should come out of the province of New Brunswick.

Premier Flemming states that the finding of the Royal Commission a cruel injustice, and that he will fight the matter out before the Legislature when it meets.

The Commissioners were Hon. H. A. McKeown, of the Supreme Court (chairman); W. Shives Fisher, merchant, of St. John, and Judge W. W. Wells, retired from the Bench.

◆

[illegible] about the inevitable [illegible] effective [illegible]

Where there is urgent need of relieving unemployment [illegible] sufficient market cannot be found [illegible] the [illegible] pulpwood, the O[illegible] government [illegible] next spring.

ADVANTAGES OF PRODUCTION

Markets for Lumber—What Okanagan Valley Shipped—Development of Overseas Trade

(Staff Correspondence.)

Vancouver, November 23rd.

That the forest branch of the provincial administration intends opening an office at Toronto to advertise the superiority and uses of the woods of British Columbia is an indication of the activity being displayed by governmental authorities to enlarge the business of the lumber mills of this province. Revenue from the lumber industry is an important factor of the provincial finances, and a systematic campaign is being enlarged to take advantage of every opportunity for greater trade. Permanent exhibitions of British Columbia woods have been installed at Toronto and St. John, N.B., a travelling exhibit has been sent to the prairie provinces, and small but complete sample lots of the principal woods have been sent to Dominion trade representatives throughout the world. The permanent exhibit at Vancouver is located in the forestry building at Exhibition Park. It was part of the exhibition this year, and even residents of the province were able to learn much by a study of what was on display. Not only was timber shown in the rough, but photographs showed the logging industry in every stage, and finished products were utilized in completed sections of model dwellings.

Development of Overseas Trade.

Shingles were also well displayed, principally the edge-grain article, which is in such favor wherever a high-grade shingle is required. Hemlock has been considered a low-grade secondary timber, perhaps because there is an abundance of fine fir and cedar on the Pacific coast. In the exhibit was a sample of its practical usefulness in interior finishing which was a revelation to many builders who had used wood all their lives. Hemlock is now being utilized to such an extent for pulp purposes that it is quoted at $7 a thousand feet in log form.

Reference might be made in connection with development of the timber trade to the statement recently forwarded to Sir George E. Foster, minister of trade and commerce, in respect to Canada getting preferential treatment in the markets of Australia. Time was when British Columbia supplied a much larger percentage of the timber imported into Australia than it now does, and in comparison it is pointed out that by reason of a ten per cent. rebate in South Africa the major portion of imported timber comes from British Columbia.

Figures of the fruit crop of the Okanagan district show that this year the output far exceeds previous returns. The increase of plums was 70 per cent., while three times as many crab apples were sent out. In apples, the increase was about 25 per cent. Small fruits and vegetables are also grown extensively in the Okanagan, and, with markets close at hand and easily reached, profit is attached to the industry. The Western Packers, Limited, put up 27,000 cases of fruit at its Penticton plant, as compared with a pack of 10,000 cases last year. The same company's plant at Kelowna packed 70,000 cases, tomatoes and apples forming the larger portion. At Penticton, over 700 tons of peaches, apricots and plums were handled.

The Vernon Fruit Union shipped out over 50,000 boxes of apples, about 350 carloads of other and small fruits and 40 carloads of vegetables and hay, although these figures are not complete. It is estimated that independent dealers sent out 140 carloads of fruit and produce. Okanagan Landing reports having handled over 600 cars of fruit and vegetables since June [illegible]th; Armstrong, five cars of apples and 350 cars of mixed fruit and vegetables, eight cars of hay, six cars of wheat and two or three tons of celery shipped out by express; Enderby shipped for reshipment 24¾ tons of apples, 3 cars of potatoes and [illegible] cars of hay.

Washington brewery interests have been looking for a site in Vancouver, and the announcement that they may build here has brought forth a protest from the reform element, who contend that no more breweries are needed in British Columbia. Persons now brewing in Seattle have had considerable trade in British Columbia and if they are closed through prohibition [illegible] it will mean increased business for the [illegible] brewing in Vancouver. Even since the tax [illegible] imposed at the beginning of the war [illegible] noticed by local concerns.

November 24—Store of Edw. Wallis, 1282A Queen Street W., owned by J. J. Ward. Cause, defective stovepipe. Loss, $50.

◆

Some men's confidence seems to ebb and flow with the times.

If everyone who can will pay his debts, things would be easier.

Britain's Attorney-General, Sir John A. Simon, introduced in the House of Commons an amendment to the act covering trading with the enemy. He said his aim was to stop the transmission of money or credits which would be advantageous to the enemy. Everybody holding property in Britain, such as dividends, profits, etc., belonging to enemies of the Empire in Germany, Austria and Turkey, would henceforth be required, under penalty, to pay these profits to a public trustee. The Attorney-General explained that indiscriminate confiscation was not intended. "We are preserving the property [illegible] until the end of the war," he said. "[illegible] at the end of the war can very properly be decided then." The Bundesrath has adopted a measure prohibiting dealings in securities stamped in England.

A SAFE INVESTMENT

The safest and most profitable investment you can make is to purchase a copy of

MURRAY'S INTEREST TABLES

at a cost of $10.00.

By means of it you can see the interest due on your investments.

These tables are from 2½% to 8% from 1 day to 368 on sums from $1.00 to $10,000

(Prepared for the Victoria League)

By SIR EDWARD COOK

III.

The foregoing résumé shows how persistently Sir Edward Grey had worked for peace. What he deliberately abstained from doing, no less than what he did, was governed by a desire for peace. At an early stage in the negotiations, the British government was urged both by France and by Russia to make an immediate declaration of complete solidarity with them (July 24). The President of the French Republic repeated the request very strongly on July 30. Sir Edward Grey thought that he was more likely to be useful as peacemaker if this country maintained as long as possible an attitude of detachment. Moreover, the government had no desire to intervene unless the honor and interests of the country made it unavoidable. At the same time intimations were given that it should not be assumed that under all conceivable circumstances England would stand aside.

The official documents thus show how unremitting were the efforts made by Sir Edward Grey to maintain the peace of Europe and by whom those efforts were frustrated.

They show also how slow the British government was to commit Britain to any share in the war. That she ultimately became involved was due to causes which had nothing to do with the Balkans.

The German Proposal to England.

The decisive day was the 29th of July, 1914. On that day the German chancellor, who had just returned from the Emperor at Potsdam, sent for Sir E. Goschen, the British ambassador at Berlin, and had a conversation with him which will always be memorable in history. The chancellor's words revealed that Germany was preparing to attack France through Belgium, and he proceeded to propose a bargain whereby Germany was to secure the neutrality of England in the impending war. The terms of this proposed bargain were these: (1) First, England was to stand aside while France was crushed, on the understanding that Germany "aimed at no territorial acquisitions at the expense of France." Sir E. Goschen "questioned his excellency about the French colonies, and he said that he was unable to give a similar undertaking in that respect." England was, behind the back of France, to be a consenting party to Germany's acquisition of the French colonies, should France be defeated in the war. (2) Secondly, England, behind the back of Belgium, was to consent to Germany's violation of the neutrality of that country, a neutrality which both Germany and England had pledged themselves by treaty to respect. In return Germany gave a promise that "when the war was over Belgian integrity would be respected if she had not sided against Germany." "The promise was given, be it observed—I am sorry to have to say it, but it must be placed on record—by a power which was at this very moment announcing its intention to violate its own treaty obligations and inviting us to do the same." (Mr. Asquith.) (3) Lastly, the bargains above described were to form the basis of good relations between England and Germany.

This "infamous proposal" might, said the Prime Minister, "have been thrown aside without consideration and almost without an answer"; but in the interests of peace, as already explained, the British government answered it in language of restraint.

Could not Entertain Proposals.

"His Majesty's government cannot for a moment entertain the chancellor's proposal that they should bind themselves to neutrality on such terms. What he asks us in effect is to stand by while French colonies are taken and France is beaten so long as Germany does not take French territory as distinct from the colonies. From the material point of view such a proposal is unacceptable, for France, without further territory in Europe being taken from her, could be so crushed as to lose her position as a great power and become subordinate to German policy. Altogether apart from that, it would be a disgrace for us to make this bargain with Germany at the expense of France, a disgrace from which the good name of this country would never recover. The chancellor also in effect asks us to bargain away whatever obligation or interest we have as regards the neutrality of Belgium. We could not entertain that bargain either." Sir Edward Grey went on, as already stated, to suggest other terms on which good relations between England and Germany might be secured.

The historic interview between the German chancellor and the British ambassador, and the British government's reply to the chancellor's proposal, show how Britain was driven to take part in the war by honor, by obligation and by the interests of self-defence. The case falls under two heads—France and Belgium, with which we will deal in turn. In the case of our relation to France, there was the call of honor and self-interest, but no direct obligation; in that of our relation to Belgium, honor, obligation and self-defence all combined.

The Case of France.

In 1904, the Conservative government concluded an agreement with France, settling all outstanding questions between her and this country. In 1907, the Liberal government concluded a similar agreement with Russia. What is called the "Triple Entente" thus grew up between England, France and Russia. It was often regarded as a balance against the "Triple Alliance" (Austria, Germany and Italy). But so far as England was concerned, it was a friendly relationship, not a formal alliance. Except in the specific matters dealt with by the two agreements, England was under no obligation to support either France or Russia. In 1906, when Germany was giving trouble to France on account of Morocco, Sir Edward Grey expressed the personal view to the French government that if war were forced upon France in consequence of the Anglo-French agreement, public opinion in this country would favor the giving of material as well as diplomatic support. In 1908, when the annexation of Bosnia and Herzegovina by Austria caused an international crisis (Russia protesting against the annexation and Germany "in shining armour" supporting her Austrian ally), Sir Edward Grey told the Russian government that this being a Balkan affair, in which England had no direct interest or concern, nothing more than diplomatic support would be given by her. Thus each case was left to be decided on its own merits.

What, then, was the case as it existed in the critical days at the end of July and beginning of August? France, having no longer anything to fear from England, had concentrated her fleet in the Mediterranean. Her northern coasts were unprotected. Sir Edward Grey's opinion was, "that if a foreign fleet, engaged in a war which France had not sought and in which she had not been the aggressor, came down the English Channel and bombarded and battered the unprotected coasts of France," we could not honorably "stand aside and see this going on practically within sight of our eyes, with our arms folded."

British interests pointed in the same direction. If England had declared her intention of remaining neutral, France might have withdrawn her fleet from the Mediterranean; and as we do not now keep a fleet there strong enough to deal alone with possible combinations, our trade-routes and inter-Imperial communications through that sea would have been in danger.

Accordingly, on August 3, Sir Edward Grey was authorized by the cabinet to give an assurance to France "that if the German fleet comes into the Channel or through the North Sea to undertake hostile operations against French coasts or shipping, the British fleet will give all the protection in its power."

This was not a declaration of war, but a contingent obligation to make war. The further and final decision was caused by the action of Germany towards Belgium.

(To be continued.)

LOAN COMPANY'S DEPOSITS TO BANKS

British Columbia Permanent Loan Company, Vancouver, Asks Banks to Take Care of Deposits

As announced exclusively in *The Monetary Times* last week, the deposits of the British Columbia Permanent Loan Company, Vancouver and Victoria, have been handed by the company to the local banks to safeguard the interests of the depositors. For some time conditions in Vancouver and Victoria, the only points at which this company operates offices and takes deposits, have been uncertain and peculiar. At the latter place particularly, there has been frequent talk of the possibility of a visit from the German warships, which have been known to be present somewhere on the Pacific. These vessels have even been reported to be in the vicinity of Vancouver Island.

Rumors of the German visit coupled with the depressed industrial conditions brought about rather heavy calls on all financial institutions and the directors of the British Columbia Permanent Loan Company deemed it advisable to secure the funds necessary to meet all deposits should the calls become pressing.

Bond Issue was Secured.

When the Dominion Trust Company closed its doors, the situation became more tense and after giving the matter of deposits full consideration, the directors of the British Columbia Permanent Loan Company, decided to close entirely that department of the company's business.

A bond issue secured on the strength of the company's mortgage assets was immediately decided upon and the necessary funds were, by this method, secured through the Vancouver subsection of the Canadian Bankers' Association, after that body apparently had satisfied themselves as to the absolute solvency and worthiness of the institution and had obtained the necessary consent from the parent body.

On November 7th the accounts were transferred to the banks in equal ratio to the amount of the bonds for which they subscribed and the various depositors were immediately advised that such a change had taken place.

Depositors Approved Action.

The company paid interest to the date of transfer and has since been the recipient of many expressions of appreciation both verbal and written. The depositors thoroughly approved of the company's action.

The following is a copy of the letter which was sent to the depositors on November 9th:—

"The directors of the British Columbia Permanent Loan Company have always taken all necessary precautions to ensure the safety of the funds entrusted to the company, and owing to the peculiar conditions brought about by the war, the failure of certain trust companies and other causes, they have deemed it wise to provide enough money to satisfy every dollar on deposit and to close out this department of the company's business.

Might Call for Money.

"An arrangement was entered into with several chartered banks to take over the money and the accounts, and on Saturday last, the transfer was made. Your account showing a credit balance of $——, which includes interest right up to date, has been transferred to the —— bank. The bank will offer you every facility for continuing the account in the form you have been used to, and you can either wait upon the bank direct to get your book changed, or we shall be glad to do so for you.

"We regret very much that conditions have made this change in our business necessary, but you can well understand how, with a great part of our funds invested in first mortgages on homes, the payments upon which extend over a period of years, we could not, with safety, invest the money to your credit because you might call for it any day. We believe that our action is a wise one, both for you and for the company, and would take this opportunity of thanking you for your confidence. The other departments of our business will be conducted as usual and our time and advice is still at your disposal."

The company's monthly loan collections of principal and interest for the month of October, amount to $52,500, a fact which goes to prove that care has been exercised in selecting the company's mortgage investments.

CANADIAN BANKS TAKE BRITISH LOAN

About £1,000,000 was Applied for by Our Banks—Notes of the Biggest Loan on Record

The British war loan of £350,000,000 was subscribed to the extent of £[illegible]. A Central News cable says that when the lists opened on Wednesday last week, there was a rush to subscribe. The loan, which will bear interest at 3½ per cent., will be redeemable at par on March 1, 1928. One firm guaranteed the subscription of £100,000,000.

The subscription lists were kept open until Tuesday, November 24th. This is contrary to the usual custom of closing the books as soon as the amount is covered.

Bankers look upon the loan as an excellent investment. Some bankers expressed the opinion that another loan will be put out in April.

For three years the Bank of England is prepared to lend 1 per cent. below the bank rate on the loan without additional security. Instalments of the loan are to be paid bi-monthly to the end of April.

The borrowing facilities arranged at the Bank of England will help the issue and the spreading of payments by easy instalments should add to the popularity to the loan with small investors.

To meet the great public demand the Treasury has arranged that application forms shall be obtainable not only at every bank throughout the United Kingdom, but through all post offices where money is issued.

Royal Family Subscribed.

Subscriptions were received from the King and from the man in the street. The British war loan was heavily subscribed to by the Royal Family. Lord Revelstoke, on behalf of the Prince of Wales, tendered for £500,000 of stock. The King, through the same channel, applied for one million, but it is understood a quarter of this stock is intended for the Queen of Spain, another quarter for ex-Empress Eugenie. Princess Henry of Battenberg is taking £160,000. Bankers, with German connections between them, applied for £6,000,000.

Canadian banks took a block of the loan, about £1,000,000. At a meeting of the Canadian Bankers' Association held at Toronto last week, the members expressed their unanimous desire to participate in the British war loan. The Bank of Montreal is understood to have taken £250,000 sterling, the Bank of Commerce £100,000 sterling, the Bank of Nova Scotia £100,000 sterling and the remaining banking institutions proportionate amounts. This is the first time in history that a London loan has been subscribed in Canada. Similar subscriptions were made by Australia and South Africa. "There was absolutely no necessity for Canadian banks taking any part in the loan," stated general manager Laird of the Canadian Bank of Commerce, in an interview, "but we felt that it would be a mark of patriotism to apply for the privilege. The British banks have already come forward with offers of many million pounds in excess of call, so our little offerings would hardly be noticed. No one would expect Canadian banks to have great amounts to spare just now, but it was the principle which we wished to emphasize."

On account of the heavy over-subscription of the loan, the Canadian banks may be allotted about half their subscriptions.

Triumph for Finance.

The London Daily Chronicle's financial expert says:—"This subscription of the loan is a triumph for finance, as great as any military victory that can be gained on the battlefield. It would be quite easy to close the lists at once, for the money required has been more than obtained, but the government desires to give every opportunity to the smaller investor, who is generally rather late in making application."

"The government war loan, the largest ever made in history, is popular," stated Mr. G. C. Cassels, manager of the Bank of Montreal, in London, "because it meets the requirements of the three important classes of investors—first, Lombard Street, representing the discount market and the professional investor; second, the trustee who does not want to be required to reinvest quickly, and, third, the general investor. In addition, the government has arranged the facility of ready borrowing from the Bank of England on it. In all probability, the loan will be over-subscribed."

LIFE SAVING AS INSURANCE FUNCTION

Experience of a Company Points to Benefits for Policyholders and Companies

Thoroughly examine the human body at least once a year. With the knowledge thus gained, it is possible for medical science, and the new-born science of personal hygiene, not only to check the progress of disease, but to lead those of average health up to higher planes of physical efficiency and well being. It is not enough to keep people out of sick beds. The general level of fitness and capacity for living long and living well must be raised, suggested Dr. E. L. Fisk, director of hygiene of the Life Extension Institute in a striking address before the members of the Toronto Insurance Institute at a recent meeting.

But why should this be a function of life insurance?

First, because a life insurance company has a direct business interest in reducing mortality, if it can be done at a cost that will leave a safe margin of profit.

Second, a life insurance company has available the channels through which it can readily and effectively reach a vast body of people. There are six million old-line policyholders in the United States, each with his zone of influence.

Third, because the successful performance of this function would just about double the value and meaning of life insurance as a social institution.

Learned From Results.

In 1909, the Provident Savings Life Assurance Society extended this privilege of yearly examination to its policyholders. This work was continued by the Postal Life, after its re-insurance of the Provident's risks. A four years' experience, showing the results of this system, has been exhibited in a number of public addresses, and more recently in a paper by Mr. C. W. Jackson, read before the Actuarial Society of America.

Approximately 2,500 people were examined, 1,000 of whom were found sufficiently impaired to require medical treatment or advice. The average age of the impaired risks was 51, and the average duration of the policies 12 years, while the actual mortality as compared to the expected by the American table was only 9; per cent.

By valuing each of these impaired lives according to such knowledge as we possess of sub-standard mortality, and expected mortality of 200 per cent. was predicated.

From these figures we derive the following presentation of the probable savings resulting from the application of the service supplied by the Institute to 100,000 policyholders.

Expected mortality in sub standard group, allowing for impairments	Gross annual savings per $1 of expense for entire service.
Estimated at 200	$12.90
" " 150	6.80
" " 125	3.70

Saving to Companies.

Approximately 5 per cent. of the 100,000 policyholders to whom the privilege is offered will actually take the examination annually. The annual cost of these examinations and the saving on the impaired group only, using the Provident Savings Postal experience, and the Institute's charge for this service ($3 per examination), as a basis, will be as follows:—

Expected mortality in the sub standard group allowing for impairments	Annual expense.	Gross annual savings per $1 of expense	Net annual savings.
Estimated at 200	$15,000	$12.90	$178,500
" " 150	15,000	6.80	87,000
" " 125	15,000	3.70	40,500

This does not include the favorable mortality influence on the non-impaired group, nor on the entire body of policyholders receiving the service, many of whom will go to their own doctors; nor does it take into account the value of the service as a goodwill producer.

By the introduction of conservation methods into a company, the [illegible] mortality of those coming under this influence may be permanently lowered, just as the mortality in a community may be permanently lowered by the establishment of a filter plant.

AFTER THE NATIONAL MERCANTILE COMPANY

According to a dispatch from Seattle to the Vancouver press, George E. Stillings, president of the National Mercantile Company, Limited, of Vancouver and nine other defendants, were named in two secret indictments returned by the federal grand jury, on October 28, and made public recently, charging the defendants with conducting a lottery, obtaining money under false pretences and using the mails to defraud.

The men indicted with Stillings were Charles Merrill, Seattle agent of the National Mercantile Company, Limited; Orlando K. Fitzsimmons, of Vancouver, B.C.; R. C. Oeder, Tacoma; John Doe Fenelon, Aberdeen, Wash.; A. D. Baker, Portland, Ore.; C. H. Nellist, Vancouver, B.C.; John H. Sears, H. P. Sage and C. O. Smith. The last three were said to have been employed by Stillings. The government alleges that the men obtained large sums of money by means of a fraudulent loan scheme.

The company has its headquarters in Vancouver.

◆

FOR THOSE WITHOUT LIFE INSURANCE

Why should a man insure his life? Because it strengthens a man's credit; it is a will that no lawyer can break; it provides for a man in his old age; it enables the widow to educate the children; it is the safest investment known among men; it creates for the poor man an immediate estate; less than ten men in a hundred leave any estate at death; the policy is a certificate of health for the man about to marry; it will enable the widow to pay off the mortgage on the farm or the home; it will continue one's income after his death for the need of those who remain.

These sound reasons are given by the journal of the Canada Life Company, Canada Life Echoes, which further says, if the policy is properly written, it is exempt from the claims of creditors. It gives the business man good standing with his banker and the business world. It provides for his family when, after death, he can no longer care for their wants. Systematic in its methods, it affords the surest and easiest way to save money. Most men at death leave no estate for wife and children other than their life insurance. A life policy in a sound company is the best present the young husband can give his bride. If one is rich, he can afford to carry life insurance: if he is poor, he cannot afford to be without it. The dead have no further need of bread; but the living, who are left behind, will need three meals a day. It is the one thing that a man can certainly buy to-day for less money than will be required a year hence. When a man dies, some of his investments will be sold at a loss. The life policy is virtually cash in bank. In these days of high prices, life insurance is perhaps the only thing that costs less than it did a generation ago. It is an investment that increases in value yearly; there is no uncertainty, no depreciation, no possibility of loss. All normal, successful men carry life insurance; the man who is not insured in some amount is a curiosity, a freak. Life insurance places a man's own future welfare and the welfare of his wife and children upon shoulders stronger than his own. It enables the remaining members of a firm to buy the interest of the deceased partner without delay or detriment to the business. It brings peace of mind to the man who loves his wife and children; for he knows that whatever may happen, they are provided for. Life insurance means ready cash for the widow of the well-to-do man, whose funds would otherwise be tied up in the settlement of the estate. Through life insurance a man can create an immediate estate for the cost of one cigar (or a [illegible] the cost of one street car fare) a day. Bonds and [illegible] fluctuate in value; mortgages may fail through defective title or insufficient security; there is no shrinkage in the value of a life insurance policy.

DEVELOP SASKATCHEWAN'S FARMING

Agriculture is Cornerstone of Successful Province Building Lessons of the Past

There is no legitimate reason for apprehension or misgivings as to the ultimate outlook of the western provinces, so writes Mr. J. S. Carmichael, financial broker, of Saskatoon, to *The Monetary Times*. An adjusting process was bound in the ordinary course to ensue, not only from too rapid exploitation, but quite as much from the indirect causes inevitably associated with the conditions which have so far prevailed. To distinguish between what may be termed the effervescent and permanent phases of development was not easy at certain stages, but in the aftermath, this is self-evident even to the casual observer. To ask certain real estate operators to capitalize their deals was making use of a language either unknown or studiously avoided. Studied relation to intrinsic worth was a lost art. It would have saved many pitfalls alike to communities and to individuals. The then immediate concern was the difference between the buying and selling price or the net profit to them along with other side issues of commission, which were looked upon as dūe reward. The wider issues as affecting the general well-being of the city or town or province or the heavy burdens thus created were considered of no import. So long as a willing buyer and willing seller were prepared to consummate a deal, all else was quite beside the mark. That naturally percolated through more channels than one.

Fight Money's Effects.

Money easily made has many followers in its wake. The spending proclivities of individuals and municipalities were bound to receive a check sooner or later and long before the war broke out, influences were at work which changed the entire aspect of the situation. Money was not easy to obtain and what are termed equity holders were obliged to have recourse to different methods to safeguard their interests. Some were more fortunate than others.

Lenders on the whole have behaved well and there are few reputable financial institutions which refused to give due consideration to the representations of well-intentioned borrowers of former good standing, though temporarily embarrassed. There may be some isolated exceptions.

Land Development is Necessary.

Saskatchewan is essentially a farming province and its permanent development can only be achieved along sound farming lines which now require some adjustment. An exclusive growing of one product or undue prominence thereto will never accomplish that nor will other than the farmer with grit coupled with actual equipment in the form of experience and what is known as stickability, make of himself or his land the needed asset.

Farm lands will be the first to appreciate in values, and that important phase of the situation is being sedulously cultivated by some and their labors are already meeting with a fair commensurate return judging by enquiries now being received. Lands tributary to large or important centres settled with the right class of cultivator will in themselves furnish the demand for commodities which these centres ought and must supply. Thus and thus only will an important problem be solved—viz., the building up of towns and cities on a sure and progressive foundation. To introduce factories before that stage is reached, not only impedes natural development, but throws normal progress behind for years. Yet the reverse of that policy has been followed, and it is only now finding favor in certain quarters which should have known better.

Speculators in farm lands whose interest is temporary and restricted to profits on values exclusively can be made much less in number and power, if provincial assemblies will address themselves to the question. They have the means at hand.

The legitimate farmer has in front of him, so far as present portents run, conditions for marketing his crop which will place the prairie provinces on a sound basis if nothing else did. The European war will not be an unmixed evil for the farmer in probably enhanced values for their products for some time to come.

IS POLE SUPPLY BEING EXHAUSTED?

Twelve Per Cent. Used by Large Purchasers Were Imported

That Canadian railway and public utility companies, during nineteen thirteen, had to pay more for the poles used in their operations, and that the supply of the species chiefly used at present for poles, eastern white cedar, is visibly decreasing, is indicated by Mr. R. G. Lewis, B.Sc.F., of the forestry branch, in his latest report, which states: the consumption of wooden poles in Canada varies greatly from year to year. There was a decrease of about 30 per cent. in the numbers purchased from 1910 to 1911, an increase of 5.9 per cent. from 1911 to 1912, and a decrease of 12.2 per cent. from 1912 to 1913. Eastern white cedar still heads the list, as it always has done in the past. The supply of good eastern white cedar poles, however, is visibly decreasing, as is demonstrated by the fact that at least 20 per cent. of the poles purchased in 1913 were imported from the United States. The western species of red cedar is more abundant, and is now taking the place of the eastern species, especially in the greater length-classes Poles of this wood are used extensively in the western provinces, and more particularly in British Columbia, where this tree grows. In the prairie provinces the poles are about half of the eastern species and half of the western. Of the red cedar poles purchased in 1913, over 8 per cent were imported from the Pacific States, and were classed as "Idaho red cedar," although these are of the same species as those obtained from British Columbia.

Twelve Per Cent. Were Imported.

Out of a total of 534,592 poles used by 424 pole purchasers in Canada in 1913, viz., 218 telephone companies, 155 electric light and power concerns, 29 electric railways, 18 steam railways and 4 telegraph companies, 12.1 per cent. were reported as having been imported from the United States in 1913.

While the total number was a decrease from 1912 to 1913, the total value, $1,188,331, showed an increase of 6.7 per cent., caused by an increase in the average price amounting to $0.39.

Telephone and telegraph companies and railway companies operating telephone and telegraph lines used 87.8 per cent of all the poles purchased in Canada in 1913. This is a decrease in numbers of 14.6 per cent., and an increase in value of 0.3 per cent., the average value to these companies increasing by $8.26.

All the jack pine, balsam fir, white pine, chestnut and ash poles were purchased by companies of this class.

The electric railway, power and light companies' purchases formed only 12.2 per cent. of the total, but these poles cost on an average $3.68 more than those purchased by the telephone and telegraph companies.

The total number was an increase of 10.3 per cent. over 1912; while the average price was an increase of $0.66. These companies imported over 5 per cent. of the poles they used in 1913. They purchased all the cypress poles imported into Canada during that year, and also all the western larch poles from British Columbia.

The average prices given for certain kinds of poles which have been purchased in small quantities cannot be considered as indicative of the intrinsic value of that particular wood for pole purposes, or even as a fair gauge of its market value, as these individual prices are affected by so many outside conditions, such as cost of transportation, size, etc.

Mostly Less than Twenty-five.

The greater part of the poles purchased in 1913 were less than 25 feet in length, and of this class the two cedar species and eastern tamarack together formed over 97 per cent. All the chestnut and ash poles were of this length, and the eastern tamarack poles were more numerous in this class than those of western red cedar, which is only true for this length class.

In the [illegible]-foot class the two cedars formed together [illegible] per cent. and tamarack poles became of little relative importance. While the cedar species still formed by far the greater part of the poles in the 31-to-35-foot class, poles of spruce became more important, and cypress poles appeared for the first time. White pine and western larch poles appeared in the [illegible]-foot class, and here red cedar became more important than white, which is not the case with the [illegible] length poles. In the class of poles over 40 feet in length, red cedar formed over two-thirds of the total.

Guaranteed Investments

An investment, promising a satisfactory interest return, and guaranteed by an institution of 32 years' standing, and with a Paid-up Capital of $1,500,000 and Reserve of $1,500,000, should interest Investors. There are features of this investment offer that make it worth your further investigation.

Why Burden Your Friend?

THE duties of an executor or trustee are exacting, tedious, and difficult. No matter how willing and competent your relations and friends may be, your consideration for them should prevent you from involving them in the troublesome processes such administration requires. A trust company offers financial responsibility, executive permanence, and constant attention to your concerns. It surpasses any personal executor in administrative effectiveness.

LOAN COMPANIES AND DEBENTURE RENEWALS

War Has Failed to Shake Confidence of Investors—Life Companies Called for Funds

The loan companies of Ontario are pleased with the way in which their sterling debentures held in Great Britain, and maturing about the middle of November, were renewed. These renewals, taking the companies as a group, averaged about 80 per cent. of the maturities. In some cases, the percentage of sterling debenture money retained this term was as high as 90 per cent. Under prevailing conditions, this is a remarkably good showing. The loan companies in Ontario have every reason to be pleased with the evidence given by British investors of the high estimate in which loan companies' debentures are held. Besides renewals, a very satisfactory amount of new money was obtained.

Those companies having currency debentures also met with success. In one case, 84 per cent. of the amount was renewed and 14 per cent. paid, while some new money was obtained.

The debentures held by life insurance companies have mostly had to be paid by the loan companies, on account of the provision the life companies are making for war risks. One company, for instance, had a considerable amount due to two life insurance companies, who were naturally anxious to augment their cash reserves. The payments to these two life companies accounted for half of the total repayments of the loan company to Scottish holders.

The above facts and figures have been gleaned by *The Monetary Times* through an inquiry among the loan companies. In view of the unsettled conditions due to industrial depression and to the war, the results of the companies' operations among investors have been very gratifying. The following are the replies received from some of the companies.

London and Canadian Loan and Agency Company.—We are advised by cable that almost all our sterling debentures were renewed maturing on November 11th, and in Canada we had not any debentures maturing.

Toronto Savings and Loan Company.—About 90 per cent. of our sterling debentures falling due in November were renewed. We are not in a position as yet to state what percentage of our Canadian debentures will be renewed, as they do not mature until January 1st next.

Toronto Mortgage Company.—Our British debentures mature in May and November, and our Canadian ones in February and August. The result of the November term in Scotland has surpassed our expectations. Including new money, we have retained 90 per cent. of our maturities, all at 4½ per cent., as per advices from Edinburgh up to November 23rd.

Dominion Permanent Loan Company.—We have no debentures in Great Britain except those sold here to parties moving there. The only one there, expiring since the war began, is renewed. In Canada our renewals have been practically on the same percentage as before the war, and all the withdrawals have been accounted for by death of the owners or the necessity of the money to pay off mortgages or to build houses.

Huron and Erie Loan and Savings Company.—While we have not as yet received advice from our Scottish agents as to the decision of all holders of maturing debentures regarding the renewal thereof, we have, of course, heard from the greater part, and the results are entirely satisfactory. We, of course, did not receive as large a volume of new money as in normal times, but, as before stated, we are quite satisfied with the results, not only as regards new money but as regards renewals.

Standard Reliance Mortgage Corporation.—Since the opening of the war we have had no debentures at all come due in Great Britain; in fact, it is only quite recently that any [illegible] debentures have been placed over there at all.

With respect to our Canadian debentures, we have them coming due on certain fixed quarterly days, namely, first of March, June, September and December, and the renewals and new debentures are issued as at the last quarterly day [illegible] withdrawals.

Our next quarterly date will be December 1st, and the [illegible] point to a repetition of September [illegible].

Canada Permanent Mortgage Corporation.—The currency debentures due in October amounted to $150,000, 84 per cent. of the amount was renewed, 14 per cent. paid, and we have still to hear from [illegible] per cent. In addition, we obtained new money for a little over $[illegible],000.

As to the sterling debentures, our cables show that out of a little over £200,000, due on the 11th of November, the following results have been obtained: Renewed, £140,000; called up, £54,000; not yet advised, £8,000; new money, £30,000. The new money mentioned above covers only the new money obtained in connection with the term days, and does not include the amounts we have received from time to time throughout the year.

◆

NEWS OF THE LIFE UNDERWRITERS

The second number of the Life Underwriters' News contains an extensive account of the association's successful convention at Halifax in August, and is worthy of the attention of all engaged in the life insurance profession. The convention issue of the journal is an excellent production.

◆

LIFE INSURANCE COMPANIES WILL FIGHT

The life insurance companies do not seek to avoid their fair share of responsibility in the matter of governmental taxation, but desire to protest against the burden imposed upon them in some of the provinces, which they regard as excessive and relatively much greater than that imposed upon other classes of corporations. Life insurance, by protecting the home and the family is safe-guarding the best interests of the country, and relieving it from the possible burden by caring for those who may be unable to support themselves in the event of the death of the breadwinner.

That sums up the opinion of the life insurance interests represented at the annual meeting of the Canadian Life Insurance Officers' Association, held at Toronto last week. Representatives were present from 23 Canadian, British and United States companies, operating in Canada. The result of the conference was a unanimous feeling against life insurance taxation.

The Life Managers' Association have questioned the constitutionality of the tax laws, and have secured opinions from several eminent legal counsel expressing the opinion that the tax is unconstitutional. It is, therefore, proposed to test the constitutionality of the tax and counsel has been retained. The newly-elected officers of the association are:—President, T. B. Macaulay, managing director, Sun Life Assurance Company; first vice-president, Alex. Bissett, manager for Canada, London and Lancashire Life; second vice-president, Col. W. C. Macdonald, managing director, Confederation Life; honorary secretary-treasurer, D. E. Kilgour, actuary, North American Life Insurance Company; assistant secretary-treasurer, W. G. Reburn, Imperial Life Assurance Company; auditors, J. F. Weston, managing director, Imperial Life Assurance Company, G. B. Woods, president and general manager, Continental Life Insurance Company; executive committee, foregoing officers, Geo. Wegenast (managing director, Mutual Life Assurance Company), J. E. Kavanagh (Metropolitan Life), J. F. Weston (Imperial Life), H. C. Cox (president and general manager, Canada Life Assurance Company) and A. R. Howell (manager for Canada, Gresham Life).

SUBDIVISIONS AND ASSESSMENTS

Problems Left by Land Pirates—No Difficulty With Legitimate Homesites

"Western Canada's Subdivision Curse" was the caption of an article written by *The Monetary Times* investigator, on his return some two years ago from a tour through that country of promise and progress. His comment was: "The worst feature is the sale of outside subdivisions. This consists of the purchase by promoters of farm or waste lands at a few hundred dollars per acre and the sale on the strength of imaginative literature, at so much per city lot." A pointed corollary to this statement is given in the recent issue of Saskatchewan's Public Service Monthly, which says: Since the inauguration of Saskatchewan as a province, there has been a constant and increasing stream of immigration, attracted by free homestead and pre-emption land and the cheap and productive lands held for sale. This has resulted in an increase of population within the province from 150,000 to about 700,000 in the last nine years.

Necessarily there has grown up a large number of urban communities some of which are taking on all the earmarks of cities with all city facilities, such as street cars, water, sewerage and electric light systems, paved streets, etc.

Along with this stream of immigration, in order to develop the country and make it suitable for the maintenance of such a population, a flow of capital was necessary, and accordingly capital has been attracted and investors have placed large sums of money at the disposal of those engaged in such development.

All this development resulted in a rapid increase in the value of real property, both farm lands and urban property, and a large proportion of the population, if not actually engaged in dealing in real estate, were interested in some way in an endeavor to take advantage of the situation. The expansion covered so long a period and the demands for facilities to do the business of the country were so great in many of the urban centres that the values of real property in these centres were inflated beyond what was warranted by actual conditions, being based more or less on prospective conditions, and surrounding many of these urban centres the land has been subdivided into lots and placed on the market at prices that took into consideration fully this prospective growth.

Were Drug on Market.

As long as the rapid expansion of these towns and cities continued with the corresponding flow of capital there is no doubt that these unimproved lots had a certain added value, due to the possibility of their being required for building purposes, which was marketable, and the shorter the time appeared until they would be included in the built up areas of the cities or the greater the expansion the more nearly they were valued at what they should be if considered as improved city property.

The financial stringency of the last year, the diminution in the flow of immigration and the consequent cessation in expansion and flow of capital on which the added value was based has left these lots a drug on the market, so that now there are large numbers of unimproved subdivisions around the towns and cities that were most prosperous, which are not needed and which there is every indication will not be needed for years for building purposes. As the values of these lots are based to a large extent on the rate of expansion, these values inherently must fluctuate between what they are worth simply as farm lands and what they are worth as improved city property, as the population of a city is stationary or is expanding, as it has done during a few years past.

Many of those holding interests in these subdivisions are considering them to be worth the money that has been paid for them in past times, but there is no market for them at these prices and they are being held in the hope that an expansion and flow of capital as in the past will take place again within a reasonable time.

What the Government Supervised.

The subdividing of townsites and placing them on the market has been controlled to the extent that seemed advisable by the government from time to time. The width of streets and the connections with the public road allowances surrounding, also the sizes of lots and numbers in the blocks and the lanes provided at the rear of lots, were subject to legislation or approval of the public works department. Later plans were required to show contour lines, sloughs, etc., to show that the land was suitable for townsite purposes before it could be registered, and, latterly, in addition to all this, a contribution to the public funds had to be made by the owner in subdividing before he could have the subdivision registered and be in a position to give transfers of titles to lots he had sold. There is no doubt but these measures checked the placing of many unwarranted subdivisions on the market that were contemplated a couple of years ago, but the financial stringency of the last year or so and the European war have brought about conditions in connection with many of these subdivisions which are untenable.

The different subdivisions may be classified as follows:—

1. Those that have been registered, nearly all sold in small parcels and partly developed or built upon.
2. Those that have been registered, nearly all sold but not developed or built upon.
3. Those that have been registered but very few lots sold, and substantially still in the hands of the original owner entirely undeveloped.
4. Those that have not been registered but a few lots sold and held under agreement of sale and no titles given, and entirely undeveloped.

May Be's or Has Been's.

Class 1 has come to be part of the cities or towns and the subdividing was well warranted, and no particular difficulty exists in connection with their taxation or other conditions.

There are many subdivisions in class 2 and 3 which have come to be really simply farm lands, although on account of transfers and agreements of sale they cannot be used as such. Local authorities have been assessing them as lots at inflated values based on sales made a couple of years ago, whereas no such values exist, or when in rural municipalities, at a fixed sum per lot, which results in an excessive taxation out of all proportion to the present value.

It is practically impossible to effect any arrangement whereby subdivisions in class 2 can be used as farm lands, although in some cases they might develop market gardening or truck farming. Assessments should be revised to accord with these conditions. In the case of class 3 it should be possible to effect an arrangement whereby they could be used for farm purposes and the assessment should be revised to suit this condition.

Cannot be Assessed as Lots.

It has been well established by a number of decisions of the courts that subdivisions in class 4 cannot be assessed as lots, but must be dealt with as acreage, and there should be no difficulty in dealing with the assessment of such subdivisions, although in some cases a revision should be made. It should be quite possible to effect an arrangement whereby subdivisions in class 4 can be used as farm lands if desired.

At the last session of the legislature an act respecting subdivisions was passed which included certain provisions in connection with the assessment, cancellation and the possibility of bringing under cultivation of subdivisions.

This act confers upon the local government board authority to fix values for assessment purposes of all or portions of subdivisions within any rural municipality and provides procedure by the board for the cancellation in whole or in part, or the amendment in whole or in part of plans of any subdivided area situated within a city, town, village, or rural municipality as may be deemed expedient, or in cases where it appears to the board that a subdivision or portion thereof is not required for building purposes, or will not be developed in the immediate future, the board may take steps to promote the purchase of such parcels by the person owning the remaining or largest portion of the area, or such purchases as may reduce the number of owners in subdivisions, or the exchange of certain parcels for others so as to interfere as little as possible with the convenient cultivation of the remainder.

The jurisdiction of the district court judge is limited to appeals that may be brought before him, but this does not cover a consideration of the revision of the assessment of a subdivision as a whole or any portion larger than that appealed against regarding which he is not in a position to

take the initiative. The act empowers the local government board to initiate proceedings in such cases and enables it to give the consideration desired.

Protect Owners' Interests.

Either through the cancellation in whole or in part or under the other provisions of the act the local government board should be enabled to effect arrangements whereby subdivisions in class 2 above may revert to acreage, and if desired be used as farm lands, at the same time protecting the interests of scattered lot owners in the subdivision.

As the conditions affecting these subdivisions change very rapidly and are many and complicated, and as the manner of dealing with them affects very materially the finances of the municipalities in which they are located, the local government board is given large discretionary powers under the provisions of the act, but it is thought that it contains all the machinery that is necessary to provide a solution of most of the difficulties that have occurred in connection with them, and it is so worded that these solutions will be found in the most direct and inexpensive way possible.

◆

CANADIAN PUBLIC UTILITIES

The provincial public utilities commission of Nova Scotia have refused to grant the application of the city of Halifax for the disallowance of the act passed by the provincial legislature for the incorporation of the Nova Scotia Tramways and Power Company, Limited, and it is probable the men behind this corporation will now go ahead with their plans.

The powers conferred on the corporation are comprehensive, it having authority to construct and operate tramways, develop, transmit, and supply power, and to acquire other properties in the province. The capital of the new company was fixed at $6,000,000, with power to increase this up to $10,000,000, and bonds may be issued in amounts to be determined by the corporation. The company also is empowered to purchase the Halifax Electric Tramways Company, Limited.

On January 1st the new rates ordered by the Ontario Hydro Electric Power Commission will go into effect in Guelph, thus effecting a saving of approximately 10 per cent. The new rates as ordered by the Hydro Electric Commission make domestic lighting 3 cents per 100 square feet and 2½ cents per kilowatt hour, less 10 per cent. cash discount. The rates for commercial lighting will be 6 cents per hour for the first 30 hours' use and 2½ cents per hour for all over that, with a discount of 10 per cent. The power rates will be practically the same except for an additional discount of 10 per cent. The street lighting will be reduced from $9 per lamp a year to $8.50 per lamp per year.

The Saskatoon street railway report for the week ending November 7th is as follows:—

	1914.	1913.
Receipts for week ending November 7	$ 2,556.85	$ 2,873.30
Total receipts in year to date	120,090.65	132,825.85
Passengers for week	50,837	65,122
Average daily receipts	$ 365.26	$ 410.45
Average number of passengers daily	7,262	9,303

The financial statement of the British Columbia Electric Railway Company and allied companies for September, 1914, showing the approximate income and expenditure is as follows:—

	1914.	1913.	Decrease.
Gross earnings	$ 650,516	$ 734,2[illegible]	$ 83,767
Working expenses, maintenance, etc.	509,626	[illegible]	51,262
Net earnings	$ 140,890	$ [illegible]	$ 32,505

For the three months of the fiscal year from July 1st to September 30th:—

	1914.	1913.	Decrease.
Gross earnings	$2,015,351	$[illegible]	$245,503
Operating expenses, maintenance, etc.	1,548,804	[illegible]	128,571
Net earnings	$ 466,547	$ [illegible]	$116,932

GOVERNMENT TAKES UP TREASURY BILLS

Hon. W. T. White, minister of finance, states that the Dominion government has taken up the London treasury bills amounting to £1,700,000, or $8,500,000, maturing November 10th. That is the last of the outstanding treasury bills, and none of the permanent loans made in the London market mature until 1919. In view of present international money conditions, the minister of finance believes that Canada is therefore in a particularly fortunate position, as no new loans will have to be floated for five years to provide for maturing permanent loans for large amounts. During the past three years maturing loans for more than 35 millions have been arranged for by new long-term loans. Since February of 1912 the total of permanent loans negotiated in London by the finance minister has been £22,000,000, or about $110,000,000, exclusive of a few temporary loans made from time to time.

The permanent loans since the Borden government came into power have been as follows:—February, 1912, an issue of £5,000,000 3½ per cent., maturing 1930-50; September, 1913, an issue of £3,000,000 4 per cent., maturing 1940-60; December, 1913, an issue of £4,000,000 4 per cent., maturing 1940-60; January, 1914, an issue of £5,000,000 4 per cent., maturing 1940-60; February, 1914, an issue of £5,000,000 4 per cent., maturing 1940-60.

◆

PRODUCERS WHO ARE ALSO DISTRIBUTERS

Canada needs increased production. Improved distribution is a problem being worked out in the Dominion. Many suggestions to this end are being put in practice. In western Canada there are more than 14,000 farmers who have joined hands in improving and facilitating the marketing of their products. The result was seen in the last issue of *The Monetary Times*, which showed the Grain Growers' Grain Company, Limited, marketed 29,920,225 bushels of grain and the year's trading resulted in the satisfactory profits of $151,080.

The activities of the Grain Growers' Grain Company include the operation of grain elevators, both terminal and country.

In 1911 the company entered the export business by forming a subsidiary corporation known as the Grain Growers' Export Company. In this venture it sustained a loss for two reasons: (1) wheat spoiled on the way across the Atlantic; (2) export business required much skill and experience.

But the activities of the Grain Growers' Grain Company are not limited to the grain business. In 1913, the company leased a flour mill at Rapid City, Manitoba, and began the distribution of flour in carload lots to local grain growers' associations through the elevators operated by the grain company.

The Grain Growers' Grain Company also distributes coal among farmers in carload lots.

Another commodity that has already been distributed in carload lots, is apples. The Grain Growers' Grain Company buys them direct from fruit associations in Ontario, and nothing but the freight rate and a nominal charge of ten or 15 cents a box to cover handling stands between the producers and these enterprising farmers.

The Western Farmers' Lumber Company, a subsidiary corporation, has been formed to handle the lumber business of the association.

Not content with these various activities the Grain Growers' Grain Company owns a printing establishment and publishes its own journal by a subsidiary company. So that it would [illegible] farmers have solved many difficulties, and have, under existing conditions, an unexcelled opportunity of [illegible] the success obtained under the leadership of Mr. T. A. Crerar, president of the Grain Growers' Grain Company, and his various lieutenants.

ARGENTINA'S MARKET WORTH INVESTIGATING

Much interest has been aroused in Canada amongst manufacturers over the possibility of securing some of the trade of Argentina, which has formerly been held by the countries now in a state of war. In view of this a statement of the imports for the year 1912, from the belligerent countries into Argentina, is of importance, suggests Mr. H. R. Pousette, Canadian Trade Commissioner at Buenos Aires. This list will be found in the Department of Trade and Commerce's articles on the German war in its relation to Canadian trade, which the department will send to applicants. From a close perusal of the figures, an idea of the opportunities which are likely to present themselves to Canadian manufacturers in the future may be gleaned. Competition in the commodities enumerated will probably be eliminated for some little time from some of the countries, and even in the future for some time may be expected to be relaxed.

There should be no misconception with regard to the trade in the articles mentioned. They represent the high water mark in Argentina's import trade, and with a few exceptions would be misleading were proper account not taken of the serious falling off in imports which has occurred during the present year.

The point, however, to keep in view is that so soon as times improve Argentina will commence purchasing more or less as before, and it, therefore, behoves Canadian manufacturers to begin now to vigorously prepare for the period of renewed activity. For so long as seed time is followed by harvest, and the world requires meat in its diet, so long will Argentina continue to be a heavy purchaser of manufactured goods. There will be a marked falling-off in the importation of luxuries, but that is of no regret to Canada, and it will enable the country to buy more largely of those commodities which are necessary in the course of daily life, and which are manufactured to advantage in the Dominion.

The elimination or relaxation of the competition mentioned above, referred, of course, only to that from those states whose trade is seriously affected by the war. The United Kingdom and the United States have if anything redoubled their efforts to strengthen their position, so that no less attention than formerly to the principles that govern success in foreign trade is necessary.

ANALYZING CANADA'S HONEY SUPPLY

It is certain that no illegal manufacture of artificial honey, upon any considerable scale, exists in Canada, and I am convinced that the requirements of the Adulteration Act only need to be better known, in order to their receiving universal recognition, states Dr. A. McGill, chief analyst, in a report upon 194 samples purchased throughout Canada. Of these, 159 meet the requirements of existing standards for honey and 22 other samples are legally genuine except in one particular, namely, excess of mineral matters, the non-volatile portions of which appear as "ash," two samples were not sold as honey, and one sample contained slightly more sugar than the law allows, while ten samples are shown to be not honey, the comment thereupon being that these samples contain nothing injurious to the health of the consumer, and that a presumption of honest intent on the part of the vendor, and perhaps even of the manufacturer, may be allowed, inasmuch as substitutes for or imitations of foods are distinctly recognized as legitimate, and are provided for by the Act, as long as they are labelled correctly, in such a way as to prevent deception of the purchaser, honey being the sole exception in this regard.

Honey is entirely the product of the work of bees operating upon the nectar of flowers, and other saccharine exudations of plants; and contains not more than twenty-five (25) per cent of water; not more than eight (8) per cent of sucrose (cane sugar); not more than twenty-five hundredths (0.25) of one per cent of ash; and not less than sixty (60) per cent of invert sugar.

The standard above defined became effective on the 25th November, 1912.

The invert sugar referred to in this definition is, of course, that naturally present in the nectar of flowers, or produced by the operation of the organism of the bee; and not invert sugar artificially produced by the action of acids, or otherwise upon sucrose. This interpretation follows necessarily from the first statement of the definition.

Honey enjoys the peculiar distinction of being especially mentioned in the Adulteration Act, and is the only article of food in whose special regard this protection is granted.

CANADA'S NICKEL EXPORTS

Communications have from time to time passed between the British and the Canadian governments respecting the exportation of nickel matte from Canada to the United States by the International Nickel Company of New Jersey, says an Ottawa dispatch. It is claimed by the company that since the outbreak of war it has employed effective and successful measures to prevent any nickel manufactured by it from reaching Germany.

The company invited investigation, and recently an expert accountant of great experience was sent by the Canadian government to New York to go into the matter thoroughly. He made a prolonged and careful investigation, and his report has been submitted to the British government for consideration as to the sufficiency of the safeguards which are employed by the company for the purpose.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended November 20th:—

McKinley-Darragh-Savage Mine, 83,620; O'Brien Mine, 63,250; La Rose Mine, 186,130; Mining Corporation of Canada, Limited (Townsite City Mines), 252,610; Dominion Reduction Company, 168,300. Total, 753,910 pounds, or 377 tons. The total shipment since January 1st, 1914, is now 32,542,073, or 16,271 tons.

Week ended November 21st:—

New Liskeard—

Casey Cobalt Mining Company, Limited, 115,348 pounds, or 57 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 20,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons; in 1913, 20,261 tons.

OCTOBER COBALT ORE SHIPMENTS

The following are the shipments of ore from Cobalt during October:—

Mine.	Tons.
Beaver Consolidated Mine	39.4
Casey Cobalt Mine	19.8
Chambers Ferland Mine	32.4

NEW INCORPORATIONS

Only Two Companies With Large Capital—Sixteen New Quebec Charters

Canada's new companies incorporated this week number 36. The head offices of these companies are located in four provinces. The total capitalization amounts to $5,636,000. The largest companies are:—

Aztec Oil and Asphalt Refining Company of Canada, Limited	$2,000,000
The Sandwich Bay Pulp and Lumber Company, Limited	2,000,000

Grouping these new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Manitoba	1	$ 20,000
Ontario	15	875,000
Quebec	16	4,473,000
Saskatchewan	4	268,000
	36	$5,636,000

The following is a list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Moose Jaw, Sask.—The Riverdale Farms, Limited, $50,000.

Saskatoon, Sask.—The Masons Hotel Company, Limited, $48,000.

North Battleford, Sask.—The Terminal Cities Hotel Company, Limited, $20,000.

Joliette, Que.—J. J. Sonmis and Cie, $20,000. Joseph Jeremie Sonmis, Zoel Gariepy.

Prince Albert, Sask.—The Saskatchewan Mines Development Company, Limited, $150,000.

St. Ignace de Loyola, Que.—La Compagnie d'Aqueduc de Saint Ignace de Loyola, Limitée, $10,000.

Sherbrooke, Que.—Plateau Laval, Limitée, $19,000. Jos. Emile Noel, Thomas Tremblay, Treffé T. Delisle.

Kenora, Ont.—Bijou Theatre Company, Limited, $25,000. Joseph Derry, Fanny Derry, Arthur Kinney.

St. Euphémie, Que.—La Compagnie Forestière, $20,000. Georges Labonté, Camille Boulet, Antoine Mercier.

Rimouski, Que.—J. P. Bellevance, Limitée, $20,000. Jos. Pierre Bellevance, E. Alexis Dufresne, Adélard J. Rioux.

Sault Ste. Marie, Ont.—G. A. McNally and Company, $50,000. Myrtie May McNally, Mark Shepley, Wilfred Pelletier.

Winnipeg, Man.—Manitoba Stationers, Limited, $20,000. Charles Wilfred Macdonald, Fred G. Howard, Ernest R. Taube.

Berlin, Ont.—Star Whitewear Company, $150,000. Albert Liborious Breithaupt, Herbert Detweiler Huber, Edwin Charles Reitzel.

St. Thomas, Ont.—C. H. Hepinstall and Sons, Limited, $40,000. Cyrus Heman Hepinstall, Oscar Charles Eby, Robert Wilbur Johnson.

Hamilton, Ont.—Midcity Securities, Limited, $100,000. E[illegible]r Roydon Marshall, Edward Dempster Marshall, John Sutherland Marshall.

Ottawa, Ont.—The Canadian Lipp[illegible] Stewart Motor Car Company, Limited, $50,000. John Scott Ennis, Th[illegible] An[illegible] [illegible], Louis Cote.

Sudbury, Ont.—The Sudbury Drug Company, Limited, $4[illegible]. Charles McIntosh Burroughs, John Albert D[illegible], G[illegible] Alexander Burroughs.

HALIFAX WILL HAVE DRYDOCK

The draughtsmen of the department of public works are at work on plans of the new drydock at Halifax. The plans, which will be completed next month, provide for a dock 1,150 feet long and 180 feet wide. It will be specially adopted for repair work on ships of the Royal Navy and is estimated to cost $3,000,000.

◆

WHAT CANADA DRINKS AND SMOKES

Canada last year produced 6,672,583 proof gallons of spirits as compared with 6,458,452 gallons in the fiscal year of 1913. Some 15,362,100 pounds of rye, 72,170,255 pounds of Indian corn, 7,434,935 of malt, and 19,690,720 of molasses were used in their manufacture, according to inland revenue statistics just issued.

The per capita consumption of spirits in 1914 was 1,061 gallons or a little less than 1,112 gallons in 1913. However the average consumption has been going up in Canada since 1886, when it was only .711 per capita. Canadians are also drinking more beer, the consumption per head in 1914 being 7,200 as compared with an average in the last four decades of 3,840.

There has been little increase in the per capita consumption of wines, which was .124 in 1914, as compared with an average of .119.

The consumption of tobacco per head was 3.711 pounds, a little less than the 1913 figure of 3.818, but more than the average of 2.421.

◆

You will find the cash system is a pretty good one, too.

The Buffalo Head Rural Telephone Company, Limited, has increased its capital from $3,000 to $4,000.

The Prudential Insurance Company, of Newark, has announced a new industrial policy, which is payable in weekly instalments instead of in one sum. It is the belief of the company that there is a widespread field of usefulness for [illegible] providing for the payment of a certain [illegible] in order to tide a household over a reasonable [illegible] had a chance to readjust themselves to the changed conditions after the breadwinner [illegible] of this new policy the beneficiary [illegible] the amount of insurance in [illegible] for thirteen or twenty-six weeks, [illegible] the time of his application. Such [illegible] the original purpose of the Prudential [illegible], which sets forth that one [illegible] for the wants of widows and [illegible] of the insured.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Pacific Great Eastern Railway.—As a result of arrangements with the British Columbia government with reference to bonds guaranteed by the government, the company will float a loan of $5,000,000 through its bankers. Nearly seven thousand men are employed along the route between Squamish and Fort George.

British Empire Trust Company.—The directors of the British Empire Trust Company state that they are unable to declare the interim dividend on the preferred and ordinary shares for the first half of the current year on account of showing a loss of £239. The half year's dividend on the 5 per cent. cumulative perpetual preference shares has been paid.

A. Macdonald Company, Limited.—This company has paid off $200,000 in short-term notes this month, reducing its outstanding note issue to $600,000. The last annual report showed outstanding $300,000 of six per cent. certified mortgage notes maturing in equal amounts in November, 1914, 1915 and 1916, and $300,000 first mortgage notes to vendors, maturing equally in November, 1914, 1915 and 1916.

Mining Corporation of Canada.—On November 16th a dividend of 12½ per cent. was paid to shareholders. This company was incorporated in April last and took over Cobalt Townsite, Cobalt Lake and City of Cobalt Mining Companies and the Cobalt property of Townsite Extension Mines and Little Nipissing Mine. They are now being operated by the Mining Corporation of Canada. The Cobalt Townsite Mine had paid dividends as follows: in 1911, $125,000; in 1912, $346,000; in 1913, $371,000; and in 1914, $200,000. The Cobalt Lake Mine had paid dividends as follows: in 1913, $315,000; and in 1914, $150,000.

The City of Cobalt Mining Company, Limited, the Cobalt Townsite Mining Company, Limited, the Cobalt Lake Mining Company, Limited, and the Townsite Extension Mines, Limited, were liquidated and are now out of existence.

Dominion Pork Company.—A decrease of $34,643 was reported in earnings of the Dominion Pork Company, Montreal, for the year ended October 31st last.

Earnings of $171,749, as reported for the year, were sufficient to meet operating and general expenditure of $133,091, to pay bond interest of $8,538, and dividends of $24,000, and to leave a net balance of $6,119 to be added to surplus. A year ago, after all disbursements, $34,394 was carried forward. The company's balance sheet compares with the previous one as below:—

Assets.

	1914.	1913.
Property	$638,678	$638,678
Investment	99,778	99,778
Cash	70,156	65,835
Stores	4,272	2,895
Accounts receivable	761	6,393
	$81[illegible],646	$813,570

Liabilities.

	1914.	1913.
Capital	$400,000	$400,000
Bonds	250,000	250,000
Mortgage		
Accounts payable	[illegible]	4,8[illegible]
Dividends		12,000
Suspense account	[illegible]	25,158
Surplus	[illegible]	[illegible]
	$81[illegible],646	$81[illegible],570

The directors were re-elected as follows: Mr. H. A. Do[illegible], president; Mr. W. G. Ross, vice-president; Messrs. D. McDonald, C. A. Duclos, P. Gal[illegible]; Mr. J. R. Cooper, secretary-treasurer.

The Porto Rico Railways Company, Limited.—The comparative statement of the company's earnings for October, 1914, is as follows:—

	1913.	1914.	Decrease.
For October:			
Gross	$ 70,589	$ 62,693	$ 7,895
Net	32,466	27,773	4,693
For ten months:			
Gross	707,712	652,650	55,062
Net	309,976	300,176	9,800

Algoma Steel Corporation, Limited.—A meeting of holders of the first and refunding mortgage 5 per cent. 50-year bonds will be held at New York on November 27th, 1914. The bondholders will be asked to sanction a modification of their rights by agreeing to accept the interest due October 1st, 1914, and for the next year and a half, in scrip, convertible into bonds on and after December 1st, 1916, with an option by the company to pay in cash at any time. The bondholders will also be asked to permit the issue of $2,000,000 additional bonds under this mortgage, and to agree to a release of the Lake Superior Corporation from its guarantee of interest on the bonds.

Dome Mines.—The Dome Mines' report for October shows an output of 22,500 tons, with a gold production of $95,880.07, which makes the grade of ore treated during the month average at $4.70. The mill ran 94 per cent. of the possible running time, a little below the record of the previous month, and the return was also less, although above the average of recent performances, and on a larger tonnage.

The record of the Dome for this year is as follows:—

1914.	Tons milled.	Value gold produced.	Value per ton.
January	13,900	$111,500	$8.02
February	12,010	69,000	5.74
March	14,979	87,657	5.85
April	14,770	97,454	6.59
May	16,180	62,109	3.83
June	18,250	83,421	4.51
July	19,780	82,984	4.19
August	20,170	90,893	4.50
September	21,940	99,301	4.52
October	22,500	95,880	4.70

Camaguey Company.—President Archibald, writing to the shareholders, shows that the comparison by the Montreal Engineering Company of Camaguey with the operations at Havana, Kingston and Santiago is unfair because of different conditions. The Bambeta Extension at Camaguey, built by the former management, was costly, and the extension was left without cars, for which the new management had to borrow $15,000. The sum of $3,500 had to be raised for repairs to the turbine. When the new management took hold of the company they had to borrow $10,000 to pay bond interest, and it was apparent from the first that declaration of 4 per cent. dividend on the million dollars capital was a mistake. Any other course than the cutting off of dividends would be suicidal, suggests Mr. Archibald, who says that the present indebtedness must be paid off before dividends are resumed, that if he thought any such advantages as alleged would follow the acceptance of financial assistance from the Royal Securities Corporation, he would gladly accept, but he is strongly convinced that this would not be the case, and he advises shareholders to hesitate before accepting the Montreal Engineering Company's offer.

◆

Attorney-General Sir John Simon, of Great Britain, said in a recruiting speech in London: "I will tell you a secret with the full authority of my colleagues in the Ministry. I will tell you when the war is going to end, not approximately, but exactly. The war is going to end on that day when we and our allies have accomplished the purpose on which we set out. That is not only to right the wrongs of unhappy Belgium, though righted these wrongs shall be, not only to re-enforce respect for sacred European obligations, as it shall be restored, but to crush that hateful spirit of Prussian militarism, which is a menace to Europe worse than war; by crushing which we shall confer lasting benefit not only on ourselves, and not only upon the small nations of Europe, but on that great and powerful community, the German people themselves."

PERSONAL NOTES

Mr. T. S. Miller, formerly of Winnipeg, has been appointed provincial manager for Saskatchewan of the Imperial Life Assurance Company.

Mr. A. R. Hector, manager of the Vancouver branch of the Royal Bank, has been appointed manager at Saskatoon in succession to Mr. T. K. McCallum, who has resigned.

Hon. L. P. Pelletier, former postmaster general, has been appointed a judge of the Superior Court of Quebec, in place of Mr. Justice Delorimier, of Montreal, who has resigned.

Hon. W. T. White, minister of finance, visited New York this week to meet Sir George Paish and discuss with him as the representative of the British Treasury questions of finance affecting Canada and Great Britain.

Sir Frederick Williams-Taylor is no doubt busy just now with the preparation of the address for presentation to the shareholders of the Bank of Montreal at the annual meeting early next month. His remarks on the present situation are being awaited with keen interest.

Mr. L. Goldman, of the North American Life, is one of the few men who figured on economic depression in 1914. He has considerable faith in the "seven-years-and-then-depression" theory, which has worked out in practice in recent years. One of the results is that the North American Life is a "house in good order."

Mr. W. McLeish left Toronto on Thursday and will sail from New York on Saturday, to take charge of the Edinburgh office of the Great West Permanent Loan Company. Mr. H. C. Mitchell, who has been associated with the company for many years, will succeed Mr. McLeish at Toronto, where he is well known and respected. The Toronto office staff presented Mr. McLeish with a travelling-bag.

Mr. Vivian Hugh Smith, of Messrs. Morgan, Grenfell and Company, has been appointed Governor of the Royal Exchange Assurance Corporation of London, filling the vacancy caused by the death of Sir Nevile Lubbock in September. This corporation is well known in Canada, and its growing business in the Dominion is under the guidance of Mr. A. Barry, Montreal, who is manager for Canada.

His Royal Highness the Duke of Connaught and Sir Cecil Spring-Rice, British ambassador at Washington, inspected the specie and securities holdings of the government. The new Dominion vaults are among the largest and most modern on the continent. The specie and security holdings of the government inspected included the gold owned by the Dominion, that held by the minister of finance for the Bank of England, and the bonds and other securities held for insurance companies.

Mr. J. H. Housser, director and secretary of the Massey-Harris Company since 1901, died at his home, 78 Lynwood Avenue, Toronto. The late Mr. J. H. Housser was born in Beamsville in 1840, and was educated there, and taught school in the county of Lincoln for a time. In 1869 he entered the dry goods business in St. Catharines, and since 1872 was engaged in agricultural implement industry. He was employed with A. Harris, Son and Company at Beamsville for about a year, when he moved to their office in Brantford. In 1880 he was appointed assistant manager and went to Winnipeg. He retained this position for the Massey-Harris Company after the amalgamation in 1891. Returning to the Brantford office in 1894, Mr. Housser came to Toronto in the following year.

The late Mr. E. W. Cox's, former president of the Canada Life Assurance Company, will has been probated in the Surrogate Court, and the widow, Mrs. Hattie Cox, 160 Isabella Street, is the sole beneficiary. The will shows an estate of $[illegible]. The bulk of the estate was held in the following stocks, having a total value of $4[illegible]4,515: 100 shares of Canada Life Assurance Company stock, $17,500; 1,517 shares Dunlop Tire and Rubber Goods Company, $150,[illegible]; 100 Imperial Bank shares, $21,[illegible]; 75 Brazilian Traction Company, $[illegible]; [illegible] Central Canada Loan and Savings Company, $[illegible]; [illegible] Provident Investment Company, $15,000; [illegible] [illegible] Company, $5,800; five Scarboro Golf Club, $[illegible]; [illegible] Golf Club, $445; one Caledon Mountain Trout Club, $[illegible]; one Toronto Hunt Club, $25; 11 Granite Club, $[illegible]. The residence at 160 Isabella Street is valued at $27,150 and [illegible] furniture, $10,000. Deceased had $8,740 [illegible] $7,[illegible]; and $27,000 in bonds.

Mr. G. [illegible] Morley, the new secretary of the Canadian Bankers' Association, has had a varied experience in banking, chartered accountancy, law, and in the study of political economy at the University of Trinity College and Toronto University. He obtained his early education at Trinity College School, Port Hope, between the years 1893 and 1900. After matriculation in 1900 he entered the service of the Canadian Bank of Commerce as junior clerk in St. Catharines. After filling various positions in the same bank at Winnipeg, Elkhorn, Regina and Belleville, he was appointed assistant accountant at Hamilton in 1906. In December of the same year he resigned this post and elected to take a course in political science at Trinity College and the University of Toronto. After graduation in 1910 he was appointed accountant of the Canadian Bank of Commerce at Moose Jaw, one of the largest branches of that bank in the North-West. In February, 1911, when a clearing house was opened in Moose Jaw, he was appointed manager. Mr. Morley later resigned these positions and took a law course. At the same time he was appointed to a position with the law firm of Bicknell, Bain and Strathy, where he gained experience in the winding up of banks, such as the Ontario Bank and the Farmers Bank of Canada. After being called to the Bar in May of this year he became one of the solicitors in the firm.

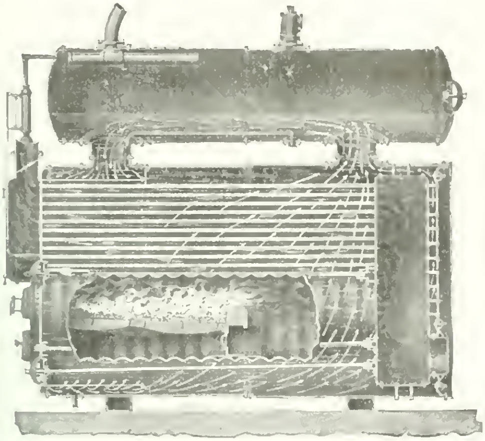
Mr. George J. Bury, vice-president and manager of western lines of the Canadian Pacific Railway, is succeeding Mr. D. McNicoll, first vice-president of the Canadian Pacific Railway. He was born in Montreal forty-eight years ago. He received his first railway training in the purchasing department, and then went into the operating branch. He has successively been assistant superintendent of the Chalk River-Cartier-Sault Ste. Marie division; superintendent at Fort William; superintendent at Cranbrook, B.C.; assistant general superintendent, Lake Superior division, later general superintendent of the same division; general superintendent of western lines, with headquarters at Winnipeg; vice-president and manager of western lines, in which position he succeeded Sir William Whyte. Mr. David McNicoll, vice-president of the Canadian Pacific Railway Company, has resigned owing to his health. It is expected that Mr. McNicoll, when his health permits, will be asked to accept another important post in connection with the company's affairs. He retires with the esteem and indeed affection, of the directors, officials and employees of the company. Mr. McNicoll was born at Arbroath, Scotland. Coming to Canada in 1874, he entered the service of the Toronto, Grey and Bruce, of which he became general passenger agent in 1882. From 1883-9 he was general passenger agent of the eastern division of the Canadian Pacific Railway, and later of the whole system. In 1899 he was appointed assistant general manager, vice-president and general manager in 1900, and first vice-president and director since 1903. Mr. Bury is one of the "big" men of the West.

Get rich quick men are the first to get hit when the clouds come.

In an encyclical recently issued the Pope attributes the war to four causes, namely, lack of mutual love and sincere [illegible] among men; contempt of authority; injustice on the part of one class of people against another, and the consideration of material welfare as the sole object of human activity.

Hon. William Templeman, former minister of mines and of inland revenue in the Dominion Government, and proprietor of the Victoria Times, died at his residence, Victoria, on November 15th. The late Mr. William Templeman was born in Pakenham, Ontario. He entered the office of the Carleton Place Herald and gained a knowledge of the printing trade. He founded the Almonte Gazette in 1867, and in [illegible] moved to British Columbia, where he became connected with the Victoria Times. He was called to the Senate in 1897, [illegible] until 1906, when he was elected to the House of Commons as the member for Comox-Atlin. He was defeated in the 1911 election. He was a member of the [illegible] from 1902 to 1911, first without portfolio and later as minister of inland revenue and minister of mines.

ROBB-BRADY SCOTCH BOILERS



have two very important advantages:

INTERNAL FIRING

which prevents loss of heat, air leakage and the expense of providing and repairing brick setting.

RAPID CIRCULATION

which keeps the heating surfaces clean, prevents unequal expansion and makes them quick steamers.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Chilliwack Township, B.C.—Tenders are desired for an issue of $15,000 6 per cent. 10-year debentures.

Cranbrook, B.C.—A United States bond house has acquired an issue of this city's 6 per cent. waterworks bonds.

Winnipeg, Man.—A by-law to issue $40,000 debentures for the Winnipeg Industrial Exhibition is to be voted upon December 11th.

Sault Ste. Marie, Ont.—An issue of $30,000 treasury notes was disposed of to local investors in three days. The notes are for one year and bear 7 per cent. interest.

Empress, Alta.—At a meeting of the village council, the secretary was instructed to write the minister of municipalities asking permission to issue $66,000 in debentures for the installation of a waterworks system.

Gravelbourg R.M., Sask.—Tenders for issues of $11,000 and $9,000 6 per cent. 11 and 9 instalment debentures are desired. Messrs. Gravel and Gravel, Moose Jaw. (Official advertisement appears on another page.)

Oakville, Ont.—A by-law to provide for the expenditure of $10,000 in purchasing land as a site, and erecting a fire-hall and to authorize the issue of debentures to the amount of $10,000, will be voted upon December 7th.

Saskatchewan.—The following school districts are empowered by the local government board to borrow money:—Pontrelas S.D., No. 3280, $225. E. Mattison, Nipawin; Imperial Village S.D., No 550. W. J. Rodman, Imperial.

Edmonton, Alta.—The gross debenture debt of the city of Edmonton on October 31st, 1914, was $24,660,250 made up as follows:—General, $10,283,285; special, $4,702,280; light, $864,267; power, $2,051,735; street railway, $3,007,072; telephone, $1,911,840; water, $1,838,859.

Peterboro, Ont.—Mr. F. Adams, city treasurer, informs *The Monetary Times* that in addition to the bonds sold locally in October, an additional block has been sold and the funds thus raised are for the street paving and sewer outfall purposes, providing work for the unemployed.

Saskatoon, Sask.—The Bank of Hamilton does not view with favor the suggestion that the city should issue debentures in small denominations for sale among the citizens. The bank's opposition to the scheme, centres about the proposal to use the sinking fund to redeem any debentures which the investor might desire to sell back to the city.

Westmount, Que.—Messrs. N. W. Harris and Company, Montreal, are offering $100,000 4½ per cent. bonds of the city of Westmount at 93¼. The net debt of the city, including the last issue of bonds of which the present offering is part, is $3,241,588. The assessed valuation of the city's property, exclusive of property exempted from taxation, was $42,029,411 in 1913.

Rainy River, Ont.—At the election on the money by-law to issue debentures for $5,000 to cover the balance of the cost of installing waterworks and sewers in the town, the by-law carried by a large majority. Mr. E. E. Jess, town clerk, informs *The Monetary Times* no new work has been undertaken by the town council this past season, as it was deemed inadvisable to try to finance anything new under the present conditions. The debentures will be ready for sale at once.

Victoria, B.C.—The October civic financial statement, as presented by City Comptroller Raymur, showed that there were credit balances in favor of the city to the amount of $[illegible]. The total credit balances were $2,202,547, chief items of which were:—General purpose sinking funds, $753,[illegible]; local improvement sinking fund, $[illegible]; school purposes loan funds, $89,000; Sooke Lake loan, $146,000; sewer loan, $200,000; local improvement construction accounts, $[illegible]; police headquarters loan, $7[illegible],714. Debit balances totalled $1,340,770, made up of local improvement advances, $[illegible]; annual loan by-law notes, $475,000; general revenue [illegible], $[illegible],417.

Alberta.—The following school districts have been empowered to borrow the following amounts, the respective treasurers' names being also given:—M[illegible] S.D., No. [illegible], $1,000. C. C. Roberge, Logan. Jord[illegible] Hill S.D., No. 720, $600. G. W. Gr[illegible], [illegible]. Bellgrove S.D., No. 2390, $1,200. R. J. Bell, P[illegible]. Fairplay S.D., No. 2682, $1,200. E. B. Wertheimer, L[illegible]n. Crocus Plains S.D., No. 2693, $1,200. W. H. Bird, Stoppington. Moon Lake S.D., No. 2785, $1,000. H. Alford, Waugh. Kingman S.D., No. 2867, $1,000. T. J. Rogness, Kingman. Tollerton S.D., No. 2878, $2,200. A. Thomson, Tollerton. Maybridge S.D., No. 2028, $1,200. R. Fletcher, Lamont. Alhambra S.D., No. 2930, $1,200. J. R. Kerr, Pitcox. Elk Park S.D., No. 2962, $1,400. G. Miller, La Calmotte. Flaxland S.D., No. 2988, $1,300. J. O. Carter, Kinmundy. Coyote S.D., No. 2901, $1,500. C. H. Stirling, Leo. Opal S.D., No. 3024, $1,200. W. Scott, Hardisty. Brunetta S.D., No. 3032, $1,200. C. H. Gage, Brunetta. Lonira S.D., No. 3057, $1,000. G. Turner, Lonira. Junkins S.D., No. 3068, $500. T. A. Payne, Junkins. Northern Star S.D., No. 3092, $1,200. C. V. Larson, Landonville. Minook S.D., No. 3105, $1,500. R. Tucker, Minook. West Athabasca, No. 3110, $1,000. M. W. Hitchins, Athabasca. Maryland S.D., No. 3132, $4,200. J. J. Martin, Ogden. Stettin S.D., No. 3140, $1,200. N. Hammond, Stettin. Lakeland S.D., No. 3149, $500. H. E. Burnell, Mussel.

◆

MONTREAL IS OFFERED $5,000,000 LOAN

New York bankers having made a favorable offer to the city of Montreal, through the Bank of Montreal, for a temporary loan of $5,000,000 for three years, the board of control has resolved to recommend the city council to accept the offer. The price compares favorably with similar transactions of the past year.

◆

DOMINION TRUST DEPOSITORS TO CHOOSE LIQUIDATOR

Over six hundred creditors of the Dominion Trust Company attended a meeting at Vancouver, and a committee of depositors was elected as follows: Messrs. H. J. La Brash, J. S. Cowper, G. H. Healey, C. A. Rankin and A. J. Paterson, to investigate the qualifications of companies and individuals for the position of liquidator and report to a meeting to be held in December.

◆

YORK COUNTY LOAN AND SAVINGS COMPANY

An order for the payment of a final dividend of five cents to the shareholders of the York County Loan and Savings Company, Toronto, has been made by Official Referee J. A. C. Cameron. Previous dividends amounting to 50 cents have already been paid, so that shareholders receive 55½ cents on the dollar from an estate that promised only about 25 to 30 cents when it went into liquidation on December 16th, 1905.

The principal asset of the company was a considerable area of unimproved real estate in the Roncesvalles-High Park district. The tremendous growth of the city in that direction realized the vision of Joseph Phillips, the promoter of the company, and accounts for the comparatively comforting result of the liquidation. The liquidators, the National Trust Company, receive $[illegible]8,714.81 for their nine years' labors, but out of this came some $12,000 for every dividend that was paid to the 115,000 shareholders.

The total amount realized in the liquidation was $2,432,555.[illegible]. The expenses of winding up, comprising the cost of retaining the York Loan clerical staff, stationery, printing, commission on real estate sales, court costs and other costs of administration and disbursement in connection therewith, amounted to $250,055.16.

Preferred claims against the estate amounted to $276,45[illegible], and the total dividends received by the shareholders were $1,[illegible]. The liquidator still has certain unrealized assets of a book value of $26,[illegible]32.16.

There is some $11,000 in past dividends, and will probably be $[illegible] in the final dividend for which the addresses of [illegible] are unknown. This will be kept in the bank at interest for a [illegible] months period, after which it reverts to the [illegible].

DIVIDENDS AND NOTICES

NOTICE TO SHAREHOLDERS

THE SUN AND HASTINGS SAVINGS AND LOAN COMPANY OF ONTARIO

Take notice that a special general meeting of the Shareholders of the Sun and Hastings Savings and Loan Company of Ontario will be held at the Head Office of the Company, Confederation Life Building, Toronto, on Monday, the thirtieth day of November, 1914, at the hour of 12 o'clock noon, for the purpose of taking into consideration, and, if approved, of ratifying and accepting an agreement as passed and approved by the Registrar of Loan and Trust Corporations of Ontario, provisionally entered into by the Directors of the Sun and Hastings Savings and Loan Company of Ontario and the Directors of the Standard Reliance Mortgage Corporation, for the sale by the Sun and Hastings Savings and Loan Company of Ontario, of its assets and undertaking to the Standard Reliance Mortgage Corporation, upon the terms and conditions prescribed in the said agreement.

And take notice that the original of the said agreement may be inspected by any Shareholder at the Head Office of the Company above mentioned.

Dated this fifteenth day of October, 1914.

(Signed), JOHN P. MARTIN,
Secretary.

BANK OF MONTREAL

Notice is hereby given that a Dividend of Two-and-one-half per Cent. upon the paid-up Capital Stock of this Institution has been declared for the three months ending 31st October, 1914, also a Bonus of One per Cent., and that the same will be payable at its Banking House in this City, and at its Branches, on and after Tuesday, the First day of December next, to Shareholders of record of 31st October, 1914.

The Annual General Meeting of the Shareholders will be held at the Banking House of the Institution on Monday, the Seventh day of December next.

The Chair to be taken at Noon.

RAILROAD EARNINGS

The following are the railroad earnings for the first two weeks of November:—

Canadian Pacific Railway.

	1914.	1913.	Decrease.
November 7	$1,908,000	$3,204,000	$1,296,000
November 14	1,878,000	3,124,000	1,246,000

Grand Trunk Railway.

November 7	$ 906,941	$1,178,707	$ 271,766
November 14	860,676	1,022,375	161,699

Canadian Northern Railway.

November 7	$ 384,300	$ 620,400	$ 236,100
November 14	370,600	643,500	272,900

The Canadian Northern Railway's statement of earnings and operating expenses for October is as follows:—

	1914.	1913.		Increase or decrease.
Gross earnings	$1,895,300	$2,687,100	—	$791,800
Expenses	1,332,100	1,683,000	—	350,900
Net earnings	563,200	1,004,100	—	440,900
Mileage in operation	4,670	4,520	+	150

◆

"What is the school doing to counteract the spirit of so-called Western optimism?" he asked. "An optimism which is too often of the Micawber type, always waiting confidently, expecting that something will turn up—something that will enable us to get rich quickly with the minimum of effort. One of the most appalling things about our country to-day, is the number of young men who are looking for soft jobs. Is the school considering that one of the aims of education is the inculcation of the truth that there are no gains without [illegible]? Is the fact sufficiently emphasized that we must be producers or we are nothing: that the keynote of life is service. We do not like the words master and servant out here. We prefer employer and employee. Is it being impressed upon the rising generation that service is better than employment, and that the question is not how much we get for the smallest output of energy, but how serviceable are we." Mr. J. B. Sutherland at Calgary.

War Orders Mean $40,000,000 to Canada

BRITISH, *Canadian, French and Russian Governments are Purchasing all kinds of Supplies in this Country—Details of First Orders—They Range from Shirts to Shrapnel and Mitts to Motor Trucks—Many Factories are Benefited—Interesting Results of The Monetary Times Inquiry.*

A LARGE amount of money is being spent in Canada by the Imperial, Dominion, French and Russian governments in connection with orders for equipment for armies and navies, and with gifts to the Imperial authorities. These are stimulating industry considerably, keeping thousands of employees working throughout the winter in factories, many of which are running night and day shifts. While many of these industries may find conditions slack after this active, and obviously artificial, period, these war orders have prevented such unfavorable conditions from being present this winter. About 2,500 factories are said to have been affected favorably by the orders.

The government authorities are too busy to give out information as to war orders just now, but details will come forward in official documents later, probably long after the war has ceased. In the meantime, *The Monetary Times* has gathered reports, facts and figures, from which an approximate estimate can be made as to the value of war orders being placed in Canada. The information has been obtained from official sources whenever possible.

The following figures represent the value of only a portion of the orders placed in the Dominion. They include the Dominion and provincial government gifts to Great Britain and Belgium.

British Government Orders.

Canned goods and other food supplies	$ 1,000,000
Shirts	1,250,000
Sweater coats	900,000
Socks, mitts, belts, etc.	900,000
Miscellaneous woollens and textiles	950,000
Mess tins, picket poles and pegs	1[illegible],000
Shovels, picks, etc.	1,000,000
Horses	3,850,000
Sheepskin coats (second order)	25,000
*Saddles	2,000,000
Shrapnel shells (to October 16)	2,000,000
Boots and shoes	2,500,000
Rifles, ammunition, and shell cases	2,000,000
	$18,505,000

*This order included also the requirements of Canada, Russia and France.

Dominion Government Orders.

30,000 Ross rifles and bayonets (first order)	$ 1,0[illegible]0,000
Conversion of 10,000 old type rifles	25,000
Flour, 1,000,000 bags	3,000,000
Blankets	155,000
Wagons, 1,000	150,000
	$ 4,340,000
Numerous other orders (details not available yet) estimated at	11,000,000
	$15,340,000

Provincial Government Orders (Gifts to Imperial Authorities).

Horses (Saskatchewan)	$162,500
Flour (Ontario) 250,000 bags	750,000
Flour (Manitoba) 50,000 bags	150,000
Evaporated apples (Ontario) 100,000 lbs.	6,000
Oats (Alberta) 500,000 bushels	300,000
Canned salmon (British Columbia) 25,308 cases; and charges	102,000
Potatoes (New Brunswick) 100,000 bushels; and expenses	90,000
Oats (Prince Edward Island) 100,000 bushels	50,000
Cheese (Quebec) 1,000,000 lbs.	620,000
	$2,230,500

Provincial Government Orders (Gifts to Belgium).

Flour (Alberta) 5,000 bags	$20,000
Barrels (New Brunswick) 15,000; and charges	25,000
Evaporated apples (Ontario) 160,000 lbs.	16,000
	$61,000

French Government's Orders.

Boots	$1,000,000
Blankets	1,845,000
	$2,845,000

Summarizing the above, we have the following results:

War Orders Placed in Canada by Government.

British	$18,505,000
Dominion	15,340,000
Provincial	2,291,500
Foreign	2,845,000
	$38,981,500

This sum represents only the orders given during about the past two months. Many more are to follow.

At the special session of parliament in August last, the government was authorized to use an appropriation not exceeding $50,000,000. The details of the expected expenditure of $30,000,000 between then and the end of the fiscal year to end March 31st, 1915, for military purposes, as given by Premier Borden, include the following:

Pay of 25,000 officers and men for seven months, $6,100,000; rations at 40 cents per man, $2,100,000; purchase of 5,000 horses at $200 per horse, $1,000,000; transport to Quebec, $150,000; ocean transport, $1,000,000; transport abroad, $300,000; return transport to Canada, $1,450,000; engineers' services at Halifax, Quebec and elsewhere, $500,000; equipment, $2,400,000; clothing, $300,000; ammunition from Dominion arsenal, $660,000; censorship, $150,000; pay and maintenance of troops on guard in Canada, $2,000,000; for additional troops and unforeseen expenditure, $7,615,000.

From London in November came a cable from "Windermere," a service used by *The Monetary Times* by special arrangement with The Montreal Star, stating that large war orders were being given to Montreal, Hamilton, and other Canadian houses, including steel, woolen, leather, hosiery, and other goods, under the direction of the British purchasing director, Mr. Fred. W. Stobart, with headquarters at Montreal. Contracts for further orders on behalf of France and other allies might come, it was added, if Canada was able to promise prompt delivery. The fullest desire was shown, it continued, to act upon the recent compact between the British, French and Russian governments to give preference to the British dominions next only to the factories of the allied countries and before going to foreign countries for supplies.

As to the British orders, the names of the Canadian firms who received the orders are not available, but all firms offering a good quality of material at reasonable prices are being awarded their share. An even distribution is also being made.

Some complaints were heard to the effect that after receiving portions of the business, some Canadian firms were entering the United States market and buying the goods there. This has been denied. In some cases Canadian manufacturers have been obliged to buy the raw material for manufacturing some of the goods in the United States, but the actual labor is done in Canadian factories. Manufacturers of sweater coats, for instance, have had trouble in securing the necessary yarn, and have had to pay much higher than at first anticipated, the price having shown an advance of nearly 20 per cent. in two weeks.

The representatives of the British government in Canada have all the equipment to examine and pass before it is shipped abroad. The accounts will also be paid through Mr. Stobart.

The first large consignment of materials ordered by Mr. Stobart has been forwarded to the British War Office. A shipment of five hundred packages made up of sweaters, socks, leather mitts, sheep-skin coats and cardigan jackets left Montreal on November 18th. Shipments will probably be forwarded weekly.

According to a Canadian Associated Press dispatch, dated November 30, orders for one million tins of meat have been sent to Toronto by the British War Office, which is also giving further orders for clothing. A military representative has left for Canada to supervise the fulfilment of these orders. Canadian manufacturers would [illegible] receive larger orders if they were able to guarantee immediate delivery. Goods like boots and [illegible] cannot be had right away in view of the present [illegible] in the war area, adds the dispatch.

Among the numerous articles and commodities which [illegible] ordered in Canada are the following:

Dominion and Provincial Contributions.

Flour, oats, canned salmon, potatoes, apples, evaporated apples, cheese, horses, hay.

Harness and Saddlery.

Saddles, halters, horse collars, rifle straps, bandoliers, mess tin straps, Oliver equipment, universal saddlery.

Clothing, Etc.

Shoes, blankets, woolen caps, shirts, under-drawers, sweater coats, socks, sheep-skin coats, woolen mitts, cholera belts, gloves, uniforms, overcoats, shaving brushes, hair brushes, rubber sheets, overshoes, blankets, suspenders, rubber boots, fur caps.

Miscellaneous Equipment.

Mess tins, picket poles and pegs, saddle blankets, picks, shovels, mallets, shrapnel shell, rifles, ammunition, motor trucks, automobiles, food supplies, cutlery.

Among the orders given, the following details of quantities have been reported: 250,000 mess tins, 50,000 picket posts, 200,000 picket pegs, 200,000 shaving brushes, 1,000,000 shirts, 1,000,000 pairs of worsted socks and 1,000,000 pairs woolen mitts.

Harness and Saddlery.

Harness and saddlery orders were heavy and aggregated a large sum. They were ordered by the Imperial, Dominion, French and Russian governments. On October 19 Hon. Robert Rogers, chairman of the contract sub-committee of the Dominion cabinet, stated at Ottawa that contracts for the supply of 50,000 military saddles for Canada, Great Britain, France and Russia had been placed with Canadian saddlery firms from the Atlantic to the Pacific. These contracts covered an order for 15,000 saddles from France, one for 10,000 from Britain, one for 20,000 from Russia, and the requirements for Canadian uses, aggregating about 6,000 saddles. Mr. Rogers stated that not a single saddlery firm in the Dominion had been overlooked in the letting of the contracts for the large order. "Their representatives were all at Ottawa," said Mr. Rogers. "When the Russian order of 20,000 saddles came in I held a conference with the representatives of the companies. I told them it was up to them to supply the order, and they, one and all, declared that it would be done."

While the value of the contract to Canadian saddlery concerns was not definitely given, it is estimated that in saddles alone the contracts will aggregate over $2,000,000. The contracts include bridles, etc. Some estimate of the price paid for each outfit may be gathered from the fact that the French saddle, owing to additional fittings, such as water bags, rifle buckets, etc., will cost from $12 to $16 more than the British saddle. In addition to the orders placed for saddle outfits, large orders were placed with Canadian firms for artillery harness, single harness, etc., and these also were divided among the various companies.

On November 2nd, Canada received a further request from Russia for a heavy order of cavalry saddles.

Leather Men Ready.

A deputation of leather men, representing the principal leather, tannery and manufacturing industries of Ontario and Quebec, was in Ottawa on November 20th and saw the minister of trade and commerce, Sir George Foster. The partial embargo on animal products from the United States had threatened materially to reduce the supply of hides for the Ontario and Quebec tanners and manufacturers, and the minister of trade and commerce sent for the representatives of these industries to ascertain to what extent they felt themselves in a position to take care of large army orders in the near future. The members of the deputation assured Sir George that they could fill all such orders with reasonable dispatch.

Contracts have been let to various manufacturers in Canada to supply 15 and 18 pr. shrapnel shells and component parts for same. These orders have been very widely placed and are for large quantities. They will keep various departments of the companies in full operation during the winter. The president of one company, for instance, tells *The Monetary Times* that the shells are forged under new modern hydraulic forging presses, which are equal in power and efficiency to any on this continent or in Europe. His two plants are fully equipped to produce any size or class of shells or projectiles, which may, at any time, be required by the government, militia or navy department. It is at this plant that all the forged steel parts for the Ross rifles are made. To handle these orders on behalf of the Dominion government, acting for the Imperial government, a shell committee has been appointed with headquarters in Montreal. The members of the committee are: Colonel A. Bertram, chairman, Thomas Cantley, George W. Watts, F. Carnegie, Colonel T. Benson, Lieut.-Colonel F. D. Lafferty and Lieut.-Colonel G. Harston. The orders given up to October 16 were valued at about $2,000,000.

On November 17, it was intimated unofficially in Montreal that in the near future some business on a large scale would be placed. Requisitions for additional materials had been received, and tenders were to be requested of manufacturers shortly.

Big Order for Shirts.

To make a bid for the British government contract for 1,000,000 shirts, valued at about $1,250,000, forty of the shirt making firms in Canada combined efforts. The contract was awarded to them to the extent of four-fifths of the contract, or for 800,000 of the 1,000,000 shirts. The 200,000 remaining were given out among the independent companies remaining.

The "combine" purchased all the flannel available in Canada and ordered $700,000 worth from New York. The Canadian shirt makers were anxious to get the contract in order to keep it in Canada so that plants might be kept working. It was admitted that the order was an opportunity to check shrinkage in commercial business.

The executive officers of the "combine" have been in communication with the French government, who are prepared to place an order in Canada for 500,000 shirts. It is not likely that this order can be taken on until after January 1st. The Canadian government allows five shirts per man in its equipment contracts. The British estimate is a new shirt every two weeks.

A large boot contract for the British government may be handled in the same way. A co-operative association which will be known as the Canadian Shoe Manufacturers' Export Association has been formed at Montreal. The company, which embraces the leading shoe manufacturers, will make an effort to obtain a portion of the shoe orders now being placed by the Imperial government. To this end they are sending Mr. A. R. Angus, of the Ames-Holden-McCready Company, and Mr. Oscar Dufresne, of Dufresne and Locke, to interview the War Office in London.

This group of shoe dealers will submit a proposition to the Imperial government for the manufacture within two months of a million pairs of military boots.

Mr. Stobart, the British government's special purchasing agent, has commenced enquiries regarding the likelihood of the immediate availability of large quantities of lumbermen's socks and other warm footgear for the troops at the front.

Purchase of Horses.

In the purchase of horses, the British government has been active in Canada. The authorities announced that they would pay a maximum average of $175 each. When business commenced it was found that the quality of mounts varied, so that from $150 to $200 was paid, but an average for each day's inspections of $175 was maintained. Taking $175 as the average price, the cost of horses to the British and Canadian governments has been about $3,850,000, and more are to be bought.

Both Britain and France plan to buy freely from Canada and the United States in the near future. Purchasing areas are said to have been divided between the two allied nations. France will buy from the Southern States and ship via Gulf ports, while Britain will draw from the Northern States and Canada and ship from Atlantic ports.

Mr. Borden's estimates gave $200 as the price of horses for the Canadian government. The Saskatchewan government purchased 1,500 horses as a gift to the Imperial authorities.

Over a million dollars worth of field glasses were required, and as far as is known these can not be supplied by Canadian firms. Five hundred thousand knives, with a can-opener attachment, are required, but apparently cannot be supplied by Canadian houses. These orders have probably gone to the United States.

Men Who Are Placing Orders.

The names of the members of the sub-committee of the cabinet handling the war orders of the Dominion government are not available, officially.

Answering certain complaints recently as to partisanship in handing out war orders, a member of the Canadian government said: "It is not a question of anyone securing a contract these days. It is a question of how we can get them filled, as there is work enough for all industries turning out the stuff we need. But rapidity in filling contracts is one of the chief factors which we have to consider. The firm which can turn out the materials quickest has the best chance."

Tenders for the supply of motor-trucks for the second Canadian contingent have been received and are being dealt with at Ottawa. These tenders, which call for trucks of high power and capacity, are under consideration by a committee appointed by the Minister of Militia, consisting of Honorary Colonels the Hon. George Taylor, John Eaton and W. K. McNaught; Honorary Major McQuarrie, Messrs. Owen Thomas and T. A. Russell, Colonel Hurdman, and Quartermaster General Macdonald.

Orders were placed by the Dominion government with the Russell Motor Car Company in November for the assembling of forty armored automobiles equipped with quick-firing guns.

Provincial Government Buying.

The orders for 200,000 pounds of evaporated apples, placed by the Ontario government in the province, gave much needed assistance to the evaporating industry. The order was valued at $12,000 and 100,000 pounds of the apples are to be a gift to the British Navy, the other

(Continued on page 36.)

Deputy Minister of Finance.

October Bank Statement Reflects Sound Position

Current Loans and Deposits are Maintained, Call Loans Abroad Again Decreased, and Loans to Municipalities Increased—Figures Compare Very Well With Those of a Year Ago.

	October, 1913.	September, 1914.	October, 1914.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$389,856,507	$348,284,206	$348,732,830	—10.5	+ .12
Deposits after notice	621,511,207	658,401,501	659,806,682	+ 6.1	+ .21
Current loans in Canada	862,313,367	826,514,621	816,623,852	— 5.2	—1.1
Loans to municipalities	37,846,369	44,338,873	47,316,076	+25.02	+6.7
Current loans elsewhere	58,171,884	41,347,231	42,046,716	—27.7	+1.6
Call loans in Canada	71,118,255	70,063,414	70,201,939	— 1.2	+ .19
Call loans elsewhere	93,346,810	89,521,589	81,201,671	—13.01	—9.2
Circulation	118,234,359	120,365,786	123,744,682	+ 4.6	+2.8

The above are the principal changes during October in the position of the Canadian banks. The outstanding features are increases in loans to municipalities and in circulation, a large decline in call loans, and the practical maintenance of current loans and deposits in Canada.

The following table shows the trend of the Canadian loans account for the past thirteen months:

Loans.	Current in Canada.	Call in Canada.
1913—October	$862,313,367	$71,118,255
November	830,715,015	70,123,101
December	822,387,975	72,862,071
1914—January	811,582,130	71,248,242
February	811,711,219	71,374,602
March	823,400,422	69,088,240
April	835,705,064	68,523,774
May	838,462,680	67,210,504
June	838,276,428	67,401,484
July	840,198,625	68,441,816
August	836,574,099	69,220,045
September	826,514,621	70,063,414
October	816,623,852	70,201,939

Considering the abnormally depressed conditions, due to readjustment generally in Canada and to the war, bank credit to business in Canada has been well maintained. In October it was only 5.2 per cent. less than a year ago, which obviously is an excellent showing. In the wild days of 1912, domestic current loans were but $63,000,000 greater than to-day. To make a strictly accurate comparison, loans to municipalities in the statement under review should be included. When this is done, current loans now are only $16,000,000 less than in October, 1912. The loose talk about the curtailment of credit, therefore, is not proved by the bank statistics. Naturally, little new money is being advanced now, for the same reasons that govern the methods of any good business men.

Call loans in Canada were slightly increased in October, and remain at about the same level as for many months past. The banks have apparently extended to the stockbrokers proper and legitimate facilities to straighten the stock exchange situation. It should be borne in mind that call loans in Canada, part of which represent loans to Canadian stockbrokers, total only $70,201,939 and not $55,000,000 as one enthusiastic bank critic had it last month.

The following table shows the expansion of loans at home and abroad, during the past four years:

	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1910	[illegible]	[illegible]	[illegible]	[illegible]
1911	[illegible]	[illegible]	[illegible]	[illegible]
1912	[illegible]	[illegible]	[illegible]	[illegible]
1913	862,313,367	58,171,884	71,118,255	93,346,810
1914	816,623,852	42,046,716	70,201,939	81,201,671

Call loans abroad, chiefly in London and New York, [illegible] last month. [illegible] The call loans abroad have been reduced [illegible] since the end of July, despite the [illegible] such loans could not be called in [illegible] days before the outbreak of war [illegible] of these loans was $125,000,000. At the end of [illegible] $81,000,000, a reduction of $44,000,000 [illegible]

Current loans in Canada are $135,000,000 greater than in October, 1910, and call loans abroad, $22,000,000 less. Other loan accounts are about the same.

The following table shows the course of domestic deposit accounts for the past thirteen months:—

	On demand.	After notice.
1913—October	$389,856,507	$621,511,207
November	384,486,046	625,803,150
December	381,375,509	624,092,326
1914—January	339,811,339	635,135,955
February	337,516,595	640,927,130
March	345,590,042	646,143,604
April	350,515,993	653,679,223
May	340,748,488	663,945,753
June	355,006,229	663,650,230
July	346,854,051	671,214,125
August	338,984,418	659,399,151
September	348,284,206	658,401,501
October	348,732,830	659,806,682

The way in which the deposits accounts are being maintained is gratifying. Both demand and after notice deposits increased slightly in October. The latter account is 6.1 per cent. larger than a year ago, a very favorable change. The demand deposits are 10.5 less than a year ago.

The deposits record for the past five years for the month of October is given in the following table compiled by *The Monetary Times*:—

October.	On demand.	After notice.	Total.
1910	$280,838,612	$549,016,725	$ 829,855,337
1911	331,053,562	586,451,045	918,404,607
1912	383,814,572	640,097,928	1,023,912,500
1913	389,856,507	621,511,207	1,011,367,714
1914	348,732,830	659,806,682	1,008,539,512

The total deposits are still above the billion dollar mark.

Loans to municipalities were again increased in October. Since April the bank loans to civic authorities have increased by $15,000,000. The following table shows the course of this account during the past year:—

Month.	Bank loans to municipalities.
July, 1913	$43,121,384
August	41,310,281
September	37,465,383
October	37,846,369
November	35,172,817
December	30,518,573
January, 1914	29,301,620
February	30,372,854
March	31,899,843
April	30,168,812
May	33,689,577
June	37,269,571
July	36,372,334
August	39,664,534
September	44,338,873
October	47,316,076

If the [illegible] bank statement is able to make equally [illegible] future months, as in October, there [illegible] at the strong position of [illegible]

CANADA'S WAR MINISTER

Sir Robert Borden, as premier, should insist that Major-General Sam Hughes as minister of militia should cease his irresponsible chatter. If that is impossible, the minister of militia should be asked to resign, and resign. When the talkative minister attended the directors' luncheon at the National Exhibition, Toronto, in September, he addressed probably a hundred newspaper men. Tactfully, they gave his utterances scant notice in their journals afterwards. One remark then was that he had heard that German-Americans from Buffalo might invade Canada. "Let 'em come," said the minister. "We have 10,000 men here who will trim them to a finish." At a public meeting in London, Ont., last week, the minister is reported to have said: "My critics will stop their yelping as a puppy dog chasing an express train gives up its job as a useless task," adding that the engineer did not stop to throw stones, and promising himself some day to stop and "shy a rock." Interviewed by Toronto reporters later, the minister is reported as saying: "Shut up! that is about all I want on that. . . . I warned you to shut up about that. Shut up! don't try to explain." His public reprimand of Major-General Lessard in Toronto was also inexcusable.

Major-General Sam Hughes is supposed to represent in the cabinet the people of Canada. But he does not represent them, because there is not a citizen, except partisan blinded politicians, who approves of the minister talking in this undignified way. Sir Robert Borden, Sir George Foster, Hon. W. T. White, and other ministers have a high and proper appreciation of the dignity of cabinet office in the Dominion. They appreciate also the gravity of the times. Major-General Sam Hughes may be a military genius, but he seems to have entirely lost comprehension of the dignity of his position. Instead of creating confidence with a quiet and business-like manner, he [illegible] as a disturbing firecracker. The way to repair matters is for the minister of militia to stop talking as do some spoiled eight-year-old schoolboys.

The alternative is to appoint a war minister for Canada who is not too proud or too clever to emulate the ways of the war minister for Great Britain.

◆

If we are confident, the inevitable stays; if we grouch, it stays.

* * *

In the midst of your comforts, remember the starving, homeless Belgians.

* * * *

Keep up courage and confidence. It's hard work swimming against the stream, but the tide will turn.

* * * *

Mexico may have four presidents. That would look like a strong Dominion cabinet in good working order.

* * * *

We might sympathize with your complaints about business and finance and the situation, as being well grounded, if you lived in Berlin, Germany.

CANADA'S BANK FAILURES

Those who are inclined to exaggerate the indiscretions of Canadian banks may be reminded that in a period of from twelve to fifteen years, the percentage of total losses involved in Canadian bank failures is 14 cents on $100. An examination of Canada's record elicits a satisfactory result, especially in view of the fact that the country is young and has been passing through strenuous development stages. Eleven Canadian banks have failed since Confederation. Here is a statement, compiled by Sir Edmund Walker, which shows the total loss to depositors has been about $6,000,000:

1. Total assets of Canadian banks which have failed since Confederation ....$	77,780,419
2. Total assets of Canadian banks as on December 31, 1912	1,526,081,158
3. Total liabilities to the public of Canadian banks on December 31, 1912	1,292,451,137
4. Total losses by creditors from bank failures since Confederation	6,090,357
5. Total losses by creditors through failures of banks which could have been organized under the present Bank Act..	2,176,966

These losses were sustained by four banks as follows: Exchange Bank, $574,587; Central Bank, $7,083; St. Jean Bank, $296,988; Farmers' Bank, $1,298,308.

The Farmers' Bank catastrophe represents more than one-half of all the losses by all the banks that have failed in Canada since Confederation which could have been created under the present Bank Act. To return to the table:

6. Percentage of "total assets of failed banks since Confederation" to "total assets of all banks on December 31, 1912" (and I think that is the correct way of stating the matter).....	5.09%
7. Percentage of "total losses by creditors" of failed banks to

This Bank annually submits its Books and statements to independent outside audit.

	"total assets" of failed banks (taking in all the banks) is...	7.830%
8.	Percentage of "total losses by creditors" of failed banks to "total assets of all banks on December 31, 1912," is	.3991%
9.	Percentage of "total losses by creditors" through failures of banks which could have been organized under present Bank Act to "total assets as on December 31, 1912," is	.1426%

That is a percentage of total losses to total assets of fourteen-hundredths of one per cent., or a little over one-eighth of one per cent. It means that we have carried out our banking, from Confederation down to the present time (and having regard to the banks that can be created under the present act) with losses amounting to a little more than one-eighth of one per cent. of the total assets of the banks.

In order to make a comparison between Canada and the United States, one would have to bring in the State and Trust Banks, as well as the National Banks. Canada has only one system, whereas the United States has three. One item helps in the comparison, between the two countries, that is, the total losses of creditors to the total assets of failed banks. The comptroller of the United States, speaking of the results of liquidation of 401 banks of which the affairs were finally settled, says: "The net loss to depositors was 17.71 per cent. on the amount of claims proved." So far, in the case of the 400 banks wound up under the National Bank system of the United States, the depositors lost 17.71 per cent., and in Canada's case, 7.83 per cent. This covers a period of twelve or fifteen years.

◆

If you believe in any sort of a business future, demonstrate your faith now.

* * *

Those who complain of the rigid press censorship at the front, forget the stakes involved in this war.

* * * *

This will be a Christmas of useful giving. Put a life insurance or accident policy, or a baby bond in the stocking.

* * * *

Santa Claus was never a pessimist and he has been through enough economic cycles to turn an ordinary mortal dizzy.

* * * *

Thrift and foresight should not be penalized. On that principle alone, life insurance premiums should not be taxed. Such a tax touches every policyholder's pocket.

* * * *

The Turkish minister of finance has announced that the interest on the loan of 1900 will be paid only to such bondholders as present themselves at his office. The Turkish way of passing dividends scores chiefly on the ground of politeness.

RAILROAD EARNINGS

The following are the railroad earnings for the first three weeks of November:—

Canadian Pacific Railway.

	1914.	1913.	Decrease.
November 7	$1,908,000	$3,214,000	$1,306,000
November 14	1,878,000	3,124,000	1,246,000
November 21	1,7[illegible]0,000	3,110,000	1,[illegible]30,000

Grand Trunk Railway.

November 7	$ [illegible]	$1,178,757	$ 271,766
November 14	[illegible]	1,022,[illegible]75	161,690
November 21	[illegible]	1,080,010	8,403

Canadian Northern Railway.

November 7	$ 384,[illegible]	$ 620,400	$ 236,100
November 14	[illegible]	64[illegible],500	2[illegible]2,900
November 21	[illegible]	608,000	235,000

War conditions in Canada and a slow movement of western wheat are reflected in the various railway companies' earnings, which show large decreases, as indeed do all the other railway companies of the world.

The Canadian Pacific Railway statement of earnings for October and the four months, 1914, is as follows:—

October.

		Decrease.
Gross	$ [illegible]	$5,1[illegible]7,228
Expenses	[illegible]	2,[illegible]15,[illegible]
Net	$ [illegible]	$2,[illegible]81,520

Four Months.

Gross	$40,[illegible]	$9,[illegible]28,017
Expenses ...	[illegible]	[illegible]
Net	$14,82[illegible]	$ [illegible]

The statement shows that operating expenses for October were [illegible] per cent.

BANK CLEARING HOUSE RETURNS

The following are the figures for the Canadian Bank Clearing Houses for the weeks of November 20, 1913; and November 19, 1914, with changes:—

	Week ending Nov. 19, '14.	Week ending Nov. 20, '13.		Changes.
Montreal	$ 45,445,581	$ 54,815,511	—	$9,326,095
Toronto	33,480,416	40,807,709	—	7,318,293
Winnipeg	41,940,417	46,902,215	—	4,961,798
Vancouver	6,216,613	10,386,034	—	4,169,421

NOVEMBER FIRE LOSSES

Satisfactory Diminution is Shown in Eleven Months' Waste from Burnings

The Monetary Times' estimate of Canada's fire loss during November amounted to $858,932, compared with October loss of $772,115 and $2,200,486 for the corresponding period of last year. The following is the estimate for the October losses:—

Fires exceeding $10,000	$746,899
Small fires	74,689
Estimates for unreported fires	37,344
	$858,932

The following are the monthly totals of the losses by fire for 1914, compared with the three previous years' losses:—

	1911.	1912.	1913.	1914.
January	$2,250,550	$3,002,650	$3,913,385	$2,796,312
February	941,045	1,640,153	2,037,386	2,920,749
March	852,380	2,261,414	1,710,756	2,130,552
April	1,317,900	1,355,055	1,470,622	1,916,238
May	2,564,500	2,251,815	2,123,868	1,539,502
June	1,151,150	4,220,412	3,069,446	1,267,416
July	5,384,300	1,711,3[illegible]1	2,579,698	2,033,130
August	920,000	1,164,760	3,034,775	2,021,379
September	1,123,550	883,040	1,468,324	726,278
October	580,750	1,016,218	1,38[illegible],572	772,115
November	1,506,500	1,184,010	2,200,486	858,932
December	2,866,950	1,7[illegible],005	1,354,3[illegible]	..
Totals	$21,459,575	$22,900,712	$26,346,618	$18,491,611

Comparison of Provincial Losses.

The fire waste in each province for the first ten months of 1913 and 1914 has been estimated by *The Monetary Times* as follows:—

	1914.	1913.
Ontario	$ 6,842,632	$ 7,853,708
Quebec	4,175,074	4,260,121
British Columbia	1,873,181	1,516,015
New Brunswick	1,764,637	1,080,920
Alberta	1,057,180	3,038,334
Manitoba	[illegible]	[illegible]
Saskatchewan	960,020	2,172,683
Nova Scotia	[illegible]	[illegible]
Prince Edward Island	42,497	455,091
	$18,491,611	$24,002,318

The fires reported at which the loss was estimated at $10,000 and over:—

Revelstoke, B.C., Nov. 1	Sawmill	$250,000
Quebec, Que., Nov. 5	Shoe factory	30,000
Vancouver, B.C., Nov. 9	Hotel	10,000
Stratford, Ont., Nov. 12	Furniture warehouse	43,000
Fort George, B.C., Nov. 1[illegible]	Business section	150,000
Mount Dennis, Ont., Nov. 17	Factory	10,000
Quebec, Que., Nov. [illegible]	Commercial academy	40,000
Saskatoon, Sask., Nov. 20	Warehouse.	
Eyebrow, Sask., Nov. 21	Business section	100,000
Levis, Que., Nov. 22	Business block	25,000
Quebec, Que., Nov. 26	Factory	30,000

What Fire Destroys.

During October and November there were destroyed 17 horses, 5 pigs, 22 cows, 500 chickens, $15,000 worth of varnish, 5 automobiles, 39 gallons of gasoline, 6,800 bushels of wheat, 500 bushels of beans, 300 loads of hay.

The structures damaged and destroyed included 44 residences, 15 barns and stables, 21 stores, 9 factories, 5 hotels, 3 apple evaporators, 3 sawmills, 2 restaurants, 2 churches, 2 business sections, 2 colleges, 1 poolroom, 1 garage, 1 flour mill, 1 warehouse, 1 power-house, 1 cheese factory, 1 station, 1 bank, 1 bakery.

Of the presumed causes 6 were matches, 4 incendiary, 4 defective stovepipes, 3 explosions, 3 gasoline, 3 defective chimneys, 2 sparks, 2 gas-grates, 2 live coals, 2 defective wiring, 2 sparks, 1 spontaneous, 1 coal oil, 1 gas iron, 1 overheated stove, 1 overheated furnace, 1 upset lantern, 1 lightning, 1 short circuit, 1 engine back-firing.

During November 12 persons were reported as having lost their lives through fire. Three more deaths were reported in October, making the revised total for that month 9.

The following table compiled by *The Monetary Times* shows deaths caused by fire during the last six years:—

	1909.	1910.	1911.	1912.	1913.	1914.
January	16	27	27	27	14	26
February	8	15	12	11	21	18
March	16	20	18	24	22	27
April	18	37	20	15	11	22
May	21	15	28	18	33	8
June	16	52	13	6	18	12
July	4	15	110	9	9	8
August	17	11	22	16	29	3
September	10	10	13	6	27	9
October	26	16	17	21	15	9
November	14	19	20	22	24	12
December	33	19	17	28	13	..
Totals	210	256	317	203	236	154

The fires at which the fatalities occurred were:—

Irricana, Alta., Oct. 30	Burning building	2
Milwood, Man., Oct. 31	Prairie fire	1
Montreal, Que., Nov. [illegible]	Playing with matches	1
Ottawa, Ont., Nov. 9	Playing with matches	1
Winkler, Man., Nov. 9	Burning building	1
Lachute, Que., Nov. 11	Burning building	2
Winnipeg, Nov. 1[illegible]	Pouring gasoline on fire	1
Winnipeg, Man., Nov. 13	Pouring gasoline on fire	2
Fort George, B.C., Nov. 1[illegible]	Burning building	1
Waubaushene, Ont., Nov. 20	Burning building	2
Gilbert Plains, Man.	Burning building	2
Creston, B.C., Nov. 2[illegible]	Pouring coal oil on fire	1

MONTREAL UNDERWRITERS ARE WRITING POLICIES

Montreal Life Underwriters' Association, of which Mr. F. M. [illegible] is the active secretary, is essaying to fulfil all the [illegible] of the commandment, "Thou shalt do [illegible]" and the results were shown at a recent meeting, when Mr. [illegible] told how he had written nearly $[illegible] of business in about six weeks in rural districts, [illegible] by preaching the gospel of protection. Mr. J. E. [illegible] told how business could be had in Montreal by hard work. Mr. S[illegible] confirmed this, and explained [illegible] real estate and clothing men; [illegible] good as usual; and Mr. Butler had been successful through advising his agents to canvass rural communities.

Mr. J. F. Weston, managing director of the Imperial Life Assurance Company, Toronto, now known as "Capt. Weston," through [illegible] the command of the Insurance Rifle Club at Toronto, was the chief speaker of the evening, and dealt with [illegible] phases of legislation affecting the life insurance business. Mr. Weston was strongly in favor of conserving [illegible] rights, and against transferring them to the provincial authorities.

A SAFE INVESTMENT

It has Correspondents in all Cities of importance throughout Canada, the United States, the United Kingdom, the Continent of Europe, and the British Colonies.

Collections made in all parts of the Dominion and returns promptly remitted at lowest rates of exchange. Letters of Credit and Travellers' Cheques issued available in all parts of the world.

Why We are at War

(Prepared for the Victoria League)

By SIR EDWARD COOK

IV.

Belgium was constituted "an independent and perfectly neutral state" by treaties of 1831-2 and 1839. To these treaties Germany as well as Great Britain was a party. At the outbreak of the Franco-Prussian War in 1870, the government of Mr. Gladstone proposed a treaty to Prussia and to France, providing that if the armies of either violated the neutrality of Belgium, Great Britain would co-operate with the other for its defence. Both countries assented. To this action "Mr. Gladstone then and always attached high importance." "We do not think it would be right," he said, "even if it were safe, to announce that we would in any case stand by with folded arms, and see actions done which would amount to a total extinction of public right in Europe." "I do not think we could look on while the sacrifice of freedom and independence was in course of consummation." "There is also this further consideration, the force of which we must all feel most deeply, and that is the common interests against the unmeasured aggrandizement of any power whatever."

The same question confronted Mr. Asquith's Government in 1914, and they took the same view of it. On July 31st, Sir Edward Grey in view of existing treaties, asked both France and Germany "whether they were prepared to engage to respect neutrality of Belgium as long as no other power violates it." On the same day he "assumed" in a communication to Belgium, "that the Belgian government will maintain to the utmost of her power her neutrality." Belgium in reply "expects and desires that other powers will observe and uphold her neutrality, which she intends to maintain to the utmost of her power." France immediately gave Sir Edward Grey the desired assurance. Germany gave no answer.

Violation of Law.

On August 3rd Germany addressed an ultimatum to Belgium, saying that she would be treated as an enemy unless she consented to the violation of her territory. Belgium "categorically refused this as a flagrant violation of the law of nations," and the King of the Belgians appealed in the following terms to King George: "Remembering the numerous proofs of your Majesty's friendship and that of your predecessor, and the friendly attitude of England in 1870 and the proof of friendship you have just given us again, I make a supreme appeal to the diplomatic intervention of your Majesty's government to safeguard the integrity of Belgium."

On August 4th the British government addressed an ultimatum to Germany, saying that unless by midnight she gave a satisfactory reply to the question asked on July 31st, "His Majesty's government feel bound to take all steps in their power to uphold the neutrality of Belgium and the observance of a treaty to which Germany is as much a party as ourselves." Germany gave no reply except by the forcible violation of Belgian territory, and Britain accordingly declared war.

What We are Fighting For.

Thus, by an instructive coincidence, a crisis which began by the determination of Austria (backed by Germany) to apply brute force against the independence of a small state in South-eastern Europe came to a head, so far as Britain is concerned, by the determination of Germany (in alliance with Austria) to ride rough-shod over the neutrality of a small state in North-western Europe. "Gentlemen," said the German chancellor in the Reichstag (August 4), "we are now in a state of necessity, and necessity knows no law. Our troops have occupied Luxembourg, and perhaps are already on Belgian soil. Gentlemen, this is contrary to the dictates of international law. [illegible] Anybody who is threatened as we are threatened, and is fighting for his highest possessions, can have only one thought—how he is to hack his way through."

"If I am asked what we are fighting for," said the prime minister in the House of Commons (August 6th), "I can reply in two sentences. In the first place, to fulfil a solemn international obligation—an obligation which, if it had been entered into between private persons in the ordinary concerns of life, would have been regarded as an obligation not only of law, but of honor, which no self-respecting man could possibly have repudiated.

"I say, secondly, we are fighting to vindicate the principle which, in these days when material force sometimes seems to be the dominant influence and factor in the development of mankind, that small nationalities are not to be crushed, in defiance of international good faith, by the arbitrary will of a strong and overmastering power. I do not believe any nation ever entered into a great controversy—and this is one of the greatest history will ever know—with a clearer conscience and stronger conviction that it is fighting, not for aggression, not for the maintenance even of its own selfish interest, but in defence of principles, the maintenance of which is vital to the civilization of the world, and with the full conviction, not only of the wisdom and justice, but of the obligations which lay upon us to challenge this great issue."

The Issues at Stake.

"I ask the house," said Sir Edward Grey (August 3rd); "from the point of view of British interests, to consider what may be at stake. If France is beaten in a struggle of life and death, beaten to her knees, loses her position as a great power, becomes subordinate to the will and power of one greater than herself—consequences which I do not anticipate, because I am sure that France has the power to defend herself with all the energy and ability and patriotism which she has shown so often—still, if that were to happen, and if Belgium fell under the same dominating influence, and then Holland and then Denmark, then would not Mr. Gladstone's words come true, that just opposite to us there would be a common interest against the unmeasured aggrandizement of any power?

"It may be said, I suppose, that we might stand aside, husband our strength, and that, whatever happened in the course of this war, at the end of it intervene with effect to put things right and to adjust them to our own point of view. If in a crisis like this we ran away from those obligations of honor and interest as regards the Belgian Treaty, I doubt whether whatever material force we might have at the end it would be of very much value in face of the respect that we should have lost.

At End of the War.

"At the end of this war, whether we have stood aside or whether we have been engaged in it, I do not believe for a moment even if we had stood aside and remained aside—that we should be in a position, a material position, to use our force decisively to undo what had happened in the course of the war, to prevent the whole of the west of Europe opposite to us, if that had been the result of the war, falling under the domination of a single power, and I am quite sure that our moral position would be such—" (The rest of the sentence was lost, says the Times, in a loud outburst of cheering.)

The issues being thus vital to the civilization of the world, and to the freedom and integrity of Great Britain and of the British Dominions, "let us be sure," as the prime minister said, that all the resources, not only of this United Kingdom, but of the vast Empire of which it is the centre, shall be thrown into the scale." And let us bear ourselves through the struggle in the spirit of Abraham Lincoln's war motto: "With malice toward none; with charity for all; with firmness in the right as God gives us to see the right—let us strive on to finish the work we are in; to bind up this nation's wounds; to care for him who shall have borne the battle, and for his widow and orphan; to do all which may achieve and cherish a just and lasting peace."

The above article and three preceding ones can be obtained in pamphlet form from the Macmillan Company of Canada, Limited, Toronto. Post free, 10 cents.

◆

That the United States embargo on Canadian livestock will not affect the livestock industry in Saskatchewan in the near future is the opinion of the deputy minister of agriculture of Saskatchewan. In speaking of this matter he says: "The Canadian market is strong, owing to war orders, and it is still possible to ship hogs to South St. Paul if they are immediately slaughtered. Last season [illegible] feeder stuff, but it is probably not [illegible] such exports should be checked."

ALGOMA'S PRESIDENT EXPLAINS FINANCING

Corporation is Looking Toward Canada's Further Development

How is it that the Lake Superior Corporation is not going to be made to pay up? That is a very natural question in the circumstances, and the committee has examined the position from two points of view, Mr. J. F. Taylor, president of the Algoma Steel Corporation, Limited, told the bond and note holders of the company at a meeting in London, cabled reports of which have already appeared in *The Monetary Times*. First of all, we have had regard to the earnings of the Lake Superior Corporation; and secondly, to the free assets available. Now, I think you will agree with me when I say that the Lake Superior Corporation in its position of guarantor is practically in a new position, and for the same cause that we are in trouble with the Algoma Steel Corporation the Lake Superior Corporation has not had the necessary time nor opportunity out of dividends received to create the necessary reserves in respect of its guarantees. As a matter of fact, at June 30th, 1913, the income of the corporation amounted to something over $800,000, whereas this year at June 30th last it was cut in half. So far as free assets are concerned, the Lake Superior Corporation has a certain amount of free assets, the principal among which are the preferred and common stocks of the Algoma Steel Corporation. Now, the question has been put to us, Why not give the bond and note holders a share in these stocks—give them a bonus out of those stocks? The Lake Superior Corporation directors have not been callous in the matter, and have thought out the position very seriously, particularly with a view to the future. They have thought it out in relation to their existing guarantees and their other obligations, and could not conscientiously see their way to give up part of those stocks at all. It is perfectly true that if the bondholders or the trustees like to sue the Lake Superior Corporation in respect of its guarantees judgment would in all probability be given against the Lake Superior Corporation, but what would be the effect of that judgment?

Gained Control of Corporation.

The corporation, as we have seen, has limited assets at the present moment, and the net result would be to bring their first mortgage bondholders on the scene, and they, keep in mind, hold $5,800,000 of the purchase money bonds of the Algoma Steel Corporation, so that our complications might be serious. It was with a view to avoiding such, and also with a view to avoiding exacting conditions that the present scheme has been put forward and a voting trust adopted. You may be inclined to think, so far as the voting trust is concerned, that you have gained nothing at all. It is perfectly true that the committee acting for the bondholders and noteholders—the committee that will act as trustees—have not gained anything by way of assets; but they have gained something, they have gained control of the Algoma Steel Corporation, and will prevent the Algoma Steel Corporation in effect, from parting with any of its cash resources.

Now for the scheme itself. As I have said, we have done our best, in the light of all circumstances, to present as fair and as reasonable propositions as it was possible. Some criticism has been levelled at us because we have made proposals which apparently seem to favor the noteholders. In the first place, a matter of £15,000 of bonds has been added to the noteholders' security. This is a small matter, so I will pass it over. But the main point that has been attacked is that we propose to give the noteholders at maturity 105.

Position of Noteholders.

I just want to say a few words about the position of the noteholders. We received something like £500,000 at the beginning of this year; they have received one payment of interest, and out of three years will receive in cash two payments altogether. In addition they hold first and refunding bonds of the Steel Corporation at 66, so that, generally speaking, they are in a stronger position, but have been somewhat less fortunately treated than the first and refunding bondholders in the matter of interest. Hence it was a case for a bargain, and we are free to admit that we have made the best bargain in the circumstances. The cash position of the Algoma Steel Corporation involves my going over the [illegible] of the past year. Before dealing with the accounts of the Steel Corporation and [illegible] its position, you will be glad to know that the auditors of the company, a first class firm, Messrs. Barrow, Wade, Guthrie and Company, say, with reference to the accounts, that there has been improvement all round, which applies to the more important matter of the conservative allocation of expenditures as between expense and property accounts. There is evidence, they say, of anticipation and provision for extraordinary items of expense, which in prior years have only been taken care of when payment for such has been made. With that preface as to the accuracy and standing of the accounts, I would like to take you over the transactions for last year, the difference between the balance sheet figures at June 30th last and June 30th of the previous year practically representing the figures which I am going to quote to you now.

Cash Position Shown.

I find that in respect of cash we had reduced trust funds by $80,000 throughout the year, investments $230,000, materials $1,800,000, and cash $600,000. These reductions, in effect, represent cash released for the purposes of the business; but in addition, from the proceeds of the sales of the notes we have practically had $2,500,000, making altogether about $5,000,000 put into the business in one way or another. Now, the question which naturally arises is: What has been done with that $5,000,000? I find that our products represent an increased value of $200,000; that the Steel Corporation has lent to its subsidiary companies—the coal companies—$200,000; that its property account has been increased by $1,000,000, representing expenditure for its hydro-electric development, on its open hearth furnaces, etc.; that the accounts receivable have increased by nearly $1,000,000, and that the bank and other loans have been reduced by over $2,500,000. Why does the Steel Corporation find itself in such a position that it has to ask at this time that its interests be funded? That is explained, said Mr. Taylor, by the fact that at June 30th we had over $1,000,000 locked up in accounts receivable, and that instead of having about $600,000 in hard cash, as we had at June 30th of the previous year, we had only $50,000, and we are suddenly faced with a situation that is unequalled, and the net result is that, as between our cash position and seriously reduced earnings, we have had to conserve and to be wise for the future.

Reduced Pay-Roll.

Mr. Taylor pointed out the capacity of the Steel Corporation had been doubled. Referring to operations, he said the reduced pay-roll was practically $100,000 per month. No less than 700,000 tons of ore were imported in six months, because during the other six months our ports are icebound. We import a similar quantity of coal, and provision has to be made to currently finance all this. Hitherto we have depended very largely on temporary loans, and the situation at June 30th, 1913, in that respect was not a very comfortable one, hence our making the large reduction in our loans. In concluding, the president remarked: I have always said that in Canada, in the West, the prairies have not been opened up by the farmers, but by the railway companies, and following the railway companies has come the Algoma Steel Corporation, which has supplied the preponderance of rails hitherto, and will probably continue to do so, so that everything points to a safe situation when normal conditions are resumed.

QUEBEC LOAN COMPANIES AND QUESTIONS

Legislative Enquiry Does Not Bring Many Answers Regarding Operations

Out of thirty-seven companies only five have sent in answers to the questions sent out by Mr. T. D. Bouchard, M.P.P., president of the select committee, appointed at the last session of the Quebec legislature to enquire into the operations of the companies selling co-operative loan contracts in that province, and some answers are so evasive as to be of no practical use in the enquiry. Mr. Bouchard told the committee that he had been informed some companies would refuse to answer questions concerning their mode of operation, and as to whether or not they fulfilled the requirements of the Joint Stock Companies' Act. He thought that representatives of the companies should state their objections to the enquiry immediately.

Mr. T. Rinfret, K.C., acting for La Compagnie Co-operative d'Immeubles, and Mr. Cabana, representing La Caisse Hypothecaire, contended that the committee should limit the scope of its enquiry to matters bearing on the practicability of the principle involved in the companies' operation. They claimed that large amounts had been invested by the shareholders, and that questions relative to the actual operations of the companies would be opposed to the shareholders' interests.

Protection for Subscribers.

To this argument Mr. Bouchard replied that the best way to appreciate the value of this principle—that of protecting the investors—was to see how companies were actually operated. Mr. Bouchard said it was true the shareholders had to protect their interests, but that the money of the subscribers must also be protected. There were about ten thousand subscribers to the different companies in the province, he pursued, and the legislature wanted to know what protection was afforded them by the co-operative loan companies. To obtain such information the committee would have to find out whether or not the companies were fulfilling the requirements of the law. It was important to know the assets and liabilities of the different companies, in order to find out whether the funds of the subscribers were protected otherwise than by mortgages held as security for loans made exclusively from the subscribers' funds.

Superintendent of Insurance Gives Opinion.

Mr. William Chubb, superintendent of Quebec's insurance department, giving evidence, said: To his knowledge there was no law to curtail the operation of loan companies in the province. The first subscribers, he said, profited by their outlay, but those who subscribed later lost in proportion to the gains of the first. Mr. Chubb testified that the last subscribers to any company, provided it did not undergo legal liquidation, would have paid $1,000, besides the cost of administration, before they could obtain the loan of $1,000, the amount usually specified in the contracts. They would, moreover, lose the accumulated interest on the money they had subscribed.

Mr. Chubb thought that the [illegible] period of deferment of the loan by companies collecting $20 yearly from each subscriber would be about ten years, but a fixed period of this length could not be established without a continuity of members, or before the company had been in existence for thirty years.

LONDON PAPER IS WORLD CURRENCY

Lloyd George Speaks of British War Loan—How International Trading is Carried On

As was anticipated, the British war loan of $1,750,000,000, for which bonds were issued, has been over-subscribed.

Chancellor D. Lloyd George told the Imperial House of Commons that a feature of the loan was the enormous number of individuals, totalling nearly 100,000, who had made application for small sums. These, the chancellor declared, would receive the first allotments. He added that the loan is the largest ever raised.

In the course of a statement concerning financial conditions in the country, the chancellor stated that the financial deadlock which followed the outbreak of war was due to inability to collect outstanding debts abroad. "We can neither buy nor sell, although the whole world owes us money."

As an instance, Mr. Lloyd George referred to the United States which, he said, owed Great Britain about a thousand millions sterling ($5,000,000,000), "but we could do no business," he added.

Dealing with the steps taken by the government to assist commerce during the war, Mr. Lloyd George said that the government had undertaken responsibility which no government ever had been called upon to assume before.

"We had not merely our own business to run," the chancellor of the exchequer continued, "but we were an essential part of a machine that ran the international trade of the world. We carried half the produce and provided the capital that moved this produce from one part of the world to another, not merely for ourselves, but for other countries."

London Paper is World Currency.

Giving instances, he referred to the cotton trade, and said that all the movements from the plantations to the ultimate destination of the cotton were represented by paper signed either at London, Manchester, or Liverpool. When the United States bought cotton, or silk, or tea in China payment was made through London by means of these documents. That showed, Mr. Lloyd George said, how complicated the system was.

The paper issued in London had become a part of the currency of the world. Into this fine, delicate, paper machinery had crossed a great war, affecting two-thirds of the people of the whole world, and confusion was inevitable. It was as if a violent kick had been given to an ant heap, and for a moment there was confusion and panic.

The deadlock which existed, the chancellor pointed out, was not due to any lack of credit in this country. It was due to the failure of remittances from abroad.

Mr. Lloyd George told his hearers that the action which the British government had taken was to save Birtish trade, British commerce, British labor, and British lives. The government, he said, had hypothecated the credit of the state in order to restore these exchanges upon which the commerce and industry of the country depended, and upon which the whole community depended for their daily life.

By this step, the speaker said, the unimpeachable character of the British bill of exchange had been maintained. It was vital to the good [illegible] of this country that this type of British paper which had become currency for the whole of the trade of the world should be unimpeachable, and that no one should ever be able to say that in a day of crisis it had been dishonored.

Discounting Hundreds of Millions.

[illegible] billion pounds sterling ($600,-000,000 [illegible]), Mr. Lloyd George continued, had been discounted [illegible] Bank of England, and that showed, he said, [illegible] between [illegible],000,000 and 500,000,000 [illegible] at the beginning of the war a [illegible] in the ordinary course.

[illegible] bills which had arrived at maturity [illegible] the Bank of England had found money, was [illegible] estimated that at the end of the [illegible] pounds of bills in what [illegible] through their belonging to [illegible] other reasons.

[illegible] lost to the great accepting [illegible] the whole of these transactions [illegible] be equal to the cost of a single [illegible] the war, and in addition British commerce [illegible] saved from one of the worst [illegible]

The Hamilton Provident and Loan Society

PERSONAL NOTES

A. H. COX.

Mr. Alfred H. Cox has been appointed vice-president and managing director of the Provident Investment Company, Mr. H. C. Cox having become president of the company in succession to the late Mr. E. W. Cox. Mr. Alfred Cox is another of the famous Peterborough family of that name and being only 30 years of age, is a comparatively young man to take charge of the management of such a company as the Provident Investment. However, he had an excellent training under his uncle, the late Senator George A. Cox and has shown a capable grasp of business affairs. Since 1899 when Mr. Cox first entered the Central Canada Loan and Savings Company as a clerk, he has risen to various positions in various financial offices until in 1907, the late Senator Cox utilized his services to manage a number of his personal investments. Mr. Cox is also president of Cox and Cummings, Limited, a firm of contractors and builders, who are taking an active part in the development of Toronto.

Mr. A. G. Ross, formerly connected with the Trusts and Guarantee Company of Toronto, has been appointed general manager of the Saskatchewan General Trusts Corporation.

Mr. Peleg Howland, the new vice-president of the Imperial Bank, was born in Kleinburg, Ontario, in 1857, and he is president of the H. S. Howland, Son and Company, wholesale hardware merchants, Toronto.

Mr. C. B. Gordon, the well-known Montreal financier, president of Dominion Textile Company, and ex-president Canadian Manufacturers' Association will probably go to the front with the second Canadian contingent.

Mr. James Thom, formerly manager of the White Star-Dominion line offices in Canada, died at Montreal. Mr. Thom was formerly at the head of the old Beaver line of steamships, which was merged with the Elder Dempster lines some years ago.

Mr. G. C. Johnson has been appointed manager of the North Empire Fire Insurance Company, succeeding Mr. M. Long, vice-president of the company, who has retired from the management. Previous to this appointment Mr. Johnson was with the Union of Paris Fire Insurance Company.

Mr. Edward Hay, who was recently appointed general manager of the Imperial Bank, was born in Edinburgh, Scotland, in 1855, and entered the service of the Imperial Bank in 1875 when it was first incorporated. He was appointed inspector in 1889, and assistant general manager in 1902.

Mr. William Moffat, the new assistant general manager of the Imperial Bank, is a Canadian by birth, having been born in Pembroke, Ontario, in 1854. He served ten years with the Quebec Bank before joining the Imperial Bank in 1881. He was made chief inspector of the Imperial Bank in 1902.

Sir Thomas Shaughnessy, president of the Canadian Pacific Railway, is one of Canada's prominent men, whose name has been linked to the post of High Commissioner in London. Sir Thomas' reply to the suggestion: "I cannot imagine where or how these stories connecting my name with the High Commissionership originate. Such a thing has never been given a moment's consideration. I can only repeat what I have said before, that the balance of my active life will be devoted to the affairs of the Canadian Pacific Railway, if I am wanted," or in other words, "Canadian Pacific Railway first."

COMPANIES REGISTERED

The following companies have been registered to do business in Alberta: Oil Well Supply Company of Pittsburgh, Pa.; Pioneer Grain Company, Limited, of Winnipeg, Man.; Canadian Continental Coal Company, Limited, of Vancouver, B.C.; and Head, Wrightson and Company, Limited, of Thornaby-on-Tees, England.

◆

COMPANIES INCREASING CAPITAL

The following companies have increased their capital stock:—

Prince Edward Island.—The Rideford Fox Company, Limited, from $24,000 to $75,000.

Hamilton, Ont.—The United Gas & Fuel Company of Hamilton, Limited, from $500,000 to $1,000,000.

Edmonton, Alta.—The Montreal Oil Company, Limited, from $10,000 to $300,000. The Claresholm Oil Company, Limited, from $500,000 to $750,000.

◆

UNITED STATES COMPANY TO HANDLE MORTGAGES

The Amortization Mortgage Company, with capitalization of $1,000,000, and head offices at Pittsburgh, Pennsylvania, has been formed for the purpose of investing United States funds in Canada.

The directors are: Messrs. G. R. Wallace, of Wallace & Watson, attorneys at law; director, Thorny Creek Lumber Company; director, Euclid Manufacturing Company; vice-president, the Amortization Mortgage Company. J. L. Kendall, president and director, Kendall Lumber Company; president, H. C. Huston Lumber Company; director, First National Bank, Connellsville, Pa. J. P. Watson, president, First National Bank of Saltsburg, Pa.; treasurer, Mitchell-Watson Coal & Coke Company. W. B. Eichleay, treasurer and director, John Eichleay, Jr., Company; treasurer, Paden City Land Company; treasurer, Paden City Pottery Company. Wm. H. Sandford, president, First National Bank, Patton, Pa.; treasurer, Sapulpa Refining Company, Sapulpa, Okla. P. Brown, president and general manager, the Amortization Mortgage Company. James F. Ray, secretary, the Amortization Mortgage Company; and W. A. Shaffer, treasurer, the Amortization Mortgage Company.

Branches and agencies are to be opened up throughout Canada and the United States.

An initial issue of $500,000 is to be made at a premium of 15 per cent., the remainder being issued later. The prospectus of the company shows the profits made by Canadian corporations of a similar character. It is the intention of the directors to supplement the capital funds of the company by issuing first mortgage trust certificates, the proceeds of which will be invested.

Attention is drawn in the prospectus to the wonderful development of Western Canada, and the statement is made "That the rapid growth of mortgage companies in Canada is splendid evidence of their increasing popularity, and, with the active development of the country, resulting in a great increase in population and accumulation of wealth, the field for such companies is greatly enlarging and as a consequence, such companies cannot help but have a bright and prosperous future."

An amortization mortgage is a mortgage which provides for a regular repayment of a sufficient portion of the principal debt to extinguish it at its maturity.

CANNED GOODS AS A COMMERCIAL FACTOR

Consumers' Desire for the Packeted, Bottled and Tinned Article Has Built Up a Big Business

A few years ago, we were able to buy horse raddish by the root. The maid peeled it, chopped it, added the vinegar, and served it with the beef. To-day, we buy horse raddish already prepared, attractively bottled and labelled. We pay the extra cost of this prepared article. It has a direct effect on the cost of living. At the same time, the bottled, canned and packeted article has grown to be a big factor in commerce. The first Canadian canning factory was started at Grimsby, Ontario, by Mr. W. W. Kitchen, in 1868, although some canning of salmon had been done at St. John, N.B., in 1840, but without a factory being built. To day there are 125 million cans produced annually, or as one man has figured, enough to make a ribbon of cans from Toronto to New York, down to and across the Panama Canal, up to Vancouver and back to Toronto again. Canned goods especially have made a surprisingly rapid pace in trade spheres. Last year, $20,000,000 worth were exported from the United States. Canada exported in that year $6,934,000 worth of canned goods, importing also $4,124,000 worth. Canned and preserved goods, the basis of a big industry, come to Canada from all all parts of the world. For instance, we get anchovies, sardines, sprats and other fish packed in oil from the United Kingdom, Hong Kong, China, Germany, Italy, France, Japan, Norway, Spain, Belgium, Portugal and the United States. The largest share of prepared or preserved oysters consumed in the Dominion comes from the United States, although Hong Kong supplied 13,748 pounds of them last year.

Both Buyer and Seller.

This country is both an importer and exporter of prepared and preserved fish of various kinds. During the fiscal year ended March, 1913, we bought $178,495 worth of prepared fish, $8,000 worth preserved in oil, $79,000 worth of canned salmon and $43,000 worth of other preserved fish from countries all over the world, and as far apart as Japan and Russia, China and the British West Indies. At the same time, we shipped to points in every part of the globe 23,000,000 pounds of canned salmon with a value of $3,484,000. It is interesting to see to what countries Canadian canned salmon has found its way. The largest buyer is the United Kingdom, which purchased 16,000,000 pounds, valued at $2,605,000. Other large buyers were Australia, the Straits Settlement, New Zealand, France and Fiji. Smaller purchasers were the West Indies, South Africa, Hong Kong, Newfoundland, Belgium, China, Ecuador, Dutch East Indies, Japan, Mexico, the Philippines and many European countries. The Dominion is also a large exporter of canned lobsters, the value of these exports last year being more than $3,000,000. Other canned exports were meats, milk and cream, vegetables and fruits. Comparatively few canned fruits are exported, the value last year being $220,000. On the other hand we imported fruits in air tight cans or packages weighing 13,000,000 pounds with a value of $823,000. These came from many countries, although the United States supplied us with more than half.

Ginger From China.

Preserved ginger we got from six countries, China being the chief source of supply. We imported also jellies, jams and mincemeat, canned meats, canned poultry and game, fluid beef, canned soups, condensed milk, vegetables, chief of which were canned tomatoes and canned corn. The United States is probably one of the largest exporters of canned goods.

Canned meats exported by the United States amounted [illegible] to about $[illegible],000,000, pork and beef being about [illegible] each in the eleven months ending with November, 1913, while "other canned meats" amounted to $1,[illegible]50,000 in the same period. Canned beef, however, showed a falling off in exportations, having been about one half as much in 1913 as in [illegible] and little more than one-third as much as in 1911. Canned [illegible] also shows a slight decrease when compared with [illegible]. The canned meats go largely to the [illegible], as do also the condensed milk, of which the exports of the United States in the eleven months ended with November, 1913, [illegible]

[illegible] the large trade done in canned goods, [illegible] in the way of impure canned food. For [illegible], Dr. [illegible], the chief analyst at Ottawa, reported on 140 samples of canned [illegible] purchased in various parts of Canada. With a single exception, in which slight decomposition was found, [illegible] of the cans were in good condition. In the case of 140 samples of canned corn, they were all found to be in an excellent condition of preservation. Regarding the [illegible] of the contents of 148 samples of canned soup, [illegible] found to be good and 11 slightly unsound. In one, however, had decomposition proceeded far enough to be regarded as spoilt or made dangerous in use.

Canned soups seem to offer a fertile field of analysis. Complaints were received at Ottawa regarding the corrosion of the can, discoloration, and the substitution of other material than that designated on the label, in particular to the substitution of other flesh than chicken in so-called chicken soup. Of 148 samples, 7 cans were found to be distinctly corroded, three slightly corroded, 14 in fair condition, and 124 in good condition. Corrosion of the can proceeds in the first place from imperfect tinning, but is naturally intensified by the acidity of the contents. In most cases the contents are faintly acid, but generally in so slight a degree as to make quantitative expression of the acidity difficult and unnecessary. In 8 samples, the acidity was sufficiently marked to permit of exact determination. Marked corrosion was noted in only one of these 8 samples, and slight corrosion in another. It is evident, however, that as corrosion due to acidity proceeds, the acid is neutralized, and a fairly high acidity in the fresh soup, may be compatible with strict neutrality in the same sample, after long keeping. In this case, iron goes into solution, (with possible traces of tin or lead). The discoloration complained of is usually due to solution of iron, which, however, can have no poisonous effects. Lead was not found in any sample; but traces of tin were noted in 4 samples. The amount was too small to have any physiological significance.

Catching the Substitutes.

Canada's chief analyst, Dr. McGill, some years ago made an attempt to distinguish between chicken flesh and veal or other substitutes in soups. The results of his examination were unsatisfactory and he proposes to do further work in the matter.

In the case of tomatoes, the consumer of canned goods gets a wide variety of weight for his money. Of 111 samples of canned tomatoes taken in Canada, the average capacity of the can is 37 ounces. The average total contents is 34 ounces, the difference of 3 ounces being vacuous or containing air. Of the total contents of 34 ounces, there was an average of 18 ounces solid contents and 16 water. The solid matter of these contents is the true measure of the value of the article, equal quality being assumed. While the average amount of solids is 18 ounces this varies between very wide limits, namely, from 11.2 ounces to 24.3 ounces; which means that some samples have fully twice the value of others. There is no doubt that some regulation is necessary here. The solids referred to are not the dry solid matter of the tomato, but, the moist solids retained on cheese cloth. The weighed total content of the can is poured upon cheese cloth and allowed to drain as long as drops fall at intervals not longer than 5 seconds. The water which passes through is then weighed, and this weight subtracted from the weight of total contents. The remainder in the weight of the solid matter. The State of Ohio requires that standard tomatoes should be packed to have a gross weight of 36 ounces of fruit, exclusive of juice.

Eating Other Things.

In buying canned corn, the consumer is apparently getting more of what he pays for. There is great uniformity in the weight as well as in the character of the contents of the cans of corn. This leads to the inference that the work of preparing canned corn is carefully and systematically conducted. Frequently the consumer also gets in his canned corn [illegible] sulphite of lime, probably added for bleaching effect, and [illegible] non-sugar sweetener, usually saccharine. While [illegible] poison, it has not been demonstrated [illegible] dangerous to the human system in the [illegible] present in our canned corn. Dr. McGill does not think that the small amount of saccharine in canned [illegible] the health of the consumer. The manufacturers [illegible] in food products, however, should [illegible]. We want to know exactly what we eat.

* * *

[illegible] may be described as a little quieter than the [illegible] of [illegible].

Ontario Debentures

ACCIDENT AND HEALTH BUSINESS

Transferring or Twisting Policies is Discussed by State of Maine Insurance Superintendent

"It appears that the practice of transferring or twisting accident and health business in the state of Maine has not been entirely eliminated, although the efforts of this department have for some time been directed toward the reduction of this practice and we believe through the co-operation of the greater part of the agents engaged in this business that there has been considerably less of this changing of business than for many years past. The last legislature enacted a statute upon this subject as follows:—'No insurance company, association or society, or any officer, director, agent, broker or solicitor thereof shall issue, circulate or use, or cause or permit to be issued, circulated or used, any written or oral statement, or circular misrepresenting the terms of any life, personal accident or health policy issued or to be issued by such company, or misrepresenting the benefits or privileges promised under any such policy. No insurance company, association or society, officer, director, agent, solicitor or broker, or any person, firm, association or corporation shall make any misrepresentation, oral, written or otherwise, to any person for the purpose of inducing or tending to induce such person to take out a policy of life, personal accident or health insurance, or for the purpose of inducing or tending to induce any person having life, personal accident or health insurance to lapse, forfeit or surrender such insurance and to take out a policy of insurance in another company.'

Sympathy is for People.

"In view of the fact that there seems to be at present a considerable number of transfers among agents of industrial accident companies we believe a word in regard to the statute and the results of this practice may not be out of place. While a statute provides a penalty for twisting or transfer of insurance through misrepresentation only, yet it has been our practice to discourage agents from changing companies and transferring business which they have written for the sake of a temporary profit. Our position has not been one of sympathy for the companies but for the people who have taken this class of insurance and have secured certain accumulations by carrying the policies for a year or more and which must be sacrificed when the policy is cancelled even though they obtain one containing some features not incorporated in the first. The insuring public should realize that in purchasing insurance as well as in purchasing any commodity that they seldom receive more than they pay for. It is true that certain policies may be better adapted to the personal needs of some persons than others, but to constantly change the company carrying the insurance does not enhance its value and it is very possible that a person following this practice or allowing agents to induce him to follow it may find himself in time of need without the protection he desires. To the agent we will further say that the practice of transferring policyholders has a certain disadvantage to the agent who transfers them. His client has been insured with a good company and may be transferred by him to another company and perhaps to a third company. The habit of transfer is easily acquired by the policyholder and such transfer opens the way for competitors to secure the patronage of his client.

Premium or Commission Rebates.

"Besides prohibiting twisting or transfer of accident insurance under certain conditions, our statute provides that there shall be no rebate of the premium or commission by the agent or solicitor to the person insured. Until recently no cases where rebate appeared probable have come to our attention, but in view of the fact that it is intimated that certain agents of the state are dividing policy fees or commissions with policyholders we must call attention to this statute. While it may be argued that if the agent deems it advisable he should be permitted to divide his commission with the policyholder if he so desires, nevertheless we have a statute prohibiting this and further there can be no good reason why one policyholder should receive a part of the agent's commission unless all policyholders shall receive a part of the commission. Further the agent who permits his commission to be reduced in this manner is shortening his income and places himself under a considerable handicap in these days of close competition."

THIS SHOULD CONVINCE

The empire is at war. Therefore the average man is thinking and ofttimes speaking in martial terms. This suggests the advisability of keeping this fact in mind when canvassing him for insurance, suggests the Life Underwriters' News. Here is an illustration (actuarially sound), that will help you to secure his signature:

The mortality table shows that nine men out of each 1,000 die every year. Put a thousand of them side by side in a straight line faced by a like number of soldiers, each with a rifle in his hand; 991 of these rifles are loaded with blank cartridges but nine contain real bullets. All of these men are 35 years of age and they know that nine of their number will fall when the command to fire is given, but, of course, they are unaware who these nine will be. At this moment there appears a life assurance agent, offering to each man the opportunity of protecting himself against the certainty of death in the ratio of nine to 1,000. What happens? Every man of that thousand immediately steps forward and takes out life insurance.

There is nothing fanciful about the above situation. It confronts every man of middle age and, of course, we must not forget to lay stress upon the solemn fact that as he grows older the number of real bullets in the thousand (figuratively speaking), becomes greater.

◆

NOT UNDER ONTARIO'S COMPENSATION ACT

The Ontario Workmen's Compensation board have issued and passed through the Ontario Council a long list of industries which will not come under its operation. These all represent changes in the act since it passed the legislature last March, and having been ratified by the Ontario cabinet, make the act a little narrower in its scope. The object of the board in weeding out certain industries from the operation of the act is to clear up certain points of possible dispute and leave less room for doubt when it came down to actual instances of injury.

Chief among the occupations now declared exempt from the operation of the act are wholesale and retail mercantile businesses, hotel keeping and restaurant keeping, public garages, livery stables, auction and sales stables, also making or repairing of men's and women's clothing, whitewear, shirts, collars, corsets, hats, caps, furs, or robes carried on as part of an exclusively retail business. In these occupations it is considered there is no substantial hazard.

It is also made clear that such operations as coffee grinding, meat cutting, drug manufacturing, boot and shoe making and repairing, watch, clock and jewelry making and repairing, harness making and repairing, etc., when carried on as part of and for the purpose of an exclusively retail business are not to be considered under the act.

Two other regulations deal with exclusions where less than six men are usually employed. Under this heading are included manufacture of cheese or butter, operation of creameries or dairies, construction or operation of telephone lines, power laundries, dyeing and cleaning establishments, mining, except in the case of producing mines where the workmen are in the employ of the owner, operation of threshing machines, etc.

Machine shops, repair shops, tinsmith shops, blacksmith shops, upholstering, etc., when not incidental to an industry under the act, are excluded unless at least four men are usually employed therein.

REGINA DEALS WITH ASSESSMENT

Analytical Survey of Values Proposed—Public to Supply Information

Reforms in civic assessment are occupying attention in the West. The report of Regina's city commissioners on the problem in that city adopted by the city council is as follows:—

"The assessment in the past has been, to some extent, a matter of guesswork, and this was inevitable in a city growing as rapidly and with prices changing as rapidly as was the case here. It would appear probable, however, that conditions will be more stable from now on, and that the time has arrived when the assessment of the city should be put on a sound and systematic basis, and that if this is to be done for 1915 a commencement should be made in the near future.

"Under the present system of basing the assessment principally upon sales and listings, but little additional evidence as to realty values will be available next year, as the number of actual sales of realty is few, and where such occur they are probably mostly emergency sales, and as such do not fairly represent the actual value of the property transferred. In the absence of any reliable evidence to the contrary, the assessor next year will be practically forced into the position of repeating his 1914 assessment, and this position, as evidenced by the decisions of the Court of Appeal this year, will not be a tenable one.

"To remedy this, the commissioners would suggest that in the making of next year's assessment the ratepayers be consulted, and that the information obtained from them be considered, together with data in the possession of the assessment department. This system has been found to work satisfactorily in larger cities and there would appear to be no reason why the assessment of the city should be shrouded in mystery, or why the citizens should not feel that they have a right to have their opinions considered. If a plan such as this were adopted and the citizens consulted as to the values of realty, there are a number of other points in connection with the assessment, such as the proportionate value which the front portion of the lot bears to the rear portion; the valuation of lots technically facing on a street and actually facing on an avenue, and vice versa; the valuation of corner lots; the classification of various classes of improvements, and the establishment of a fixed assessment rate for each class; which might also be referred to them with an explanation of the systems devised by experts, and which have stood the test of time and are giving satisfaction in other and larger cities.

Ask Public to Assist.

"It is felt also that in the past the dividing line in the assessment of business and residential property has been drawn too closely in accordance with the provisions of the building by-law and with not enough attention to the actual conditions existing in the area assessed, and that the assessment in areas passing through what may be termed the "transition" stage should be more elastic. It is thought also that there has been a tendency in past years, owing, perhaps, to the active condition of the real estate market to base the assessment upon the sale prices of realty sold during a boom and under the most favorable conditions. The "City Act" provides for the assessment of realty at its "fair actual value," and it is thought that this should be interpreted to mean the value of realty based upon its productive power when used to its fullest extent under normal conditions; or, that if based upon sale prices, such prices should be those during normal times.

Expressed in Unit Values.

"The commissioners have not fully considered methods by which the public might assist informally in the making of the assessment [illegible] suggested above, [illegible] to go into this aspect of the matter [illegible] the council have decided whether [illegible] system [illegible]. Of the [illegible] it would appear that, perhaps, [illegible] of getting the plan into effect [illegible] two or three hundred citizens [illegible] businesses and parts of the [illegible] parts of the business [illegible] their written opinion [illegible] frontage of a centre lot.

"The other [illegible] the proportionate values of corners, etc., could also be dealt with and explained. The citizens interested would [illegible] be glad to respond to the invitation and give [illegible] of their time to the service of the community [illegible]. The information thus obtained could be averaged and checked with the data in the possession of the assessment department, and could then be expressed as unit values on a map or maps of the city to be prepared and displayed for the public information during the period of some few weeks, written criticisms and suggestions being invited. If, at the expiration of this period, the assessments were then finally made on the basis of the information thus collected and checked, it is believed that an assessment would be had which, while it would not, of course, be satisfactory to everyone, should at least stand the test of appeal. For subsequent years a scheme might be devised whereby each property-owner could be supplied with a map of the city and the risks showing the property values throughout the city, and written criticism and suggestion invited. This procedure would have a distinct advertising value apart from its use as part of the assessment system.

Assessment Would be Fair.

"If, after careful consideration of the best method of giving effect to same, a plan such as has been outlined were adopted, the commissioners feel that as a result the assessment of the city next year would be a fair and moderate one, based on actual productive values, and that, while the net assessment would be lower and the tax rate consequently higher—and in this connection it should be clearly understood that the increase in tax rates would be greater proportionately than the decrease in the assessment—yet the general public, having been taken into the confidence of the assessment department, would be more satisfied, and it is thought that the more knowledge the public have of the civic business, especially so with the business of a department touching the "pocket nerve," that most sensitive part of the ratepayers' anatomy, the better the results would be; and it is believed it now possesses amongst bondholders and investors for sound, sane and conservative government.

"There are a number of detailed changes in system which might with advantage be made in the making of next year's assessment, but these can be put into effect without troubling the committee with them.

"If the suggested change in system is thought worthy of consideration, perhaps the best way of dealing with same in the initial stages would be the appointment of a special committee to thoroughly investigate the procedure in other cities where a similar system is in effect, and to report back, recommending in detail the method to be followed."

◆

CANADA WAS OVER-RAILROADED

We have been living on stilts, and now we have come to the earth, Prof. Adam Shortt told the Montreal branch of the Canadian Manufacturers' Association. This was bound to come, said he, and it will be worse after the war, because the European nations are blowing away about $25,000,000 a day as completely as though that much money were being sunk into the St. Lawrence every day, and spending it simply to kill the producers of wealth.

This involved the question of transportation, and it would be absurd to demand reductions in the cost of transportation, because if these were cut below cost it would simply ruin the railway companies or destroy the roads. If Canada had blundered into a situation where it had three transcontinental railways over an area which produced no local traffic, the position must be met. He considered that Canada was over-railroaded quite unnecessarily.

Senator N. Curry, in his remarks after the address, said he thought that Prof. Shortt had been too pessimistic regarding the railways, since they not only developed trade, but [illegible] created for opening up new countries, as the Canadian Northern had done.

◆

[illegible] the Bank of Montreal report, the [illegible] remarks that the bank's position is rightly [illegible] of the financial position of the Dominion [illegible] record is highly creditable to all concerned [illegible], and will go far to reassure investors [illegible] of the inherent strength of Canadian [illegible]

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Stanley Mineral Springs and Brewery Company. At a meeting of bondholders of the Stanley Mineral Springs and Brewery Company the bondholders agreed to the deferring of all interests and sinking fund payments until a year after the cessation of hostilities. The company's last statement showed $350,000 bond issued out of a total authorized issue of $500,000.

The position of affairs was placed before the bondholders by Mr. Hugh Sutherland, a member of the board from Winnipeg, where the company's plant is yet in contemplation. It is taken for granted that this action of the bondholders will be followed as soon as possible by financing sufficient to ensure the completion of the brewery.

City Estates of Canada.—In accordance with resolutions confirmed at a special general meeting in London, the preference and common shares became exchangeable on the following basis: Each six per cent. $5 preference share for an equivalent amount in six per cent. debentures and one new common share of $2.50 in New City Estates, Limited. Each $5 common share for one common share of $2.50 in New City Estates, Limited. (The debentures will be issued in denominations of $500, $100, and $25.) Shareholders are requested to send promptly to the London agents, Hendens Trust, Limited, 3 London Wall Buildings, their share certificates, with new names in which they are to be issued on back.

Mexican Light and Power Company. The board of directors has informed the bondholders that the condition of affairs in Mexico shows no sign of improvement. The rate of exchange has been falling continuously during the last few months, and the company have recently received a communication from Mexico that the government, who are now in control of the operation of the business of the Mexico Tramways Company decline to allow the remittance of any further funds from Mexico until the rate of exchange has improved. Under these circumstances the board have deferred the payment of the half-yearly coupon, due 1st December next, on the five per cent. second mortgage fifty-year bonds of the company.

The statement of combined earnings and expenses of the electric light and power services owned or controlled by the company for October, 1914 (Mexican currency), is as follows:—

	1913.	1914.	
Gross earnings:			
The Mexican Light and Power Co., Limited .	$ 736,013	$ 780,720	+ $ 44,707
Pachuca Light & Power Co	146,277	153,611	+ 7,334
Total gross earnings	$ 882,290	$ 934,331	+ $ 52,041
Net earnings:			
The Mexican Light and Power Co., Limited	$ 566,040	$ 602,827	+ $ 36,787
Pachuca Light & Power Co.	79,376	88,656	+ 9,280
Total net earnings	$ 645,416	$ 691,483	+ $ 46,067
Aggregate gross earnings from Jan. 1st:			
The Mexican Light and Power Co., Limited .	$6,590,866	$6,779,509	+ $188,643
Pachuca Light & Power Co	1,336,394	1,341,894	+ 5,500
Total aggregate gross earnings	$7,927,260	$8,121,403	+ $194,143
Aggregate net earnings from Jan. 1st:			
The Mexican Light and Power Co., Limited	$5,066,461	$5,045,250	— $ 21,211
Pachuca Light & Power Co	733,994	764,719	+ 30,725
Total aggregate net earnings	$5,800,455	$5,809,969	+ $ 9,514

The income from the company's investments is not included in the above figures.

Dominion Bank.—A dividend of three per cent. upon the bank's paid-up capital stock has been declared for the quarter ending December 31st, 1914, being at the rate of twelve per cent. per annum, and in addition a bonus of two per cent., making a total distribution of fourteen per cent. for the current year. The dividend and bonus will be payable at the head office of the bank and its branches on and after January 2nd, 1915, to shareholders of record of December 19th, 1914. The annual meeting of the shareholders will be held at Toronto on January 27th, 1915.

Mexico Tramways Company.—Statement of earnings and expenses from traffic only for October, 1914, in Mexican currency, is as follows:—

	1913.	1914.	
Total gross earnings	$ 616,007	$ 558,990	— $57,017
Operating expenses	285,827	305,090	+ 19,263
Net earnings	$ 330,180	$ 253,900	— $76,280
Aggregate gross earnings from January 1st	$5,732,338	$6,072,755	+ $340,417
Aggregate operating expenses from January 1st	2,665,930	3,094,905	+ 428,975
Aggregate net earnings from January 1st	$3,066,408	$2,977,850	— $ 88,558

The income from the company's investments is not included in the above figures.

Windsor Hotel Company.—The annual report of the company shows that net profits, after all charges and the provision of $66,304 for repairs, renewals, etc., amounted to $63,897, against $41,087 in 1913, an increase of $22,810. Earnings on the stock were at the rate of 4.26 per cent. against 2.74 per cent. a year ago.

Last year, with profits of $41,087, the company had to draw on surplus to the extent of $33,913 to pay a 5 per cent. dividend, and a further sum of $114,119 was drawn from surplus for permanent additions and improvements made during the year. Surplus at the end of that year, therefore, stood $148,023 lower than at the end of 1912. In the year recently closed earnings were sufficient to pay 4 per cent. in dividends, against 5 the previous year, and leave $3,897 over. A sum of $19,646 was expended on permanent additions and improvements but even after that deduction the surplus was lowered only $15,749, against $148,023 in 1913.

President Joseph's report showed that the number of guests showed a reduction of 6,627 as compared with last year and of [illegible] as compared with 1911-12. The gross receipts show a decrease of 13 per cent. and the expenditure a decrease of 15 per cent. as compared with the previous year.

Substantial amounts have been written off against furniture and renewal accounts.

Half-yearly dividends of 2½ per cent. and 1½ per cent., respectively, making a total of 4 per cent. upon the paid-up capital stock, have been declared during the year.

A summary of the balance sheets of the past two years is presented in the following table:—

Assets.

	1914.	1913.
Cash	$ 17,594	$ 18,317
Accounts receivable	12,659	15,882
Provisions, etc.	61,302	68,903
Unexpired taxes, etc	25,329	24,427
Furniture	450,000	450,000
Real estate, etc	2,118,980	2,116,506

Liabilities.

	1914.	1913.
Accounts payable, etc. ...	$ 109,534	$ 124,468
Dividend due	22,500	......
Mortgage	10,000	10,000
Bonds ...	600,000	600,000
Interest accrued .	9,000	9,000
Capital ...	1,500,000	1,500,000
Surplus	434,830	450,579

With the exception of Mr. S. Cross, who desired to retire, and whose place was not filled, the board was re-elected as follows: president, Mr. Henry Joseph; directors, Messrs. Charles Cassils, Norman J. Dawes, Herbert Molson, J. Malcolm McIntyre, F. L. Wanklyn.

NOVEMBER MUNICIPAL BOND SALES

Over Half Million Debentures Sold in Home Market—United States Buys Western Issues

The municipal bond sales in Canada for November, as compiled by *The Monetary Times*, amounted to $566,024, compared with $814,871 for October and $2,481,062 for the corresponding period of last year.

The following are the particulars of the November municipal bond sales in Canada by provinces:—

Ontario	$488,424
Alberta	57,100
Manitoba	12,100
Saskatchewan	8,400
	$566,024

In addition to bond sales previously reported the following Saskatchewan bonds were sold in September:—

		Per cent.	Years.
Humboldt	$17,933	6½	20
Wakaw S.D.	8,000	6½	20
Mallard S.D.	1,200	7½	10
Herbert S.D.	5,000	7½	20
Osceola S.D.	2,000	7	10
Zukunft S.D.	1,100	7	10
Casavant S.D.	1,800	7	10
	$19,100		

And these Saskatchewan issues were sold in October:

		Per cent.	Years.
Rosetown	$15,100	6½	..
Canora	53,742	6	30
Goyer S.D.	1,000	7½	10
River Dell S.D.	2,000	8	10
Lake of the Rivers S.D.	2,000	8	10
LaFleche S.D.	1,000	7½	10
Regina Beach S.D.	800	8	10
Roch Hill S.D.	1,800	7	10

The total sales for these months being September, $547,083; October, $814,871.

Sault Ste. Marie sold $30,000 of treasury notes during November.

The following table, compiled from the records of *The Monetary Times*, shows the sales in the Dominion during the first ten months of 1914, compared with the three previous years:—

	1911.	1912.	1913.	1914.
January	$ 420,337	$ 2,133,531	$ 1,337,500	$ 1,[illegible]
February	1,037,287	2,506,378	1,038,806	5,005,336

◆

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended November [illegible]:

McKinley Darragh Savage Mine, 85,[illegible]; O'Brien Mine, [illegible]; Peterson Lake Smelting Company, [illegible]; Casey Cobalt Mine, 54,050; La Rose Mines, Limited, [illegible]; Mining Corporation of Canada, Limited (Townsite City Mines), [illegible]; Dominion Reduction Company, [illegible]. Total, [illegible] pounds or [illegible]03 tons. The total shipments since January 1st, 1914, are now 13,148,6[illegible] pounds or [illegible] tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,196; in 1906, [illegible]5 tons; in 1907, [illegible] tons; in 1908, 29,360 tons; in 1909, [illegible]041 tons; in 1910, [illegible] tons; in 1911, 25,0[illegible] tons; in 1912, [illegible] tons; in 1913, [illegible]261 tons.

WAR ORDERS MEAN $40,000,000 TO CANADA

(Continued from page 7.)

100,000 pounds being a gift to Belgium. Canada was a fairly large exporter of evaporated apples to Europe, prior to the war, Germany being one of the chief buyers.

The federal and provincial government gifts are paid for by Canadian citizens but the expenditure of the money has helped to stimulate business.

Nova Scotia offered the Imperial government one hundred thousand tons of Nova Scotia coal, but it having been found impracticable to carry this into effect the Nova Scotia government contributed the sum of $100,000 in cash, to be used for such purpose as would best relieve distress caused by the war. In addition, two shiploads of supplies have been sent to Belgium.

Many lines have benefited also by the war in the way of increased prices. Typical instances are the newsprint and agricultural industries.

France Placing Orders.

That France has ordered a large amount of goods for its army in Canada and intends to order more was an assertion made by Mr. A. E. Forget, ex-president of the Republique Francais Society in Montreal, according to a dispatch from that city. Mr. Forget offered his services to the French government as a volunteer, going to France for that purpose, but was sent back to purchase goods for the republic here.

Mr. Forget says that already 300,000 pairs of shoes and 500,000 suits of underwear have been ordered in Canada, and that future orders will include the same outfits, several thousand horses, leather, sheepskins, canvas, khaki cloth and preserves.

An order for 300,000 pairs of boots for the French government is said to have been placed among Quebec shoe factories. This was understood to be the first order coming through the province of Quebec's agent in London, England, Hon. Dr. Pelletier, acting in conjunction with Hon. P. Roy, the Canadian commissioner in Paris. Meetings of the Quebec Shoe Manufacturers' Association were called and the arrangements for filling the order were completed. About 150,000 pairs of boots will probably be ready for the end of December, and the balance a month later.

Factories throughout Canada have been turning out blankets for the French army in preparation for the winter campaign, and these blankets are being assembled in Montreal for shipment to France. The order was a large one, and when all the blankets have arrived for shipment there will be several hundred tons.

Russia Buying Too.

Canadian blanket mills have been and are making 450,000 blankets for the French government, for delivery on December 15th. The price to the mill is $4.10 each, which gives the order a value of $1,845,000. It is stated also that the Ross Rifle Company has been asked to tender on a large order for the French government.

Among other notable war expenditures were the purchase of a Canadian ice breaking vessel by Russia and the purchase by Canada of two submarines which were being built for Chile and which were acquired at a cost of $[illegible]. Besides buying an ice breaker, Russia has purchased automobiles from Canada also.

◆

The first great duty of every business concern is to maintain normal business conditions so far as lies in their power, states the well-known Montreal firm of Messrs. H. Morgan and Company, who add that they have not discharged (and have no intention of discharging) a single employee, nor have they reduced the salaries, nor have they any intention of doing so to a single employee.

MONTREAL LOSES CHANCE FOR LOAN

[illegible] opportunity of borrowing $5,000,000 from the [illegible] at 98.15 was lost, when after a lengthy [illegible] majority of the city council defeated the motion [illegible] of the New York banking [illegible] their pockets. A [illegible] of [illegible] the Equitable Trust Company, of New York, [illegible] an option to loan $5,000,000 for one year. A [illegible] submitted by a local insurance agent [illegible] capitalists. The two offers of loans were [illegible] to the controllers for analysis, and the opinion of the [illegible] the city's financial agent, will be [illegible]

How the Nations are Financing

GREAT BRITAIN'S *Loan Issues Receive Fullest Publicity—News of Germany's Financing Comes Through Careful Censorship—Neutral Countries are also Providing Funds—Loans to date are about Five Billion Dollars*

As to how the various nations are financing the war is difficult to ascertain. The greatest publicity has been given to Great Britain's financing, which has been remarkably successful and which has extended not only to the dominions overseas, but also to Britain's allies and to some neutral countries. Little has been heard of the financing of the other countries, although they are raising large sums of money. The historian will have an interesting volume to compile after the war, as to how it was financed. Few details of value are available now. Official information as to German financing has an unmistakably inspired touch, although a few interesting facts have managed to escape the censors' eyes. European experts had amused themselves years ago in estimating the cost of a war such as the present. One, Richet, figured that with 2,000,000 in the battlefield and six of the leading nations of Europe involved, an expenditure of $54,000,000 daily would result. Leroy Beaulieu, the French economist and editor, a few weeks ago, estimated that each of the greater belligerents is spending the equivalent of $200,000,000 monthly and is likely to continue doing so for seven months. With these figures in mind and with the following information gathered by *The Monetary Times*, it is seen that after four months' fighting, the war loans made by belligerents and neutral countries are approximately $5,000,000,000.

Mr. D. Lloyd George, chancellor of the Imperial exchequer in the House of Commons, estimated that the cost of one year of the war for Great Britain would be $2,250,000,000, the largest amount England has ever spent on a war, and more than twice what was spent in the conflict with South Africa during four years.

To pay this bill the British government decided to raise a loan of £350,000,000, which was issued at 95, bearing interest at the rate of 3½ per cent., and redeemable at par in 1928. Treasury bills of £90,000,000 had previously been sold.

The total sum for which provision had previously been made was £535,000,000, covering ordinary and war expenditure. The additional money which had to be found was £330,571,000. A full year of the war will cost £450,000,000.

Provision has been made for assistance to Great Britain's overseas dominions and Canada is getting her share of money for war expenditures, as already explained in *The Monetary Times*.

The daily average cost to France for the first three months of the war was $7,000,000. The government decrees in France in connection with war financing included supplementary credits opened in September for various government departments amounting to a total of 922,259,750 francs, of which the ministry of war receives 887,759,750 francs (£35,510,390). Besides this the ministry of war receives a special provision of 7,430,000 francs (£297,200) for gun-powder. The ministry of the interior receives 500,000 francs and the ministry of labor 500,000 francs for the relief of unemployment, while the ministry of public works receives 29,000,000 francs to meet the interest guarantees on various railway bonds.

A supplementary credit for extraordinary expenditures was authorized for the month of November amounting to $182,154,504, being a daily average of a little above $6,000,000.

The navy received an extraordinary credit of $855,000 The government dispensed $13,000,000 for repairs to the railroad system. These probably have been made necessary by the wear and tear due to the transportation of troops.

The sum of $1,314,000 was set aside for the relief of the unemployed, while various smaller sums will be used to relieve the sufferings in the departments of France that were at one time invaded by the German troops but which are now free of soldiers.

The French minister of finance, Ribot, submitted a decree to the cabinet in November raising to 1,400,000,000 francs ($280,000,000) the amount issuable of war defense bonds.

Subscriptions to the short-term five per cent. national defence bonds totalled 700,000,000 francs for France alone. In addition 300,000,000 francs of treasury bonds were already in circulation.

The governors of the French colonies of Martinique, Guadeloupe, French Guiana, and Réunion were authorized to relieve the colonial banks from their obligation to exchange their notes for gold. The governors were also empowered to regulate the limit for the issue of banknotes, as well as the proportion the metallic reserves must bear to such issue.

Russia's borrowings to date are approximately half a billion dollars. War subscriptions were invited for an internal loan of 500,000,000 rubles ($250,000,000) in Russia at five per cent., in addition to other loans.

Great Britain made an agreement with the Russian government whereby the former, in consideration of a shipment of £8,000,000 sterling ($40,000,000) from Russia to England, arranged with the Bank of England to discount under guarantee of the British government a further amount of £12,000,000 in Russian treasury bills.

The rate of discount is on the basis of the rate at which Great Britain has been able to borrow for her own needs.

The £8,000,000 will be applied by Russia to providing exchange for Anglo-Russian trade. The £12,000,000 will be used for the purpose of paying coupons on the Russian external debts which are payable in London and for financing Russian purchases in England, or where Great Britain is unable to supply the article required and orders consequently have to be placed in Canada or the United States.

Belgium has received loans approximating $100,000,000 from the British and French governments

How Germany Does It.

How the war financing in Germany has been carried out, it is difficult to learn. Unlike the other nations, who made public their financial methods, Germany kept its own scheme in comparative secrecy. Inspired despatches from Berlin chronicled in September the brilliant success of a 5,000,000,000 mark loan. Letters received on this side of the Atlantic indicated that the German government had attached 25 per cent. of all bank balances in the country and the depositor was forced to subscribe to that extent to the war loan whether he wished to do so or not.

It also appears that German merchants at the direction of the government, are liquidating their debts by investing the amount owed in the government war loan at 5 per cent., placing this and interest thereon to the credit of the creditor, while at the same time notifying the creditor that it has been decided to discontinue doing business with such manufacturers who will not agree with this method of paying German debts.

In this connection, the communication sent out by German concerns owing for bills of goods bought in Switzerland and supplementing a statement that the money owed had been invested in the war loan, is reproduced.

> "Referring you to our communication, we repeat that on account of the very high rate of 84-25 we are not in a position to send you liquidation for your invoices, as it is not in the interest of the German Empire, while at war, to forward actual money abroad.
>
> "We are convinced that you wish with all your heart for the success of the German Empire in this war, and we presume that you consent to the placing of your claim on us in the German war loan at five per cent. In consequence we have this date credited you in the German war loan at five per cent., the interest to be carried by us to the credit of your account
>
> "We also wish to advise you that we have decided after the war not to continue business with other manufacturers than those who will agree with the measure announced here before "

Discussing the operations of the German banks during war time, a London writer stated that they were doing everything possible for their customers, and it is quite probable that owing to the great numbers of small banks in Germany advances to firms of good standing have been made more rapidly than has proved feasible in England. Secondly, a war credit bank has been set up which has the power to advance $375,000,000 upon securities. Thirdly, full scope has been given to local initiative everywhere throughout Germany and credit banks are protected or being established with the idea of helping the small man and capitalist, guaranteed by the commune or co-operative society, supported by the larger firms.

The amount of credit which the banks are prepared to advance is amazing. At Frankfurt, for example, it proposed that credit to the amount of 10,000,000 marks shall be advanced on cash deposits of one-twentieth of that sum. A cash basis of 5 per cent. is extraordinarily flimsy, especially when the securities offered for the remainder are inconvertible.

Germany's Financial Measures

That the financial measures being taken by Germany to cope with the war situation might be borne in the event of German victory, but that their effect would be disastrous in the event of defeat, was the opinion of the Berlin correspondent of the London Times, who left that city shortly after declaration of war. He states that the Reichstag in August passed without discussion seventeen emergency bills. The first authorized extraordinary expenditure to the amount of £265,000,000 ($1,325,000,000)—£250,000,000 ($1,250,000,000) from loan and £15,000,000 ($75,000,000) from the empire's stock of gold and silver.

An additional war credit of $1,250,000,000 has also been voted by the Reichstag with one dissenting vote.

It was officially reported from Vienna that the amount of the Austrian war loan subscribed was 1,500,000,000 marks ($375,000,000) in Austria and more than 800,000,000 marks ($200,000,000) in Hungary. The minister of finance then extended the period in which subscriptions may be made.

How closely interwoven are the commerce and finance of the world's nations was illustrated by the fact that nations not directly involved in the great European war were compelled last year to take emergency financial measures. The most notable case was the United States, which, owing to loss of customs revenue, had to mulct its people with $100,000,000 war taxes.

Small European Nations.

The Norwegian banks were financially well situated, and they were in a position to conduct their business as usual, discounting bills and receiving the money of the public on deposit. The stock of gold of the Bank of Norway dropped nearly £4,500,000. The exchange facilities having temporarily broken down, the supply of sterling bills was altogether inadequate, which, with the exorbitant rates of exchange, prevents people from remitting money in payment of their debts abroad. The explanation of this anomalous situation is that double payments have had to be made abroad, as Norwegian banks and merchants have had to meet their obligations as they fell due, while it has been necessary to pay cash for new purchases, and the export trade was temporarily held up during the early part of the war, because shipping was stopped until the war-risks insurance scheme had been arranged.

The bank law was altered so as to give the government power at any time to free the Bank of Norway temporarily from its obligation to cash notes in gold. If the notes were declared inconvertible they were none the less to continue to be legal tender.

New Regulations in Denmark

A law was passed in Denmark empowering the minister of commerce, so long as the economic situation tendered it desirable, to restrict withdrawals from any bank or savings bank to the maximum sum of 300 kroner (about $80) per week.

Although the Netherlands was not engaged in the war, it passed through a serious financial crisis. It was found that the adoption of vigorous measures was necessary, as follows:—

First—The law relieving the Netherlands Bank from the obligation of keeping the notes in circulation covered by at least 40 per cent. of gold and silver reserve.

Second—The law relieving the Netherlands Bank of the obligation of redeeming its notes in coin immediately on demand.

Third—The Bourse law, by which the minister of finance is given almost unlimited authority to fix the date of the reopening of the Bourses, to decide which stocks shall be quoted, and especially what rate will be accepted for all stocks on deposit on July 28, the last day on which the Bourses were open.

Fourth—The law forbidding the export of gold or silver.

Fifth—The law authorizing judges to grant debtors a period of delay for payments, and not to declare failures.

Exchange Circles in Holland.

Exchange circles in Holland are divided into two groups. The small but important group of the buyer and the large one of the seller, each of which has attempted to influence the government on their behalf. The buyers naturally wished to cancel short fixtures as soon as possible in order to dispose of the money invested, which at this time is needed for their colonial enterprises. There was also a general apprehension that at the reopening of the Bourses not only the amounts due, estimated at some 6 million dollars, would be called up, but that all margin sales, estimated at about 160 million dollars, would also be cancelled, while it would be impossible to obtain the money elsewhere. If these repayments could not be made the securities would have to be sold, and there would be a general slump in the price of stocks, which have already fallen considerably. The consequences of this would inevitably have been that all the Amsterdam stock dealers together with their correspondents in the provinces, and many private customers would have failed.

Until the minister of finance appoints a committee of investigation and has made adequate arrangements in accordance with their advice, it was recently reported, there will be much confusion over the cases of arbitrary dealing which are being reported to the minister. It was suggested that perhaps the best solution would be for all stock loans which were current on July 28 to be transferred to the government through the mediation of the Netherlands Bank at the rates of that date. The certainty of such an arrangement would result in no more hurried cancelling of such loans. As soon as possible when normal conditions again prevail and any of the stocks again reach the level of price of July 28, they would have to be withdrawn as a security. It was considered that the risk for the government is considerable, but not less than if this measure were not taken, especially as arrangements would be made by which both the seller and the purchaser would be held responsible for any permanent depreciation of the stock.

In order to remedy the lack of specie in the Netherlands, the note issue has been increased and small paper-money has been issued. The banks have also come to an arrangement by which they will place at the disposal of manufacturers and merchants the necessary funds for the continuation of business without requiring the securities usual in normal times.

Switzerland spent nearly $10,000,000 on mobilization, and will lay direct tax on incomes and tobacco. The first war loan was $6,000,000 and the second war loan of $10,000,000 in 5 per cent. bonds was oversubscribed three times, although only the home market was concerned.

An Italian royal decree, dated 19th September, fixed the total sum of the advances which the three banks of emission must make to the state treasury at 310,000,000 lire, distributed as follows: Banca d'Italia, 230,000,000 lire; Banca di Napoli, 60,000,000 lire, and the Banca di Sicilia, 20,000,000 lire.

The sum total of circulation of state notes is raised by this decree to 700,000,000 lire, viz., 525,000,000 lire under the law of 9th July, and 175,000,000 lire of new issues. (25 lire equal £1.)

South American Republics.

A decree authorizing the Brazilian government to issue paper notes to the value of 250,000 contos of reis, of which 150,000 contos are to be set apart for meeting duly authorized treasury liabilities and 100,000 contos for loans to banks. Ten per cent. of the weekly customs receipts of Rio de Janeiro and Santos are to be ear-marked for paying off the 150,000 contos, while the bank loans must be paid off by the end of 1915. The issue of a portion of these notes to the value of 150,000 contos of reis was authorized by a further decree of the same date. Of this amount 100,000 contos are for loans to banks and 50,000 contos for meeting treasury liabilities.

The "Banco Agricola," a Paraguay state institution in Paraguay, has been authorized to grant loans to the local banks up to a total of 25,000,000 dollars paper (about £230,400). These loans are not to be for more than one year and are to be redeemed by instalments, in six, nine, or twelve months. They are to bear interest at 9 per cent. per annum. The amount of the loans must not exceed 70 per cent. of the value of the documents accepted from the banks as surety. The "Banco Agricola," as the repayment of the notes is effected, will withdraw them from circulation and destroy them. It is doubtful if the majority of the commercial firms in Asunción are in a position to meet their liabilities within the next twelve months, so that it appears probable that some portion of the money will not be redeemed. It may, therefore, be anticipated that the amount of unsecured paper money in circulation will become increased, and its value still further depreciated.

And in Hayti.

Two financial laws were recently enacted by the Haytian government to meet the situation created by the war. The first provides for the issue of a loan of 1,200,000 gourdes (£48,000), and the second authorizes the suspension of the withdrawal of the paper and nickel currency, and empowers the government to draw to the extent of 178,179 dollars (£35,635) upon the sum of ten million francs (£400,000) which had been set aside from the loan of 1910 and placed in the custody of the National Bank of Hayti for the reform of the monetary system.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Oakville, Ont.—A $1[illegible],000 money by-law has been carried.

Kamloops, B.C.—A by-law to raise $7,000 for park purposes was voted upon December 7th.

Belleville, Ont.—Two money by-laws were passed by the council at its recent meeting

London, Ont.—A by-law to issue $40,000 for erection of a bridge is to be submitted to the electors.

West Vancouver, B.C.—The by-law to raise $150,000 for waterworks purposes has been passed by the ratepayers.

Halifax, N.S.—The school commissioners are desirous of of receiving tenders for an issue of $48,067 4½ per cent. 25 years.

British Columbia.—Reports from this province state a London firm is desirous of investing $500,000 in British Columbia municipal debentures.

Athens S.D., Sask. Authorization has been given for the borrowing of $5,000 for school purposes. Mr. H. J. Binnie, Elston, is treasurer.

Penticton District, B.C.—An irrigation by-law to issue $10,000 6 per cent. 30-year debentures, has received the approval of the provincial municipal department.

Eganville, Ont.—Neither of the two offers received from Toronto for an issue of $5,000 5 per cent. debentures to pay overdraft were accepted, and the bonds remain unsold.

Montreal, Que.—Mayor Martin has signed treasury bills for an advance of $1,000,000 from the Bank of Montreal, at 6.43 per cent., including interest, commission and discount. The bills are redeemable on June 7.

Berlin, Ont.—Mr. A. H. Millar, city clerk, informs *The Monetary Times* that Berlin has no debentures for sale at present, and that an issue of $8,000 was not sold in November, as stated in certain press reports.

Chatham, Ont.—A by-law to authorize the granting of a bonus, for the promotion of an industry known as Everlasting Caskets and Vaults, Limited, and to provide for the issue of debentures to the amount of $3,000, is to be voted upon January 4th.

Alberta.—The sale of $107,950 debentures reported last week, will allow the school boards of the different districts to complete operations which had been contemplated before the commencement of war and which had been delayed through there being no market for municipal securities.

Calgary, Alta.—The council, at its recent meeting, ascertained from the city comptroller that there will be an apparent surplus of $100,000 over the estimates in the various departments at the end of the first ten months of the year. The council also agreed that the mayor and representatives of the school board should take up the matter of ascertaining from the Imperial Bank as to whether joint note of city and school board would be accepted as security for advance in settlement of school board's demand for $[illegible],000 due, the amount to be secured by a deposit of the city's debentures.

Regina, Sask.—That the city of Regina has a margin of borrowing power at the present time of $[illegible] and that the bonded indebtedness of the city is but $[illegible] is shown in the city's annual financial statement. Of the total of $[illegible] of bonded indebtedness some $4,000,000 is charged against revenue producing utilities. This leaves a gross indebtedness of $2,[illegible]00,000 and to offset this, the city owns taxable property to the value of $11,500,000. The statement shows a surplus of over $[illegible],000 of assets over liabilities. One large asset which the city has, is the industrial [illegible] which is served by spur tracks from three trunk lines, [illegible] paved, electric lighted and with street car service. This property is sold to bona fide industrial concerns at low prices and on easy terms, in order that all industrial [illegible] may be kept in the one district.

Toronto, Ont.—The council has passed a by-law guaranteeing [illegible] Municipal Loan Association. The association [illegible] assist deserving cases of those out of employment [illegible] still in employment but at reduced income, by loaning moderate sums for short periods on reasonably satisfactory security, even if such security is of such a nature as would not be accepted by banks, loan companies, or other regular financial organizations. The fund will be administered on a business basis, and every effort will be taken to make it self supporting. It is intended to relieve a large section of the community that would neither look for nor accept charitable relief so long as they have security to offer for moderate advances to tide them over a period of unemployment or loss of income. Those of the community who require work or, failing that, direct relief, will be referred to the Social Service Commission or such other charitable organization as may be designated for that purpose.

Medicine Hat, Alta.—The total revenue for ten months of the year on the current revenue and expenditure account, was $469,393.28, while the expenditure up to November 1st is shown to be $440,889, leaving a surplus of $28,504.28. The estimates for the expenditures for the calendar year were $537,606.86. Since the war broke out in Europe, every effort has been made to keep these expenditures down. The gross debenture debt in 1913, was $3,563,360, debentures authorized by by-laws in 1914, amounted to $199,651, making a gross debt of $3,763,017.76. After deducting local improvement assessments receivable, $285,349, and the 1914 sinking fund of $50,473 as well as $895 for local improvement assessment by-laws, the net debenture debt of the municipality is $3,426,293. The assessment of the city for 1914 is approximately $22,000,000, and the tax rate struck this year was 17½ mills. Nearly 60 per cent. of the taxes have been paid into the city treasurer. The financial report showed that the three chief revenue-producing departments, natural gas, water and electric light and power, had brought in $180,487, the expense of administering these departments being $75,038. The natural gas department made a net profit of $58,000 on receipts of $82,000 in the ten months.

Edmonton, Alta.—Electors will vote upon the following by-laws on December 14:—One to create a debenture debt in the sum of $150,000 for taking over the machinery, pipes, accessories and other plant of the Edmonton Industrial Association Drilling Company, Limited, in respect of its gas drilling operations on the north-west quarter of section 24, township 48, range 13, west of the fourth meridian, and reimbursing the said company for all expenses which it shall have incurred in and about or by reason of the boring of a gas well on the said quarter section, and also for defraying the expenses of sinking such further and other wells under its leases or rights of approximately 250 square miles for the proper establishment of the quantity and area of the said gas field: Fifteen-year debentures with interest at 5 per cent., payable semi-annually. Sinking fund plan. Rateable property according to last revised assessment roll is, $190,669,410. Total debenture debt is, $24,563,430.15. Local improvement and other debts not affecting 20 per cent. borrowing power are, $14,774,487.25. Debenture debt affected by 20 per cent. borrowing powers is $9,788,942.90. No amount of the debenture principal or interest is in arrears; and the other to grant a franchise to Tramways, Limited.

LOAN IN LONDON OVER-SUBSCRIBED

An issue of $[illegible] of 6 per cent. debentures in the Mond Nickel Company, which is largely a Canadian concern, was over-subscribed in London.

TORONTO RAILWAY NOTES PLACED

[illegible] Toronto Railway one and two-year notes, have been placed in the United States by the Dominion Securities Corporation at a rate just under 5 per cent.

* * *

Sir Ernest Cassel, a prominent financier and confidential financial adviser to the late King Edward, has been barred from Great Britain's Privy Council by King George, as has also Sir Edgar Speyer. There is no precedent in British history for such action. Sir Ernest Cassel, although born in Germany, has long been identified with British Royalty, finance and philanthropy. When war was declared, Sir Ernest and Sir Edgar Speyer were both excused from attending Privy Council meetings. Sir Edgar visited Canada two years ago

NOT "HARD UP"

Reference is made in a recent Toronto daily paper to the non-payment of the Ontario premium income tax of life insurance companies, and is so worded as to imply that this non-payment of the tax is due to the companies being "hard up." This implication is so wide of the truth that it suggests either that the writer intended to be humorous, or that his informants were having a joke at his expense. If the article in question is intended to be taken seriously, it shows a somewhat considerable lack of knowledge, both as to the financial conditions of the life companies in Canada and as to the reasons back of their action in refusing to pay the Ontario tax.

This action is the outcome of a persistent, but unsuccessful, endeavor on the part of the life companies, extending over many years, to secure in the interests of their policyholders some relief from the unjust and disproportionate burden of taxation imposed upon them by a majority of the provinces. The matter was brought to a crisis last year when the legislature of the province of Ontario, despite the strong opposition of the companies, made a heavy increase in the rate of taxation imposed upon life companies by that province. The companies, finding that no relief could be expected from the provincial legislatures, decided to appeal to the courts, believing that it can be shown that such taxes are indirect taxes, since the burden of them falls eventually on the policyholder and results either in increasing the cost of his insurance, or diminishing the amount of it. As indirect taxes they would, under the British North America Act, be "ultra vires" of the provincial legislatures.

The financial conditions of the companies in no way entered into the matter. Probably no class of financial institution has felt the effect of the conditions which now prevail less than the life insurance companies.

Pay your debts; and pray for peace.

THE NATIONAL POSITION

An excellent idea of the national position in these strenuous times is to be gathered from the remarks of Mr. H. V. Meredith, president and Sir Frederick Williams-Taylor, general manager of the Bank of Montreal at the annual meeting of that institution. Not only did they give a clear idea of the position, but they also pointed clearly the way to solve our principal problems and gave a measure of conservative optimism to their facts and opinions, which is refreshing in these days of international troubles. Mr. Meredith, who has exceptional facilities for judging, said that from the reports which have reached him from all parts of the country, legitimate business is fundamentally sound. While trade generally is quiet, and in many branches restricted, especially those dependent upon construction work, there is compensation, in a measure, by activities in others which provide the vast supplies required by the war.

A general suspension of new undertakings is apparent. Agriculture—the backbone of the country—continues prosperous, notwithstanding a shorter crop yield, owing to the high prices being paid for grain and other farm products. The great increase in the number and value of live stock in the North-west is especially gratifying.

Farmers are preparing to increase the acreage of land under crop, and manufacturers are taking advantage of the situation to extend their sales where foreign competition, for the time being, has been eliminated. There is, moreover, an undiminished confidence in the future, which is an asset of no little importance.

Considerable unemployment exists, but the extent of it is probably over-estimated, and, as Mr. Meredith added, our position in this respect will compare favorably with that of other countries.

Sir Frederick Williams-Taylor reviewed the position in London, New York and in our own provinces. His remarks are printed elsewhere in this issue and make instructive reading. Discussing the effect of the war on Canada, Sir Frederick again pointed out that from a financial point of view the outstanding result of the war upon Canada has been the instantaneous stoppage of the supply of British capital to which we had become so accustomed that sight was too frequently lost of its importance as a factor in the development of the Dominion.

Money from this source flowed to us in such increasing volume that during a considerable ante-bellum period it amounted, in round figures, to at least $25,000,000 per month. Canadian public borrowings from the London money market for the seven months ended 31st July were $17[illegible],000. Since the outbreak of war the inflow of such capital has ceased.

This monetary deprivation has forced upon us the necessity of using our earnings and income for the purpose of paying to Great Britain interest on our indebtedness of $2,500,000,000 to London, has brought home to us the extent to which the London money market and the British investor have been our friends, indeed our partners, in what might be termed this colossal Canadian enterprise.

Dealing with the way in which Canada is standing the strain, Sir Frederick remarked that the financial position of our country to-day is that, consequent upon the prompt measures adopted by the minister of finance, and owing to the elasticity and excellence of our banking system, Canada is standing the strain without collapse. "We are adjusting ourselves," continued Sir Frederick, "to the heavy burden thrust upon us without warning whilst in the constructional stage, and though here and there weak spots will develop, the general structure will surely stand the strain, and we hope and believe we, as a country, can safeguard the situation."

Concluding, Sir Frederick said: "It is obvious to everyone in the Dominion and to our friends abroad that we are cast upon our own resources, that we are on trial, and that our future development will depend in no small measure upon the condition in which we emerge from this trying ordeal. The longer the duration of the war the more will the colonial props of the Empire, including Canada, suffer, but good will come out of evil, for our energies will be turned to the development of our great natural wealth, particularly our vast agricultural resources, and we can then look forward with confidence to eventually emerging from present conditions a wiser people, with our affairs on a healthier, more normal and sounder basis than that with which we were threatened."

* * * *

Buy Christmas presents just the same this year and help Normal.

* * * *

Don't blame the war. Most of the inconveniences were due here anyway.

ONTARIO WORKMEN'S COMPENSATION ACT

The new Workmen's Compensation Act, passed at the last session of the Ontario Government, comes into effect on January 1st, 1915. Those who have given the matter serious consideration have not reasonable grounds to find fault with this advanced legislation.

It has taken a long time for the province to make proper provision for workmen injured by industrial accidents and their dependants. Under the old law the employer of labor had many defences which enabled him to resist, if desired, claims for compensation made by injured employees. This was the fault of the laws on the statute books relating to the liability of an employer for accidents to his employees. Under the new law, these defences are abolished. The fact of the injury alone will entitle an injured workman or his dependants to certain compensation provided by the act. The Ontario government, therefore, has shown a progressive spirit in enacting a new law to take the place of the obsolete one that has been in operation in that province since 1885.

But *The Monetary Times* cannot see eye to eye with the government regarding the plans they have adopted for the administration of the new act. Based on the German system, the new act has taken away the liberty of the employer in schedule known as number 1, preventing him buying his protection, or insuring, in the cheapest market. He is compelled under the grouping system to subscribe to an accident fund and is assessed with other employers of labor in the same group, according to the requirements of the case, in respect to current payments as well as deferred payments, as called for under the act. Great powers are given the commissioners in the matter of making assessments and transferring employers from one group to another as they may deem advisable. Indeed, the commissioners have the power at any time to take the employer out of Schedule I. and transfer him to Schedule II. or to put him beyond the scope of the act altogether. Schedule II. deals with industries, the employers in connection with which are individually liable to pay the compensation.

When an employer is taken out of Schedule I., which schedule subscribes to the accident fund, and is placed in Schedule II., the individual liability obtains. That is to say, he still comes under the provisions of the act, but is compelled either to carry his own risk or to insure with a casualty insurance company. This individual liability concession has been made, amongst others, to the big steam railway companies as well as to electric railway companies. It is obvious, therefore, that by putting these industries into Schedule II. a material concession has been made that does not apply to the employers grouped in Schedule I. In other words, the employers grouped in Schedule II. are permitted to buy their insurance in the cheapest market. The question arises whether these special concessions should be made only to big corporations, such as the railway companies, etc., while other industries are forced to pay into an accident fund on an assessment basis, thereby making it absolutely impossible for them to know what their insurance will cost. The weakness of this accident fund scheme, or grouping system, has already been demonstrated. The commissioners, according to the official Ontario Gazette dated November 28, have made numerous changes in the groups in Schedule I. and have read a number of industries out of the act altogether. Those that have been read out of the act are liable to common law actions. These changes cannot have been made by reason of any experience on the part of the commissioners in their administration of the act, because the act has not yet come into force.

The government evidently appreciate the weakness of their experiment and fortunately made provision in the new act for the transfer of any industry coming under Schedule I. to Schedule II., so that it is in the power of the commissioners to transfer any one or the whole of those in Schedule I. to Schedule II. In the latter event, the individual liability would apply to every case, just as it now applies only to the big corporations cited above. The present conditions brought about by the war are bound to have a telling effect on the assessment plan scheme, and it is questionable whether it is wise for the government to run the risk of seeing this new legislation fall to pieces.

The appointment of the commissioners is a most commendable feature of the new act. They are a final tribunal in adjudicating upon accident claims in dispute. Litigation should therefore be a thing of the past, as the commissioners' decision will be final. It is not too late for the government to remedy the mistake which seems to have been made. *The Monetary Times* does not advise deferring the effective operation of the act, but the commissioners will be conserving the best interests of employers and employees alike if they forthwith transfer to Schedule II. many or all of Schedule I. The workman has nothing to lose by the change. The employer is bound to do one of two things. He must take out insurance covering all the provisions of the new act or put up substantial security with the government to provide for any accidents for which he may be called upon to pay compensation.

* * * *

Premier Borden did pretty well at Toronto last week smoothing the wrinkles left by his talkative war minister.

PERSONAL NOTES

Mr. A. M. Grenfell, of the Canadian Agency, and against whom bankruptcy proceedings were instigated, is now serving with the army, and these proceedings have been postponed till March.

Mr. Godfrey C. White has been appointed Quebec general agent of the Lloyd-Thomas Company, Limited, appraisers and engineers, of Toronto and Chicago. Mr. White's headquarters will be in the St. Nicholas Building, Montreal.

Mr. George Bury, recently appointed first vice-president of the Canadian Pacific Railway, was described by a hurried typesetter on an Ottawa paper as "Mr. David Bury, New Zealand manager of the Canadian Pacific Railway." Such is fame—and hustle.

Mr. W. H. Hall, the president of the Insurance Institute of Toronto, was born in Chester, England, in 1870, but has been a resident in Toronto for over 40 years. He is general manager and director of the Canadian Surety Company; chairman of the School Section No. 22, Township of York, and a member of the Toronto board of trade. Mr. Hall has been for over 28 years in the insurance profession, having commenced his career with the Western Assurance Company in its head office at Toronto in April, 1886. He remained with that company until 1895, when he resigned to organize a general insurance agency business on his own account, and which continued for ten years, until 1905, during which period he acted as general agent for Ontario for the American Surety Company of New York and for the New York Plate Glass Insurance Company; also as a Toronto representative for the Norwich Union Fire Insurance Society. In 1905 the American Surety Company of New York appointed him its manager for Canada, which position he held until 1913, when, on the organization and commencement of business by the Canadian Surety Company, he became its general manager and also a director of the company. He is a keen, energetic man and a credit to the profession.

MR. W. H. HALL,
President, Insurance Institute of Toronto, 1914-15.

Mr. Albert Oakley and Mr. Morgan Jellett have retired from partnership in the firm of Æmilius Jarvis and Company, Toronto. The partnership will be continued by Mr. Æmilius Jarvis and Mr. A. D. Morrow, under the firm name of Æmilius Jarvis and Company. Mr. Jellett will remain with the firm as manager of the bond department.

Messrs. Rainnie and Keator, Limited, of Halifax, are right up to date with their insurance policies. "Fire resulting from invasion or bombardment is not covered under fire policies. We can protect you against this contingency," they advertise.

Mr. J. M. Neilson, late city auditor of Saskatoon, who has accepted a position as bursar of the University of Saskatchewan, will be the instructor in classes in accountancy as soon as arrangements are made to relieve him of a part of his work as bursar.

Mr. Alexander Robertson, of the firm of Robertson Brothers, candy manufacturers, Toronto, who was one of Toronto's oldest residents, died this week, at the age of 68. He was born in Selkirk, Scotland, in 1845. Coming to Toronto with his parents, when 12 years old, he had lived there ever since. About 50 years ago he and his brothers founded the well-known and progressive firm of Robertson Brothers. A comparatively short time ago, he had to retire through ill-health, but prior to that, he attended to business daily.

Sir Felix Schuster is the latest resident of England, of German birth and German associations, to come under criticism. Among his numerous appointments, he is a director of the Grand Trunk Pacific Railway. A London despatch to the New York American says: Is financial England to experience as sensational a retirement as England's navy? It is gossiped in bank parlors that Sir Felix Schuster, chairman of the London Bankers' Association and governor of the Union of London and Smith's Bank, and regarded as the mouthpiece of the banking world, will prefer to sever his connections with the business community rather than continue to bear the burden of abuse. Sir Felix Schuster, in his field, almost is as dominant a figure as was Prince Louis of Battenberg. He visited Canada a few years ago and accorded a special interview to *The Monetary Times*.

Mr. T. M. E. Armstrong, manager and secretary of the Ocean Accident and Guarantee Corporation, Limited, has informed the branch managers of the fact that the company's directors have heard with pleasure that 269 officials of the "Ocean" staff have volunteered for service, either at home or abroad. The directors have placed on record in the official minutes an expression of their satisfaction. They are particularly pleased to know that the seniors who are not eligible for service have undertaken to perform the work of those who are absent, so that the business of the corporation will not be neglected. This shows an excellent spirit, and apparently means full pay for the men who have gone to the front, and their positions kept open for their return. Mr. Charles H. Neely is the company's manager for Canada, with headquarters at Toronto.

◆

QUEBEC BANK'S RETURN

The Quebec Bank, at the annual meeting of shareholders held at Quebec, reported, after the usual deductions, net profits of $296,659 for the year ended October 31st last. As compared with the previous year, this shows a decrease of $12,569.

The new stock issue which was brought out in January, 1913, was still in process of payment in the past year so that the average amount of capital employed was slightly larger. In the year ended October 31st, 1913, the average capital was $[illegible],653,155, against $2,732,843 in the succeeding twelve months. The earnings on the average paid-up capital in 1913 were at the rate of 11.65 per cent. against 10.86 per cent. in 1914. On the average paid-up capital stock and rest profits were at the rate of 7.34 per cent.

Dividends in 1913-14 took $191,299. The amount of $30,000 was reserved for depreciation of securities, against $[illegible]5,000 the previous year, and that a special appropriation of $10,000 was made to the patriotic fund. Total appropriations for the year amounted to $310,216, leaving the amount at credit profit and loss $11,448. In addition, there was transferred to rest account $1,692 received as premium on new stock. The rest account is now $1,308,655, and the total paid-up capital $2,7[illegible]4,620. The balance sheet shows a contraction of about $1,500,000 in total deposits of the public, and there has been a slight reduction in both current and call loans.

The Quebec Bank continues to maintain the implicit confidence of its large clientele. Its position is shown in the balance sheet to be very strong and satisfactory.

NEW INCORPORATIONS

Security Company With Large Capital—Lumber Companies Forming in British Columbia

Canada's new companies incorporated this week number 27. The head offices of these companies are located in four provinces. The total capitalization amounts to $1,479,000.

Grouping these new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	6	$ 800,000
Quebec	6	369,000
Saskatchewan	6	100,000
Alberta	9	210,000
	27	$1,479,000

The following is a list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:

Shaunavon, Sask.—Mitchell Bros., Limited, $10,000.

Moose Jaw, Sask.—Exchange Company, Limited, $20,000.

Neville, Sask.—The Farmers' Oil Company, Limited, $20,000.

Scollard, Alta.—Scollard Trading Company, Limited, $10,000.

Calgary, Alta.—Throgmorton Alberta Agencies, Limited, $20,000.

Bow Island, Alta.—Bow Island Hardware Company, Limited, $10,000.

Three Rivers, Que.—J. L. Durand, Limitee, $20,000. J. L. Durand, M. L. Brunelle, B. Penneton.

Walkerville, Ont.—Walkerville Roofing Manufacturing Company, Limited, $60,000. L. H. Cheeseman, C. J. Cheeseman, J. T. Sullivan.

Vermilion, Alta.—Brunswick Hotel Company, Limited, $10,000. Stewart-Kennedy Lumber Company, Limited, $20,000.

Saskatoon, Sask.—The Atwood Investment Company, $20,000. The Elks Club, of Saskatoon, Limited, $10,000. Saskatoon Children's Carriage Company, Limited, $20,000.

Ottawa, Ont.—The Brading Breweries, Limited, $250,000. K. Tannahill, J. F. Cunningham, R. McDougall. Anglo-Franco Club. B. Boutet, A. Belanger, J. L. Rattey. J. Y. Caldwell Company, Limited, $100,000. J. Y. Caldwell, G. B. Caldwell, S. B. Caldwell.

Edmonton, Alta.—The Canada Colonization Company, Limited, $100,000. C. W. Livingston, A. C. Macnaughton, A. L. Shaver. The Crown Stock Food Company, Limited, $10,000. Edmonton Jobbers, Limited, $20,000. The St. Petersburg Hotel Company, Limited, $10,000.

Toronto, Ont.—Goldsmith Products Company, Limited, $100,000. D. H. Goldsmith, J. W. Wood, G. B. Balfour. Colonial Mansions, Limited, $40,000. J. C. Hay, R. W. Campbell, I. M. Johnston. Huichau Club. J. F. Twigg, H. A. Harrison, E. M. MacMahon. Dominion Farming Company, Limited, $250,000. J. F. Gundy, H. W. Gundy, G. S. Bell.

Montreal, Que.—Society Brand Clothes, Limited, $150,000. S. Hart, A. Falconer, M. A. Phelan. Gagnon, Limitee, $15,000. D. Gagnon, D. A. Gagnon, A. Gagnon. Cafe Casino, Limitee, $20,000. A. G. Simays, M. Marsolais, Ulric Leclair. La Compagnie des Granits du Nord, Limitee, $140,000. J. T. Lafond, L. Lafond, J. Lafond. Saint Anne's Land Company, Limited, $15,000. H. H. Scott, A. E. Woodworth, A. B. Wright.

Canada's new companies incorporated last week number 42. The head offices of these companies are located in three provinces. The total capitalization amounts to $15,628,000. The largest companies are:—

The Associated Securities Company, Limited	$3,200,000
Pacific Mills, Limited	9,500,000

Grouping these new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization
British Columbia	13	$10,590,000
New Brunswick	5	629,000
Ontario	18	4,115,000
Quebec	6	294,000
	42	$15,628,000

The following is a list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Victoria, B.C.—Quadra Greenhouse Company, Limited, $20,000.

Nanaimo, B.C.—Seafield Lumber and Shingle Company, Limited, $15,000

Prince Rupert, B.C.—The Merchants Publishing Company, Limited, $75,000.

Shediac, N.B.—R. C. Tait, Limited, $19,000. Robert Chesley Tait, Alexander J. Tait, Mary L. Tait.

Windsor, Ont.—Parisian Imports, Limited, $50,000. Frederick Aaron Koch, John Sale, Dorothy Margaretta Sale.

Smiths Falls, Ont.—The Smiths Falls Brass and Aluminum Foundry Company, Limited, $60,000. John McEwen, James MacDonald, Monson Gougde Henniger.

Rimouski, Que.—J. P. Bellevance, Limitée, $20,000. Joseph Pierre Bellevance, E. Alexis Dufresne, Adélard J. Rioux.

Sackville, N.B.—A. E. Wry Standard, Limited, $500,000. Albert Edward Wry, Fred Trueman Tingley, John Warren Sangster.

Boiestown, N.B.—W. R. McCloskey, Limited, $45,000. Catharine J. McCloskey, Fitzgerald McCloskey, Mary Vida McCloskey.

Quebec, Que.—L'Artique Compagnie de Glace, Limitée, $100,000. Joseph Léon Lachance, Oscar Alphonse Bériau, René Couture.

St. Stephen, N.B.—The Boundary Fur Farms, Limited, $45,000. J. Arthur Thompson, Thomas A. Whirty, Charles R. Donaldson.

Nashwaaksis, N.B.—McFarlane Wagon Company, Limited, $20,000. William Leslie McFarlane, Peter George McFarlane, Samuel Hanford McFarlane.

Merritton, Ont.—Steine and Read, Limited, $40,000. Norman Howell Treadwell, Francis Watts, Morley Punshon van der Voort. The Ashland Realty Company, Limited, $10,000. Henry Eaton, Franklin Leop Niederaur, Oscar Seaburn Eaton.

Vancouver, B.C.—Vancouver Shipping and Trading Company, Limited, $10,000. Castle Hotel, Limited, $50,000. Thomas Dredging Company, Limited, $100,000. Lumber Exporters, Limited, $10,000. Needham's, Limited, $10,000. E. R. Stewart and Company, Limited, $400,000. Pacific Mills, Limited, $9,500,000. British Columbia Sheep Company, Limited, $100,000. Lee Building, Limited, $200,000. Coast Counties Investment Agencies, Limited, $100,000.

Ottawa, Ont.—National Amusements, Limited, $50,000. Adelard Emile Charron, Marie Louise Charron, Frederick Henry LeDuc. Brennan Properties, Limited, $40,000. CANADA'S REVENUE RETURNS

A decrease of $24,000,000 in Canada's revenue for the eight months of the present fiscal year is shown in the November financial statement. The total revenue up to the end of last month, since April 1st, the commencement of the present fiscal year, is $90,468,002, compared with $114,640,295 in the same time last year. The November receipts for 1914 are $9,495,536, as against $13,536,981 in November, 1913.

There was a large decrease in the customs revenue. Postal receipts have maintained a good average. From the consolidated account $73,708,627 was spent in the eight months of this year, compared with $66,678,060 for last year.

On capital account the outlay has totalled $28,231,933, a decrease of eight millions. The Dominion debt on December 1st stood at $364,843,247, an increase of $12,167,848 for November alone.

Canada's inland revenue for the last fiscal year, plus collections left from previous years, and less refunds, amounted to $21,748,548.

CANADIAN Statistics, Concise, Accurate and Up-to-date. They will be in great demand at the end of the year.

BANK OF MONTREAL RESULTS

Sir Frederick Williams-Taylor at the annual meeting of shareholders of the Bank of Montreal, recalled that it is common knowledge that the policy of the bank is conservatism, a policy that tends in prosperous days to arouse in some quarters a measure of criticism, but one meeting with unstinted approval in times as troublous as those we face at present. Thanks to a reasonably liquid position, the unexpected outbreak of war found the Bank of Montreal not unprepared. It was an easy transition for the bank to convert into actual cash and bank balances to the extent it was deemed advisable, the secondary line of defence in the shape of other reserves held in London and New York. The strong position of the bank is reflected in the balance sheet. The cash reserves and bank balances have been brought up to a very strong point.

After allowing for a contribution of $100,000 for national patriotic purposes and while reporting comparatively smaller profits on the year's operations, as a result of strengthening the bank's position, and of prevailing conditions, the bank was able to earn comfortably its customary dividend, continue the semi-annual bonus of 1 per cent., and at the same time make full provision for realized and prospective losses. The bank's quick assets increased during the year, the ratio to liabilities to the public being 55.17 per cent. at the end of October, 1914, as compared with 49.69 per cent. at the same date in 1913. That result was obtained without restricting the legitimate demands upon the bank by the merchant and manufacturing clientele in Canada. Current loans in Canada, which are mainly to the mercantile community, are lower now by $10,172,653.79 than they were at the corresponding date last year, but the reduction was made prior to the war, and there has been an increase of over $3,000,000 in such loans and of over $13,000,000 in total loans in Canada since the outbreak of war.

Bank deposits throughout Canada naturally have declined slightly, the grand total of all the banks to the end of October being $1,144,199,224, as compared with $1,146,739,868 a year ago. During the same period the Bank of Montreal's deposits increased by $7,649,836.11, exclusive of deposits made by and balances due to other banks in Canada, which increased $5,570,032.53. The bank's notes in circulation are $169,837 greater than a year ago.

The total assets of the Bank of Montreal are $259,481,663. The bank maintains its strong position in a world-wide banking sphere and continues to do its important part in the strengthening of the national structure and credit abroad

NEW ISSUES OF CANADIAN BANK BILLS

Some striking bank bill designs are just being issued by the Royal Bank of Canada and the Standard Bank. The $5 bill of the Royal Bank is in a green tent and displays the portraits of Mr. E. L. Pease, the general manager of the bank and of Mr. H. S. Holt, its president. Both are excellent likenesses The $10 bill is perhaps one of the most picturesque designs, at the same time typifying the national and Empire ideas. There are draped in an artistic manner several Union Jacks and ensigns enough to satisfy the most ardent patriot. The Canadian beaver has a prominent place in the design as also has the maple leaf. This bill is printed on a light brown surface.

The $20 bill is on a blue background and shows a Canadian railroad and harvesting scene, typical of the west. All the bills bear the signature of Mr. H. S. Holt, as president, and have the royal coat of arms on the back.

The Standard Bank's $5 bill has a youthful feminine head on a red background. The centre of the $10 bill displays on an olive green background, the portrait of Mr. Cowan, the president of the bank The $20 bill has two feminine heads on a green background. The three bills have respectively green, orange brown and green backs, with the bank's coat of arms, a lion rampant bearing the standard. All the bills bear Mr Cowan's signature. The American Bank Note Company is responsible for the attractive designs and the execution of this bank's new bills.

WEEKLY FIRE LOSSES

The Monetary Times' list of fire losses of the past week has been held over on account of pressure on space.

A SAFE INVESTMENT

The safest and most profitable investment you can make is to purchase a copy of

MURRAY'S INTEREST TABLES

at a cost of $10.00.

By means of it you can see the interest due on your investments.

These tables are from 2½% to 8% from 1 day to 368 on sums from $1.00 to $10,000

LIFE INSURANCE FOR WOMEN

Need is Increasing Rapidly — Duty of the Companies

The increasing need of life insurance for women was the subject of an interesting address by Mr. H. C. Cox, president of the Canada Life Assurance Company, yesterday. Mr Cox spoke at the eighth annual convention of the Association of Life Insurance Presidents, at New York. The problem of the insurance of women, he said, has ever been one of interest and difficulty because of the paucity of knowledge we have been able to bring to bear upon its solution. At a very early period we learn that woman as an insurable subject was considered most desirable; at another period—the companies having insured her on a lower premium rate than men because of her supposed superior longevity—we find her attractiveness quite dispelled by the unfavorable mortality experienced.

At still another and later period, we find her again being wooed by life insurance companies, until presently practically all barriers to her acceptance have been removed.

As pointed out by Cornelius Walford, F.I.A., the earliest glimmering of the idea of woman as an interesting statistical subject was when Graunt, in 1661, made something in the nature of a discovery, namely, that in the city of London there was a preponderance of males over females, but that the females outlived the males, in spite of the fact, which had come under his observation, that "Physicians have two women patients to one man, yet more men die than women." He was, however, speaking only generally, and came to no positive conclusions.

Greater Longevity of Women.

In 1693 Dr. Halley, in constructing the Breslau table of mortality, had not discovered the superior longevity of women, and it was not until 1742 that Kersseboom, in his investigations into the mortality of the Dutch Annuitants, took special note of that amongst females, and his data established the fact of their greater longevity. This information, together with further proofs supplied in 1746 by Deparcieux, an investigator of the French Tontines, was turned to advantage by the Dutch, who, when subscribing to a scheme of English Exchequer Life Annuities, nominated girls instead of boys, thus obtaining the benefit of the more favorable mortality.

What General Experience Shows.

Up to 1843 the confidence engendered by these discoveries had, as stated, resulted in the life insurance companies offering lower rates to women, which proved to be a sorry miscalculation, for in that year the tabulated experience of seventeen British offices demonstrated that the boasted longevity of women failed to assert itself when insured women were under observation.

The general experience from that time was that the insured female presented a doubtful aspect and the unfavorable mortality gave rise to the suspicion that the offices had been grossly deceived by the woman applicants, who, it was asserted, could not have disclosed their true physical condition to the examining physician. An excessive death rate in the first five years of risk seemed to bear out this contention but no specific case of fraud could be discovered. Many suggestions were offered in explanation of this reversal of the former case for women as good insurable risks, it even being mooted that they were subconsciously warned of the approach of disease while they were still in a perfect state of health, and thus impelled by instinct they applied for insurance.

In 1861 the compilation of the well known Combined Experience Table of Mortality led to the conclusion that the greatest reliance could be placed upon a table which was based upon observation of male lives exclusively, as the mortality amongst insured females had been clearly shown to be higher than amongst insured males. The recent investigation made by the Actuarial Society of America still further confirms this finding, although the superior longevity of women in general is still unquestioned.

Women as Voluntary Applicants.

This wide divergence in experience as exposed by a comparison between insured and uninsured women we may in large measure account for by a review of the practice of the companies, which would seem to indicate that they have somewhat extensively adopted the method of waiting for female insurants to propose themselves. If the same procedure were followed in regard to men the result would, in all probability, be similarly adverse. Officials and agents know the necessity of urging men to apply for life insurance, and the voluntary applicant in some degree invites especial scrutiny of his desirability as a risk by this very offering of himself without solicitation. It would, therefore, seem that if the increasing need of life insurance for women is to be met, without undue stress upon the companies, we must adopt toward them the same attitude as toward men. It is not sufficient to accord them the same rates and plans, as has already been done quite commonly, but that we may create a favorable average our agency systems must be extended to include an aggressive campaign amongst women of all classes, employing such safeguards as are reasonably demanded for the female risk in the same manner that hazards are guarded against in dealing with men in various occupations and walks of life.

An Increasing Need.

That the occasion of insurance for women is great and urgent and largely unsatisfied is apparent, and we must perforce acknowledge that its need has far outgrown the machinery of the companies for supplying it, the personal solicitation which has been the great factor in the increase of insurance amongst men being almost entirely neglected. Probably less than seven per cent. of insurance risks are upon the lives of women. This surely cannot be considered a fair proportion, having in mind how very extensively woman has been thrust into the professional and industrial occupations by our modern civilization. In art, in literature, in law, in medicine, in education, in finance, in commerce, in manufacture, and even now in war the twentieth century woman is bearing her full share in the creation and conservation of the wealth of nations, and in the support of those for whom circumstance had rendered her responsible.

While this increasing absorption of women in business pursuits may by some be viewed as constituting a danger to the State, on the one hand through giving them interests foreign to the home, and on the other through the effect of their competition with man, thereby lessening his earning capacity to the point where the forming of home ties is not feasible, it is nevertheless the outcome of present-day economic conditions, and must be recognized as an integral part of our financial and industrial fabric. Charged, then, with the maintenance of themselves and sundry others, it would seem they perform a function as important to society as do their brothers, and they cannot logically and properly prosecute their avocations with independence and content without the provision and protection for the future of which those brothers have the advantage and which they also should be able to secure through life insurance. Every basic argument in support of insurance for men serves also to impress the necessity and desirability of similar protection for such women producers. In addition and of equal importance is the economic value to the State of having insured those women who have established for themselves a monetary value through becoming the support of others who may eventually but for the aid of life insurance become a charge upon the State.

Entitled also to consideration and insurance benefits are numberless women of the home, whose lives represent a value which cannot be expressed in terms of money, but who nevertheless constitute one of our greatest national resources and present an indisputable insurable interest.

Duty of the Companies.

It would seem, therefore, that the life insurance companies have a duty in respect of these women who are sharing in the erection of our business and social structure, that our institutions should approach the obligation in the light of its broader relation to the community at large, and that, looking to its adequate discharge and the satisfying of the increasing insurance need of our women, we should set in motion whatever of machinery we have or may be able to devise, having always in mind that it is also laid upon them by their relation to the State to make, even at the cost of some individual discomfort, ample or possible provision for the perpetuation of their earning capacity in its application to others.

TRANSPORTATION AND MUNICIPAL DEBTS

Building Radial Lines in Agricultural Areas—Routes and Traffic Receipts

BY A. T. DRUMMOND, LL.D.

The recent votes by various municipalities in the counties of York and Ontario in favor of the incurring by each municipality of a large bond debt to pay for its share of the cost of construction of a system of electric railways do not seem to imply a full understanding of the responsibilities attached to such debts, or of the traffic conditions required to make such a system of railways meet not only the interest and sinking fund of the necessarily large issue of bonds, but also the considerable sums yearly required for renewals and betterments. In some cases the proposed municipal indebtedness is so large in proportion to population as to give the impression that these municipalities do not ever expect to pay any of the principal or interest of the bonds they have thus voted to issue, and that a belief must have prevailed that deficiencies, whenever they arose, and all further requirements of capital for extensions and betterments, would be taken care of by the hydro-electric commission or the Ontario government.

Comparison of Debts.

Farmers are not accustomed to freely vote away large sums, the principal and interest of which are a direct charge on their farms and have to be paid off in taxes. One township, with a population, by the last census, of 5,328, has agreed to a responsibility of $803,038, or a debt of $151 for each inhabitant; another with a population of 3,479, has voted to assume $488,152, or $140 for each inhabitant; whilst one village, with 1,433 population, was asked to undertake $204,655 liability, which would be $142 per head—in each case in addition to all existing indebtedness.

Most of the municipalities had also lost population since the previous census. And yet, these municipal bonds thus to be issued are evidently intended to be the background for an issue of hydro-electric commission or Ontario government bonds for construction purposes.

How do these amounts compare per head with the gross indebtedness of other Ontario municipalities, including in this indebtedness the sums paid for waterworks, light, power, gas, and even street railways and railway subsidies? Taking at random a few cities, towns and townships, Berlin has a debt of $76 per head of population; Smith's Falls, $106; Toronto, $110; Hamilton, $91; Stratford, $92; Brockville, $92; Tavistock village, $18; township of York, $18; township of Grey, $42; township of Dover, $33; township of Cornwall, $25; whilst, by way of further comparison, the present debt of the Dominion, including the new war loan, is $72; and the obligations of Alberta are $42

How Government Railways Have Fared.

In Canada, railways operated by governments or by government commissions have not in the past been financially successful, and every railway man knows the reasons why. Very many electric railways in the United States, generally much less costly in construction than that proposed here, have been injudiciously placed, have not been a success, and, as a result, have brought all electric road propositions into disfavor with financiers there.

The success or non-success of a railway depends, in the first and foremost place, on the planning of the route being made, not with a view to local public or private interests, but solely with the object of obtaining the shortest line consistent with good engineering conditions, and with such a maximum of traffic as will ensure a net surplus much more than ample for the service of the bonds. The ideal railway is that which, by a short route, connects two large, important cities, and has between them, alongside the line, not only good agricultural country, but some thriving manufacturing cities and towns.

The further a railway proposition is from that ideal, the more difficult does it become to secure a sufficient traffic. Mining traffic is often precarious, and, at the best, is fluctuating; suburban business is unremunerative, unless large, and supplementary to a good long-distance traffic; tourist and excursion travel is limited to two or three months of the year; agricultural traffic has also its principal season; but the railway which has important manufacturing cities and towns on its route has the most profitable and most permanent source of revenue, as it means an active, growing population, and results in much other business becoming tributary to the road.

The purpose of this proposed electric railway through these two counties is to connect with Toronto not some reasonably distant and important commercial centre, but certain villages by a somewhat zigzag main line, and certain other villages by means of branches from that main line—all built at high cost. It is difficult, from the information given to the press, to know what the final decision may be as to the length of the railway and the number of its branches—some early proposals limited its length to seventy-one miles—but seven townships and six villages appear to have been asked to vote upon the issue of debentures by them, aggregating $4,346,038, which, at the estimated cost of about $40,000 per mile, would provide for 108 miles of railway. The entire population of these townships and villages is only 38,294, and there is the competition of other railways to be considered.

The question is not simply whether this railway will be of advantage to the people of these townships and villages and of Toronto. Every railway is more or less advantageous to the sections of the country served by it, but the question of importance to those who provide the funds for its construction—these funds are represented by the railway bonds—is whether the gross traffic receipts will at least provide not merely for the operating expenses, but also for the interest and sinking fund of these bonds; for the constant outlay in renewals in permanent way and equipment; and a fund for betterments in tracks, sidings, yards, buildings, and car and overhead equipment, as the traffic increases.

For Consideration of Whole Province.

Municipalities in various other parts of south-western Ontario are asking for electric roads to be built by the hydro-electric commission on the same principle, and the question is thus general in application and important. In the present case, the absence of a good terminal city at the northern end, and of any leading manufacturing towns on the line of road, and the facts that the business will be so notably agricultural, and that each larger village to be passed through is already in direct railway communication with Toronto, make it incumbent that the municipalities should consult traffic experts as to the routes and the sufficiency of the traffic before committing themselves to huge responsibilities.

The position would be different if the commission or the Ontario government, in addition to financing the construction of these electric railways, intends to take care of all deficiencies, and to provide for future extensions and betterments as they are needed, but in such case all such roads would then become, in reality, government railways, and the whole province interested in where they were to be constructed and whether they could be operated at a profit

BIG C.P.R. FINANCING STROKE

Equipment Trust Certificates of $12,690,000 Sold in the United States

On December 4th, a New York despatch stated that a syndicate headed by the Guarantee Trust Company, White, Weld and Company, Brown Brothers and Company, and Colgate, Parker and Company, bought $12,690,000 Canadian Pacific Railway Company four and a half per cent. equipment trust certificates maturing in equal semi-annual instalments of $470,000 each from July 1st, 1915, to and including July 1st, 1928. An offering will probably be made in the near future on about a 5 per cent. basis. Brown Bros. and Company and E. Lowber Stokes are forming a separate syndicate to handle the selling in the state of Pennsylvania. The issue was over-subscribed.

How Issue is Explained.

While the issue of these notes came as a surprise to financial circles, it is clearly explained by Sir Thomas Shaughnessy's statement in the annual report of the company that: "The capital expenditure of over $60,000,000 for cars and locomotives for the years 1910-13 was so very large that your directors decided that it would be proper to spread the payments for this year's deliveries, about $14,000,000, over a period of fifteen years, under the terms of an ordinary equipment trust agreement, and, therefore, a contract was made with the Victoria Rolling Stock and Realty Company to provide the equipment and receive payment in fifteen annual instalments, with interest at 4½ per cent. per annum. All of the equipment has been delivered, and the cost has been advanced by your company pending the sale of the rolling stock company's bonds, when your treasury will be recouped."

In response to an enquiry of *The Monetary Times*, Sir Thomas Shaughnessy says:—

"The equipment trust securities, sold in New York a few days ago, were those of the Victoria Rolling Stock and Realty Company of Ontario, guaranteed as to principal and interest by this company. The total amount is $12,690,000, to be paid in semi-annual instalments of $470,000 each, and interest at 4½ per cent. per annum. By the payment of these instalments, the whole amount will be repaid in 13½ years."

Policy of Company.

It has not been the policy of the Canadian Pacific Railway to finance its equipment purchases to any extent by the issue of equipment trust obligations which are secured by a mortgage on rolling stock or other equipment. At June 30th last there were but $720,000 Canadian Pacific Railway equipment securities outstanding; this amount showed a reduction from the previous year—no doubt by redemption of maturing certificates—of $160,000.

Apart from its usual large cash resources, Canadian Pacific Railway realized $45,600,000 cash from the issue of $52,000,000 ten-year notes at 80 last year. These notes were secured by assets from land sales account. The disposition of this money has not been explained.

BRITISH INVESTED CAPITAL IN UNITED STATES

"Judging from the comments which have appeared in the United States press on the Chancellor of the Exchequer's statement on Friday last in the House of Commons with regard to exchange between Great Britain and the United States of America, this appears to have been incompletely reported in America. Mr. Lloyd George has issued a statement containing the actual words as reported in the official report. They were:—

"'America, I suppose, owes us nearly a thousand million pounds in fixed and floating capital, but we could not buy. It was impossible to do any business. Why? The exchange had broken down. The paper machine had crumpled and somehow got out of order, and the result was that no business was possible.'

"This statement seems to have reached the United States in the form that America owed the United Kingdom a thousand million pounds, without any explanatory words that this sum was owed in fixed and floating capital. These words of course make it quite clear that Mr. Lloyd George's statement referred to the total of British invested capital in America, and in no way to America's indebtedness in respect of the current balance of trade between the two countries."

HOW WILL WAR EFFECT MONEY RATES?

What Big Demand for War Capital Will Mean to Industries and Railroads

A discussion of the effect of the European war upon the rate of interest for railroad and industrial securities formed a part of the address made at Boston by Mr. Charles A. Conant. He estimated that the European war was costing the various Powers about $50,000,000 per day, which would make a total of $18,000,000,000 if the war lasted a year. This, he declared, would absorb the entire supply of free capital seeking investment for a period of several years. While the usual estimate of the absorption of new securities annually was about $4,000,000,000, the Powers at war would probably not be limited to this amount, because much money which would be employed in normal times in extending private enterprises and in consumptive expenditure would be contributed to the great national loans which were already being offered. Inevitably, as on the occasion of the payment of the French indemnity, there would be a great outpouring of private saving from patriotic motives in addition to what would ordinarily appear in the market for the purchase of new securities.

The British loan of $1,750,000,000 had already been over-subscribed; and the German loan of $1,250,000,000 had also been fully covered by strenuous appeals to banks, insurance companies and private patriotism. Russia and France were able to draw temporarily upon the resources of their central banks, each with their reserve of $800,000,000 in gold, but would undoubtedly appear in the market sooner or later with offers of long-term securities equal to those offered by Great Britain and Germany.

Difficult to Secure Capital.

The effect of these demands, Mr. Conant indicated, would necessarily be to make it difficult to procure capital for other enterprises, like railways, public service corporations, mills and factories, and to raise for a considerable period of time the rate of return upon permanent investments. This would be keenly felt by the railways in their efforts to obtain capital for making necessary improvements and extensions, and would be felt in the bond market by lowering the price at which securities, whether old issues or new offerings, could be sold. The price of bonds would necessarily decline, other things being equal, to the level of the higher interest rate resulting from the big demand for capital for war purposes.

The British loan had been floated at a rate slightly more favorable to the Government than 4 per cent., but the German loan paid a little over 5 per cent. Something approximating 5 per cent. was likely to be the rate on most of the government loans, and this would probably mean a rate from ½ to 1 per cent. higher on the better types of railway and industrial issues, and perhaps a rate of 7 or 8 per cent. on issues of a more speculative character.

Destruction of Capital.

He argued that while the war involved a great destruction of fixed capital, it should be borne in mind that the destruction of capital which would otherwise be consumed during the year would not leave permanent effects in the impoverishment of the community. So far as capital which would otherwise be applied to the purchase of luxuries, or even of partial necessities, was simply diverted from the use of the ordinary consumer to that of the soldier, it might inflict hardship on the normal consumer, but would leave intact the great plant of transportation, buildings and machine production which is the distinguishing characteristic of the present economic era.

So far, however, as the operations of the war had crippled or destroyed the railway and manufacturing equipment of Belgium, Northern France and other fields of conflict, the drain would be imposed upon the supply of capital usually available for permanent investment to replace these losses. The amount blown away in powder and shell, moreover, so far as it was paid for by permanent issues of securities, would impose a considerable burden of taxation for a long period of years upon the countries issuing the securities. If a given country were compensated by a war indemnity, it would involve a shifting of the burden, without directly increasing or diminishing its effect upon the supply of capital as a whole.

The Hamilton Provident and Loan Society

HALF-YEARLY DIVIDEND No. 87

Notice is hereby given that a Dividend at the rate of eight per cent. per annum has been declared for the half-year ending December 31st, 1914, upon the paid-up Capital Stock of the Society, and that the same will be payable at the Society's Head Office, Hamilton, Ontario, on and after Saturday, the 2nd day of January, 1915.

The Transfer Books will be closed from the 14th to the 31st of December, both days inclusive.

By order of the Board,
C. FERRIE,
Hamilton, November 18th, 1914. Treasurer.

THE BANK OF MONTREAL

Annual General Meeting, Held 7th December, 1914

The 97th Annual General Meeting of the Shareholders of the Bank of Montreal was held at noon, Monday, December 7th, in the board room at the Bank's headquarters.

Amongst those present were: C. J. Fleet, K.C., H. V. Meredith, Sir Frederick Williams-Taylor, Alfred Piddington, H. B Macdougall, F. Shaughnessy, G. L. Ogilvie, C. R. Hosmer, Ed. Fiske, D. F. Angus, D. Law, A. Baumgarten, Geo. R. Hooper, W. R. Miller, Est. B. A. Boas, Mr. Johnston, Sir Thomas Shaughnessy, R. Hampson, W. H. Evans, Senator R. Mackay, W McMaster, H. Mason, Dr. William Gardiner, W. A. Leney, C. B. Gordon, Dr. Shepherd, George Caverhill, W. D. H, Percey, R. B. Angus, Edward Sawtell, W. Yuile, Horace Joseph, C. R. Black, C. Chaput, E. B. Greenshields, J. R. Ronald, Estate J. Crathern, Estate H. Finley, W. J. Morrice, Huntley Drummond, J. Patterson, L. Skaife, S. G. McElwaine, W. G. Hanson.

On the motion of Mr. R. B. Angus, Mr. H. V. Meredith was requested to take the chair.

Mr. C. J. Fleet, K.C., moved, and Mr. A. Piddington seconded, that Messrs. George R. Hooper and David Law be appointed to act as Scrutineers, and that Mr. James Aird be the Secretary of the meeting. This was carried unanimously.

The Chairman then called upon the General Manager, Sir Frederick Williams-Taylor, to read the annual report of the Directors to the Shareholders at their 97th Annual General meeting, held Monday, December 7th, 1914.

THE ANNUAL REPORT

The Directors have pleasure in presenting the Report showing the result of the Bank's business for the year ended 31st October, 1914:—

Balance of Profit and Loss Account, 31st October, 1913		$1,046,217.80
Profits for the year ended 31st October, 1914, after deducting charges of management, and making full provision for all bad and doubtful debts		2,496,451.62
		$3,542,669.42
Quarterly Dividend, 2½ per cent., paid 1st March, 1914	$ 400,000.00	
Quarterly Dividend, 2½ per cent., paid 1st June, 1914	400,000.00	
Bonus, 1 per cent., paid 1st June, 1914	160,000.00	
Quarterly Dividend, 2½ per cent., paid 1st September, 1914	400,000.00	
Quarterly Dividend, 2½ per cent., payable 1st December, 1914	400,000.00	
Bonus, 1 per cent., payable 1st December, 1914	160,000.00	
	$1,920,000.00	
Canadian Patriotic Fund	100,000.00	
Provision for Bank Premises	290,000.00	
		2,310,000.00
Balance of Profit and Loss carried forward		$1,232,669.42

Since the last Annual Meeting, Branches have been opened at points in the following Provinces:—

In Quebec—McGill street (Montreal), Valcartier Camp.

Ontario—Berlin, Parkdale (Toronto).

North-West—North Battleford, Sask; Yorkton, Sask.

British Columbia—Fort Coquitlam.

Maritime Provinces—Riverport, N.S.

The following Branches have been closed:—

In Quebec—Valcartier Camp.

North-West—Plum Coulee, Man.; Ogden Shops, Alta. (Calgary).

British Columbia—Hosmer, Nicola (Sub-Agency to Merritt).

Maritime Provinces—Edmundston, N.B.

The Directors have to record, with deep regret, the death of the Right Honorable Lord Strathcona and Mount Royal, G.C.M.G., G.C.V.O., etc., who had been a member of the Board for over forty-one years. Lord Strathcona and Mount Royal was Vice-President of the Bank from 1882 until 1887, and President of the Bank from 1887 until 1905, when he was elected Honorary President.

All the Offices of the Bank, including the Head Office, have been inspected during the year.

Bank of Montreal,
7th December, 1914.

(Signed) H. V. MEREDITH,
President.

THE GENERAL STATEMENT

The general statement of the position of the Bank on October 31, 1914, was read, as follows:—

LIABILITIES

Capital Stock			$ 16,000,000.00
Rest		$16,000,000.00	
Balance of Profits carried forward		1,232,669.42	
		$17,232,669.42	
Unclaimed Dividends		114.00	
Quarterly Dividend, payable 1st December, 1911	$400,000.00		
Bonus of 1 per cent., payable 1st December, 1911	160,000.00		
		560,000.00	
			17,792,783.42
			$33,792,783.42
Notes of the Bank in circulation		$17,231,502.00	
Deposits not bearing interest		42,689,031.57	
Deposits bearing interest, including interest accrued to date of statement		154,533,643.41	
Deposits made by and Balances due to other Banks in Canada		6,089,840.66	
Balances due to Banks and Banking Correspondents elsewhere in Canada		370,349.95	
Bills Payable		436,010.88	
			221,350,378.47
Acceptances under Letters of Credit			3,368,066.53
Liabilities not included in the foregoing			970,434.83
			$259,481,663.25

ASSETS

Gold and Silver coin current		$15,452,819.73	
Government demand notes		25,208,942.75	
Deposit in the Central Gold Reserves		1,500,000.00	
Deposit with the Minister for the purposes of the Circulation Fund		790,000.00	
Balances due by Banks and Banking Correspondents elsewhere than in Canada	$15,900,030.37		
Call and Short (not exceeding thirty days) Loans in Great Britain and United States	41,502,122.01		
		57,402,152.38	
Dominion and Provincial Government Securities not exceeding market value		[illegible]	
Railway and other Bonds, Debentures and Stocks not exceeding market value		10,254,173.91	
Canadian Municipal Securities, and British, Foreign and Colonial Public Securities other than Canadian		488,296.03	
Notes of other Banks		1,988,533.00	
Cheques on other Banks		8,069,753.60	
			$122,658,003.02
Loans to the Government of Canada		$5,000,000.00	
Current Loans and Discounts in Canada (less rebate of interest)		108,845,332.96	
Loans to Cities, Towns, Municipalities, and School Districts		9,017,324.26	
Current Loans and Discounts elsewhere than in Canada (less rebate of interest)		5,756,003.55	
Overdue debts, estimated loss provided for		452,768.65	
			129,071,429.42
Bank Premises at not more than cost (less amounts written off)			4,000,000.00
Real Estate other than Bank Premises			173,620.79
Liabilities of Customers under Letters of Credit (as per Contra)			3,368,066.53
Other Assets not included in the foregoing			210,543.49
			$259,481,663.25

H. V. MEREDITH,
President.

FREDERICK WILLIAMS-TAYLOR,
General Manager.

To the Shareholders of the Bank of Montreal:

We have checked the Cash and verified the Securities of the Bank at the Chief Office and at several of the principal Branches at various times during the year, as well as on 31st October, 1914, and we found them to be in accord with the books of the Bank. We have obtained all information and explanations required, and all transactions that have come under our notice have, in our opinion, been within the powers of the Bank. We have compared the above Balance Sheet with the Books and Accounts at the Chief Office of the Bank, and with the certified Returns received from its Branches, and we certify that in our opinion it exhibits a true and correct view of the state of the Bank's affairs according to the best of our information, the explanations given to us, and as shown by the Books of the Bank.

Montreal, 19th November, 1914.

GEORGE HYDE,
J. MAXTONE GRAHAM,
JAMES HUTCHISON,
Auditors.
Chartered Accountants.

The 97th Annual General Meeting of the Shareholders of the Bank of Montreal was held in the Board Room of the head office of the Bank on Monday, December 7th.

The meeting was marked by complete addresses by Mr. H. V. Meredith, the President, and Sir Frederick Williams Taylor, the General Manager.

THE PRESIDENT'S ADDRESS

In moving the adoption of the annual statement, Mr. H. V. Meredith, the President, said:—

The statements presented to you will, I trust, be received with satisfaction.

While profits show a diminution compared with those of the preceding year, the shrinkage is mainly attributable to the fact that during the world-wide disturbed financial conditions which have existed we deemed it prudent to forego the profit on a portion of our liquid reserves ordinarily carried abroad and having an earning power. These we transferred to our vaults to provide against every possible contingency, and to support, if required, the general financial situation in Canada.

I feel sure this course of action will meet with your approval.

The year, I need hardly say, has been an eventful and anxious one.

POSITION IN GREAT BRITAIN

In Great Britain the period immediately antecedent to the declaration of war was marked by considerable ease in the money market, coupled with a slight recession in trade, following a long period of unrest and depression caused by the Balkan chaos and other adverse factors.

The outbreak of hostilities brought about the collapse of the whole financial fabric, the closing of the bourses and a world-wide financial cataclysm. For a time at least a condition of well nigh general insolvency was threatened. The steps which were taken to cope with the crisis are of too recent occurrence to require reiteration.

Britain's command of the sea was undoubtedly the chief factor in bringing about a recovery of confidence, but great credit is due to the government and their able financial advisers for their bold and statesmanlike views of the situation and their prompt action in meeting the crisis, as well as to the Bank of England for the courage and activity with which the plans of the government were carried out.

The great latent wealth of the Empire has been demonstrated by the patriotic response to the recent government loan, and this is being followed by the removal of barriers to trade which is now once more approaching a normal condition.

What the consequences of the war will be must depend, I think, to a large extent on the duration of hostilities.

Whether a long period of depression and economy, in order to replace the wasted wealth of the world will follow its conclusion, whether the removal of political apprehensions and the prospect of a long era of peace will bring about an immediate restoration of prices—not alone of commodities, but of stock exchange and of other securities—it would be idle at the moment to predict.

In either event, all borrowing countries, including Canada, must expect their facilities to be largely curtailed while the wastage of war is being repaired.

IN THE UNITED STATES

In the United States, the revival of business which had begun to be perceptible met with an abrupt check upon the declaration of war, and in consequence of the cutting off of supplies of European capital, plans for development and expansion in all directions were either deferred or abandoned.

Notwithstanding that the Western sections have reaped more than usually bountiful crops, the tendency there, as elsewhere, is towards general curtailment and the avoidance of capital expenditure.

These conditions do not appear to result so much from an absence of resources or unsound trade as from doubts and uncertainties touching the future, affecting corporate bodies as well as all classes of the community. This distrust will, no doubt, gradually disappear and conditions right themselves in time. The increased prices, together with shipments of grain and food stuffs, and the large sale of war materials are having a stimulating effect on business generally, and gradually offsetting the adverse balance of trade.

The embarrassments caused by the disarrangement of the foreign exchange market have been largely overcome.

There appears to be a growing feeling in favour of giving some measure of relief to the railways by way of increased freight rates so that they may be the better enabled to negotiate securities to meet their present needs and to provide for necessary expansion.

The coming into force of the Federal Reserve Banks operations should cause an easing money market until commercial activity absorbs the free funds created thereby, and it will likely prove a potent factor in restoring normal conditions throughout the country, as well as preventing those periodical crises which have been so disturbing in the past.

The opening of the exchange has helped to relieve an acute cotton situation. It has also been further considerably eased by the declaration that cotton will not be considered contraband. The operations of the New York stock exchange are gradually being extended and the fact of its now having been opened, even with restrictions, has had a good sentimental effect upon the whole financial situation.

POSITION IN CANADA

In Canada, a period of several years of remarkable growth and progress was accompanied by large—and in some cases imprudent capital expenditures by industrial, municipal and other corporations, and an ambitious programme of railway construction made possible by the ease with which money could be obtained.

These conditions were taken advantage of by company promoters and speculators to bring about unduly inflated and fictitious values, and the extent to which these were carried directed suspicion and distrust of our economic position in the money markets of the world, followed by a close scrutiny of our securities and a curtailment of money supplies so essential to our development.

The ensuing check caused embarrassment in some instances, but had a salutary effect on the country in general, as it brought us to realize the fact that unproductive expenditures must of necessity cease for a while, and our efforts be directed towards development of natural resources, accelerated by a large flow of immigration.

It fortunately happened that for over a year previously, our manufacturers and merchants, preparing for such a contingency, had entered upon a period of curtailment and readjustment; and our economic position had been approaching a more normal condition. They were, therefore, the better able to meet the shrinkage in their turn-over occasioned first by restricted demands and now by the war.

I refer to these somewhat trite matters because the halt in business presently experienced may create in the public mind a more gloomy view than is warranted by actual conditions. It is well to remember that for a decade the commercial expansion of Canada was really abnormal.

A decline in the foreign trade of the country had set in before the outbreak of war, and has been accentuated by that event. In the seven months ending October 31st last, the value of merchandise imported, exclusive of specie, was $286,800,000, or $103,700,000 less than in the corresponding period of the preceding year. On the other hand, the value of Canadian produce exported has been fairly well maintained, having been for the seven months $226,757,000, as compared with $245,550,000 a year ago. The adverse balance of trade has, therefore, been reduced from $145,000,000 to $60,000,000 in this period, a substantial improvement of $85,000,000, the more satisfactory in view of the practical closing of the London money market to Canadian loans. The transportation interests of Canada have also been benefited by an increase in the value of exports of United States products through our ports from $19,000,000 in the seven months period of 1913 to $41,600,000 this year.

LEGITIMATE BUSINESS SOUND

I am glad to be able to say that from the reports which reach me from all parts of the country, legitimate business is fundamentally sound. While trade generally is quiet, and in many branches restricted, especially those dependent upon construction work, there is compensation, in a measure, by activities in others which provide the vast supplies required by the war.

A general suspension of new undertakings is apparent. Agriculture—the backbone of the country—continues prosperous, notwithstanding a shorter crop yield, owing to the high prices being paid for grain and other farm products. The great increase in the number and value of live stock in the North-West is especially gratifying.

Farmers are preparing to increase the acreage of land under crop, and manufacturers are taking advantage of the situation to extend their sales where foreign competition, for the time being, has been eliminated. There is, moreover, an undiminished confidence in the future which is an asset of no little importance.

Considerable unemployment exists, but the extent of it is probably over-estimated, and I think our position in this respect will compare favorably with that of other countries.

These conditions are overshadowed at the moment by a war so disastrous and so unexpected that even yet many of us do not grasp the full significance of it all. New local conditions and new problems had to be met.

GOVERNMENT'S WISE COURSE

The wise and timely action of the Finance Minister in providing facilities for rediscount, and in making Bank Notes legal tender, had a steadying effect throughout the country, and has enabled the Banks under all circumstances to meet the legitimate demands of business and to keep in hand ample resources against deposits.

Power was taken by the government to declare a moratorium, but fortunately it has not been necessary to put this into effect, for all must recognize the supreme consideration of maintaining our credit in the money markets of the world.

The war, by closing the financial markets of all countries, has precluded us from obtaining capital for construction and development work and so long as these conditions prevail, it will be necessary for us to conserve our resources rather than proceed with other than unavoidable capital expenditure.

The financial fallacy of issuing inflated currency for such purpose—abundantly proved by experience of other countries—is well known, and Canada is to be congratulated on having avoided the miseries of a depreciating paper currency.

In this connection I may remind you there is a homely adage that "no one has yet succeeded in lifting himself by his boot straps."

Nor should it be forgotten that we have a large foreign interest indebtedness to be liquidated by exports or new borrowings.

For the latter, the London market being now less available, we shall have to rely partly on such facilities as the United States market can offer and, in a measure, upon our own resources, to solve the problem of restricted trade and shrinking revenue, as well as to meet maturing interest, capital commitments, and other obligations.

FOREIGN RESERVES VALUABLE

Our reserves abroad have proved valuable in this connection, as they are enabling us to conserve the gold supply of Canada.

War and other adverse conditions are bound to retard our progress. A period of rest and recuperation may be expected, but the future depends to a great extent upon the spirit with which the people meet the changed conditions.

Economy and prudence in the matter of expenditure, and an earnest effort to increase production of exportable articles, will in time usher in an era of active trade and renewed prosperity.

There is no question in my mind that after a pause, the duration of which will be determined by the measure of our production and by our savings, we shall again enter on a period of progress and development, and that pause, I believe, will not be long continued.

Mr. R. B. Angus seconded the motion for the adoption of the Report, which was carried unanimously.

THE GENERAL MANAGER'S ADDRESS.

Sir Frederick Williams-Taylor, the General Manager of the Bank, then made his annual address, as follows:—

Gentlemen:—This Bank is now approaching its centenary, but never before in the ninety-seven years of its history has the annual balance sheet been presented to the Shareholders under such universally perturbed financial conditions as exist at the present time.

For the sake of consecutiveness and as a natural preface, I may say that since the outbreak of the present war all bourses have ceased to transact business. In consequence throughout the world at large Stock Exchange securities have become unrealizable except by limited sale and slow process.

In a sense a large part of the trading and manufacturing world has undergone a course of declension towards first principles. The most readily saleable commodities in large volume now are the necessities of life, either direct or represented by commercial paper, and the appliances created by man for the destruction of life.

As the President has ably reviewed the general trade and financial situation both in Canada and at the chief centres abroad, my [illegible] are confined to an explanation of the most important features in the accounts I have the honor to submit to you and the points arising therefrom.

It is pertinent to interject that the interests of the Bank of Montreal have become of such an international character that one cannot adequately analyze and comment upon our balance sheet without at least reference to London and New York.

LONDON

The interest taken by Canada in the London financial situation is due to a combination of firm patriotism and monetary dependence. Not only are we solicitous for the welfare of our Empire's financial centre, but the Dominion has financed its requirements in that market to an extent obvious enough to the few but only recently fully appreciated by the people of this country as a whole.

It might be added without boastfulness that this Bank's London business has steadily increased in importance step by step with the development of our country, until we have attained a prestige, and what has been termed by others, a unique position among Colonial Banks represented in the great metropolis, that you, its Shareholders, can regard with a measure of national and, may I say, individual pride.

NEW YORK

We are naturally greatly interested in New York conditions, as not only is that city the Clearing House of North America, but also the channel through which the bulk of our foreign exchange transactions pass. Further, the financial relations of the two countries become more intimate and further dovetailed with the ever-increasing establishment in Canada of branches of great American industrial companies.

POLICY-LIQUIDITY

It is common knowledge that the policy of this Bank is conservatism, a policy that tends in prosperous days to arouse in some quarters a measure of criticism, but one meeting with unstinted approval in times as troublous as those we face at present.

Thanks to a reasonably liquid position, the unexpected outbreak of war found us not unprepared. It was an easy transition for us to convert into actual cash and bank balances, to the extent we deemed advisable, our secondary line of defence in the shape of other reserves held, as you are aware, in London and New York.

PROFITS—PATRIOTIC FUND

As banks are not eleemosynary institutions, it is our duty to earn for the shareholders such measure of profit as is consistent with the safe employment of your capital and the deposit moneys entrusted to our care. Under normal conditions our first consideration has ever, as you know, been safety, but with the financial world out of joint we have felt it our duty, both in self protection and in a desire to bear our share of the national burden in safeguarding the general situation, to take additional precautions. In pursuance of this policy our cash reserves and bank balances have been brought up to a percentage point that seemingly precludes danger.

Naturally the greater volume of money unemployed, the smaller our profits. Nevertheless we are gratified to have been able to comfortably earn our customary dividend, continue the semi-annual bonus of 1 per cent., and at the same time to have made, in our opinion, full provision for realized and prospective losses.

The $100,000 gladly voted by your Directors for national patriotic purposes was taken out of the year's profits.

DEPOSITS

For obvious reasons it is natural that bank deposits throughout Canada should decline as they have done to a slight extent, the grand total of all the banks to the end of October being $1,144,1[illegible]9,224, as compared with $1,146,739,868 a year ago. During the same period our own deposits have increased by $7,649,836.11, exclusive of deposits made by and balances due to other banks in Canada, which have increased by $5,570,032.53.

CIRCULATION

Our notes in circulation are $169,837 greater than a year ago.

QUICK ASSETS—CURRENT LOANS

As before intimated, our quick assets have increased during the year, the ratio to liabilities to the public being [illegible] per cent. at the end of October, 1914, as compared with [illegible] per cent. at the same date in 1913. It is satisfactory to be able to state that this has been accomplished without restricting the legitimate demands upon us by our merchant and manufacturing clientele in Canada. It is the case that our current loans in Canada, which, as you are aware, are mainly to the mercantile community, are lower now by $1[illegible],172,653.79 than they were at the corresponding date last year, but I desire to make it quite clear that the reduction was ante bellum, and that there has been an increase of over three million dollars in such loans and of over thirteen million dollars in total loans in Canada since the outbreak of war.

It is only fair to add that the wisdom of keeping our secondary reserves—viz: our call loans—in London and New York instead of in Canada, has once again been strikingly demonstrated. If the war had found us in a reverse position it would have indeed been a serious matter, not only for ourselves, but for the entire community. In other words, the wisdom of this Bank in having its call loans available outside of Canada in time of stress is now being splendidly justified.

MUNICIPALITIES

Our loans to Municipalities stand at $9,017,324.26, as compared with $5,227,905.74 at the corresponding date last year. A very large proportion of this sum has been advanced in anticipation of tax payments.

Loans have been made against the security of debentures in certain instances, but only as a matter of public policy to enable our civic clients to pay for work to which they were committed, or where the health or safety of the citizens was at stake. We have felt it our duty to urge upon both our Provincial and Municipal friends the wisdom, if not the imperative necessity, of refraining from committing themselves to fresh capital outlay and of limiting their expenditure to essential undertakings. I am glad to be able to say that, as a rule, our advice has been well received and in most cases conscientiously followed.

PROVINCES

I would now like to briefly recite to you the situation as we find it in our various Provinces.

PROVINCE OF ONTARIO

General conditions in Ontario are moderately satisfactory. Crops have been quite good, with high prices, and profitable results have accrued generally to those engaged in agricultural pursuits.

The lumber trade is dull.

The production of silver in the Cobalt District shows a slight falling off.

Manufacturing has been quiet, with a material reduction in the labor employed, particularly in those industries producing machinery and agricultural implements.

Wholesale conditions are reasonably satisfactory, but retail merchants are feeling the decreased volume of business consequent upon reduced wages and pay rolls.

Urban real estate is inactive, but a lower level in prices is inevitable.

PROVINCE OF QUEBEC

Reasonably satisfactory conditions prevail throughout the Province of Quebec, which, if less progressive than some of its sister Provinces, is also for the same reason less liable to periods of depression.

Agricultural conditions have been reasonably good.

The lumber trade has had an average year and the price and demand from Great Britain are [illegible], due to the closing of the Baltic and the curtailment of the output in Russia consequent upon mobilization.

Manufacturing industries have been quieter, with fewer operatives employed, but textile and certain other lines are stimulated by orders from abroad.

There has been little movement in real estate, but nominal values have not appreciably fallen.

MARITIME PROVINCES

Though the Maritime Provinces are not enjoying the same measure of prosperity as a year ago, economic conditions may be summed up as being fairly healthy, and surprisingly good as compared with those elsewhere. This, perhaps, may be attributed to the fact that previously there has been an absence of inflation and [illegible] prosperity, and consequently no severe reaction.

The [illegible] have been [illegible] prosperous. The apple crop has been large and of excellent quality, but this, unfortunately, is offset by the low prices prevailing.

Much money has been invested in the black fox industry, but this business has proved hazardous, and the possible result of a marked decline in prices must not be overlooked.

The demand and price for lumber declined during the early part of the year, but the foreign trade is improving with a resultant upward tendency in prices.

The fishing industry has been less satisfactory. The catch shows a reduction and lower prices prevail.

There has been a diminution of upwards of 250,000 tons in the coal mined in Nova Scotia as compared with last year, largely accounted for by the partial closing down of steel plants and other allied industries. This unfavorable feature of the situation is reflected in the manufacturing towns.

NORTH-WEST PROVINCES

In the North-West Provinces agriculture and stock-raising are of primary importance, and all other industries and businesses are more or less directly or indirectly dependent upon the success of the farming community.

The results of the crop for the year 1914 have been satisfactory. Certain districts suffered severely from drought at the critical period, and the total yield is consequently less than last year, but with the higher prices prevailing the value of the grain produced is somewhat greater. More land is being brought under cultivation, and owing to the early harvest and a favorable autumn it is expected that a record acreage will be under crop next year.

Mixed farming is receiving more attention with gratifying results and more live stock is being raised.

The flour mills are well employed, but other manufacturing industries are quiet.

Trade conditions are not altogether satisfactory, but credit is granted less freely than formerly.

There has been a decline in realty values with few transactions.

The North-West Provinces undoubtedly are passing through a period of stress, but with their great areas of good farm lands still uncultivated capable of producing vast food supplies, we look to the future with a justifiable measure of confidence.

PROVINCE OF BRITISH COLUMBIA

British Columbia, after nearly two decades of almost continuous prosperity, development and expansion in business, is now suffering from reaction, accentuated by the general commercial depression and world-wide financial distress.

Agricultural conditions continue to show improvement. Crops are good, but the prices for fruit have not come up to expectations. There is a tendency to increase the production of live stock, for which the demand is good.

It is a matter of common knowledge that the lumber business has been in an unsatisfactory state resultant upon overproduction, restriction in building operations throughout the West, and American competition.

It is estimated that the total mineral production for 1914 will be 75 per cent. of last year. Consequent upon the inactivity of the smelters, the collieries also are not doing so well, and the output of coal has been greatly diminished.

The fisheries have had a successful season. The salmon run has been good with a ready demand and satisfactory prices. The halibut catch also has been satisfactory, but the market is less so.

Provincial and municipal expenditure is, of necessity, being curtailed.

The year 1914 has marked an almost complete cessation in real estate speculation with a general decline in values.

NEWFOUNDLAND

General conditions in Newfoundland, England's oldest Colony, cannot be described as altogether satisfactory.

The pulp and paper industry is normal. The catch of codfish, the great staple product of the country, has been smaller than usual and the outbreak of war practically demoralized for a time the usual markets, resulting in a slackened demand and low prices. In both, however, I am glad to state an improvement is now perceptible. The seal catch was almost up to the average, but the lobster catch has been unsatisfactory.

As trade conditions in Newfoundland are governed almost entirely by the return from fisheries, business generally is affected disadvantageously this year, and the immediate outlook is somewhat uncertain. Nevertheless it is well to bear in mind that the Island's all important product is a staple article of food and it may be that the war, so far disadvantageous, may presently prove otherwise.

MEXICO

Conditions in Mexico continue disturbed, with business practically at a standstill, and it is problematical when a more settled state of affairs may be expected.

The business of our office in Mexico City has been reduced to the lowest possible limit, and is being ably conducted under exceptionally trying conditions.

THE EFFECT UPON CANADA

Your President has adequately reviewed the general situation in a masterly manner that makes further remarks superfluous, but perhaps I may be permitted to say in summary of my own comments that from the financial point of view the outstanding result of the war upon Canada has been the instantaneous stoppage of the supply of British capital to which we had become so accustomed, that sight was too frequently lost of its importance as a factor in the development of the Dominion.

Money from this source flowed to us in such increasing volume that during a considerable ante bellum period it amounted in round figures to at least $25,000,000 per month. Canadian public borrowings from the London money market for the seven months ending 31st July were $177,000,000. Since the outbreak of war the inflow of such capital has ceased.

This monetary deprivation coupled with the necessity of using our earnings and income for the purpose of paying to Great Britain interest on our indebtedness of $2,800,000,000 to London has brought home to us the extent to which the London money market and the British investor have been our friends, indeed our partners, in what might be termed this colossal Canadian enterprise.

TRADE

The trade situation we are now facing is that, owing to our present inability to borrow by public process in the London market, we seemingly must limit our imports to the approximate volume we are able to pay for in exports, or we must borrow elsewhere; that is, in the natural assumption that we wish to avoid reducing our cash capital.

There is an alternative, for it will be obvious to the most uninitiated that if our good neighbors in the United States desire us to purchase from them in anything approaching the volume of the past, they must, at least during the war, whilst the London market for public flotations is closed, provide us with the wherewithal in the shape of loans to our principal public borrowers. If they adopt this course, and a commencement has already been made, it will be clearly advantageous to them and to Canada.

HOW CANADA IS STANDING THE STRAIN

In conclusion, the financial position of our country now is that, consequent upon the prompt measures adopted by our Minister of Finance, and, owing to the elasticity and excellence of our Banking system, Canada is standing the strain without collapse. We are adjusting ourselves to the heavy burden thrust upon us without warning whilst in the constructional stage, and though here and there weak spots will develop, the general structure will surely stand the strain, and we hope and believe, we, as a country, can safeguard the situation.

It is obvious to everyone in the Dominion and to our friends abroad that we are cast upon our own resources, that we are on trial, and that our future development will depend in no small measure upon the condition in which we emerge from this trying ordeal. The longer the duration of the war, the more will the colonial props of the Empire, including Canada, suffer, but good will come out of evil, for our energies will be turned to the development of our great natural wealth, particularly our vast agricultural resources, and we can then look forward with confidence to eventually emerging from present conditions a wiser people with our affairs on a healthier, more normal and sounder basis than that with which we were threatened.

ELECTION OF DIRECTORS

The result of the ballot for the election of Directors was declared by the Chairman as follows: Messrs. R. B. Angus, D. Forbes Angus, A. Baumgarten, Huntly R. Drummond, C. B. Gordon, E. B. Greenshields, C. R. Hosmer, Sir William C. Macdonald, Hon. Robert Mackay, Wm. McMaster, H. V. Meredith, M. Morrice, Sir Thomas Shaughnessy, K.C., V.O.

The meeting then terminated.

At a subsequent meeting of the Directors, Mr. H. V. Meredith was re-elected President.

Guaranteed Investments

An investment, promising a satisfactory interest return, and guaranteed by an institution of 32 years' standing, and with a Paid-up Capital of $1,500,000 and Reserve of $1,500,000, should interest Investors. There are features of this investment offer that make it worth your further investigation.

PACIFIC MILLS, LIMITED

New Company is Incorporated to Acquire Ocean Falls Plant—Coastal Shipping

(Staff Correspondence.)

Vancouver. Dec. 1st

With the incorporation of the Pacific Mills, Limited, it would look as if activity were to be resumed at Ocean Falls, where large saw and pulp mills are located. The company is to take over all the holdings and interests of the Ocean Falls Company, the capitalization being $9,500,000, divided into 95,000 shares. The provisional incorporators are Messrs. W. S. Lane, Vancouver; R. A. Leiter, T. S. Robinson and Leslie Craven, all of Portland, and R. G. Parker, Vancouver, all lawyers, the principals being Messrs. Mortimer and Herbert Fleischhacker and William Pierce Johnson, of San Francisco, who are interested in similar enterprises on this coast. on both sides of the line.

The Ocean Falls Company was organized by Mr. L. W David, after he disposed of his interest in the Fraser River Mills to the people who comprise the Canadian Western Lumber Company. A sawmill and a pulp mill were constructed at Ocean Falls, but when operations were about to have commenced financial difficulties were encountered and Mr. I. Hamilton Benn, M.P., of London, England, came to the coast in connection with the affairs of the company, and completed negotiations with the Messrs. Fleischhacker and Johnson, which have resulted in the final reorganization under the new name.

British Capital Made Offer.

Mr. A. B. Martin, of Vancouver, has been acting as receiver. When the matter of liquidation was before the courts, Mr. David cabled from London that he had interested capital, which was prepared to take over the Ocean Falls Company, but the judge refused to receive the offer in the form it was made.

Work will be resumed at Ocean Falls, and a papermaking plant will be installed in connection with the pulp mill. The pulp and paper plants in British Columbia are busy, and the prospects are that the trade now secured will be retained, even after peace is declared in Europe.

Panama Route is Factor.

There is little doubt that the Panama Canal is a factor in promoting new shipping business, for otherwise the proposed services would hardly be instituted. The big exposition to be held in San Francisco next year is also a reason for the augmentation of traffic facilities. The Great Northern's new coasting steamers, the Great Northern and the Northern Pacific, are scheduled to leave New York in January and February for this coast, and will enter into the service between San Francisco and Flevel, the terminus on the Columbia River. The Boston-Atlantic line, the first vessel of which is on its return to Boston from Portland, proposes to extend its service to Victoria and Vancouver, via the Panama Canal, and if business warrants it, boats will ply every two weeks instead of monthly as at present.

Additional service farther afield, and having in view the extension of commerce, is also in view The Danish East Asiatic Company, of Copenhagen, which has a boat to arrive this week, plans a direct service The boats of this line are fine new motor ships.

In addition, extended coast service is announced by the Pacific Coast Steamship Company, which will have seven steamers going into San Francisco next year Some time ago it was reported that the Canadian Pacific Railway would also be in the field to secure trade between Vancouver and Victoria and San Francisco, and would extend its steamship service south during the progress of the exposition It would thus be able to give a through service to passengers from the east who made the trip through the Canadian Rockies

◆

The Grassy Lake board of trade, Alta., has been reorganized with the following officers president, George P Porter; vice president, O W Larson; secretary, J. C Knox; treasurer, P. Carruthers; Wm. Salvage, F. J James-Davies, Dr Poyntz, E. Wittum and J. K Craig are members of the executive

DEVELOP RESOURCES AND CONSERVE CAPITAL

That Must Be Canada's Policy in the Present Time of Stress

"Canadians must be patient and economize, and must get closer down to actual production from the land. Canada has such stupendous resources awaiting development that it is absurd to be pessimistic about her. But she must act the prudent and courageous part," stated Mr. A. Digby Besant, general manager of the Clerical, Medical and General Life Assurance Company, of England, who has returned from a Canadian tour, according to a Windermere cable.

"Business conditions in the west are undoubtedly difficult. In the autumn of 1912 the land boom collapsed, and that brought about a certain amount of unemployment. Then the depression caused by the collapse was accentuated by the increasing difficulty in obtaining loans on the London market. This in its turn increased further unemployment, and the prevailing conditions caused a great falling off in immigration. This falling off meant a decrease in building, and that immediately hit the lumber industry in British Columbia severely. On the top of all this came the outbreak of war, which caused much dislocation of industry.

"It must not, however, be forgotten that Western Canada is quite a new country, and that its trade has been conducted on credit, and that there has not been time for the accumulation of wealth. Consequently, any temporary set-back is far more serious in its effects than it would be in an old, settled country like England.

Must be Producers.

"As a set-off to these conditions in the wheat-growing provinces it must be said that the farmers will this year obtain very high prices for their wheat, and the circulation of the money thus obtained may do something to relieve the situation. The coming winter will be a time of difficulty for the towns. The great hope for the future is that the present crisis will check the artificial development of new towns and send a large proportion of the citizens on to the land, where they will become producers, and not merely distributors of wealth.

"Eastern Canada is in a better position to meet the strain, because she possesses larger manufacturing industries, some of which are kept actively engaged by orders due to the war. The east is, indeed, much better off than the west. Many industries, however, are hit by the loss of trade with Germany, and by the impossibility of recovering debts. For instance, the great works of the Massey-Harris Company, which employed 5,000 men in Toronto, are shut down. There is unemployment in the east as well as in the west, but owing to the eastern towns having reached something like maturity, they are better able to face the position.

Undeveloped Resources are Enormous.

"But nothing can alter the fact that the undeveloped resources of the country are enormous and that the agricultural and mineral industries are only in their infancy. They are only beginning to be tapped, and the potential wealth of the country is incalculable.

"It is rather academic to talk of Canada as a field for investment a point of especial interest, of course, to British insurance companies New capital cannot be obtained in any large amount as long as the war lasts. The constant expenditure in development is, of course, essential to a new country like Canada, and until the London loan market becomes available again, the progress of the country must be retarded. Money is needed for development in every direction for mines, irrigation, docks, and other enterprises. Large as has been the past expenditure, good investments will be found in Canada for all capital available for many years to come But in the meantime Canada will have to pass through a serious economic crisis, and for the first time will have to meet expenditure out of income, without assistance from the stream of new capital so freely imported in the past"

PRODUCTION OF PULP IN CANADA

British Columbia's Increased Output—Legislation and Record of Various Provinces

For the first time in the history of the industry more than half of the pulpwood (51.7 per cent.) produced in Canada was manufactured into pulp in Canadian pulp-mills.

During 1913 each province, except Nova Scotia, used an increased proportion of its pulpwood for home manufacture. The greatly increased production of pulpwood in British Columbia, together with the fact that this province manufactures practically all (99.9 per cent.) of its pulpwood at home, is largely responsible for the increased proportion for the whole of Canada.

Laws exist in Ontario whose strict enforcement has checked the export of raw pulpwood. In this province 79.1 per cent. of the pulpwood is used in home manufacture. The exports of raw pulpwood have increased in Nova Scotia from 0.3 per cent. in 1911 to 22.7 per cent. in 1913. Laws prohibiting the export of raw pulpwood from Crown lands in Quebec came into force on September 1st, 1910. Since that time the export for the province has decreased steadily from 69.4 per cent. in 1910 to 62.0 per cent. in 1911, 56.5 per cent. in 1912, and 56.0 per cent. in 1913. This proportion probably represents approximately the proportion of pulpwood cut on Crown lands and privately-owned limits, and may remain stable for some time. In New Brunswick the restrictive legislation of October 1st, 1911, checked the export of raw material, and in 1913 a slight increase in the proportion of pulp wood consumed in the province is to be noted. This province still exports a greater proportion of its pulpwood in the raw state than any other.

Seven Millions for Manufacturers.

The 48 active firms reporting in 1913 to the forestry branch of the department of the interior consumed in their mills a total of 1,109,034 cords of pulpwood, valued at the mill at $7,243,368. A total of 1,035,030 cords of unmanufactured pulpwood, valued at $7,070,571, was exported from Canada to the United States during the same year, bringing the total production of pulpwood to 2,144,064 cords, valued at $14,313,939.

The quantity of pulpwood consumed in Canadian pulp-mills in 1913 was an increase of 28.1 per cent. over that of 1912. The average price of raw pulpwood at the mill increased by 51 cents a cord, making an increase of 38.9 per cent. in the total value of the raw material used in this industry.

Quebec and Ontario still led the other provinces in 1913, as in 1912 British Columbia displaced Nova Scotia from fourth place on the list in 1912 and displaced New Brunswick from third place in 1913. This province now consumes 7.6 per cent. of the pulpwood used in Canada, and will probably increase this proportion in the future, as the pulp industry on the Pacific coast is still in its infancy. There was an increase in consumption in every province but Nova Scotia, where the closing of four mills resulted in a decrease of 21.4 per cent. The increases were: Quebec, 8.8 per cent.; Ontario, 84.7 per cent.; British Columbia, 140.0 per cent.; New Brunswick, 2.1 per cent.

The average cost of pulpwood at the mill in Canada in 1913 was $6.53, an increase of 8.5 per cent. from 1912. The cost increased in Quebec Ontario, New Brunswick and Nova Scotia and decreased in British Columbia.

Sixty-four Mills Working.

These reporting pulp manufacturers in 1913 operated altogether 64 different pulp mills. These firms each used on an average 23,105 cords of wood, as compared to 18,042 in 1912. Each one of the individual 65 mills consumed an average of 17,062 cords of pulpwood. The largest individual mills are situated in British Columbia, where the average mill consumption was 28,058 cords. Quebec has the greatest number of mills, and the average consumption of these was 18,527 cords. The average mill consumption in the other provinces was as follows: Ontario, 18,807 cords; New Brunswick, 12,280 cords; and Nova Scotia, 5,140 cords.

In addition to these active firms, reports were received from 10 firms whose mills were idle in 1913, and from 5 firms with mills under construction.

Only five kinds of wood were used in the manufacture of pulp in 1913. Spruce headed the list with over two thirds of the total. The percentage of balsam fir used in pulp-making has increased steadily as the prejudices against the wood have been overcome. In 1911 balsam fir formed 17.5 per cent. of the total; in 1912, 19.0 per cent.; and in 1913, 25.5 per cent. The wood has been found to make excellent pulp, equal in many cases to that made from spruce alone, but a prejudice existed against its use. Fir generally gives a 10 per cent. lower yield of pulp than spruce, and is, therefore, not so desirable from the mill operator's standpoint.

Processes, Exports and Imports.

The manufacture of ground-wood pulp still consumed over half (54.1 per cent.) of the wood used for pulp-making in Canada. This percentage has been decreasing in the last few years. The sulphite process, the most important of the chemical processes, was used in converting a third of the total quantity of wood into pulp in 1913. This proportion is practically the same as in 1912.

The increased manufacture of Kraft papers has caused an increased demand for pulp made by the sulphate process. This process was used with 12.3 per cent. of the pulpwood in 1913, as compared to 7.7 per cent. in 1912. The manufacture of soda pulp has greatly decreased, only 5,144 cords of wood being used for this process.

Canada exported in 1913 to the United States 1,035,030 cords of unmanufactured pulpwood valued at $7,070,571, or at $6.83 a cord. Canadian pulp manufacturers operated 65 mills in that year. Mr. R. G. Lewis, in report for 1913, commenting on these figures, remarks that if the exported material had been manufactured into pulp in Canada it would have been sufficient to supply 60 mills, each consuming 17,062 cords of pulpwood, the average consumption of Canada's 65 mills in 1913.

Canadian pulp-wood operators paid an average price of $6.53 per cord for their raw material. The exporters received only 20 cents a cord more than this for the wood sent to the United States.

This 1,035,030 cords of pulpwood, if manufactured into pulp, would have made 1,035,030 tons of ground-wood, or 517,515 tons of chemical fibre. Ground-wood pulp is worth at least $14 a ton, which would give $14,490,420 as the value of the pulp made from the wood exported in 1913. Had this wood been made into chemical fibre at an average price of $38 a ton, its value would have been $19,665,570. In reality only $7,070,571 was received for this wood. The pulp industry lost the profit which could have been made by manufacturing this wood into pulp, and the country at large lost the money which would have represented the cost of manufacture in the form of wages, etc.

The export of wood-pulp from Canada decreased from 1912 to 1913 by 22.4 per cent. in spite of an increase of 25.2 per cent. in the quantity manufactured. This would seem to indicate increased activity in the domestic manufacture of paper. Decreases are to be noted in the exports of pulp to the United States, Great Britain and China. New Zealand did not import Canadian pulp in 1913. The only increase reported was in the export of chemical pulp to Japan. The United States still takes about two-thirds of Canada's output of pulp of which about 70 per cent. is ground-wood. Great Britain takes a little less than one-third of the total, and her imports are almost entirely ground-wood or mechanical pulp. The exports to Japan and China in 1913 were of chemical fibre only. Altogether, 77.4 per cent. of the pulp exported was ground-wood, and the remaining 22.6 per cent chemical fibre.

The average price of ground-wood pulp increased by 87 cents and that of chemical fibre by $1.20 from 1912 to 1913. The price of mechanical pulp exported to the United States increased by only 2 cents a ton, while the increase in price of that sent to Great Britain was $1.78. The price of chemical fibre exported to the United States increased by $1.32, and of all fibre to Japan by $2.65. The chemical pulp exported to Great Britain was valued at a little more than half the value in the previous year. A reduction in price of $3.09 was also reported for the pulp exported to China.

The imports of wood-pulp into Canada in 1913 were valued at $350,862 as compared to $172,707 for 1912. This is an increase of over 100 per cent., the imports from the United States having more than tripled during 1913. The importations from Great Britain more than doubled, and those from Germany increased by half those in 1912. The importations of wood pulp from Sweden decreased by 42.8 per cent. Pulp was imported from Norway and Switzerland in 1913, but not in the previous year. No pulp was imported from Austria-Hungary in 1913. The United States in 1913 supplied over four fifths of the total 85.1 per cent. as compared with a little over a half (58.0 per cent.) in 1912.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Nipissing Mining Company.—The Nipissing Mining Company of Cobalt, will have increased its surplus this year by between $300,000 and $400,000, according to present indications. This is after the payment of 20 per cent. dividends.

Canadian Locomotive Company.—The directors of the Canadian Locomotive Company have declared the usual quarterly dividend of 1¾ per cent. upon the preferred shares of the company, being at the rate of 7 per cent. per annum. This dividend will be payable January 1st, 1915, to shareholders of record, December 22nd, 1914.

Intercolonial Mining Company.—The shareholders of the Intercolonial Coal Mining Company, at a special general meeting, unanimously empowered an issue of $100,000 debentures, and authorized a mortgage to the Nova Scotia government to secure a guarantee for the issue. The proceeds from the debentures are to be used in retiring certain outstanding bonds.

Dorchester Electric Company.—The city of Quebec will ask the provincial legislature for power to make an additional loan of $500,000 to enable the city to municipalize, at an approximate cost of one million dollars, the light and power service of the Dorchester Electric Company.

This company's debentures fell due December 1st. At a civic committee meeting Mayor Drouin expressed the belief that the Dorchester Company may be merged into another company, which move the city would not allow. Hence steps it is taking towards taking over the lighting plant.

Dominion Steel Corporation.—The Dominion Steel Corporation's, Limited, comparative figures for November, of coal and steel production, are as follows:—

	November.	
	1914.	1913.
Pig iron	5,121	28,976
Steel ingots	15,740	27,120
Rails	2,727	13,348
Rods	3,967	2,507
Bars	2,134	1,708
Wire and products	2,535	1,996

Imperial Oil Company.—The expansion of the Standard Oil Company of New Jersey in the South American fields is indicated in the memorandum sent to the stockholders of the Imperial Oil Company of Canada, calling a special meeting at Sarnia, Ont., to ratify the purchase by the Imperial Company of three oil companies of Peru.

The Imperial Oil Company is a subsidiary of the Standard Oil Company.

The meeting of the Imperial Company has been called to ratify the purchase of control of the London and Pacific Oil Company, Limited, the West Coast Oil Fuel Company and the Lagunitis Oil Company, Limited, made on April 7 and July 27, and to turn them over to the International Petroleum Company, Limited.

Canadian Pacific Railway.—Replying to a query from the Boston News Bureau as to the reason for Canadian Pacific Railway's decline in gross earnings Sir Thomas Shaughnessy is quoted as saying:—"Gross earnings October and November this year compare with abnormal earnings in the same months last year. War conditions have affected general business and have encouraged farmers to hold crops for prospective higher prices. Anticipate substantial improvement a little later." Commenting on this the News Bureau says:—"In other words it was unfortunate for the Canadian Pacific that the poor results of the past two months must be compared with two months of extraordinary prosperity in 1913. If the freight has not passed over the Canadian Pacific lines stockholders may comfort themselves in the knowledge that it is on the farms, and must eventually go to the market."

Brazilian Traction, Light and Power Company, Limited.—The statement of combined earnings and expenses of the tramways, gas, electric lighting, power and telephone services, operated by subsidiary companies, controlled by this company, for the month of October, are as follows:—

	1914. Milreis.	1913. Milreis.	Increase or decrease. Milreis.
Total gross earnings ..	6,241,170	6,098,850	+ 142,320
Operating expenses	2,679,560	2,710,422	— 30,862
Net earnings	3,561,610	3,388,428	+ 173,182
Aggregate gross earnings from January 1st	61,411,258	59,922,665	+1,488,593
Aggregate net earnings from January 1st	35,235,738	32,358,485	+2,877,253

In consequence of the fluctuations in the rate of exchange the earnings are given in Brazilian currency so as to show the actual monthly results of operation.

COMPENSATION BOARD AND CRITICISMS

The Ontario Workmen's Compensation Board in reply to published criticisms issued a statement containing these remarks —

It is said "that the excluded industries are now in a worse position than any time since 1885, when the old Compensation Act was passed; that the workmen in most of the affected groups had a remedy where accidents may have been caused by the ways, works, machinery or plant of the employer, etc.; that this remedy has now been removed.

It is true as stated, that the old Workmen's Compensation Act is to be repealed when the new act comes into effect on the first of January See Section 110. It is not true, however, that nothing has been substituted—See Sections 106-8

The worker who is excluded from part 1 of the act, either by regulation of the Board or by the act itself (save as to Section 100) is in a much better position under the substituted remedy provided by these sections than he was under the old act, as the following comparisons will show:—

Under the old law, if the workman was injured by the negligence of a fellow servant, he could not recover against the employer.

Under the new law this is not so.

Under the old law a workman who had knowledge of the defect or negligence which caused his injury was deemed to have voluntarily incurred the risk and he could not recover.

Under the new law this is not so.

Under the old law if the workman himself was guilty of contributory negligence he could not recover.

Under the new law this condition is ground only for reduction of damages, not a bar to recovery.

Under the old law the limit of damages which a workman was entitled to recover was $1,500, or three years' wages, whichever was the greater.

Under the new law there is no stated limit within which a jury is confined in considering a verdict.

Many of the 42 regulations referred to were passed in order to make for greater certainty in respect to the items mentioned; the fact that power was given to the board to deal with certain industries in this way far from proving the act to be unworkable, rather proves the wisdom and far-sightedness of the draftsmen in recognizing the difficulty in dealing properly with each and every industry by the act itself.

It is not pretended that what has now been done by the board is the last word either in exclusion or re-classification, but it is desirable that no class, either of employers or workmen, should be misled as to the effect of the regulations which have been passed.

COMPANIES INCREASINC CAPITAL

The following companies in Saskatchewan have increased their capital stock:—

The Lorlie Rural Telephone Company, Limited, from $1,500 to $1,800. The West View Rural Telephone Company, Limited, from $5,000 to $5,500.

Ross and Wright, adjusters for the assured; building (unoccupied), 377-379 Weston Road, owned by H. H. Gilkes. Loss, $1,500. Insurance, $2,000, Queen Ross and Wright, adjusters for the assured.

◆

CAUSES OF FIRES

The causes of fires during the three months ended September 30th, 1914, in the State of Maine, are classified by the insurance commissioner as follows:—

Ashes, 4; back fire of engine, 5; back fire in carbureter, 1; boiling over of kettle of fat, 3; boiling over of kettle of wax, 1; burning out of chimneys, 14; burning paper, 1; caught from alcohol lamp, 2; caught from boiler, 4; caught from candle, 3; caught from chimneys, 18; caught from dryer, 1; caught from fireplace, 3; caught from flue, 1; caught from furnace, 1; caught from gas iron, 1; caught from gas jet, 3; caught from gas stove, 3; caught from gasoline, 2; caught from gasoline tank, 1; caught from gasoline torch, 1; caught from lamp, 7, caught from match, 1; caught from muffler, 1; caught from oil stove, 10; caught from oven, 1; caught from stove, 9, caught from stove funnel, 2; caught in picker, 1; children playing with matches, 15; defective chimneys and flues, 5[illegible]; defective fireplace, 1; defective wiring, 5; electric flat iron, 1; electric iron, 1, electric light, 1; electric switch board, 1; electric wires, 4; exhaust pipe, 1; explosion of gasoline, 1; explosion of gasoline stove, 2; explosion of kerosene stove, [illegible]; explosion of lamp, 5; explosion of oil, 1; explosion of oil stove, 1; explosion of turpentine, 1; fireworks, 15, forest fire, [illegible]; fumigating, 1; grass fire, 2; hot box, 1; hot exhaust, 1; ignition of gasoline, 2; ignition of matches, 2; lightning, 157; incendiary [suspected], 5; matches, 18; match and gasoline, [illegible]; mice and matches, 1; overheated chimney, 10; overheated kettle of fat, 1; overheated lamp, 1; overheated oven, 1; overheated stove, 6; overturned lamps and lanterns, 10; rats and matches, 5; smoking, 44; sparks, 9; sparks from chimney, 15; sparks from fireplace, 1; sparks from locomotive, 6; sparks from match, 5; sparks from stove, 3; sparks in picker, 1; spontaneous combustion, 15; tramp, 1; unknown, 121—642.

◆

REDUCTION OF FIRE WASTE

Discussing the reports of *The Monetary Times*, showing the fire losses for October in Canada at approximately $772,115 as against $1,383,572 for October, 1913, the Conservation Commission's Journal says:—

"This shows a considerable decrease, but there is yet room for a further reduction. Seasonal causes were responsible for a large number of the fires. Defective flues, sparks, over-heated stoves, furnaces and stovepipes, together with defective wiring, caused 16 fires out of a total of 35 fires reported in Canada, amounting to $10,000 or over. All these fires could have been avoided. It is the duty of every person to give special attention to the prevention of fire. Canada needs all her resources for general business conditions. Destruction by fires requires the payment of large sums by insurance companies but which must, in the end, be paid by the policy-holders. Again, the insurance companies do not carry their resources in cash on hand, but have the money invested in interest-bearing securities. In the event of heavy losses the insurance companies must provide money to meet them, and to do this they must of necessity dispose of these securities. With the stock exchanges closed, this is a very serious problem. To overcome it, the banks have to advance the money, and this again reduces the amount in their hands for the accommodation of the mercantile community and manufacturers."

◆

ENGLISH MONEY IN GERMANY

The careful mobilization of economic resources was necessary for the maintenance of a country's national life throughout a great crisis, said Professor G. I. Lloyd, in an address at Toronto, and for Britain's position at the moment she had her mercantile navy to thank as well as her armed fleets, and in a large measure the war risk scheme introduced by the government. Shipping and Admiralty authorities had estimated the probable percentage of loss during six months at 10 per cent., but it had not reached one quarter per cent., compared with Germany's 16½ and Austria's 10 per cent. Against Germany's loss of 12½ of the world's trade, Great Britain's sacrifice was comparatively little. During the first three months of the war British exports had suffered to the extent of 40 per cent., but the United States had suffered in greater proportions. German money was worth very little outside of Germany, but even in Germany English money was selling for more than its weight in gold, and so great was Britain's credit that since the war her supply of gold had increased 170 million dollars, just the amount of the decrease in the United States during a period of five months.

◆

The Monetary Times Annual will answer your question.

The Massey Harris Company, which practically closed three months ago, re-opened on December 1, having secured a contract for 2,000 military wagons for the British government.

The Dominion Steel Corporation's No. 1 blast furnace, closed down since August, has been again restarted. This makes two furnaces in active operation.

Colonel W. C. Macdonald, managing director of the Confederation Life Association, formerly commanding officer of the 48th Highlanders, addressed the Insurance Rifle Association of Toronto, on Discipline.

Municipal Officials

who would offer debentures for sale in the United States should advertise in the medium that is used by a majority of the borrowing counties, cities and towns in the "States."

In the year 1913 more than THREE HUNDRED MILLION DOLLARS of municipal bonds were purchased by subscribers to either the daily or weekly edition of

SPANISH RIVER PULP AND PAPER COMPANY

A meeting of the holders of 6 per cent. first mortgage [illegible] gold bonds of the Spanish River Pulp and Paper Company is to be held in London on December 23rd, to give [illegible] to the postponement of the interest payments on the [illegible] during the two years 1915 and 1916, until October [illegible] 1922.

The company under the proposed scheme has the privilege of paying this two years' interest prior to 1922, on giving six months' notice of its intentions and also of cancelling for a period not exceeding five years the operation of the agreements contained in the company's trust deed of [illegible] and the supplemental trust deed of October, 1911, relating to the formation of a sinking fund for the redemption of these bonds.

Criticizing the Chartered Banks

WHENEVER trade depression has come to Canada, criticism of Canadian banks has arrived with it. In past years, many of those who complained of the banks did their full share in helping to crystallize the depression, usually by highly speculative and sometimes improper enterprises. The present position in the Dominion, which is causing inconvenience to everyone from the banker to the bootblack, is due largely to two reasons—to the economic readjustment, which commenced more than a year ago, and to the outbreak of war, which gave a sharp impetus to the readjustment and dislocated business and finance generally.

One of the first group of complaints after the declaration of war in August, arose because the banks would not advance as much credit as borrowers desired. These complaints were heard even before the slightest measure of gratitude had been bestowed upon the bankers, acting in conjunction with the Dominion government, for their remarkably rapid and very desirable action taken early in August to prevent financial disaster.

Complaints respecting the banks almost invariably come indirectly. They reach Mr. Jones through Mr. Smith, who was told the story by Mr. Brown, whose nephew is a bookkeeper in the office of Mr. White, who is a brother to a company director, whose son is president of a corporation which was refused bank accommodation. *The Monetary Times* has endeavored to obtain details of specific instances where bank credit has been refused and, it is alleged, improperly. Of all the gossip heard, we selected three of the most likely cases which looked like strong indictment of the banks. It is obviously impossible to give the confidential details of these cases, such a course being unfair both to the banks and to their clients. *The Monetary Times* has investigated thoroughly, weighed the evidence received and can come only to the conclusion that the banks in each instance took what was the proper and legitimate course. They took action such as any sane business man would take in similar circumstances in running his own business.

Irresponsible critics of the banks could spend their time more profitably by studying the national position. They will find that for some years past much of the prosperity upon which they, with others, have fattened, was due to the constant flow of British and foreign capital to Canada. This has stopped for the time being, and the result is inconvenient. As one banker puts it, "We have to dig down into our own pockets now."

Dr. Adam Shortt, discussing the situation in a public address at Toronto recently, stated that, generally speaking, we have in Canada enough constructive machinery and that what is necessary now is more production from the plant which has been installed. This is largely true. Our development has been very rapid and practically all upon British and foreign capital. The supply of capital is now stopped on account of the war. We cannot ask the Canadian banks to take its place. That is not their function, besides which it would be bad business for national credit. A curtailment of expenditure was due anyway, as the country had come to the end of an unusually active period of construction, and the beginning of a period of what it is hoped will be heavy production. The transition of the one to the other is involving some hardships. It means the transfer of labor to some extent, of economy in expenditures and of efforts to direct capital into some new and productive channel.

The banks' chief duty is to see that they are prepared against all contingencies. Discussing the position of the banks in the present crisis, Dr. Shortt referred to the popular cry in certain quarters for them to come to the rescue just now and provide money to maintain the city and railway construction which had been going on and had been supported by British capital. "That would be perverting the function of the banks," said he, "which is simply the facilitating of exchange." "You cannot," he continued, "by adjusting the banking system create one more mouthful of food. The money-lenders abroad must be paid by bills of exchange or counter goods, and not by Dominion notes."

Mr. J. W. Flavelle in a recent public speech said: "Let us bear in mind this is not the banks' trouble. A great number of us seem to have the impression that the only reason that we are unable to borrow all the money we need is because the banks are unreasonable and won't lend it. After all, the amount of resources which we have liquid in this country is comparatively limited. What do our friends the bankers have to do? They are trustees to hold these liquid resources of this country available for the need of this country, distributing them as best they may over the largest surface possible to accomplish the best result."

The same point was made in an interview recently given by the general manager of a chartered bank. After stating that the Canadian banks would still stand in close relationship with the manufacturing, agricultural and commercial life of Canada, he added: "Now, the [illegible] even if the banks wished to do so; which, as I [illegible], they have no desire to do. At the same time, the banks must of necessity be very careful what they do with the people's deposits at this critical time. We must, above all, see to it that we keep our assets liquid. While every aid will be given to legitimate business enterprise, we must be doubly careful to see that such funds as are advanced are not placed in fixed capital forms. Now, as never before, it is necessary to keep our resources in a fluid form."

The banking statistics show that credit has not been curtailed to such an extent as popularly imagined. The following table shows the volume of current loans in Canada in October last, and for the same month of the four previous years:—

October.	Current loans in Canada.
1910	$679,820,039
1911	768,492,008
1912	879,676,655
1913	862,313,367
1914	816,623,852

Considering the abnormally depressed conditions, due to readjustment generally in Canada and to the war, bank credit to business in Canada has been well maintained. In October it was only 5.2 per cent. less than a year ago, which obviously is an excellent showing. In the wild days of 1912, domestic current loans were but $63,000,000 greater than to-day. To make a strictly accurate comparison, loans to municipalities should be included. When that is done, current loans now are only $16,000,000 less than in October, 1912.

The banks as a group are one of the very few reliable bulwarks of the Canadian national position. This is recognized especially in Great Britain, whose investors have placed in Canada £500,000,000 of their funds, and largely because of the unshaken policy of our banks in doing everything possible to maintain Canadian credit. If the banks had carried on business as have many of the men who are now complaining of the lack of credit, financial disaster undoubtedly would have come to Canada and Canadian credit would have been badly besmirched. From such a blow it would take at least twenty-five years, and maybe forty, to recover.

PERSONAL NOTES

Mr. E. W. Beatty, general counsel of the Canadian Pacific Railway, has been appointed vice-president of the road. Mr. Beatty was born in Thorold, Ont., and removed with his parents to Toronto when he was ten years old. His father was the late Henry Beatty, one of the best known steamship men in Canada. Mr. Beatty graduated from the Toronto University and studied law with the well known McCarthy firm in Toronto. Mr. A. R. Creelman, who was his predecessor as general counsel of the Canadian Pacific Railway, was a [illegible]. Mr. Beatty came to the Canadian Pacific Railway with Mr. Creelman in 1901, as one of his assistants. He retains his position as chief counsel of the Canadian Pacific Railway. He is a comparatively young man, bright, energetic and [illegible]. Mr. I. H. Chrysler, K.C., who was associated with Mr. Beatty in the Western rate case, says of him: "I am very glad to hear of his promotion to the position of vice-president of the Canadian Pacific Railway. I have been associated with him in some departments of his work for [illegible] and I have the highest opinion of his fitness for the responsible and difficult office to which he has been appointed."

E. W. BEATTY,

Vice-President and General Counsel, Canadian Pacific Railway.

Mr. John K. Wilson, of Regina, has been appointed fire commissioner for the province of Saskatchewan, succeeding Mr. R. J. McLean, resigned.

Mr. Charles L. Wisner has been appointed to the vacancy on the board of the Massey-Harris Company occasioned by the death of Mr. J. H. Housser.

Sir Thomas Skinner, Bart., has been elected a director of the Laurentide Company as an addition to the board, which is increased from seven to eight members.

Mr. Charles D. Corbould, chartered accountant, Ontario and Manitoba, has changed his address in Winnipeg from 619 Somerset Building to 806 Sterling Bank Building.

Mr. D. R. Wilkie, president and general manager of the Imperial Bank, who died on November 17th, left no will. The late banker's estate is estimated at about half a million dollars, and will be divided equally among his three children

Mr. E. B. Freeland, president of the Toronto Stock Exchange, sent the following message to The Journal of Commerce and Commercial Bulletin, New York, in response to an inquiry regarding the re-opening of the New York Stock Exchange:—"I consider the New York Stock Exchange reopening a long step in the right direction, calculated to hasten complete restoration of confidence. It provides machinery for gradually affording facilities for the international liquidation which must of necessity take place sooner or later."

Mr. Thomas D. Bowman, of Pacific, Mo., has been promoted from United States vice consul at Nogales to consul at Fernie, B.C.; Mr. Frederick M. Ryder, of Connecticut, consul at Rimouski, Que., to consul-general at Singapore. The following United States consuls have been transferred: Milton B. Kirk, of Chicago, from St. John's, Que., to Orillia, Ont.; Frank C. Denison, of Pittsford, Vt., from Fernie, B.C., to Prescott, Ont.; John Fowler, of Boston, from Foochow to Rimouski, Que.; Jose De Olivares, of St. Louis, from Madras to Hamilton, Ont.; Jas. H. Goodier, of Utica, N.Y., from Tahiti to Niagara Falls, Ont.

◆

The works of the Armstrong Whitworth Company at Longueuil, Que., were opened last week. The company which is allied with the well known English concern, has spent $1,250,000 on its works and plant already, and will employ a large force of skilled workmen. High grade steel goods will be manufactured.

The Labor department at Ottawa reports that there is a record quietness throughout Canada at the present time so far as industrial disputes are concerned. Practically no new strikes [illegible] and indications are that during the war there will be few, if any, strikes or lockouts in Canada. Both employers and employees realize that under existing industrial conditions due to the war any conflict between labor and capital [illegible].

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Canadian Pacific Railway.—Competent London critics fear decreases in Canadian Pacific earnings will continue for some time, and are even prepared for deficiency taking the place of the customary surplus. They console themselves by thinking it need not follow that the dividend would be reduced, seeing the company has such large reserves.

East Canada Power and Pulp Company.—The Montreal Trust Company, as liquidator for the East Canada Power and Pulp Company, will offer at auction at Quebec on December 18th certain blocks of pulp wood cut up on the timber limits formerly held under lease from the Crown by the East Canada company. Approximately 29,000 cords of wood, in four different lots, are to be offered for sale, and, with the exception of one lot, without any reserve price.

Canadian Home Investment Company.—A petition to wind up the Canadian Home Investment Company, on the ground that it is an alleged insolvent institution, and asking for an inspection of the personal accounts of the president, directors and shareholders, has been presented to Chief Justice Hunter, in the Supreme Court chambers, and arguments on the application were adjourned for one week. The petition is on behalf of contract holders.

Kaministiquia Power Company.—The total gross earnings for October were $20,883, as compared with approximately $31,000 during the corresponding period of 1913.

The total gross earnings for this year were $327,109 as compared with $302,741, or an increase of approximately $25,000, or 8.3 per cent. Early in the year the dividend was raised from 5 to 6 per cent. This called for an additional disbursement of $16,000. The capital of the company was also increased by $200,000 during the year and has ranked for dividends since about March.

Laurentide Company, Limited.—The company is understood to have completed arrangements for the sale in London of a block of the bonds authorized under the new mortgage created last September. The amount is between $1,500,000 to $2,000,000. When the company sells these bonds, about $800,000 will be required for the retirement of the old issue. There was a bank loan of $304,000 on June 30th, 1914, representing capital expenditure on the new hydro-electric development, and there was further work ahead in the same connection.

British Columbia Electric Railway Company.—The British Columbia Electric Railway Company records depressing conditions in that province, new work having to be postponed, and a big reduction in population. Stockholders are told that they must be prepared for drastic reduction of dividends in the future, owing to the war. There are critics in London, states a cable, who question whether the directors, under these circumstances, are doing the proper thing in drawing upon reserves to maintain the deferred stock dividend at eight per cent. There is pretty certain to be considerable criticism at the annual meeting.

St. Lawrence Flour Mills Company.—The board of directors have declared a dividend of 14 per cent., being the accumulated dividends on the preferred shares up to August 1st, 1914. Of this amount the shareholders have agreed to take 10 per cent. in preferred stock, which will add over $[illegible] to the capital of the company. This additional capital is required by the large increase in the company's business.

In addition to the 4 per cent. in cash now to be paid to the shareholders, the directors expect to pay 3½ per cent. more in cash early in February. That payment will liquidate all dividends up to and including January 31st, 1915, and the way will be cleared for regular quarterly distributions should business continue satisfactory.

Alberta Pacific Grain Company.—For the year ended August 15th the company showed net profits amounting to $450,810, as compared with $322,326 the previous year. Out of the profits for the year four quarterly dividends at the rate of 7 per cent. per annum, have been paid on the 12,500 issued and fully-paid cumulative preferred shares; $18[illegible] has been transferred to replacement account, bringing the fund to $200,000, and a dividend of $4 per share on the 14,000 issued and fully paid common shares of the company, with a bonus of $1 per share, has been [illegible].

Deducting these amounts, [illegible] surplus [illegible] $312,62[illegible] remains to be carried forward to the credit of profit and loss. This balance is more than [illegible] the preferred dividend of 7 per cent. per annum and [illegible] dividend of 4 per cent. per annum for [illegible].

International Milling Company.—The annual statement of the International Milling Company for the year ended August 31st last shows trading profits of $519,1[illegible] against $408,8[illegible] the previous year. After deducting $4[illegible] for bond interest, this will leave $475,135 available for dividends on the preferred stock.

The common stock issue of the company was increased from $57[illegible] to $800,000 in February of the current year, when the company declared out of its surplus a stock bonus of 40 per cent. in addition to a cash dividend of [illegible] per cent. After allowing for a year's dividend on the preferred in the year recently closed, there would be a balance of approximately $40[illegible] available for the common stock.

The annual statement will show a surplus of approximately $1,000,000 in current assets. The company also has $50,000 more cash on hand than notes payable. The company's total assets are $[illegible],554,423, and after all payments under profit and loss account the surplus at the end of the fiscal year was $4[illegible].

The International Milling Company has two mills in Canada and three in the United States.

In the past year operations at the Canadian plants were slightly less profitable than in 1913, but fair gains were shown by the United States mills.

Western Canada Power Company.—The company's holders of 5 per cent. forty year bonds are to meet in London on December 22nd to consider a modification in the terms of the company's first mortgage.

It is proposed to give the company power to create a fixed first charge, ranking in priority over the bonds issued under the first mortgage upon certain land and property in New Westminster and in certain districts of British Columbia lying to the south of the company's existing plant on Stave River.

"The existing first mortgage trust deed of the Western Canada Power Company is in terms an open mortgage covering all present and future acquired property of the company" explained an official of the company to the Montreal Gazette. "It is now proposed, in order to improve the security and market value of the first mortgage bonds, to close this first mortgage for the present at $[illegible], allowing an ultimate increase to $10,000,000, as the net earnings increase, and at the same time to release from the mortgage certain surplus lands of slight value, which are not required for the hydro-electric works of the company now under construction on the Stave River.

"In case the company should in future years decide to build another additional power house, on another site, it will be permitted to place a separate first charge on any such site that may be hereafter acquired to cover the costs of the new construction. The company has need to sell some of its bonds to meet its immediate requirements, and the prospective purchasers, in view of existing financial conditions, insist upon closing the first mortgage before making further purchases of the first bonds."

The $1,000,000 to be raised by the further sale of bonds will probably take care of all the company's financial requirements next year. Most of the machinery for the third unit has been bought and paid for and will be installed in the early part of 1915. The fourth unit may be installed before the end of the year; that will depend on the demand for power.

Considering the conditions which have existed on the Coast, Western Canada Power Company [illegible] fared [illegible] this year. The [illegible] for power has not come up to expectations, but in other directions [illegible] British Columbia Electric, for instance, since September 1st last has been [illegible] per cent. more power than it did in the first [illegible] of the contract. However, even in the case of this contract, [illegible] adverse [illegible] normal British Columbia Electric would probably be taking considerably in excess of the minimum provided by the contract.

◆

Don't be a business [illegible]. After the war, the [illegible] process will be difficult.

DEATH OF SENATOR JAFFRAY

Another prominent figure in financial spheres has passed away in the death of Senator Jaffray, who died at his home, Toronto, on Wednesday, in his eighty-third year. Only a few weeks previously, he had been appointed president of the Imperial Bank in succession to the late Colonel D. R. Wilkie. At the time of this appointment, an acquaintance said, "Senator Jaffray is a very sensible man, a good business man, and is honest and trustworthy in every way." That gives a picture of the man, one who has had a long and intimate experience of Canadian business.

He was president of the Imperial Bank, of the Globe Printing Company, a director in the Canada Life Insurance Company, of the North American Life, Toronto General Trusts, Nova Scotia Steel and Coal Company, Canadian General Electric Company, the Central Canada Loan and Savings Company, Crow's Nest Pass Coal Company, a member of the Toronto Board of Trade, member of the Niagara Falls Park Commission, director of the Peterboro Real Estate Investment Company, vice-president of the Land Security Company, which under the name of the Toronto House Building Society, he helped to organize; director of the Central Canada Land Investment Company, of the Ontario and Sault Ste. Marie Railway, of the Homewood Retreat for the Insane, Ontario Beet and Sugar Company, General Accident Insurance Company, British American Assurance Company, King Edward Hotel Company and others.

Senator Jaffray was born on January 23, 1832, on a farm near Bannockburn, Scotland. In 1852 he came to Canada, choosing Toronto as his home. He formed a partnership with his brother-in-law, who had already established himself in Canada, and became the manager of a grocery and wine business on Yonge Street, under the firm name of Smith and Jaffray. In 1858, Mr. Smith withdrew from the grocery business, and Mr. Jaffray conducted it alone. In 1883 Mr. Jaffray found himself able to retire with a competency, after an active commercial career of 31 years.

In 1874 he was appointed by Hon. Alexander Mackenzie a director on the old Northern Railway as government representative on the board, the government having granted large sums to aid the construction of the road.

On March 8, 1906, Mr. Robert Jaffray was called to the Senate by Earl Grey during the administration of Sir Wilfrid Laurier.

Senator Jaffray entered with the late Senator Cox, in the Midland Railway deal, when the road was in a state of insolvency. He and the late Mr. Cox secured the majority of the stock in small lots and then bought out the English bondholders at a low figure. After several years, Mr. Cox and his associates brought the road to a paying condition. The "deal" was the consummation of their task when the road was sold at 100 cents on the dollar to form part of the Grand Trunk Railway system. That transaction was the foundation of the fortune of Senator Jaffray. The association of Senator Jaffray and Senator Cox continued for years, and until the death of the latter a year ago.

◆

DEPOSITS IN CENTRAL GOLD RESERVES

Deposits of the banks in the central gold reserve against excess note circulation were increased in October by $2,000,000, the total being $13,000,000. This is the highest amount on record since the reserve was established in July, 1914. Eleven banks had deposits to their credit in October, the figures comparing with those of the two preceding months as follows:—

	October.	September.	August.
Montreal	$ 1,500,000	$ 1,500,000	....
Nova Scotia	2,250,000	1,500,000	$1,000,000
Royal	3,250,000	3,250,000	2,250,000
Standard	200,000	200,000	....
Ottawa	300,000	300,000	....
Hamilton	400,000	200,000	....
Union	2,200,000	2,100,000	....
Merchants	1,000,000	1,000,000	....
National	1,000,000	900,000	900,000
British North America	500,000	....	....
Toronto	400,000	....	....
Totals	$13,000,000	$10,950,000	$4,150,000

WHAT INDIA IS DOING

"And the people of India, who have so thoroughly identified themselves with the British people, have come forward, more generously than ever in the past, either in the days of the Hindu or the Moslem, for they had not then realized their power, to offer their services and their resources. They have through their representatives in council voted out of the revenues of India the whole cost of the Indian expeditionary force; and they are prepared to lay down their lives on the field, so that the old order of things may pass away and a new order be ushered in." This is a statement contained in a pamphlet giving the reasons why India is heart and soul with Great Britain.

Why India is Heart and Soul with Great Britain; by Bhupendranath Basu. Price, 5 cents. The Macmillan Company of Canada, Toronto.

◆

ABOUT ALBERTA'S WEALTH

Superficial observation in Canada at the present time is in danger of confusing the effects incidental to the period of liquidation and readjustment through which Canada has been passing for more than two years, with effects immediately traceable to the war, remarks Mr. Kingman Nott Robins, treasurer of the Associated Mortgage Investors, Incorporated, of Rochester, in his report, after a business tour in Alberta, in which province this corporation has much capital placed in farm mortgages. In the opinion of expert economists, the programme of construction—railways, city buildings and improvements, etc.—carried on in Canada under easy money conditions during the last few years was sufficiently extensive and has been sufficiently completed to suffice for ten years to come. During this period of construction the importation of borrowed capital and of materials of construction carried the balance of imports to a point far in excess of the exports, and also added to the cities and villages a population employed in construction and not in production, which now finds itself without any means of livelihood.

This considerable class in the community in the past, always foremost in proclaiming to the outside world the glories of Western Canada, with a view to furthering their speculative schemes, are now the loudest in criticism of conditions in a country that refused to be ruined by their speculative extravagances. It means little to them that the real producers of the country are better off than ever, so long as their own pet schemes of living on borrowed money refuse to work. The man who would know Western Canada, therefore, does well not to rely on reports current in the towns and cities, but to get into the country districts for his information.

Alberta will receive more income from the sale of farm products this year than in any previous year. The great and continuing increase in production and sale of cattle, hogs and dairy products, and the unprecedentedly high prices for both live stock and grain have more than offset a short crop in the southernmost part of the province, and the crop in the central and northern parts of the province—the backbone of Alberta—is unsurpassed.

The period immediately following the war between the States witnessed a greater proportionate settlement and increase in value of farm lands in the Western States than has ever occurred since, and this for three main reasons that seem certain to operate in regard to Alberta lands in the case of this war also, viz.:—

(a) High prices for farm products stimulate the use of and settlement on the land.

(b) Lack of employment in other industries during the war, the shifting of employment at the close of the war from industries founded on or artificially stimulated by the war, and the return to civil life of great numbers of men, combine with the first factor in producing a movement on to the soil that no other combination of events can produce.

(c) The reduced state of European countries—ravaged farms, ruined industries, heavy taxation, general unemployment—it seems certain will stimulate the emigration to the United States and Canada of large numbers of that class of labor which furnished the backbone of the emigration into the United States in the 70's, 80's and 90's—especially from Germany—and which ceased only with the growing industrial prosperity of the mother countries.

The Monetary Times was established in 1867, the year of Confederation. It absorbed in 1869 The Intercolonial Journal of Commerce, of Montreal; in 1870, The Trade Review, of Montreal; and the Toronto Journal of Commerce.

The Monetary Times does not necessarily endorse the statements and opinions of its correspondents, nor does it hold itself responsible therefor.

The Monetary Times invites information from its readers to aid in excluding from its columns fraudulent and objectionable advertisements. All information will be treated confidentially.

SUBSCRIBERS PLEASE NOTE:

When changing your mailing instructions, be sure to state fully *both* your old and your new address.

All mailed papers are sent direct to Friday evening trains. Any subscriber who receives his paper late will confer a favor by complaining to the circulation department.

PRUNING BOND SECURITY

As history seems to be repeating itself in spheres where bonds are made, bought, sold, and held, there is some excuse for *The Monetary Times* repeating its views as to the old-time idea of a bond and the new-fangled trimmings which some modern financiers are too much inclined to introduce to bonds as a group. The holders of six per cent. first mortgage sinking fund gold bonds of the Spanish River Pulp and Paper Mills, Limited, will be asked on December 23rd to pass, among others, the following resolutions:

> 1. Sanctioning and assenting to certain proposed modifications or alterations of the rights of the holders of the six per cent. first mortgage sinking fund gold bonds of the company against the company and against its property and of the provisions contained in the said trust deeds for the purpose of postponing the payment of the interest on the said bonds falling due in the years 1915 and 1916 until the 1st day of October, 1922, or until previously thereto the company shall give six calendar months' notice of its intention to pay the same and of cancelling for a period not exceeding five years commencing with the year 1914 the operation of the provisions contained in the said trust deed and the said supplemental trust deed of the 2nd day of October, 1911, relating to the formation of a sinking fund for the redemption of the said bonds and otherwise as expressed in the draft supplemental trust deed referred to in the next following resolution.
>
> 2. Authorizing Montreal Trust Company as such trustees as aforesaid to concur in and execute a supplemental trust deed embodying such modifications in the terms of the draft which will be submitted to the meeting.

Somewhat similar plans are proposed in the case of the Lake Superior and the Ontario Pulp and Paper companies. This sort of thing is poor financing and it hurts Canadian credit. Every time Canadian credit is hurt it damages the prospects of Canadian borrowings in London and besmirches Canada's name generally in the money markets.

Sixteen months ago, a similar plan was proposed by another company and *The Monetary Times* remarked that "When is a bond not a bond?" would become a popular vaudeville question in Canada if some of our financiers continued to indulge in financial novelties. Instances have been too numerous in recent years wherein a company's bond has proved a poor thing, indeed. Investors are taught to regard the average bond as an investment giving a fair interest return with the maximum amount of safety. Reorganizations of certain Canadian companies have done much to blast that idea, which happily was becoming well established.

A holder of Canadian bonds should know that he has a security which cannot be swept away at the whim or in the troublous times of company promoters, reorganizers and financiers. The sooner we get back to the old English idea that a bond is an investment surrounded with a fence of financial purity, and live up to that idea, the better will it be for Canadian credit.

Another matter which bondholders must give attention, as *The Monetary Times* has pointed out previously, is the recent innovation of those who draft trust deeds, giving facilities in the trust deed for complete control by the majority of bondholders over the mortgage, which is security common both to the majority and minority. If this practice spreads, minority bondholders' rights will not be worth a tinker's expletive.

◆

The city of Montreal has decided to dismiss 57 fire inspectors, in order to economize. The logical sequel is for the insurance companies to raise Montreal's fire insurance rates.

TAXING LIFE INSURANCE

When every holder of a life insurance policy knows more of the taxes he pays upon his premiums, the governments concerned will likely seek a new form of taxation. The provincial treasurer of Ontario is already familiar with the strong moral arguments of the companies on behalf of their policyholders. As they have pointed out to him, the companies do not seek to avoid their fair share of responsibility in the matter of governmental taxation, but protest against the burden imposed upon them, which they regard as excessive and relatively much greater than that imposed upon other classes of corporations.

All insurance is based upon the principle of indemnity and is for the protection against loss of interest in acquired property or of persons against the untoward vicissitudes of life. It does not create any wealth. It simply distributes loss. It is the taking of small portions of existing property and combining the aggregate contributions of the many to prevent individual loss or destitution.

Life insurance companies are not, except to a limited degree, profit-making concerns. They do not enjoy any special privileges from the state. They are a means simply of co-operation for the purpose of enabling the individual to distribute the cost of providing for those by law and by nature dependent upon him for support or of the accumulation of a fund for old age. A tax upon life insurance, as *The Monetary Times* has previously pointed out, is therefore a tax upon thrift and upon foresight.

Life insurance by protecting the home and the family, is safeguarding the best interests of the state and relieving it from the possible burden of caring for those who may be unable to support themselves in the event of the death of the bread-winner. It should not, therefore, be subjected to a high rate of taxation.

The injustice of the tax is clear and here is an illustration. It is put by Mr. Thos. Hilliard, president of the Dominion Life Assurance Company, in the form of a little parable:—

Two neighbors, Jones and Thompson, live next door to each other. Each has a wife and four children. Jones carries $5,000 life assurance. Thompson is wiser in his own estimation, believes in spending his money as he goes and if anything happens him, oh well, the town will not let the kids starve, anyway. Both men are killed by accident the same day. A few days after the funerals, the company's agent calls on the sorrowing Mrs. Jones and hands her a document providing a monthly income for her for life, which, though not large, is sufficient with economy to provide the necessaries of life. A day or two later the taxgatherer calls with another document. It demands $100 in the name of the great province of Ontario. "Why should I pay this?" says Mrs. Jones The officer of the law says he cannot explain it fully, but he understands that it is to help keep Mrs. Thompson and her children who were taken to the poor house, as Thompson had no insurance.

The only difference between this story and the actual facts of daily experience, is that the $100 was collected from Jones in his life-time in small instalments, instead of from the widow after his death. But the effect is the same. The man who by his unselfish thrift relieved the state of its burden, is penalized to support those left dependent by the selfish man who did not do his duty. The policyholder cannot afford and should not be compelled to carry that burden.

◆

Some will spend $2, some $200, some $2,000 on Christmas presents, but an average expenditure of only $20 by 7,000,000 people in Canada means $140,000,000. Cheer up!

BANK OF VANCOUVER

The suspension of payments by the Bank of Vancouver will probably mean the reduction of the number of banks in Canada to 22. From what financial ailments the bank has suffered during its four years' existence, will probably be explained in part during the events which will follow the suspension. One thing the failure proves again—to run a bank successfully, there must be no "catering-to-the-local-citizens" sentiment. The day of the local or provincial bank in Canada passed long ago. Those bank promoters who have doubted that fact during the past few years, have lived to rue their opinion, as have men and women who put their funds into the shares.

The Bank of Vancouver was never a very healthy member in Canada's banking world. Many physicians were called in from time to time and they all expressed hope that the end was far away. It is doubtful if the most enthusiastic Bank of Vancouver supporter ever went into hysterics of delight as to the position and prospects of the institution.

Sympathy goes to the numerous shareholders who will probably have to bear the brunt of the collapse. The whole incident is an expensive lesson as to the futility of starting a new bank under mistaken notions as to the ease of doing such a thing and as to the ease of continuing the existence of a "local" bank.

◆

Keep head erect, eyes front, and have confidence.

BESIDES THE DEAD MAN—WHO?

Granted that the late Mr. W. R. Arnold, of the Dominion Trust Company, may have been responsible for many of the troubles of the Dominion Trust Company, was there no responsibility on the part of the other directors, and of the auditors? Surely the directors knew something of what was going on. If they did, poor practices should have been stopped. If they did not, they were not directors. Here, too, is a certificate, signed by the company's auditors on August 26, 1913, and a similar one on August 28, 1914:—

> "We have made a detailed examination of all the Deeds, Documents and Records in connection with the Investments made by the Dominion Trust Company, on behalf of its clients. We certify that the same are in good order and that where the Deeds and Documents of Title are in possession of the Company they are filed separately under the Client's name and apart from the Company's own Investments. Where no Deeds or Documents were in evidence, receipts or other satisfactory proof that they had been handed over to the Clients, or disposed of under their directions were exhibited to us. Valuator's reports, Certificates of Title, Solicitor's reports, have been produced to us in the case of Mortgage and other investments requiring same."

There is much to learn yet about the Dominion Trust Company's affairs.

MAKING A WILL

Making a will is a simple thing to do but, like most simple things, it should be done properly to safeguard the important matters of the future. In Toronto recently the danger of using a printed form in making a will was illustrated in a case in which Mr. Justice Middleton declared an intestacy. He had been asked to interpret what purported to be the will of a deceased lady. The will was made on what apparently was an adaptation of a Scotch will form. "In the case in hand it may be that the testatrix intended to give everything to her mother," remarked Mr. Justice Middleton, "but she has not said so."

In the blank where the name of the beneficiary and the property to be conveyed should be placed, all that was written was "Everything I have, clothes, money, etc." No beneficiary was named. The only name which appeared in the will, besides the signature of the testatrix, was the deceased woman's mother, who was named as executrix. Judge Middleton held that there was an intestacy as to the estate.

Everyone should make a will, but it is useless unless done correctly. There are reputable lawyers and companies [illegible] wills in a proper way and who see to their administration. A great deal of annoyance and suffering is caused by carelessly made wills.

NEW INCORPORATIONS

Charters Are Less Numerous—Montreal Oil Concern Has Large Capital

Canada's new companies incorporated this week number 25. The head offices of these companies are located in three provinces. The total capitalization amounts to $31,380,000. The largest company is:—

Port Lobos Petroleum Company, Limited, Montreal	$30,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of Companies.	Capitalization.
Ontario	7	$ 670,000
Quebec	17	30,695,000
Manitoba	1	15,000
	25	$31,380,000

The following is a list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Parry Sound, Ont.—Hawkins Brothers, Limited, $40,000. R. H. Hawkins, J. E. Hawkins, C. H. Hawkins.

Rimouski, Que.—La Briqueterie Rimouski, Limited, $49,000. F. Ringuet, J. C. Tetu, S. Vachon.

Winnipeg, Man.—Co-operative Tailoring Company, Limited, $15,000. A. Levi, J. Levi, S. Levi.

Notres Dame du Lac, Que.—Le Syndicat du Lac Temiscouata, $30,000. L. F. Dube, C. F. Beaulieu, P. Roy.

Chatham, Ont.—Everlasting Caskets and Vaults, Limited, $50,000. W. G. Burrows, S. Lamont, Christine H. Soutar.

St. Lambert, Que.—Southern Counties Builders' Supply Company, $20,000. W. Williams, G. L. Williams, G. L. Williams.

Toronto, Ont. Maple Leaf Athletic Club. E. M. Whitaker, J. C. Whitaker, W. E. Hanna. Phonograph Shop, Limited, $40,000. R. S. Williams, H. G. Stanton, W. Middleton. Canadian Cartridge Company, Limited, $100,000. W. S. Morlock, B. V. McCrimmon, R. Beverley Whithead. Ashdown, Palmer & Elliott, Limited, $40,000. V. E. Ashdown, A. G. Palmer, H. Elliott Canadian Series Company, Limited, $100,000. Thomas Minney, J. Sidebottom, A. T. McDonald. Harris Lithographing Company, Limited, $300,000. S. Harris, H. Harris, M. E. Harris.

Montreal, Que.—Anglo-Canadian Equipment Company, Limited, $50,000. S. D. Dixon, W. Taylor, R. E. Allan. International Lime Company, Limited, $200,000. W. Kenneth, A. Barnard, H. Lacerte. Port Lobos Petroleum Company, Limited, $30,000,000. C. G. Ogden, H. C. G. Mariotti, J. A. Perodeau. Brandy Brook Company, Limited, $10,000. E. F. Surveyer, C. G. Ogden, H. C. G. Mariotti. Societe de Construction des Maison Ouvrieres, Limitee, $50,000. J. A. M. Marin, C. Desmarais, D. Deschamps. Sinclair, Limited, $50,000. S. G. Dixon, W. Taylor, A. Murray. Lortie, E. Boucher, E. Gagne. Montreal Axle Works, Limited, $40,000. P. A. Amyot, B. Legault, L. Guilbault. La Compagnie du Boulevard Pie ix, Limited, $20,000. W. Damphouse, J. H. O. Hebert, A. A. Caron. Reids, Limited, $49,000. J. Reid, J. A. Scott, G. Farquharson. Beaudin Brothers, Limited, $[illegible]. J. A. Boutet, J. E. Beaudin, A. Perras. Lac Compagnie Commerciale Immobliere, Limited, $[illegible]. M. J. G. Langelier, J. D. Langelier, J. A. Langelier. Cinema Passe Temps, Limited, $[illegible]. J. F. Labrecque, J. A. Labrecque, L. Beauchamp.

Application is being made for letters patent for the following companies:

St. John, N.B.—The Colonial Construction Company, Limited, $[illegible]. J. M. Queen, G. F. Dawes, M. W. Long. [illegible] Company, Limited, $[illegible]. H. G. Marr, [illegible] J. H. Marr.

SPANISH RIVER COMPANY'S REPORT

Orders Enough to Keep Mills Running — Finances Affected by War

The report of the Spanish River Pulp and Paper Mills, Limited, contained a condensed balance sheet, as of June 30, of the Lake Superior Paper Company. The summary of the income and expenditure of both companies for the year ended June 30, 1914, is as follows:—

	Spanish Company.	Lake Superior Company.	Total.
Net revenue	$470,996	$408,289	$879,285
Interest on funded debt and other loans and proportion of discount on notes	345,303	376,710	722,013
Surplus	$125,693	$ 31,579	$157,272

The report states, however, that the balance at the credit of profit and loss account of the Lake Superior Paper Company, Limited, does not give a correct impression concerning the actual earning power of that company, for the reasons that when control was acquired profit and loss account showed a balance of $26,215 at debit, due to temporary dewatering of the power canal to permit of completion, and that a bad debt of $27,200 was incurred on an old contract and charged against earnings. Since that date earnings have shown steady improvement.

Shortage in Stocks.

The president states that:—"Shortly after the directors entered upon their duties they made an investigation into the position of the companies. Estimates were made by experts as the result of which the directors became convinced that a considerable shrinkage in wood and other stocks had occurred, for which they deem it desirable to make provision. It will also be necessary to provide for an expected loss in respect of the liability to the Dominion Bond Company, Limited, referred to in last year's accounts, and the recommendation of the directors is that as the shrinkage in stocks and the loss upon the other items in question belong to a period prior to the year covered by the accounts, the provision should not be charged against the profits of the year, but carried forward as a special deficit account to be dealt with later, as the directors and shareholders may decide."

Statements Compared.

The Spanish River general statement compares with the previous year's returns as below:—

	1914.	1913.
Net profits for year	$ 125,693	$ 190,754
Less dividend paid	....	190,875
Current liabilities	1,221,486	1,683,531
Bonds outstanding	5,238,613	3,923,500
Notes outstanding	78,000	....
Stocks issued	13,699,100	6,000,000
Total liabilities	20,362,892	11,607,191
Current assets	1,563,025	1,966,100
Property account	9,185,297	9,102,112
Securities other companies	8,163,833	....
Deferred charges, etc.	1,450,734	538,978

The president remarks that the directors are impressed with the outlook, and that orders in hand will keep all the mills running. All the mills are in good condition and modern. All sinking fund obligations have been met, but owing to the financial position incident to the war, relief is now being asked of the bond holders.

The income account shows net revenue for the year ended June 30 of $470,996, from which interest on funded debt and other loans and proportion of discount on notes to amount of $345,303 was paid, leaving a surplus of $125,693. No dividend was paid on the preferred or common stock.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Revelstoke, B.C.—The money by-law for a market was defeated.

Brantford, Ont.—By-laws totalling $68,000 have been passed by the council.

Fredericton, N.B.—The board of school trustees have an issue of debentures for disposal.

Delaware Township, Ont.—A hydro-electric by-law to expend $4,000 will be voted upon, January 4th.

Port Dover, Ont.—An issue of $10,000 school debentures is being offered for sale. Mr. E. P. Bagley is treasurer.

Welland, Ont.—A by-law to issue $5,000 debentures for fire alarm system will be voted upon at the municipal elections.

Sarnia, Ont.—A by-law for new city hall to replace the one recently destroyed by fire will be voted upon at the municipal elections.

Ottawa, Ont.—By-laws totalling $850,000 for incinerator, abattoir, water mains and sewer will be voted upon at the municipal elections.

Hamilton, Ont.—A by-law for the issue of debentures for $305,000 for the construction of a system of storm overflow sewers will be voted on at the municipal elections.

Windsor, Ont.—Eight tenders were received for an issue of $188,230 5 per cent. local improvement debentures, the successful tender being that of the Dominion Securities Corporation, Toronto.

Ottawa, Ont.—The city has been able to borrow all the money it has required on the strength of its debentures as collateral. The amount owing the bank for this year will be fully covered by collateral.

Truro, N.S.—The town of Truro has redeemed debentures to the amount of $6,000, issued in May, 1899, bearing interest at 4 per cent., and maturing in thirty years. The price paid was 93 per cent

Fort William, Ont.—A by-law to raise the sum of $65,000 by way of debentures for the purpose of further improving and extending the waterworks system of the city; also a by-law to raise the sum of $18,000 for the purpose of paving a subway, will be voted upon at the municipal elections.

Medicine Hat, Alta.—The assets of the school board amount to $1,025,746, with land and buildings valued at $641,000, the balance being made up of equipment, taxes, grants, etc., the surplus being $109,400. The receipts of the board for eleven months to December 1st from various sources, taxes, grants, etc., were $300,661, which, less the bank balance of some $5,000, was expended in salaries and other expenses in connection with old and new schools. The board has outstanding debentures amounting to $888,552, while it has on hand debentures not delivered on account of war conditions amounting to $202,080.

Winnipeg, Man.—The reasonable manner in which subscribers to new issues floated prior to the war are being met is exemplified in the Greater Winnipeg water issue, states a London cable. The Bank of Montreal made arrangements whereby subscribers who have, under the moratorium, deferred payment on the July issue, will be allowed as an alternative to withhold further instalments and receive eleven pounds stock for every fifteen pounds paid. This is on similar lines as arranged in the case of the recent provincial issues Greater Winnipeg subscribers, however, are urged by advisers here that it is more to their advantage to pay the remaining instalments, as the stock is recognized generally as first class.

Calgary, Alta.—The report of the city treasurer as to the money needed to February 1st is as follows: Accounts payable, $350,000; estimated purchases for December, $105,000. Salaries and wages—Executive and staff, $151,880; labor, $148,000. Grants—Sundry grants, $10,127; General Hospital, $15,205; Holy Cross $2,000; library, $6,000. Interest—Debenture interest, $250,000; interest account, treasury notes, $60,000, making a total of $1,098,212. This does not include any provision for school board, separate schools, depreciation and sinking fund accounts.

Westmount, Que.—The city of Westmount has an ample margin of borrowing powers, which it exercises only for purposes which may properly be termed capital expenditures, writes Mr. A. F. Bell, the secretary-treasurer, to *The Monetary Times*. The city's general manager, after conferences with the heads of departments, presented a report and recommendation that the necessary steps be taken to authorize the borrowing of sufficient funds to meet the estimated capital expenditure for the years 1914 and 1915. This recommendation, approved by the chairman of the finance committee, was unanimously adopted by the city council, and the sale at 95.42 net to the city (or a 4½ per cent. basis net) of bonds thus authorized was made last June, which fully covered the expenditures of the year. The revenue for administration and maintenance purposes has been sufficient to meet the estimated expenditure as per financial budget prepared at the beginning of the year. It has not been necessary for Westmount to make temporary borrowings or resort to other measures to secure funds for its needs.

Victoria, B.C.—Arrangements have been made with the Bank of British North America whereby $350,000 will be secured for the Sooke Lake waterworks system. Victoria council has on hand about £158,000 worth of debentures authorized under the second $1,500,000 Sooke Lake issue. Owing to the present monetary situation it has been found impossible to sell these bonds. The city has recently repaid to the bank about $1,000,000, borrowed early in the year on the security of the annual taxes, and in addition, has taken up £20,000 worth of treasury certificates floated in the London market. The bank consented to make the advance of $350,000, to be secured by the waterworks debentures. Lands which are being held by the Esquimalt and Nanaimo Railway Company, valued at $300,000 have to be paid for, but this sum will not be available until such time as the unsold debentures now on hand have been sold.

TWO TELEGRAPH SYSTEMS AMALGAMATE

An arrangement has just been consummated between the Great North Western Telegraph Company and the Canadian Northern Telegraph Company. Commencing on January 1st, 1915, these two large telegraph systems will be operated as one under the name of the Great North-Western Company. Within the next few months, the lines and offices of the Western Union Telegraph Company in the Maritime Provinces will be operated by the Great North-Western Company, which will then have the largest telegraph system in Canada, it covering the country from the Atlantic to the Pacific. They will have over 1,700 offices in Canada and direct connection with 25,000 offices of the Western Union Telegraph Company in the United States, as well as with eight transatlantic cables, six of which have landing stations in Canada. This insures to the Canadian public a telegraph and cable service with and from Canada unique in its completeness.

Mr. Z. A. Lash, K.C., continues as president, and Mr. Geo. D. Perry is general manager of the Great North-Western Company.

◆

An experimental farm of about one thousand acres is to be established in Northern Ontario, and the work of clearing it will be done by utilizing the labor of prisoners of war now interned in the province.

It has Correspondents in all Cities of importance throughout Canada, the United States, the United Kingdom, the Continent of Europe, and the British Colonies.

Collections made in all parts of the Dominion and returns promptly remitted at lowest rates of exchange. Letters of Credit and Travellers' Cheques issued available in all parts of the world.

BANK OF VANCOUVER SUSPENDS

Small Local Bank Could Not Overcome Difficulties—Failure Does Not Affect General or Banking Position

The directors of the Bank of Vancouver announced on Monday evening, December 14th, that they had been obliged to suspend payment. The bank withdrew from the clearing house at Vancouver on December 9th.

The following is the official statement made by the directors of the bank:—

> "The directors of the Bank of Vancouver regret very keenly to be obliged to announce that the institution has been compelled to suspend payment. This decision was reached at a meeting of the board, held yesterday afternoon, and was made necessary for the following reasons:—
>
> "1. Widespread and damaging rumors, resulting in the loss of public confidence and heavy withdrawals of deposits.
>
> "2. Inability of the bank to collect quickly outstanding loans under present unprecedented conditions.
>
> "3. Failure to obtain financial assistance in the crisis.
>
> "Since the failure of the Dominion Trust Company, which shook public confidence, the Bank of Vancouver has failed to receive even a reasonable measure of support. Without doubt this is largely attributable to the damaging rumors which have been persistently circulated regarding the bank during the past month or two. To illustrate the nature of these rumors it can be stated that many depositors of the bank and others interested in its welfare have been advised, some of them anonymously, to discontinue their business with the institution. The direct effect of these rumors caused very heavy withdrawals of deposits, which an institution much stronger than the Bank of Vancouver could not have continued to meet because of the impossibility readily to collect loans under prevailing conditions, notwithstanding the fact that vigorous and persistent efforts were made to do so. In addition to affecting seriously the bank's policy of collecting, which was being pursued, the war indefinitely postponed negotiations towards securing additional capital for the bank, and it has since been impossible to resume these negotiations.
>
> "When it became evident that funds would be required to meet depositors' demands, every possible effort was put forth to secure assistance, and it was only after exhausting every available source that the directors reluctantly decided to suspend business.
>
> "The directors are confident that the depositors will be paid in full as the assets are ample, but in view of existing conditions some time will be required for full realization. The assets at the close of business yesterday amounted to approximately $1,098,000, of which about $70,000 is made up of cash, cheques, bank balances and deposit with the government at Ottawa as security for note circulation. The liabilities are composed of deposits totalling $370,000 and notes in circulation, $325,000.
>
> "Attention is here directed to the fact that on November 30th, 1913, a little more than a year ago, the bank's total deposits amounted to $1,507,000 and notes in circulation $373,000. These figures are indisputable evidence of the large reduction which has taken place in the bank's liabilities during the past year."

The present directors and officers of the bank are as follows: R. P. McLennan, president; L. W. Shatford, vice-president; directors, J. A. Harvey, K.C., Hon. T. W. Paterson, M. B. Carlin, Alvo von Alvensleben, Dr. O. Grunert, Col. J. Duff Stuart; acting general manager, W. F. Jardine.

The Monetary Times understands that the affairs of the bank have been before the department of finance for some time past, and have received considerable attention, more especially during the past two or three weeks.

The Bank of Vancouver was organized on March 1st, 1910, and received a license from the finance minister at Ottawa to open its doors on March 16th, 1910. The first president was Mr. R. P. McLennan, and the first general manager Mr. A. L. Dewar. Mr. C. G. Pennock became general manager later. The institution started with great hopes of becoming a purely local or provincial bank, as several other banks have started in the past, and failed.

At the first annual meeting of the bank, held at Vancouver on January 10th, 1911, Mr. McLennan, the president, stated that a contract had been made with a responsible house for a sale of a further issue of the bank's stock to the extent of $500,000, "with a view to continually strengthening our position." This issue, it was said, had been received most favorably by the public, over $200,000 then having been subscribed for. The bank's president added: "The Bank of Vancouver has been well supported by the people at every point it has located since it was open for business. This has enabled us to show a net profit for the four months (ended November 30th, 1910), of $5,943.46."

The general manager, Mr. Dewar, made the following remarks at the bank's first annual meeting: "I do not hesitate to assure you that with such a board as we now have and with good, loyal men connected with the active management, the future progress and success of the bank is absolutely assured. British Columbia can, and will, support a bank, but I warn British Columbians on this point, never to covet an outside holding for the unwise policy of too much haste to make profits. Let us make haste slowly, and thus secure a steady local increase in the capitalization, with a determination to retain the control always in British Columbia."

"Many Requests for Loans."

In August, 1910, a few days after the bank had commenced business, Mr. Dewar was optimistic as to the bank's affairs, and said: "It looks as if Vancouver people are going to patronize their own bank. We have had many requests, too, for loans, and altogether prospects are of the brightest."

It may be found that the question of loans was one of the weak spots in the bank's career. Mr. Shatford, who was president of the bank at the time it failed, was acting as manager in 1912. At that time he admitted to *The Monetary Times* that the bank was in some trouble as a result of bad loans, but he thought the institution could weather the storm.

The statement made by the institution from month to month did not reflect the strongest of positions, as will be seen in the accompanying table. During the past few months the position became worse. Deposits declined at an alarming rate, as will be observed from the figures in the table.

Absorption Proposal Turned Down.

This year it is understood that the Royal Bank investigated the affairs of the Bank of Vancouver with a view to its absorption. The Royal Bank decided not to purchase.

When the Dominion Trust failure occurred and other companies in British Columbia got into difficulties, the end of the Bank of Vancouver was hastened. Mr. Shatford visited Eastern Canada in the hope of finding a means to prevent the collapse of the institution. He saw the late Col. D. R. Wilkie, then president of the Canadian Bankers' Association, a few days before Mr. Wilkie died, but while measures to safeguard the bank's existence were discussed, apparently no decision of value was obtained.

First Statement of Bank.

The statement of the bank, as presented to the shareholders on January 10th, 1911, after four months' business, was as follows:—

	Nov. 30, 1910.
Capital stock, paid up	$ 334,050
Profit and loss account	5,943
Interest accrued on deposits	1,088
Rebate of interest on unmatured discounts	4,759
	$ 346,741
Notes of the bank in circulation	191,270
Deposits at call	375,284
Deposits subject to notice	251,880
Total liabilities	$1,165.177
Gold and silver coin on hand	18,660
Dominion government notes on hand	77,172
Due by agents and other banks in Canada	97,898
Due by agents and other banks elsewhere	10,783
Notes of and cheques on other banks	61,042
Deposits with Dominion government to secure note circulation	5,000
Bills discounted, advances current and other assets	863,534
Bank premises and furnishings	22,085
Total assets	$1,165,177

BANKERS IN GREAT BRITAIN—The London Joint Stock Bank, Limited.

TORONTO BRANCH—A. B. PATTERSON, Manager.

The bank had its head office in Vancouver and two branches in that city. There were also two branches in Victoria. One branch in each city catered especially to the accounts of Chinese residents.

Local in Character.

The notes of the bank gave views of industrial activities in British Columbia, while all were backed with a reproduction of the parliament buildings at Victoria.

A complete list of the shareholders of the bank appears on another page. The largest holding is that of the Commonwealth Trust Company, Vancouver, 2,145 shares, fully paid. Most of the shares of the bank are held in British Columbia.

The following figures have been compiled by *The Monetary Times* from the bank's monthly reports to the government.

When the bank withdrew from the Vancouver clearing house last week, Sir Frederick Williams Taylor, a vice-president of the Canadian Bankers' Association, commented on the announcement as follows: "The Bank of Vancouver is entirely local in character, and its withdrawal from the clearing house has no bearing whatever on the general trade or banking situation in Canada."

STATISTICAL STORY OF THE BANK

Monthly Returns Made to the Dominion Government by the Bank of Vancouver, Reveal Interesting Figures

The following table, compiled by *The Monetary Times* from the bank's returns to the Dominion government, shows the position of some of the chief accounts during the bank's career:—

	Current loans in Canada.	Call loans in Canada.	Deposits on demand.	Deposits after notice.
1910				
June	$ 64,434	......	$ 12,675	$ 2,472

October	1,098,009	27,000	220,920	334,432

Directors' Loans and Deposits.

Under the heading, "aggregate amount of loans to directors and firms of which they are partners," the first entry in the bank's returns was in August, 1910, the amount being in that year $2,000. The amounts for August of the following years were: 1911, $50,775; 1912, $123,338; 1913, $98,316; and 1914, $37,102. The October, 1914, bank statement showed them to be $46,579. The highest amount in this account of the bank was in December, 1912, when it totalled $148,468.

The decline in deposits since the late summer of 1913 is very noticeable.

Some Other Accounts.

The following figures show the position of other accounts of the bank at various times:—

	Notes in circulation.	Total liabilities.	Total assets.
1910.			
June	......	$ 336,735	$ 336,735
July	$ 4,465	361,509	361,509
December	150,690	904,540	1,209,340
1911.			
June	118,160	1,355,485	1,770,184
December	383,445	1,805,873	2,626,182
1912.			
June	447,100	2,050,813	2,950,970
December	571,887	2,216,883	3,139,890

The Maximum of Security

Real Estate Mortgages afford investors the Maximum of security. More than twenty-eight million dollars of this Corporation's investments are in first mortgages on carefully selected improved real estate securities. It is in these that the funds entrusted to our care by our Debenture-holders are invested, thus assuring

Safety of Principal and Certainty of Interest.

That the conservative investor of small means may be afforded the advantages of this most desirable security, we issue our debentures in sums of one hundred dollars and upwards. Don't wait till you have accumulated more money. If you have a hundred dollars to invest write us for particulars.

ASTONISHING FINANCIAL TANGLE REVEALED

Liquidator Drayton, of the Dominion Trust Company, Makes a Detailed Report

The following is the full text of the report, dated December 9th, of Mr. C. R. Drayton, provisional liquidator of the Dominion Trust Company:—

On October 27th, 1914, a petition for the winding-up of the Dominion Trust Company was presented, and an ex-parte order for my appointment as provisional liquidator was made. My appointment gave me practically no powers except to take possession of the property, documents and securities of the company. On November 9th, 1914, however, a winding-up order was granted by the court under the Dominion Winding-up Act, and I was appointed provisional liquidator with limited powers.

By that order I was authorized to employ, and did employ, the firm of Marwick, Mitchell, Peat & Company, chartered accountants, to make a complete investigation and report on the affairs of the company. They immediately began their work here, and gave instructions to their various branches to take up the work at the branches of the Dominion Trust Company. The whole work is now well in hand. Owing to the large number of adjustments required in the books at the head office and Vancouver branch, and to the limited time at their disposal, they have naturally been unable to prepare final figures as at October 26th, 1914, the date of the winding-up. I have, however, prepared a statement of assets and liabilities which is presented herewith.

Ramifications Were Large.

As the ramifications of the company were very large, and the persons and interests affected by the company's failure very numerous and widespread, it has been necessary for me to attend personally to a great deal of the detail work, and impossible for me, therefore, to make a complete valuation of the company's properties and securities, and give a full report as to the exact position of these. Many of their investments are outside of Vancouver, and it would require a few months to inspect them and get an absolutely correct valuation. However, as, before my appointment, I was more or less familiar with quite a number of their investments, I have been able, in the short time at my disposal, to approximate more or less closely the value of some of the more important of the properties and securities. This approximate valuation will be found in the statement submitted herewith:

Causes of Liquidation.

The direct causes of the liquidation, so far as I have been able to ascertain, may be shortly stated as follows:

1. The fact that in violation of its powers the company received deposits and kept in hand little or no liquid assets with which to meet a possible run.

2. The fact that moneys in hand, both trust moneys and the company's own moneys, were invested, not as required by the provisions of its charter, but in highly speculative assets and in the shares or bonds of highly speculative companies, where more and more advances were necessary to protect the company's security.

3. The fact that moneys entrusted for investment were not kept separate, nor in a separate bank account, although the company's charter required this to be done. At the date of liquidation the company had under its control trust moneys amounting to between four and five million dollars. Part of this was always uninvested and always carried in the company's bank account, mixed with its own money, and often, [illegible], dealt with as if it were its own money.

4. The fact of the misappropriation of trust and other securities. This appears to have been a vain attempt to save the situation and has been most noticeable during the few months prior to liquidation. The inability of the company to [illegible] funds when demanded rendered the situation acute.

5. To sum up the situation, the company seems to have done the things that a trust company should not do, and the company had no power to do, and few things that a trust company should do.

Before dealing with the above causes in detail, I would like to state that in my opinion the extraordinary conditions prevailing to-day on account of the war should not have contributed very materially to the downfall of the company. Since August 1st, 1914, practically no funds have been received from the old country for investment, so that the company have had no means since that date to replenish their own bank account as they had done in the past. This naturally helped to make the situation acute, and in view of the fact that the situation was bound to grow worse so long as the company was managed as it had been, the war was probably a blessing in disguise for the Dominion Trust Company.

Returning to the first cause of the liquidation, the taking of a large amount of deposits with no liquid assets, I would like to state that in my opinion the depositors have to a very large extent been victimized. The old company, the Dominion Trust Company, Limited, which was incorporated by letters patent of the province of British Columbia, subsequently confirmed and extended by chapter 59 of the Statutes of 1908 of British Columbia, applied for and received a Dominion charter incorporating the Dominion Trust Company on April 1st, 1912.

New Company's Powers.

This charter gave the new company power to acquire the business of the old company and of the Dominion of Canada Trusts Company, conditional upon the assumption by the new company of the obligations and liabilities of these companies. The charter gave no power to take deposits, and in fact stated that nothing in the act should be construed to authorize the company to engage in the business of banking. Its powers by the Dominion charter were largely confined to those of receiving money in trust for investment on first mortgages on improved freehold property, in Dominion, provincial, municipal or school bonds, or in securities authorized by the terms of the trust.

However, on March 1st, 1913, the legislature of the province of British Columbia passed an act ratifying the agreement to take over the property and rights of the old company, and at the same time professing to give to the company the power expressly refused by the Dominion parliament, namely, the power to take deposits. On March 4th, 1914, the same legislature repealed the last-named power.

Trust Companies Act.

The next act affecting this company was the Trust Companies Act, passed by the province of British Columbia on March 4th, 1914. This act allowed companies doing a trust business eighteen months from the passing of the act in which to comply with its provisions, and to apply for registration thereunder. Its provisions regarding the management and investment of moneys received on deposit were very stringent. All moneys received on deposit had to be kept separate from the company's own funds, and in a separate department, and all investments of the moneys deposited had to be kept separate and distinct from the general business of the company.

The act also required every trust company to have on hand as a reserve in lawful money of the Dominion of Canada at least 25 per cent. of all such deposits received by the company which were withdrawable on demand. The act also required that no company should carry on a trust business in the province of British Columbia after July 1st, 1914, unless it had deposited with the minister of finance and agriculture a deposit of not less than $25,000 nor more than $200,000 as the inspector of trust companies may from time to time require. In accordance with this provision a bond of the Railway Passenger Assurance Company dated May 29th, 1914, for $200,000, and a bond of the London Guarantee and Accident Company, Limited, of London, England, dated April [illegible]th, 1914, for $[illegible], were deposited with the minister of finance and agriculture. No application, however, was made by the company for registration under the act, so that the provisions of the act regarding the management of deposits did not apply.

Depositors' Pass Books.

The new company issued a pass book to depositors, in the front of which was an agreement between the company and the registered owner of the pass book, called "the depositor," whereby the company acknowledged to have received from the depositor the sums entered therein in trust for investment on account of the depositor, some of the conditions mentioned being as follows:

The Hamilton Provident and Loan Society

HALF-YEARLY DIVIDEND No. 87

Notice is hereby given that a Dividend at the rate of eight per cent. per annum has been declared for the half-year ending December 31st, 1914, upon the paid-up Capital Stock of the Society, and that the same will be payable at the Society's Head Office, Hamilton, Ontario, on and after Saturday, the 2nd day of January, 1915.

The Transfer Books will be closed from the 14th to the 31st of December, both days inclusive.

THE TRUSTS AND GUARANTEE COMPANY LIMITED

43-45 King Street West TORONTO

JAMES J. WARREN President E. B. STOCKDALE General Manager

6

1. That the moneys were to be invested in or loaned upon such securities as the trust company should deem safe and advantageous, to be taken in the name of the trust company, but to be held by the trust company as trustee for the depositor.

Pay on Demand.

2. That the trust company should guarantee the repayment of the above mentioned sums upon demand, or upon fifteen days' notice at the option of the trust company, together with interest on the said sums at the rate of 4 per cent. per annum, etc.

It should be stated that there was earmarked by memorandum in the books of the company a sufficient amount of securities to cover the balance of deposits and uninvested trust funds in the hands of the company. In this earmarking, however, the specific securities supposed to be earmarked were not mentioned. In fact when the company's liabilities became pressing some of the securities supposedly earmarked on the books for the deposits and uninvested trust funds, were hypothecated to the Royal Bank for advances. As I am advised by my solicitors that it is very doubtful whether this earmarking will stand, I have disregarded it altogether.

Cannot Pay Depositors.

Under their Dominion charter the company were obliged to submit annually to the minister of finance, a statement setting forth the assets and liabilities of the company and the trust property held by it, made up to December 31st, in each year. Under the Trust Companies Regulation Act of British Columbia, 1911, the company had to forward to the minister of finance quarterly a report setting out all the assets and liabilities of the company and other statements giving details of certain of the items. Both the Dominion and the British Columbia Provincial Governments were therefore aware that this company was carrying a large amount of deposits.

The government has made a formal demand upon me as provisional liquidator to pay off the depositors, which, of course, it is impossible for me to do, and they are therefore calling upon the bonding company to pay them the sum of $200,000, the amount of the bond. I am informed that the bonding company disputes the liability, and there will possibly be a long drawn out lawsuit, probably going to the Privy Council. I have interviewed the premier and attorney-general of British Columbia, and have tried to make them see the situation in the same light as I do, namely, that as the Dominion and British Columbia Governments knew that deposits should never have been taken, and as they were aware this was being violated, I think they should reimburse all depositors with the exception of the directors of the company. If the government do not do this, the question will arise as to whether the deposits taken on and after January 1st, 1913, will have any standing at all.

Highly Speculative Assets.

Passing now to the second cause of the liquidation, the investment by the company in highly speculative assets and in the shares and bonds of highly speculative companies, I would mention the following accounts, and the interest of the company in each:

	Approximate Interest.
British Canadian Securities, Limited	$1,231,704.72
Western Canada City Properties, Limited	339,232.34
Alvo von Alvensleben, Limited	528,483.19
Syndicate No. 8, W. R. Arnold	392,664.35
Central Okanagan Lands, Limited; Columbia Valley Orchards, Limited; Seymour Arm Estates, Limited	870,959.56
Vancouver Industrial Sites, Limited	46,719.59
Grand total	$3,409,763.75

In addition to the above amounts, there are large contingent liabilities, for example, Alvo von Alvensleben, $514,121.68.

Loans Should Not Have Been Made.

In my opinion, not one of the above loans or advances were such as should have been made by a trust company. In addition to these advances, many of the above companies have received substantial advances from the British Columbia Securities, Limited. All of the accounts had small beginnings, but further advances were required from time to time to protect the company's security, and at the present time the finances of nearly all of these companies are in a very bad shape. The advances to the British Columbia Securities are made up as follows:

Stock which is now valueless (being all the shares of the company except 17 shares held by the directors)	$ 248,300.00
Debentures, security for which, in my opinion, is valueless, and for which the company will rank as ordinary creditors in the liquidation of the British Columbia Securities, Limited.	640,000.00
Advances for which no security is held	343,404.72
	$1,231,704.72

Rank as Ordinary Creditors.

The company will rank as ordinary creditors for the debentures and advances, amounting to $983,404.72, which may only pay between ten to twenty cents on the dollar. Many of the other companies are in bad financial condition, and will require careful handling if the company's security is to be protected. Under present conditions it is impossible to realize anything from such securities, and while they may be of some value ultimately, I have put no value on them in the statement now submitted.

As many of these securities have only what I term "think equities," their value depends largely on whether the first charges can be protected, and there will also arise the question in a great many cases whether, even if they can be protected, it would be wise for the liquidator to do so. To give one example, the company owns a property where there is a first mortgage of $50,000 on the whole of it.

Money Sent, But Mortgage Unpaid.

A client sent to the company $50,000 to place on first mortgage, which sum was placed on this property, but the first mortgage was not paid off. The client has, therefore, a second mortgage of $50,000, making a total of $100,000 prior claims against part of this property. The company have also started to erect upon part of this property a building which now is only partly finished, and upon which there are mechanics' liens of about $7,000. It requires about $13,000 to finish the building, yet this property was carried on the company's books as an asset of $30,000. It is very doubtful, in my opinion, whether the company have any asset at all in this property.

No Separate Trust Account.

The third cause of liquidation stated above was the absence of a separate trust account for trust moneys in the hands of the company which were uninvested. At the date of the death of the late managing director there were in the hands of the company uninvested trust funds and clients' and agency moneys amounting to over $1,000,000. This figure does not include deposits, which, at that date, also amounted to over $900,000. In this connection is it noteworthy that the first item of business at meetings of the advisory committee of directors always was the receipt of a report by the secretary showing the bank balances.

No mention is made in the minutes, however, of the balance of uninvested trust funds on hand. It is, therefore, evident that trust and clients' funds were used for the purposes of the company, and I think it is safe to state that in recent years these moneys were used to keep the subsidiary and allied companies alive. It is impossible to go very fully into this phase of the situation with the incomplete information which I have at hand, but this feature will be fully brought out in the final report of the auditors.

Misappropriation of Funds.

The fourth cause of the present position was stated to be the misappropriation of trust funds and securities and the inability of the company to hand over trust funds when demanded. In addition to the trust funds mentioned above as uninvested, the company has made a large number of investments on behalf of clients which are contrary to their specific instructions. In the event of loss the company will be responsible and I expect claims against the company arising in this way will amount to a considerable figure. The company has also disregarded the fact that securities were earmarked or held in trust and have either hypothecated or sold them to other parties. This is a feature than cannot be fully [illegible] until the auditors have completed their investi-

Montreal Winnipeg Edmonton Saskatoon Regina

gation, but I may say meantime that cases of this kind are being discovered almost daily. The following are a few examples of misappropriation or diversion of trust funds:—

1. A client sent $250,000 for investment in a first mortgage. This mortgage is supposed to be held in trust for him, but it has been discovered that at least two other parties have also an interest in it.

2. Securities earmarked as held for depositors have been hypothecated to the Royal Bank of Canada as security for advances. It will be very hard to trace these securities as the earmarking for depositors was merely in a total, the details of the items so earmarked not being stated in the books. It seems fairly certain, however, that the debentures of the British Columbia Securities, Limited, amounting to $640,000, come under this category.

Scotch Money was Invested.

3. The Edinburgh agents of the company have sent approximately $690,000 for investment. Of this amount about $145,000 has not been invested. The directors attempted to earmark certain securities on their behalf on October 26, 1914, but I have been instructed by my solicitors to disregard this earmarking meantime. The balance of the moneys sent by the Edinburgh agents appear to have been properly invested, but I have not had time to appraise their securities. It should be stated that the company were allowed six months in which to find an investment for moneys remitted by the agents, and that practically no investments of these moneys have been made by the company in the six months prior to the death of the late managing director.

Some More Examples.

4. A client sent $85,381.25 for investment in a specific security. As this money went into the company's bank account and the investment was not made, it would be almost impossible to trace the money now so as to give the client a preference.

5. The company, while acting as trustee for a certain company, used over $40,000 of trust funds for their own purposes. Failure to pay over this money when demanded early in October, 1914, made the situation acute.

6. Securities which were earmarked for a certain sinking fund were forwarded to London for disposal.

7. Property was purchased from and paid for to the company as agents, and in some cases the purchasers have built their homes, but as the company has not paid over the moneys received to the government to obtain title, this has worked a great hardship in very many cases. This is another case where I trust the government will see their way clear to take the unsold lots as security for what is still owing them, and issue crown grants for the others, so that the purchasers can obtain title to the land which they have paid for in full.

To Keep Company Alive.

The above are only a few examples of the many cases of misappropriation which have been discovered. Most of the cases appear to have been attempts to provide sufficient funds to keep the company alive. The complications caused by manipulations such as these may make it necessary to have points settled in the law courts before a final statement can be prepared.

The securities held by the Royal Bank of Canada have been hypothecated chiefly during the few months prior to the death of the late managing director. They have a total book value of over $1,500,000 against advances by the bank of approximately $167,427.35. At the present time, however, it is impossible for me to put any value on the reversion to the company out of these securities.

Ten Cents on the Dollar.

The debentures of the British Columbia Securities, having a face value of $640,000, are included in this total, and as there are prior mortgages on all the properties supposed to be included in these debentures, I can only value them as an ordinary claim against the company, which I understand is worth from 10 to 20 cents on the dollar. Other large items consist of bonds, stocks and notes of orchard companies, which at the present time are financially embarrassed and most of them are in default on their bond interest. It may be possible that with careful handling some of these securities may be made good, but they are unrealizable at the present time. I therefore consider the bank fully secured, if [illegible] [illegible], but expect no reversion from these [illegible] [illegible].

A statement of assets is submitted herewith as part of this report. From this statement it will be seen that the total unsecured liabilities are estimated at $3,000,000 and that my valuation of the assets, including the bonds deposited with the government, without providing for the expenses of liquidation and for the preferred claims, is $985,000. I would like to make it clear that if business conditions improve, and if the first claims against many of the properties can be protected, the assets should realize considerably more than my valuations. The statement is prepared in a form which shows exactly where the shrinkage has occurred.

Prospects of Dividend.

At the date of my appointment I hoped that we should be able to realize $250,000 immediately from the bonds held by the government for the depositors and creditors. Apparently this will not be paid in the near future, as the bonding companies are disputing liability. There is also a legal battle over the late Mr. Arnold's life insurance, so that meantime the most easily realized asset is the unpaid calls on the shares, which have a book value of $181,090, which, roughly speaking, should be worth $100,000. Unless this amount is called up, the permanent liquidator will be left with no ready cash to disburse now or in the near future to the depositors and creditors, and will possibly be in the awkward position of being unable to find enough money to meet the immediate costs of the liquidation.

As provisional liquidator I do not consider it my duty to go into the question of who is responsible for the present position. A full investigation into this question will no doubt be made by the permanent liquidator.

In conclusion, I consider it only fair to the province of British Columbia in particular, and to the Dominion of Canada in general to state that from my investigations up to date, it is amply proven to me that the present position of the Dominion Trust Company was bound to happen sooner or later, and that the present financial stringency caused by the war merely accelerated the climax.

I recommend that Messrs. Marwick, Mitchell, Peat and Company be retained to continue their investigations as they have now got the work well under way.

Yours truly,

(Signed) C. R. DRAYTON,
Provisional Liquidator.

ST. JOHN'S NEW DOCK OPENED

Mr. G. M. Bosworth, vice-president, told of the purchase of two steamers and the charter of two others by the Canadian Pacific Railway and Allan line when the government docks at West St. John were opened by Hon. R. Rogers, minister of public works. He promised enough business to keep the port busy during the winter.

Sir Robert L. Borden had expected to be present for the opening of the docks, but was prevented by the pressure of public business.

◆

BANK OF TORONTO REPORT

The Bank of Toronto has a reputation for being a very conservative institution, a reputation which is an asset of incalculable value to a bank. This institution has been doing business in Canada for nearly sixty years, during which period it has weathered many severe financial and economic storms which have raged around it. The present year is testing the mettle, merits and strength of institutions and individuals, and the Bank of Toronto is clearly seen in its latest balance sheet, to have come through this critical period without damage to its financial position or to its high reputation.

The shareholders received this week a statement regarding the bank's operations during the year ended November 30th, 1914. The net profits were $829,538, less than in the two previous years, when high profits were regarded almost as a matter of course in every kind of business. The profits of the bank last year are very gratifying, and have resulted from the careful business which the bank invariably handles.

With a sum of $1,136,810 for distribution, the directors have made the following appropriations:

Dividends at the rate of 11 per cent, $550,000; bonus, one per cent., making a total distribution of 12 per cent., $50,000; transferred to officers' pension fund, $25,000; Patriotic fund (first instalment of a subscription of $25,000), $5,000; Red Cross Society, $2,000; Toronto General Hospital, $2,000; and appropriation re depreciation in value of stocks and bonds held, $100,000. This left a balance to be carried forward to next year of $402,810, which compares with $[illegible]7,272 carried forward in the previous year.

In the general statement, it is seen that bank premises remain at the same value as before, the sum of $100,000 having been written off in two previous years. The total assets are $60,020,000, of which $15,485,000, or about 25 per cent., are in liquid form. The liquid assets show an increase of almost $1,400,000 over the previous year. Holdings of coin and Dominion notes increased to $8,162,000. Deposits at the end of the year amounted to $45,000,000, a gain of $1,750,000. Prevailing business conditions are reflected in a shrinkage in discounts amounting to $800,000.

The annual meeting of shareholders of the bank will be held on January [illegible]. The bank's directorate, management, shareholders and customers have every reason to be gratified at the result of the year's business.

RAILWAYS AND THEIR PROBLEMS

Costs of Operation Are Increasing—Railway Facilities Are Not Fully Used

That prices for railroad supplies had increased anywhere from 29 to 54 per cent. during the last 10 years, while wages during the same period had increased from 10 to 79 per cent., the average increase of all purchases, including labor, being approximately 35 per cent., was shown in an address before the Canadian Railway Club, by Mr. A. Price, assistant general manager of the Canadian Pacific Railway, who said:—An ordinary business institution would have simply increased prices, to make the public pay, but the railroads did not enjoy this privilege.

Railroad earnings per passenger per 100 miles since 1907 showed an increase of 6 cents, and per ton of freight a decrease of 5½ cents. But the freight ton mile units for 1914 were 23 billions and the passenger mile units only 3 billions. As a result had the passenger mile and ton mile earnings of 1907 been applied to the 1913 traffic the railroad earnings would have been increased by $11,000,000.

Problem of Maximum Efficiency.

The railroads, however, had to meet the demands of the public, and always be prepared to handle the "peak of the load" whenever unusual demands came along. Unfortunately there was no probability that existing railroad facilities would be taxed for some time to come, so it would be folly to advocate the lowering of transportation costs by improving road or operating facilities. Instead of this, the operating official had to face the problem of the maximum efficiency at the minimum cost.

In these items Mr. Price suggested cutting down the freight damage account of $2,000,000 in 1913. Another idea was the "safety first" principle. This was shown by the fact that last year 710 people were killed in Canada by the movement of trains and 2,966 injured, the different railways paying out over $1,500,000 in damages on this account, although almost half of those killed were trespassers, while most of the other fatalities and accidents might have been averted by ordinary prudence. The great necessity was for increased safety, in railroad operation.

Another important item was fuel, which cost the Canadian railways $28,000,000 last year. With regard to this Mr. Price said it did not pay to run trains at high speeds, since apart from the greater liability to costly accidents, the service was expensive. While competition made very fast trains necessary in some districts he considered that when possible the actual running speed should not exceed 45 to 50 miles an hour.

If Loaded to Capacity.

Last year the average number of passengers on Canadian railway trains was only 62, the average number of cars being 5.6. This meant that the minimum tonnage per passenger train mile should be handled, while the maximum tonnage per freight train mile should be hauled, so as to secure the most economical load for locomotives. An engine would burn almost as much coal per mile hauling 75 per cent. of its capacity as when fully loaded.

During 1913 the average car load on all Canadian railroads was only 19 tons while the average capacity was 32.14 tons. In this one item, if the cars could be loaded to capacity, the saving would be millions of dollars a year. This also involved the unnecessary movement of empty freight cars, which also involved large possibilities for saving, since the cost of hauling empty freight cars was at least 1½ cents per mile. Last year 24 per cent. of the freight car mileage on Canadian railroads was empty, and if this could be reduced even to 20 per cent., the saving would mean a large increase in the net earnings.

MUST REPAY NATIONAL BORROWINGS

Whether by Gold or Products Depends Upon Canada's Development of Farm, Mine and Forest

That Canada would borrow $100,000,000 a year during the course of war, that Canadian banks had provided for the legitimate banking requirements of the community, made advances to government and municipalities to enable them to complete works under contract, provided for the payment in whole or in part of treasury bills and other short-date securities maturing due abroad, which, but for the war, would have been funded, and financed the movement of the grain crops and other products of Canadian agriculture, and that confidence was restored, panic allayed, trade passing across the ocean in tranquil security, the stock exchanges opening, money becoming easy, industry in all lines quickening into activity, were pointed out at Montreal by Hon. W. T. White, when addressing the Canada Club.

Hon. Mr. White explained that debts to another nation must be paid, directly or indirectly, in products, services, interest on investments, or in gold; until the balance is redeemed, the nation must export her gold.

"The so-called adverse balance of trade against Canada amounted in the fiscal year 1912 to over $225,000,000; in 1913 to $300,000,000, and in 1914 to $180,000,000. How did we pay it? The answer is that we paid interest and balance of trade by borrowing.

Borrowing is Gold.

"We are overtaking our adverse trade balance. From April 1, the beginning of our fiscal year, to October 31 we had an excess of imports over exports of $56,000,000, while for the same period of last year the excess was $141,000,000. Another factor which will materially help us is our borrowings in London for war. War is our first business until it is over. We shall borrow probably a hundred million a year, the greater part of which will be spent here. That borrowing is gold—the equivalent of exchange, so far as it is spent in Canada. Then there are the orders placed by British, French and Russian governments. The funds for those orders are also gold. Then there will undoubtedly be borrowing abroad on a reduced scale as money markets become easier, as is now their tendency. London may within a few months resume lending. What a marvel is Britain to-day financing the war out of her savings, and with a margin left over for investment! No doubt the United States will purchase some of our high-class securities, because, as I pointed out, we cannot buy unless we borrow or sell, and we buy more from the United States than from any other country.

Agricultural Production is the Means.

"Next year our agricultural production will be immensely increased. Every man with a plot of land should plant it next spring. Our exports will thus be greatly swelled. By all these means Canada is taking and will take steps, no doubt unconsciously to the great body of her citizens, who work by sure instinct, to meet the subversive conditions created by the war and the large adverse trade balance without resorting to gold exports."

The speaker showed that while in the month of August last the exports of the United States decreased 40 per cent., and those of Great Britain 45 per cent., Canada's increased [illegible] per cent. In September Canada held her own, United States declined 28 per cent., and Great Britain 35 per cent. In October our exports fell off 14 per cent., while Britain's declined 36 per cent.

WESTERN DRY DOCK COMPANY'S NEW WORK

The Western Dry Dock and Shipbuilding Company, of Port Arthur, has one of the most complete plants for high-class metal working and wood working on the continent. Similar plants on the American side are utilized for a variety of manufacturing apart from shipbuilding, and it is the intention to do the same at Port Arthur. Mr. James Whalen [illegible] part in the new undertaking, and has already [illegible] the financing of it. The plan involved the im[illegible] construction of a $25,000 addition to the existing plant and means the employment of several hundred skilled [illegible]. Besides the finest classes of interior woodwork the company will manufacture boilers and engines of all kinds, [illegible] and structural iron and steel products.

DOMINION TRUST AFFAIRS

Court Solicitor Talks of Thievery and Robbery—Liquidator Drayton's Report

According to a Canadian Press dispatch of Monday, a meeting of creditors of the Dominion Trust Company unanimously resolved to recommend Mr. A. C. Starrett, Vancouver manager of the General Administration and Credit Foncier, as its nominee for the liquidatorship, and by another unanimous resolution decided to be represented by independent counsel at the court proceedings yesterday, when Chief Justice Hunter was to make the final appointment. The meeting also recommended Mr. C. R. Drayton as its selection for the office of inspector on behalf of the creditors.

Thievery and Robbery.

Mr. G. R. Cowan, whom the court had appointed permanent solicitor in connection with the case, said:—"Investigation which I have made into this concern has exposed a perfect labyrinth of thievery and robbery. I cannot be persuaded that only one man was concerned in this. I want good men with me, who will do their duty. Give me time and I will bring them to book."

Mr. Cowan said that he personally regarded Mr. Starrett as an excellent man, honest and upright, and with "no strings on him."

Mortgages to New Trustees.

Over $100,000 worth of first mortgages on property in Vancouver, Victoria, Nanaimo, Calgary and Regina, belonging to the superannuation fund of the Methodist Church, which were being held in trust by the Dominion Trust Company, are to be turned over to new trustees to be appointed by the Methodist Church. An order to this effect was made by Chief Justice Hunter on the application of Mr. T. J. Baillie. A list of the mortgages, 62 in number, was furnished to the court. These mortgages had all been examined by the solicitor for the provisional liquidator and found to be in order.

Endorsed Action of Creditors.

At the meeting of contributors of the Dominion Trust Company, only four persons attended, and by a vote of three to one endorsed the action of the creditors in recommending Mr. A. C. Starrett, manager of the General Administration Society and Credit Foncier, to conduct the liquidation.

Among the contributories are a number of shareholders who owe as high as 65 per cent. on their shares. Altogether, the shareholders are liable for contributions amounting to over $180,000.

CAN INCREASE PRIMARY PRODUCTS

Canada Can Add Twenty Per Cent. to Output Next Year

Canada does not need capital to cut down standing forests in order to prepare soils fruitful in primary products, says Sir George Foster in a special interview. The soils are there ready for the plough, and labor is everywhere ready for employment; without any further extraordinary calls on capital twenty-five or more per cent. can next year be added to the primary products of the Dominion, for which call at very paying prices will undoubtedly be had. If these are raised there is no fear that banking facilities will not be forthcoming to move them to market.

Similarly, our forest, fishery and mining areas are equipped, and as the demand persists the products will find their way to the markets. There is at present more or less dislocation in these markets, but that is temporary, and already shows signs of amelioration.

Equipped with Industrial Machinery.

When we come to our industries there are also favoring indications. In the first place, Canada is extraordinarily well equipped with the machinery of industrial production already adapted or easily adaptabl to present conditions. Capital is not needed for buildings, and not to any great extent for equipment. These are in place and the labor is at hand, and the problem is rather to carry on and not in any large degree to create anew. If markets can be found, operations can proceed with ordinary banking facilities, and these, I believe, are provided for and will be had. Some industries will temporarily be slowed down, some few for a time stopped, but, on the other hand, many will be stimulated, and most will continue, with perhaps lessened hands or shortened time, and expand as new sources of outlet are found abroad and increased buying takes place at home.

Strength of the Home Market.

Nor should we lose faith in the purchasing ability of the home market. In this Canada is unique as to her position to-day. Her export of primary products of the farm, mine, fisheries and forests was last year worth nearly $400,000,000. Is there any reason for fearing that the values this year will be less? Very little, if any. Loss in some will be more than made up by the increased prices in most. The field crops last year were worth $552,000,000. They will be worth more this year. The home sales and exports this year will give a return which will be an assured basis for large purchasing power on the part of our primary producers. For next year, with increased product and increased prices, this basis will be still wider. These are farmers' years, and their prosperity determines trade.

Direct and personal examination of the situation where it develops, direct and personal representations of what manufacturers can make to suit requirements, and the price at which they can supply it, face to face with the one who wants this, is infinitely more fruitful of results than tons of correspondence. And this direct representation does not need much added capital—much banker's aid.

Take your Christmas and New Year holidays, because it is business as usual.

GRANBY SMELTING COMPANY RESUMES WORK

The plants, both at Phoenix and Grand Forks of the Granby Smelting and Refining Company, which were forced to close as a result of the disruption of the metal markets at the outbreak of the war, will resume operations almost immediately, thus relieving the unemployed problem in the Boundary district. During December the company will operate two furnaces, handling 900 tons per day, and in January four furnaces will be operated. This is practically one-half the capacity of the smelter with an output of 1,800 tons per day.

Statistics of 1914 show how things go down. More production will make the prosperity mercury go up.

BUSINESS BETTER IN ENGLAND

That business in England in many cases is better than usual is the statement of Mr. H. Clifford Wallis, a London manufacturer, visiting Canada. Not only are British firms benefiting by present conditions, but much German competition, which for years has been ruinous to manufacturers in different lines, has been eliminated.

Faith in your country is not an asset unless it is working.

THINGS ARE ON THE MEND

"Unquestionably things are on the mend. Evidences of this are becoming more apparent each day, and I look for a big revival of business in the not distant future." So said Sir William Van Horne at Baltimore, who was a guest at dinner given by President Willard, of the Baltimore and Ohio Railroad.

"Primarily, I should say this country is bound to benefit tremendously by the European war. The effects of this are already being felt in the constant demands on the agricultural and manufacturing resources of the United States. It is doubtless the appreciation of this which has aided more than any other one thing, in restoring confidence.

"This demand has just about started. It is bound to grow as the needs abroad become more urgent. Therefore, the future for business and for better times here is bright, and this outlook cannot fail to impress any business man who tries to keep in touch with current events.

"Conditions in Canada are usually somewhat similar to those in this country. Our relations are close, and the intercourse of the two are such that the influences which affect the one are also felt in some degree in the other. Canada, however, did not have the abundant grain crop that was raised in the United States this year."

The better the Canadian manufacturer makes good goods and the better the price, the more the "Made-in-Canada" buying movement will progress.

It is better to have worked at cost than never to have worked at all.

◆

ABOUT THE BRITISH WAR LOAN

The London financial correspondent of a New York city daily cables:

I hear on good authority the actual amount of public subscriptions to the war loan is about £65,000,000 ($325,000,000), or nearly one-fifth of the total.

This calculation excludes all subscriptions by banks and other financial institutions and represents the amount actually invested by private individuals.

The calculation, if accurate, may appear small, but, as one banker remarked: "There's no other European country, except France, which could raise that amount from private investors," and even France could not under present conditions.

It must be remembered investors in this country feel the serious effects of the war through the suspension of dividends on many high class foreign securities, and also the reduction and passing of dividends on industrial issues in trade adversely affected by the war.

Moreover, the war loan was issued coincident with the announcement of largely increased taxation, which did not help to loosen the purse-strings of some members.

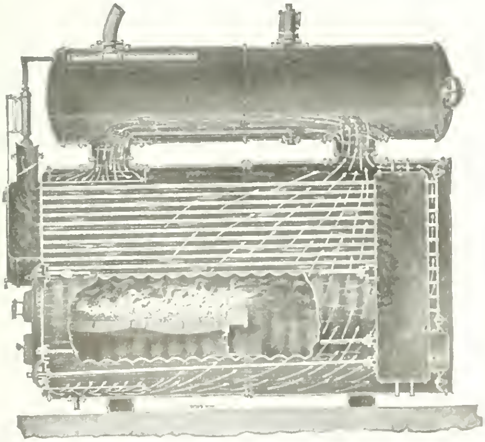
ROBB-BRADY SCOTCH BOILERS



have two very important advantages:

INTERNAL FIRING

which prevents loss of heat, air leakage and the expense of providing and repairing brick setting.

RAPID CIRCULATION

which keeps the heating surfaces clean, prevents unequal expansion and makes them quick steamers.

THE MONETARY TIMES
WEEKLY STATISTICAL RECORD

As conditions are more nearly approaching normal, and confidence is being restored in financial centres, *The Monetary Times* is able to resume the publication of its Weekly Statistical Record, with the exception of stock exchange figures (the exchanges still being closed) and the immigration statistics, which the Dominion Government is not issuing.

REDEMPTION TREASURY NOTES

The Bank of England on Wednesday earmarked £1,000,000 for the redemption of treasury notes.

The American Bank Note Company has issued its attractive and useful calendar for 1915. The company has its Canadian headquarters at Ottawa, with branches at Halifax, Montreal, Toronto and Winnipeg.

Holding that the company has no standing in court because of questionable business methods, Federal Judge George M. Bourquin has dismissed the suit of the National Mercantile Company of Vancouver, B.C., against State Auditor William Keating, says a Butte, Montana, dispatch. The suit sought to enjoin the enforcement of Montana's "Blue Sky Law." In dismissing the suit, Judge Bourquin held that the documents of the company submitted in evidence during the trial satisfy the court that "they embody a scheme tending to defraud." In dismissing the case the court did not pass upon the constitutionality of the blue sky law. This company has offices at Vancouver.

IT'S AN ILL WIND, ETC.

Yes, the importance and necessity of Life Insurance must be considered even more than usual, in this period of trial and strife. Field men should set a record for new business, for the crop is there, and it is yours to harvest. First, be connected with a reliable company. Good territory is open with the

WHO IS BUYING CANADA'S NICKEL?

It is alleged in the London press that Canada is ma[illegible] [illegible] helping Germany by allowing the United States to import her nickel, which thence goes to Germany [illegible] ns, says "Windermere" in a cable from London.

The Globe asks why the Canadian Government [illegible] prohibition of export to all countries outside the British Empire. Then the supply of nickel for the enemy [illegible] the source, and all questions of the right of [illegible] cargo would be obviated.

"[illegible] that we should be creating our own trouble [illegible] in the enemy's drawing supplies [illegible] empire."

Doing Business as Usual—Always

THEY were all there, a quorum and more. Some [illegible] because they had never missed an annual meeting for fifty years, others, because they had never attended one in ten. Some liked the social end of the directorate, and one or two felt that plug hats and frock coats matched the board room furniture particularly well. Some had come from afar, feeling the strange duty of a director who directs. Others had turned up, keen and energetic to direct the directors who never did any of the directing themselves. Twelve men, more or less good and true, fitted themselves as best they could into revolving chairs. These chairs were built on a plan which secured marginal inch fractions for 300 pounds, and gave more than elbow room for 110. They were standard chairs for standard sizes, a term which covers a multitude of manufacturing misfits.

This concern had run for years. Even the bond house junior had forgotten how many. There had always been a quorum, except once, when a board of trade excursion had been too strong a counter attraction. This day, however, December 1st, 1914, every member of the board had managed to get to the inkwells, sunk cunningly in the table tops, and to the penholders which were brought up to scratch at the last minute, short in number and long in crossed points. Only special business, of course, could bring forth the halt and the lame from Victoria and Charlottetown and the cities between. The proposal which had been framed by one of the younger executive officers was a simple one, but new. Like most of these new and perfectly simple ideas in modern finance, the older men had frowned at it, played their thoughtful wrinkles and toyed with it. They regarded it much as a long whiskered, deliberate mouse, once in trap difficulties, regards a piece of succulent cheese on the tongue of a "break-back." When we say the older men, we should recall that there were only two such on the board. This particular company had thrived on the help of the new generation every few years. However, they had all come to hear this proposal discussed. The young fellow who sprung it was keen, but pessimistic, [illegible] with needless worries about what the war might have done to his business, and he had a Germanic view of the scrap of paper.

Here was the trouble which the high, low and no brows had to face—Balance sheet on December 31st, 1913, excellent, and goodwill valued highly; prospects for season's trade, December, 1914, good. Along came the war, down went the mercury of human confidence, and as the office boy said, things were looking mighty blue. When the senior office boy ceases to test the accuracy of the yellow rubber as a weapon, the new junior acting as unconscious target, when the senior office boy gets down on time and is not diverted from the straight path of duty by a dog fight, arrest, or an auto accident, when the senior office boy ceases to confide to the maidenly stenographer his latest amour, when all this occurs, and the senior office boy competes with the pen wiper in a contest of silence, one of two things has happened—his trade value for human purposes has broken or something is wrong with the boss. In this case, the [illegible] still loved the boy. It was the boss who had forgotten him during a Berlin nightmare on a [illegible]. Business was bad one [illegible] and good the next, according to the authority the boss met on the street. He fretted and fumed about the inevitable, and that causes more grey hairs in a month than hard work does in a lifetime. Business returns dropped and so did the boss's hands to his side and confidence to boot. It all meant that the bond interest would be hard to pay, thought the boss. And the office boy quickly got what he termed a "hunch" that a chair cushion would mark the place where a Christmas box had in previous years covered the design.

But the young executive, who was the right hand of the chief, and had both [illegible] ears, to say nothing of the nerve of others too numerous to mention, this young executive, playing chess one evening, in a little practice game made a king look like a pawn, which gave him an idea. The company's bonds could be made to look like thirty cents, bondholders' disgust following, reorganization [illegible] and a little clotted cream of the financial variety for those who conceived the idea, executing it and other things. To make a Christmas story short, a resolution, well besprinkled with "Whereases" and "Now Therefore," [illegible] placed before the directors. It proposed the postponement of the bond interest, [illegible], if need be, so long as the bondholders had not [illegible] with the company prior to the [illegible] and hereinafter described due date, or words to that effect.

To make a Christmas story finish before New Year, [illegible], the office boy, whose usually-dull head took on the aural assets of stone [illegible] "the directors [illegible] the resolution." They refused to punch holes in [illegible] bond or to [illegible] look like a pack of old playing cards. It was a hot meeting, but the proposal never got to the [illegible] and despite the cheap estimate of their opinion [illegible]. This [illegible] the company's president who refused to cease doing business as usual [illegible] pay bond interest [illegible] crat had developed intense swelled head in Europe.

To make the story fit into this page it should [illegible] very well known. Claus is the president's name. Now [illegible] finance [illegible] doing business as usual, despite the war. He will be doing it, too, when [illegible] grandson in the eye, telling him what model [illegible] they grew in [illegible] fourteen [illegible] with a kindly slap on the back and "Merry Christmas, [illegible] lad!"

SHIPPING GRAIN THROUGH PANAMA CANAL

Pacific Ports Are Receiving More Attention as Result of New Elevator

(Staff Correspondence.)

Vancouver, December 21st.

With the letting of the contract by the Dominion government or the construction of a terminal elevator to handle grain for export at this port, the Vancouver board of trade grain committee has started to make further enquiry into the possibilities of the Pacific route for grain, and Mr. J. A. Hall, president of the Vancouver Grain and Milling Company, and the secretary of the board, will at once take up the matter of rates with the Canadian Pacific Railway. The board has already prepared estimates to the effect that grain should be moved from this coast to Europe at not more than fifteen cents per hundred pounds or nine cents per bushel, as compared with the present rate of twenty-three cents, or fourteen cents per bushel, via the eastern route from points in Saskatchewan and Alberta west of Moose Jaw. The present cost of transporting wheat from the same districts via Fort William and the Atlantic runs on an average, via lake and rail route, during the summer, at about twenty-five or twenty-six cents per bushel, or on rail during the winter at thirty-six and thirty-seven cents per bushel.

When this topic was discussed at the time the Panama Canal route was under construction, the point was raised that the grain could not be shipped through the tropics without danger of heating. This was contradicted by the figures of grain shipments from Portland, Tacoma and Seattle, which have been made constantly for some years past. One of the largest totals of cargo carried through the Canal, for the two months and a half since it was opened, has been that of grain. Once production is large enough, the export business will develop gradually and naturally.

Foodstuffs are the great necessity. If the period of the European conflict is prolonged it is believed that the back-to-the-land movement will be given great impetus, and that the western part of Canada will have many new settlers. With several railway companies needing traffic, they will also seek to bring people into the country. Every indication is that settlement will be progressive.

To Grow Tobacco.

Products of the soil are constructive wealth, and that more attention is being given to profitable lines shows the great tendency of modern day to more greatly utilize the land. Various varieties of production are being tried out in British Columbia. One of these is the growing of tobacco, and a proposal has been made to farmers in the Okanagan district to revive the growing of this article. It has been demonstrated that the tobacco leaf produced in this province is of good quality, and since this is the case Messrs. Youngheart and Company, cigar manufacturers, of Montreal, have offered to help our growers in the Okanagan. Their representative, Mr. Kleine, proposed at a recent public meeting in Kelowna that farmers should put in, say, 200 acres, which they would harvest and ship the product to Montreal. His firm would grade and cure it and sell it to best advantage, the profits being divided between the growers and themselves.

◆

RAILROAD EARNINGS

The following are the railroad earnings for the first two weeks of December:—

Canadian Pacific Railway.

	1914	1913.	Decrease.
December 7	$1,766,000	$[illegible]	$[illegible]
December 14	1,707,000	2,681,000	[illegible]

Grand Trunk Railway.

	1914.	1913.	Decrease.
December 7	$ 869,052	$1,010,199	$ 150,147
December 14	870,962	1,020,210	[illegible]

Canadian Northern Railway.

December 7	$ 304,200	$ 583,500	$ [illegible]
December 14	503,200	[illegible]	[illegible]

LOANS TO CANADA

United States Opinion Seems Favorable — President Wilson's Attitude

A New York message in the Boston News Bureau on prospective borrowing of $100,000,000 by Canada, says:—

"Ordinarily, the Dominion would have no trouble in securing the money in London, and may have no great difficulty as soon as the British war loan is absorbed. The Dominion has responded loyally, enthusiastically even, to the call for troops; England, with the big loan of the dominant Government out of the way, would undoubtedly assist the colony gladly. But bankers and other thoughtful students of trade in this country will be disappointed if Canada is obliged to resort to the London market. They would much prefer to have the Canadian loans floated here.

Objection from Washington.

"If there were no objection from Washington, a Canadian Goverament offering would be assured of a hearty reception in this city. Sentiment would, of course, play its part, pro-Canadian feeling being even more pronounced than is the pro-British. But, sentiment apart, offering a Canadian loan here would be received heartily for pure business and commercial reasons, as emphasizing cordial relations between this country and one of its best customers, as tending to even more intimate commercial association and as supplying that customer with funds usable for its own business and for purchases in the States. The new relations established with South American countries are experimental; there is nothing chimerical or risky in promoting trade with the big British possession in North America.

Matter Could be Arranged.

"Bankers who have considered the proposition are inclined to believe that Washington would object to flotation of a Canadian loan here. The matter may be arranged for all that. In various ways credits to order of the Dominion might be established, and it would be easier still, without any subterfuge whatever, to arrange through Dominion banks, which would have all the effect of assistance in Canadian Government financing. Undoubtedly, a transaction of entire neutrality can be carried through if the Dominion Government or Dominion bankers so desire."

It will be recalled that in September, United States secretary of state Bryan informed *The Monetary Times* that President Wilson's attitude regarding loans by United States bankers to belligerents included Canada. This was generally understood to apply to the federal and provincial governments of the Dominion, but not otherwise. Canadian municipal and corporation loans have been floated in the United States since President Wilson's attitude was known.

The individual counts much in the national make-up. The individual must have his share of confidence.

What would the law authorities say if they woke up on December 25th, and found H. Pollman Evans, J. W. Moyes and others in their stockings?

PAY PART OF WAR DEBTS NOW

All Cost Must Not Be Placed on Future Generations—Some Suggestions for Taxes

Editor, *The Monetary Times.*

Sir,—In England, the taxpayer is beginning to shoulder at once the burden of the cost of the war, and hand it on, eased to some extent, to the generations that are to come. But the taxpayer has already been footing for many years the cost of maintaining the command of the seas. In addition to this heavy bill the taxpayer is now called upon to pay the new taxes either directly in taxation or indirectly in loss of business. The new taxes—namely, doubling the income tax, adding threepence to the tea tax, putting a halfpenny on the half-pint of beer, and suspending all repayment of debt into the sinking fund will, it is estimated, amount to $1,758,500,000, which sum shows an increase of $58,500,000 over the estimated cost of the war for one year. This is a fair margin of security.

There are, in times of war, certain industries that flourish, but taking the population as a whole, a period of war is not only one of great difficulty, but also of grave anxiety. I refer chiefly to those who are paid wages, to storekeepers and others in similar grades of life. It has been argued that Mr. Lloyd-George's scheme of taxation looks simple on paper, but when the situation as a whole is examined, the simplicity disappears.

A government must take measures to protect the populace—when raising money out of them—against a financial strain greater than they can bear. This must be their first thought. It is seen that the cost of this war is going to be met—to some extent—by the present generation, and that the future generations will not have to foot the whole bill.

Canada's Expenses More Easily Met.

How will Canada meet her war expenses? There are many industries in Canada to-day that are now working overtime and which were idle before the war, and though—naturally—there are some trades that have been hit hard there are more that think they have. Just before the outbreak of war Canada's general financial and industrial position was not so powerful as it is to-day. The war has stopped the get-rich-quick fever; and those who think they are losing money, because there is no market for their umbrageous projects, are in reality saving money. On the other hand there are undoubtedly numerous sound ventures that are at a standstill—but then only temporarily. This is a blessing in disguise, for these same undertakings will demand greater and quicker attention after the war [illegible] in the making money quick devices will not then look so attractive.

Canada's war expenses can be more easily met—that is to say, met with less hardship to the population than in England. There are not many in Canada who cannot afford to pay their quota towards the cost of crushing Germany, and these few can be left out without crippling the [illegible] at all.

Methods that Might Help.

It is the custom in Canada to write cheques for a trifling sum; it would be impossible to estimate the number of cheques that are issued for microscopic amounts. A government stamp affixed to every cheque at a cost of [illegible] cent would do harm neither to the [illegible] individual nor the indigent.

Registered envelopes of £2 or over in England must be signed over a penny stamp; a somewhat similar plan followed in Canada could be borne with impunity. No one [illegible] the slightest doubt but that whatever course is adopted by the present government to help pay the expenses, that the course will be the most adaptable to the Dominion, but to place Canada in a strong position financially and industrially, [illegible] undue delay must hinder for a time Canada's progress. There have been many theories put forward as to the duration of the war, but whether it only lasts six months or for years or more, it will come easier to prepare for emergency expenses now than when the war is over. Subscription funds of every description have been generously supported in Canada—and rightly too, and this without impairing the capital of any individual subscriber. Still the country as a whole will have other expenses to meet, and in order to strengthen still more the ties of friendship, Canada will be in so far [illegible] this world and to the Dominion if she were in a position to show, on the [illegible] that her war expenses had been taken [illegible], being [illegible] "Emergency."

Yours, etc.,

C. A. HASTINGS.

NOVEMBER TRADE FIGURES

An increase in the total trade of Canada for November over the corresponding period of last year is [illegible] in the trade statement just issued by Hon. J. D. Reid, minister of customs, but the increase was due to imported bullion. The total trade was $126,455,[illegible], an increase of about [illegible] millions over November, [illegible]. Exclusive of the [illegible] of coin and bullion [illegible] exports [illegible] due to a falling off in the export of agricultural products.

Total imports for November, including coin and bullion, were $[illegible], as compared with $[illegible], and the total for the eight months ending November was $427,611,144, as compared with $446,1[illegible]. Imports of coin and bullion in November were $4[illegible], as compared with $1,[illegible] in November, 1913, and $[illegible] for eight months against $5,422,548 in the same period 1913.

Exports in November, 1914, were $[illegible], as compared with $[illegible]. Exports of manufactures have increased, a healthy sign, and were $[illegible] for the month, compared with $4,[illegible] in 1913. Exports of animals and their produce were $[illegible], compared with $[illegible]. Exports of agricultural products, however, dropped from $33,417,055 in November, 1913, to $18,[illegible] this year.

The bullion imports in November consisted almost entirely of shipments from New York to Ottawa for the Bank of England.

BIG STEEL MERGER "VISIONARY"

Two Leading Steel Men Think So—London Yarn of Amalgamation Receives Distinct Quietus Here

Reports reached *The Monetary Times* from London, England, just as this issue was going to press, that progress was being made in regard to the International Steel Corporation, Limited, which was chartered some time ago to develop iron ore deposits near Hobon, Ontario. Incidentally, the promoters of the new company were said to have approached certain steel companies in Canada and the United States with a view to merging these companies with the International, but they did not meet with any encouragement from the Canadian steel companies.

The charter of the corporation, which was secured by Mr. Arthur Bicknell for interests understood to be associated with Col. Sir Henry Pellatt, Mr. R. A. Lyon, and Mr. Frank Plummer, of Toronto, and Messrs. Tevis and John A. Shillitoe, of New York City, calls for a capitalization of only $100,000.

The ore properties are said to have been reported upon by Mr. Lucius Boyd, mining engineer.

The Monetary Times endeavored to confirm this information from those prominently identified with it, while the paper was going to press but many of those interested could not be reached. Mr. Frank Plummer has been in London, presumably in connection with the enterprise, and sailed for Canada on Wednesday. Col. Sir Henry Pellatt was in Boston. Messrs. Tevis and Shillitoe were also said to be in London. Mr. R. A. Lyon had left for Sault Ste. Marie, and Mr. Lucius Boyd, the mining engineer, could not be reached.

Mr. Robert Hobson, of the Steel Company of Canada, arrived home from London last Sunday, but informed *The Monetary Times* that he had been in England purely in connection with his own company's business. He said that an amalgamation proposal had been broached to his company about two years ago, but strongly stated his opinion that the merger scheme could not possibly be consummated.

Mr. J. H. Plummer, president of the Dominion Steel Corporation, when interviewed by *The Monetary Times* concerning this matter, stated that Mr. Shillitoe had approached him with an amalgamation scheme, but that not the slightest consideration had been given the merger proposals, which Mr. Plummer characterized as "visionary." Mr. Plummer said that he had been informed that the International Steel Company, Limited, controls some very good iron ore deposits, however, and that the company would likely begin operations to develop those properties, but that only a comparatively moderate capital would be employed, reaching at no time, in all probability, more than three or four million dollars.

A Dominion government commission was appointed some weeks ago to investigate matters in connection with Canada's iron ore deposits and with the progress of the industries associated with them.

◆

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Guelph, Ont.—A by-law to raise $125,000 for school purposes is to be voted on at the municipal elections.

Tara, Ont.—The ratepayers are to vote on a by-law to spend $2,500 on a fire engine and empower the council to issue 15 year debentures.

Salmon Arm, B.C.—The city has been authorized to borrow $2,500 for fire protection purposes. The debentures to be issued are 6 per cent. 10-years.

South Vancouver, B.C.—Local improvement debentures, amounting to $70,054 5 per cent. 20 years, have been approved by the Inspector of municipalities.

Vancouver, B.C.—No treasury notes have been issued by the city of Vancouver this year. The last issue was made in 191[illegible] and these have all been paid off.

Summerland District, B.C.—An irrigation loan of $10,[illegible] bearing 8 per cent. and repayable in five annual instalments, has received the sanction of the provincial municipal inspector.

North Vancouver, B.C.—The city of North Vancouver has not issued any treasury notes or made any arrangements for temporary financing beyond the usual one of borrowing against the taxes for the current year.

Mount Forest, Ont.—The council will submit to the ratepayers a by-law authorizing expenditure of $12,000 to adapt the present town electric light system to hydro current and for installation of new electric pumps.

Fort William, Ont.—The city's financing is done by loans from the bank for maintenance, as against taxes and for local improvement work debentures are issued and the liability discharged. The indebtedness to the bank at this date is $540,000 for local improvement (debentures for which are being prepared) and $65,000 for waterworks extensions.

Port Arthur, Ont.—It has not been necessary for Port Arthur to issue any treasury notes this year. The city's only indebtedness is $70,000 to the Bank of Montreal on school building account, and before the end of the year this will probably be retired. The finances of the city are in good shape, and Mr. W. J. Gurney, city treasurer, anticipates a surplus on revenue account for the year 1914.

Montreal, Que.—The board of control had been granted all the authorization by the city council for raising a $6,913,000 temporary loan. All motions restricting the board to a fixed or minimum price failed and the report went through as presented, by which the controllers are authorized to get the highest price obtainable. The loan will run for three years, the city reserving the right to cancel it on 60 days' notice.

Niagara Falls, Ont.—By-laws were read a third time at the council meeting, amending by-laws numbers 636 and 642, re debentures for $14,500 in one and $12,000 in other, authorized at 5 per cent. interest. The amending by-laws changed the wording, so as to provide for the issue of coupon debentures, the words in the original by-laws, "An equal annual payment of principal and interest," to be changed to "all payment of principal with coupons attached for interest."

Montreal, Que.—The Bank of Montreal has been authorized to receive, on behalf of the city of Montreal, sealed tenders for the purchase of $6,900,000 three-year gold bonds, dated December 1, 1914, due December 1, 1917, bearing interest at the rate of 5 per cent. per annum, payable half-yearly. Principal and interest payable in gold at the city treasurer's office, Montreal, or at the agency of the Bank of Montreal, 64 Wall Street, New York, at the option of the holder. The bonds are in the denomination of $1,000 each, with interest coupons attached.

ABOUT THE NATIONAL POSITION

Time can be spent profitably just now in learning and re-learning a few economic facts, especially as they relate to our national position. A few hours so occupied give better results than eternal grumbling at the prevailing results of past errors. We look to the statesmen at Ottawa for good advice and assistance in these days, not only regarding the national position in the present struggle of the British Empire, but also of the national position in the money markets and the economic field generally. About these matters, we as Canadian citizens cannot be told too much by our leaders. But they are not, for some reason or other, completely filling the need of the people for such mental food. With the exception of Sir George Foster, Hon. W. T. White, and to a lesser extent, Sir Robert Borden, who have spoken several times to large audiences, we are being left to flounder along as best we can.

The greatest credit should go to Hon. W. T. White, minister of finance, who spoke at Montreal the other day on what some will call "old truths." It is more knowledge of these old truths, however, that is needed, and a more pronounced application of that knowledge. Mr. White should be giving his address and similar ones throughout the country. So should other cabinet ministers. Several of the statesmen at Ottawa seem to have been lost to the public eye in the mysterious atmosphere created by the handing out of war contracts. No information is being vouchsafed the public regarding these contracts, their value and the firms getting them, so the preparation of those data is not taking much of their time. Sir Robert Borden should depute one or two of his colleagues to break what has become almost the silence of leadership, as he, Sir George Foster and Mr. White have already done to a limited extent.

Mr. White's theme at Montreal might well be taken as the text. "If a nation borrows, it must import," and "Next year our agricultural production will be immensely increased. Our exports will thus be greatly swelled." These were two of the facts dwelt upon by the minister of finance. Speaking of the adverse balance of trade, he pointed out that in the fiscal year, 1912, it was against Canada to the extent of over $225,000,000; in 1913 to $300,000,000, and in 1914 to $180,000,000. How did we pay it? We did not export gold and yet we managed to pay these large balances representing the difference between what we sold and what we bought? We also managed to pay interest estimated at $135,000,000 a year upon Canada's securities held abroad. The answer is that we paid interest and balance of trade by borrowing. Canada for years past has been borrowing at the rate of two or three hundred million dollars a year, principally in Great Britain. By exchange operations through New York this borrowed money paid the balance of trade which we owe United States. The chain was this: United States owed Britain, we owed United States, we borrowed from Britain. We paid United States by drafts on London. Those drafts representing our borrowings were paid pro tanto the balance owed by United States. So long as our borrowings were for productive undertakings the balance of trade against us was not cause for concern. If the borrowings had been for non-productive consumption there would have been cause for concern. In so far as the enterprises into which these borrowings have gone are productive, the result of the borrowing is national gain. The only question that arises is that of payment of interest which Canada can without doubt meet.

But, as Mr. White explained, if a nation borrows it must import. We can either say that we borrow by way of import or that our importations represent in part at least our borrowings. Otherwise we would import our borrowings in gold, which no lending nation could permit us to do. Canada has borrowed nearly three thousand million dollars in Great Britain, four times the amount of gold in the United Kingdom. The conclusion clearly is that to obtain our borrowings we must import commodities.

Mr. White mentioned a few of the elements which entered into the solution of Canada's problem of withstanding the shock of the sudden cessation of the money flow (due to the war outbreak) which has enabled us in the past to take care of our adverse trade balance. Firstly, the instinctive caution of the Canadian people at once counselled prudence in commitments. There ensued a contraction in finance and trade to meet the altered conditions. The war created a higher range of prices for our farm products. The people under the influence of thrift consumed less, in other words bought less both at home and from abroad. Consuming less we have increased our exports and diminished our imports. The Dominion government is the greatest sufferer by this because its revenues, based upon imports, have experienced heavy decline. But the result is that adverse balance of trade is diminishing every day.

In April last our exports were [illegible] per cent. of our total trade; in May 50 per cent.; in July 62 per cent.; in October [illegible] per cent. Our exports for October were fifty-one million dollars and our imports forty-[illegible] million dollars. We are [illegible] our adverse trade balance. From April 1st, the beginning of our fiscal year, to October 31st we had an excess of imports over exports of $[illegible], while for the same period of last year the excess was $[illegible].

Another factor which will materially help us is our borrowing in London this year. "We are doing business similar to war," said Mr. White. In his opinion we shall borrow probably $[illegible] a year, the greater part of which will be spent here. That borrowing is gold

—the equivalent of exchange—so far as it is spent in Canada. Then there are the orders placed by British, French and Russian governments. The funds for those orders are also gold. Then there will undoubtedly be borrowing abroad on a reduced scale as money markets become easier as is now their tendency. London may within a few months resume lending. No doubt the United States will purchase some of our high-class securities because we cannot buy unless we borrow or sell and we buy more from the United States than from any other country. Next year our agricultural production will be immensely increased and our exports will thus be greatly swelled.

Mr. White concluded his Montreal speech by saying: "For Canada at this juncture the watchword of the hour should be production, production and again production." That injunction Canada must put into practice.

Christmas! Make it merry for the other man, too.

TORONTO'S NEW MAYOR

If the citizens of Toronto choose their mayor for the coming year solely upon the merits of the candidate, Mr. J. O. McCarthy will be mayor of Toronto during 1915. Mr. McCarthy is a keen, energetic, business-like man. He has served well as controller and he is the type of man which a city such as Toronto should have for mayor.

◆

Make it Christmas as usual.

* * * *

Some are born mayors, some achieve mayoralties, and others have them thrust upon them.

* * * *

Talking of the future, the Hudson's Bay Railway, an all-Manitoba line, will be completed to Port Nelson in 1916.

BEGINNINGS OF CANADA LIFE

The history of the Canada Life Assurance Company, the oldest Canadian life office by a good many years, extends back to the first half of the nineteenth century. An interesting review of this history, together with the story of the men who have steered the company to its splendid position to-day, is given in the current issue of Life Echoes, the bright little organ of the Canada Life Assurance Company.

◆

GRAND TRUNK ISSUE

The Grand Trunk Railway's new issue of £1,000,000 in five and a half per cent. three-year notes is put forward in London under burdensome conditions. The company is offering one per cent. commission to underwriters, and, apart from general expenses, the issue will cost them seven per cent.

The company, during the summer, sold £2,000,000 one-year bills on a 4⅜ per cent. basis, which, like the latest offer, were secured by debenture stock.

◆

WHERE WAR CONTRACTS ARE HANDLED

All questions relating to the purchase and export of food supplies, munitions of war, and field equipment, for the French, Belgian, Russian, and Serbian Governments are being dealt with by the International Commission for the Purchase of Supplies (Commission Internationale de Ravitaillement). The executive office of this Commission, and the offices of the French, Belgian, and Serbian delegates thereon, are at India House, Kingsway, London, W.C., England, while the offices of the Russian delegates are temporarily at 192 Cromwell Road, London, S.W., England.

Application for permission to export goods, the exportation of which from the United Kingdom is prohibited, should, if such goods are required by the allied governments or their accredited agents, be addressed in writing to the Commission. The Commission will only consider such applications if they are accompanied by documentary evidence as to their official origin. Applications which are unsupported by such evidence, or which are ordered by private firms for purely industrial purposes, must be made in the ordinary manner to the commissioners of customs and excise, Lower Thames Street, London, E.C., England.

Mr. Frederick Stobart, in Canada, is purchasing supplies for the Imperial government. His temporary headquarters are at the Windsor Hotel, Montreal.

The Canadian government's war contracts are being dealt with by a sub-committee of the Dominion cabinet at Ottawa.

COMPANIES INCREASING CAPITAL

The following company in Ontario has increased its capital stock: The Little Sturgeon River Timber Slide Company, Limited, from $15,000 to $18,000.

The following company in Manitoba has increased its capital stock: The Hackney Tile and Supply Company, Limited, from $20,000 to $60,000.

The following company in Quebec has increased its capital stock: Hotel Jockey Club, Limited, from $49, 00 to $299,000.

◆

BANK BRANCHES OPENED AND CLOSED

During November five branches of Canadian chartered banks were opened and sixteen closed. Since January 1st, 1914, there have been 228 branches opened and 97 closed. Houston's Bank Directory gives the following particulars for November:—

Branches Opened—5.

Cap Sante, Que.	La Banque Nationale.
Glen Robertson, Ont.	Bank of Ottawa.
Iroquois Falls, Ont.	Bank of Ottawa.
Milner, B.C.	Bank of Vancouver.
Ste. Camille de Bellechasse, Que.	Banque d'Hochelaga.

Branches Closed—16.

NEW INCORPORATIONS

Eighteen New Companies in British Columbia—Million-Dollar Security Company in Hamilton

Canada's new companies incorporated this week number 49. The head offices of these companies are located in five provinces. The total capitalization amounts to $9,738,000. The largest companies are:—

The North Rupert Investment Company, Limited, Vancouver, B.C.	$3,888,000
The Britannia Securities Corporation, Limited, Hamilton	1,000,000
Enterprise, Limited, Edmonton, Alta.	1,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of Companies.	Capitalization.
Ontario	10	$1,880,000
Quebec	8	1,160,000
Manitoba	5	55,000
British Columbia	18	4,653,000
Alberta	8	1,090,000
	49	$9,738,000

The following is a list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Prince Rupert, B.C.—Jabour Bros., Limited, $25,000.

Usk, B.C.—The Usk Lumber Company, Limited, $25,000.

Bittern Lake, Alta.—The 55 Ranch Company, Limited, $10,000.

Enderby, B.C.—Alfalfa Products Company of Canada, Limited, $10,000.

New Westminster, B.C.—Ridley Kennedy, Limited, $10,000.

Chauvin, Alta.—The Rural Farmers' Co-operative Society, $10,000.

Sudbury, Ont.—The Walton Drug Company, Limited, $40,000. R. H. Walton, R. H. Arthur, W. H. Howey.

Watson Jack and Company, Limited, $200,000. W. Jack, W. J. Shaughnessy, C. G. Heward. Manning and Company, Limited, $100,000. T. S. Owens, E. S. McDougall, R. F. Stockwell.

◆

ROYAL BANK'S REPORT

The Royal Bank of Canada finished its forty-fifth fiscal year, ended November 30th, 1914, with a strong position, a safe outlook, and substantial profits. The year's operations yielded net profits of $1,886,142, which, with the balance previously brought forward, made a total of $1,015,119, which was distributed as follows: Dividends at 12 per cent. per annum, $1,387,200; transferred to officers' pension fund, $100,000; written off bank premises account, $250,000; contribution to patriotic funds, $50,000, and depreciation in investments, $500,000. This left a balance of profit and loss to be carried forward amounting to $614,062.25. The profits were equivalent to 16.30 per cent. on the paid-up capital. In view of the favorable character of the bank's investments, the amount of $500,000 allowed for depreciation in investments should prove more than ample.

The Royal Bank is strong again in liquid assets, the ratio being to 46.16 per cent. of liabilities to the public. Including the cash on hand, the liquid assets amount to $71,244,677. The principal accounts under this head include notes of other banks, $2,525,205; cheques on other banks, $5,752,485; balances due by banks and banking correspondents elsewhere than in Canada, $3,144,502; Dominion and Provincial Government securities not exceeding market value, $1,158,568; Canadian municipal securities and British, foreign and colonial public securities, other than Canadian, $2,185,062; railway and other bonds, debentures and stocks not exceeding market value, $13,557,741; call loans in Canada, $8,574,058; call and short loans elsewhere than in Canada, $6,080,847.

Considering the prevailing conditions, the bank's current loans show only slight contraction. They amounted on November 30th to $4,585,072, as compared with $86,080,300 at the end of the previous fiscal year. Other current loans and discounts elsewhere than in Canada totalled $15,002,488, as compared with $15,551,504.

Deposits accounts were well maintained. Deposits not bearing interest at the end of the year totalled $31,224,129, as compared with $36,276,871 at the end of the previous year, while deposits bearing interest reached $104,827,078, as compared with $101,000,700. The total deposits aggregated $136,051,208, as against $138,077,622, a decrease of approximately $[illegible]. During the year, however, the bank repaid the deposit of the Alberta and Great Waterways Company, of Alberta, amounting to $7,000,000, and allowing for this, the ordinary deposits during the past year would have shown an increase of $5,000,000.

◆

Several applications have come before the Saskatchewan local government board under the subdivision act, principally for revision of assessment of subdivisions in rural municipalities. Several applications for the cancellation of subdivision plans are also pending.

◆

BANK OF COMMERCE STATEMENT

A very important unit in Canada's financial fabric is the Canadian Bank of Commerce, and in a worthy statement, found on another page, this is strikingly shown.

The liquid assets of the bank include current coin amounting to $16,923,230 and Dominion notes, $13,413,985. Current loans are shown as totalling $132,168,482 in Canada and $10,419,594 abroad.

The Bank of Commerce has practically $15,000,000 of its notes in circulation and deposits total $181,508,809.

◆

CHANGES IN ONTARIO'S CABINET

The Hon. J. J. Foy, attorney-general of Ontario, has retired and becomes a minister without portfolio, to be succeeded by the Hon. I. B. Lucas, formerly provincial treasurer. Two new ministers have been taken into the cabinet—namely, Messrs. T. W. McGarry, who becomes provincial treasurer, and G. Howard Ferguson, who becomes the new minister of lands, forests and mines. Hon. W. J. Hanna does not make any change in his position. The complete cabinet of Hon. W. H. Hearst, as officially announced this week is as follows:

W. H. Hearst	Prime Minister and President of the Executive Council
R. A. Pyne	Minister of Education
W. J. Hanna	Provincial Secretary
J. S. Duff	Minister of Agriculture
I. B. Lucas	Attorney-General
F. G. Macdiarmid	Minister of Public Works
T. W. McGarry	Provincial Treasurer
G. H. Ferguson	Minister of Lands, Forests and Mines
J. J. Foy	Minister without portfolio
Dr. R. F. Preston	Minister without portfolio

Dr. David Jamieson, member for South Grey, will be Speaker of the Legislative Assembly.

◆

TORONTO INSURANCE INSTITUTE

Members of the Toronto Insurance Institute were favored with a modern innovation to these meetings, when Mr. Grove Smith, B.A., B.Sc., of Canadian Fire Underwriters' Association, in a comprehensive lecture, "Only a scrap of paper," told of evolution of the manufacture of paper. From the simple operations of the Egyptian, who utilized the papyrus plant, to the complex processes of a modern Canadian mill using wood pulp, was explained by Mr. Smith, and illustrated by a moving picture film showing the actual processes involved.

◆

The rumor that Hon. Sam Hughes found a muffler in his Christmas stocking may, of course, be true.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Vancouver, B.C.—During November the fire department responded to 52 alarms as follows:—False alarms 7, fires where damage occurred 17, fires where no damage occurred 8, chimney fires 17, fires outside city limits 2, and smoke scares 1. The total damage for the month was $26,675, the insurance loss was $25,215, leaving the property loss above insurance $1,460. The total value of property involved was $880,550, according to Mr. N. Lee's, secretary of fire department, report. Hose laid at fires 15,700 feet and 1,325 gallons of chemical was used. A complete list of alarms where damage occurred follows:—

November 2—Telephone alarm, 2386 Third Avenue W., owned by Mrs. L. Mallory and occupied by J. A. Johnson as a dwelling. Fire in wall in reading room in basement, caused by defective wiring. Damage, $108, covered by insurance.

November 4—Telephone alarm, 1104 Fifteenth Avenue W., owned and occupied by W. C. Shelly as a dwelling. Fire had started in base of a defective chimney and ran up the outside wall. Damage, $75, covered by insurance.

November 5—Alarm from Box 21. Fire at the Kelly, Douglas and Company, Limited, wholesale warehouse at 367 Water Street. The blaze was caused by an overheated gas stove on the sixth floor which had been left burning, burning its way through the floor and setting fire to the goods on the floor below. Water had been turned on the fire when the department arrived and considerable damage was done to the stock on the floors below. Damage, $10,085, covered by insurance; telephone alarm, 579 Howe Street, owned by Mr. Kirkwood and occupied by Miss A. Hayes. Fire in front bedroom from some unknown cause, the bedding and mattress being destroyed. Damage, $56, covered by insurance.

November 6—Telephone alarm, 1140 Pacific Street, owned by Richard Petler and occupied by W. R. Melville as a dwelling. Fire in rear wall caused by hot ashes being left in wooden pail on porch. Damage, $75, covered by insurance; alarm from Box 833. Fire in house at 525 Twenty-second Avenue E., owned by S. Goostrey and occupied by R. Baxter. The blaze was evidently caused by an overheated stove which had been placed too close to wall, both building and contents being almost a total loss. Damage, $1,375, covered by insurance; telephone alarm, 743 Broadway E., a three-story frame apartment house, owned by G. Hunter. Fire in mattress in Suite 3, occupied by Mrs. Laird, apparently caused by someone smoking in bed. Damage, $10.

November 8—Telephone alarm, 115 Cordova Street W., a three-story brick building, owned by C. S. Douglas and G. Middleton and occupied as a rooming house, pool room, restaurant and barber shop. A large portion of the furniture had been stored in two rooms on the 2nd and 3rd floors, and it was here apparently that the fire started. The place was well ablaze when the apparatus arrived and considerable damage was done to both building and contents. Cause of fire unknown. Damage, about $3,600, partly covered by insurance.

November 12—Alarm from Box 1323. Small fire in the boiler room at the Patterson Manufacturing Company's plant at Tenth Avenue and Arbutus Street, caused by a leaking tar valve over the burner, slight damage resulting to the building. Damage, $10, covered by insurance.

November 13—Telephone alarm, 732-4 Drake Street, owned by Lieutenant Kirkpatrick and occupied by Mr. Schumacher and Mrs. Rowlands. Small fire in partition caused by a defective hot air flue. Damage, $8, covered by insurance.

November 15—Alarm from Box 6. Fire in millinery store at 77[illegible] Granville Street, owned by Mr. Fee and occupied by McDonald and Harper. The fire was in a store room in the rear of the building and was evidently caused by woodwork around a stovepipe hole in the floor catching fire, the stock being considerably damaged. Damage, $[illegible], covered by insurance.

November 17—Telephone alarm, 251 Twenty-first Avenue East. Small fire in kitchen wall caused by an overheated furnace pipe. Building owned by M. Hugh and occupied by Mrs. Nestler as a dwelling. Damage, $15, covered by insurance.

November 21—Telephone alarm, 1835 Bismark Street, owned and occupied by G. Fleming. Small fire in dining room around the register, caused by an overheated hot air pipe. Damage, $10, covered by insurance; verbal alarm, S.E. corner of Lakewood Drive and Pandora Street. Fire in front room of vacant house, owned by F. Colburn. The blaze was evidently of incendiary origin, starting in the paper on the wall. Damage, $100.

November 22—Telephone alarm, 1749 Napier Street, owned and occupied by Mrs. A. M. Pennebera. Small fire in kitchen, caused by clothes on hot water tank coming in contact with stove pipe. Damage, $10, covered by insurance

November 25—Alarm from Box 1223. Fire in grocery store at 2333 Main Street, occupied by Barker and Miller. The blaze started in the office from some unknown cause, burning through wooden partition and damaging the stock. Building owned by J. S. McLeod. Damage, $541, covered by insurance.

November 30—Alarm from Box 223. Fire in two-story frame dwelling at 1135 Seventh Avenue West, owned and occupied by A. D. Mahoney. The fire had a good hold when the apparatus arrived and both building and contents were a total loss. The adjoining house on the west, No. 1145, owned and occupied by J. W. Macfie; was also damaged by the fire. Damage, $3,275, partly covered by insurance.

◆

NORTHERN CROWN BANK'S REPORT

The annual statement of the Northern Crown Bank shows net profits for the past year amounting to $201,289. In common with other Canadian banks, liquid assets have been strengthened and stand at $5,560,736. Sir D. H. McMillan, president of the bank, in his address, referred to the effect of the war and the crop movement upon Canadian banking in the following terms:—The restriction of trade, the cessation of the flow into this country of British and foreign money for investment, the very early marketing of the western crop, upon which we so largely depend for our profits, the consequent paying off of loans almost a month earlier than usual, and the exceptionally light and quick movement of the western grain, combined with the crop failure through drought in certain districts, have all contributed to a result which was unforeseen. Our profits held up fairly well for nine months, but fell off in the last three months, for the following reasons:—

The last quarter of our fiscal year is ordinarily by far the most profitable. In that quarter the movement of the crop creates a demand for our circulation, which greatly increases temporarily while the movement is on. From this source we accumulate a large sum of money which has to be kept in such a position as to be immediately available when our notes return to us for redemption. This usually occurs in December and January, although this year it is returning much earlier. The circulation contracts when the crop movement ceases, quite as rapidly as it expands while the movement is on, so that we only get the benefit of it for about two months. It is not expedient, therefore, to use the surplus funds which it creates in time loans. In previous years we have placed this surplus money on call, at interest rates varying from 5 per cent. to 6 per cent. This year the call money outlet was closed to us, and we had to keep the surplus funds reserved for the redemption of our circulation, on deposit with our correspondents and agents at unremunerative rates. The only alternative was to keep it in gold coin, earning nothing. What the future of the call loan business may be remains to be seen, but the experience of this year has amply demonstrated that it cannot be relied upon in times of stress.

The bank has paid up capital stock amounting to $2,852,828, and has a rest fund of $150,000. The notes of the bank in circulation amount to $2,361,121, deposits not bearing interest are $[illegible]20,081 and deposits bearing interest, including interest accrued are $8,774,081.

The statement shows that the bank has maintained a strong position during these times of stress.

◆

Regarding the British Government's proposal to make advances to the four large dominions for war expenditure and other liabilities directly arising out of the present crisis, the British [illegible] dealing with the question shows that the [illegible] £42,250,000, to be divided as follows: Canada, [illegible]; Australia, £18,000,000; South Africa, [illegible]; New Zealand, £5,250,000.

A GENERAL BANKING BUSINESS TRANSACTED

H. O. POWELL, General Manager

The Standard Trusts Company
DIVIDEND No. 21

Notice is hereby given that a dividend of four and one-half per cent., being at the rate of nine per cent. per annum, upon the paid up capital stock of The Standard Trusts Company, has been declared for the half year ending 31st of December, 1914, and that the same will be payable at the Offices of the Company on and after the 2nd day of January, 1915.

The transfer books will be closed from the 16th to the 31st of December, both days inclusive.

By Order of the Board.
WILLIAM HARVEY,
Managing Director.

Winnipeg, November 28th, 1914.

The Maximum of Security

Real Estate Mortgages afford investors the Maximum of security. More than twenty-eight million dollars of this Corporation's investments are in first mortgages on carefully selected improved real estate securities. It is in these that the funds entrusted to our care by our Debenture holders are invested, thus assuring

Safety of Principal and Certainty of Interest.

That the conservative investor of small means may be afforded the advantages of this most desirable security, we issue our debentures in sums of one hundred dollars and upwards. Don't wait till you have accumulated more money. If you have a hundred dollars to invest write us for particulars.

◆

CANADA'S RICHEST POSSESSION

Permanent progress would depend upon the conservation of our richest possession, the soil. It was something which had been preached in season and out of season, said Mr. G. Bury, vice president of the Canadian Pacific Railway, at a complimentary banquet tendered him at Winnipeg previous to his removal to Montreal to take up his duties, at which three premiers of western provinces and many distinguished personages extolled Mr. Bury's ability as an executive. "When a railway man preached mixed farming it sometimes happened that his motives were questioned. But be that as it might, it must be apparent to all that if we grew grain exclusively it must of necessity depress the price, and, besides, if traffic in this western country was to be moved in a few months, rather than throughout the year, it meant that large numbers of men would be out of work, and prosperity and unemployment did not go hand in hand. If he might make the suggestion, it would be an excellent thing if our well to do friends would take up scientific farming as a hobby; they might find it not as much fun as golf at first, but they would get as much fresh air."

Mr. Bury remarked that when he took up his new duties in Montreal, he intended to devote every energy to cement a friendly feeling between the east and the west, a statement which was greeted with hearty applause. Closer relations between east and west should be the aim of all, for we should think as Canadians and not sectionally.

DOMINION TRUST'S DEPOSITORS ARE ACTIVE

Those who had deposits with the Dominion Trust Company have confirmed the appointment of Mr. A. C. Stirrett, of the General Administration Company, as liquidator. At the meeting the responsibility of the attorney-general's department was dwelt on in connection with the assertion that the taking of deposits after March 4th last (when the Dominion Trust lost its right to accept deposits under either federal or provincial authority) was entirely illegal.

It was also decided to continue the special committee, consisting of Messrs. A. J. Paterson, H. J. La Brash, A. C. Rankin, G. H. Healey and J. S. Cowper to represent the depositors during the liquidation proceedings, and to go to Victoria to ask Sir Richard McBride and Mr. Bowser that the government should reimburse the depositors in full for all moneys deposited with the company.

The meeting also recommended to the court that Marwick, Mitchell and Peat be retained as auditors for the permanent liquidators. It was pointed out that they had done a large amount of work which would have to be gone over again by new auditors. Mr. G. H. Healey, in presenting a resolution to that effect, said he was at a loss to understand how any firm of auditors could ever have certified that the accounts of the company were correct.

◆

BANK OF OTTAWA REPORT

Another Canadian bank, which can claim to be a financial veteran of reputation in a young country, is the Bank of Ottawa, which held its fortieth annual meeting last week. The shareholders were presented with a good report, one of the chief features of which is the strong position of the bank in liquid assets. Profits suffered a decline last year by the writing down of securities, a very proper thing to do. The profit and loss account of the bank compares as follows:—

	1913.	1914.
Profits	$706,740	$620,691
Previous balance	269,559	202,759
Total	$976,300	$823,450
Less:		
Dividends	$471249	$480,000
Bank premises	37,291	75,151
Officers' pension fund	15,000	15,000
Rest	250,000	......
To Patriotic Fund	......	25,000
	$773,540	$505,151
Balance	$202,759	$228,299

The securities of the bank this year are valued at $3,842,546, compared with $3,052,725 last year. Before bringing forward profits provision was made for shrinkage in the value of investments, owing to prevailing conditions. The amount allowed on this score is not stated. The liquid assets of the bank total $16,180,823 against $15,153,634 in 1913. The total assets are $53,529,920.

The bank's deposits are $40,125,240, showing a decrease of less than $700,000, a creditable record in these strenuous times.

The profits on the year's operations were $620,691, a decrease of $86,000. The profits were equal to 15.5 per cent on the paid up capital, against 17.5 per cent. last year. Dividends absorbed a little more than in 1913, about double the amount of a year ago was applied to bank premises account, the usual allowance was made to the officers' pension fund, and $25,000 was given to the Patriotic Fund. After all deductions, $25,540 remained to be added to balance at credit of profit and loss. The bank's reserve is $4,750,000, against a paid up capital of $4,000,000, a substantial sum.

Orders to December 4, estimated at	$38,981,500
Less (for boots and shoes orders, which were not placed here)	2,500,000
	$36,481,500
Shrapnel shells; further orders	5,500,000
Military accoutrements	1,500,000
Clothing supplies; further orders	1,000,000
Bullets; motor trucks, miscellaneous	1,500,000
Shovels, order of 120,000	50,000
	$46,031,500

The motor transport committee of the Militia Department met last week and decided on a uniform type of motor truck for the Canadian expeditionary force. Orders for about two hundred motor trucks are being placed at once. The orders will probably total $500,000.

An Ottawa dispatch of Monday says that a contract for motor trucks for the Dominion government is likely to be awarded to the Kelly Springfield, White and Packard companies, provided they reduce their catalogue prices by 25 per cent. The contract calls for 150 trucks in all, approximating in cost about $800,000. It is believed that the trucks will be assembled on the Canadian side by Canadian companies. It is understood that a contract for 200 bicycles and 100 motorcycles for military use has been secured by the Ketchum Company, Limited, of Ottawa.

Heavy British Orders.

Mr. Frederick Stobart, the purchasing agent of the Imperial Government, with headquarters at Montreal, is now securing a large quantity of woolen socks from Canadian manufacturers for immediate shipment. Mr. Stobart is in the market to purchase all the stocks offered, provided the quality is good and warmth ensured.

Further orders for clothing supplies placed by Mr. Stobart last week, included 465,000 pairs of woolen socks and 500,000 pairs of cap comforters. Of the original order for socks, 285,000 pairs have yet to be ordered.

Fifty thousand pairs of socks were purchased on one day last week by Mr. Stobart from Montreal jobbers.

Mr. Stobart has received repeat requisitions for certain goods, the value of which he estimates at about $1,500,000. The articles required include cap comforters, cotton underdrawers, woolen underdrawers, socks and clasp knives.

Mr. Stobart received word on December 11th, to secure large quantities of military accoutrements, that is, leather belts, haversacks, rifle and revolver holders, etc., from Canadian firms. The value of the order was estimated by Mr. Stobart at approximately $1,500,000. He stated that the capacity of Canadian leather goods companies in Canada is about ten thousand sets per week. This order should mean full operation for all houses wishing to share in the business, from now until the end of March.

After the close of navigation all materials will be reshipped by rail from Montreal to either Halifax or St. John, Montreal continuing as the point of assembly for goods ordered.

Canadian Firms Busy.

Colonel Barton, who is chief clothing inspector of the British War Office, has arrived in Montreal and is working in co-operation with Mr. Frederick Stobart in the handling of orders for clothing. The capacity of Canadian manufacturers, so far communicated with, totals about 10,000 uniforms a week. Colonel Barton says that the orders to be placed will ensure capacity operations for all who are in a position to handle the business and that the business will probably continue while the war lasts.

Another repeat order for material to be used by the British army has been received by Mr. Stobart this week. The requisition calls for additional quantities of pick axes, pick heads, pick handles and shovels. An order for 120,000 shovels, value $50,000, was placed by the purchasing agent with two Canadian firms on December 19th.

Canadian hosiery manufacturers have been working for over a month on large orders for that class of clothing which have been placed by both Mr. Stobart, for the Imperial Government, and by the Canadian Government at Ottawa. A repeat order for hosiery was received by Mr. Stobart last week. It calls for the delivery of 750,000 pairs of socks before the end of March. This, together with the orders manufacturers have still to complete, will keep the entire capacity of Canadian firms taxed until the end of March. Mr. Stobart was obliged to place some of the last requisition in the United States in order that delivery could be secured within the specified time.

Twenty-Eight Million Buttons.

An order for 1,500,000 woolen underdrawers has also been distributed among Canadian manufacturers. Canadian firms will also make 250,000 cotton underdrawers.

Mr. Stobart wants to buy also 28,000,000 trouser buttons for the British army.

That the contract for the supplying of 30,000 fur caps for the Canadian contingent has been awarded to large fur establishments in New York is not true, according to Mr. A. J. Gough, of the Sellers-Gough Company, Toronto. Mr. Gough states that, so far as he knows, the contracts for the making of the caps has been distributed between several Canadian firms. He added that if contracts had been placed in New York they were confined to the British and French Governments.

An order for 20 army wagons has been placed with the Port Arthur Wagon Company, Port Arthur, Ont. The Massey-Harris Company also has a big order for wagons.

Another large order for shells for the Imperial government is being placed with the steel mills in Canada. The order is for 600,000, and means the distribution of $5,500,000. Two thousand shells a day are being turned out by 100 Canadian plants. The shells will be complete with the exception of the time fuse.

Bullets of British Columbia Lead.

A large order for bullets has been placed with a Toronto firm. The lead will come from British Columbia.

Replying to an inquiry by the London correspondent of the Toronto Mail, concerning orders supposed to have been given for boots and shoes in the United States, Mr. W. L. Griffith, secretary to the Canadian High Commissioner's office, stated that no orders have been placed either in Canada or the United States, as it is expected that all the requirements of the British army will be met in Britain. As regards woolen goods, camp equipment and hosiery, Mr. Griffith pointed out that Mr. Frederick Stobart has made large purchases of these in Canada, while recently a large order for clothing has been placed with Canadian manufacturers. In the line of meats, the Wm. Davies Company, of Toronto, has received an order for 3,500,000 tins, through its London agents, while Matthews-Blackwell, Limited, of Montreal, has secured an order for 140,000 tins. Government brokers also bought large quantities of bacon from Canadian stores.

Stretchers and Harness.

Interrogated about an order for stretchers that was said to have gone to the United States, Mr. Griffith said that, so far as he was advised, no such orders had been given on behalf of the War Office, while with regard to the allegation that 1,000 ready made huts had been ordered from United States manufacturers, Mr. Griffith said that the War Office has given its assurance that there is no foundation for the statement. An offer of these huts was received in October, but was declined.

Further orders from the French government for harness are in prospect. Several Canadian business men are over here, hoping to benefit by government contracts, but they are not deriving any more advantage than if they had remained in Canada and negotiated with Mr. Stobart. Both Hon. George H. Perley and Mr. Griffith have shown great activity in watching Canadian trade interests arising out of the war, and the work is adding considerably to their duties.

THE TORONTO GENERAL TRUSTS CORPORATION

DIVIDEND No. 74

Notice is hereby given that a dividend of Two and one-half per cent. (2½%) has been declared upon the paid-up Capital Stock of this Corporation for the quarter ending 31st December, 1914, being at the rate of ten per cent. (10%) per annum, and that the same will be payable on and after the 2nd day of January, 1915.

The Transfer Books of the Corporation will be closed from Monday the 21st day of December to Thursday the 31st day of December, 1914, both days inclusive.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing Operations, Developments, Extensions, Dividends and Future Plans

Dominion Iron and Steel Company.—The Dominion Iron and Steel Company has received a substantial order for rails from Ireland, and it is probable that the Steel Company will blow in another steel furnace the first of the year, making a total of three.

Ottawa Light and Power Company.—The regular quarterly dividend of 2 per cent. has been declared, but the 1 per cent. bonus declared this time a year ago was not included in the announcement. No bonus was paid in June, so shareholders this year will receive 8 per cent against 8 plus 2 per cent. in 1913.

Concord and Montreal Railway Company.—A special meeting of shareholders will be held on December 23, 1914, at Concord, N.H., to vote on authorizing an issue of debenture bonds to the amount of $200,000, payable June 1, 1920, with interest at 5 per cent., the proceeds to be used to reimburse the Boston and Maine Railroad Company, for permanent additions and improvements.

Hewsons Pure Wool Company.—A resolution has been adopted by the shareholders of the Hewson Pure Wool Company that another company should be formed to take over the present business. Capital would provide for the issue of $350,000 debenture shares to take the place of the present bonds, and $250,000 of preferred stock to take the place of the present preferred shares. The old common is to be thrown out, but 6,000 shares of a par value of $1 will be issued, one share of which is to be granted as a bonus for each $100 debenture or $100 of preferred stock. In order to provide working capital a bond issue of $150,000 will be made to take precedence over all other securities.

Sterling Coal Company.—The directors of the Sterling Coal Company will ask the bondholders to forego the interest charges represented by coupon numbers 10, 11, 12 and 13, and to cancel the liability of the company in respect to them. This relates to the interest on bonds due on January 2nd next, and to the three following half-yearly interest payments, the bondholders being thus asked to forego interest for two years. It is proposed to maintain the full sinking fund payment of 2 per cent. per annum on the bonds, which at the end of last year represented $1,680,700. The Sterling Coal Company owns 90 per cent. of the stock of the Conger Lehigh Coal Company, of Toronto, owning mines in Ohio and West Virginia.

Spanish River Pulp and Paper Company.—A meeting of bondholders of the Spanish River Pulp and Paper Mills and the Ontario Pulp and Paper Company, Limited, called by Mr. T. Kelly Dickinson, was held at Montreal, to formulate a plan of protest against the proposal that payment of two years' bond interest by the respective companies be deferred until 1922.

About $900,000 of bonds were represented at the meeting, $600,000 of Spanish River and $300,000 of Ontario Paper, and the result of the discussion that took place was the formation of a "protective" committee, composed of Messrs. N. B. Stark, Benjamin Tooke, E. A. McNutt, representing the Sun Life Insurance Company, and Mr. Leonard E. Schlemm. This committee was given power to act for the bondholders present in whatever way it may see fit and to advise all other bondholders of the steps they are taking.

Consolidated Mining and Smelting Company.—The annual report of the Consolidated Mining and Smelting Company of Canada shows a net profit of $474,012, after writing off $103,140 for depreciation. In 1913 the profits were $998,367, and in that year $146,010 was deducted for development and $103,256 for depreciation before the year's profits were struck. The balance this year amounts to $9,636, which compares with a balance of $534,000 in the 1913 year. The profit and loss account is left at practically the same level as last year, being $1,727,286, an increase of $10,000.

The liability to the company's bankers increased to $1,4[illegible] from $204,365, this, according to the general manager, being due to expenditure on plant account at the smelter and mines, increase in metals on hand at the smelter, development of new properties from which returns have not yet been received, and finally the failure of the market for the refined metals.

Dominion Glass Company.—Net profits of $625,748 for the 12 months ended September 30th, were reported by the Dominion Glass Company, Limited, at the annual meeting. After deducting $120,000 for bond interest and $50,000 for sinking fund, a balance of $455,748 equal to 17.5 per cent. on the $2,600,000 preferred stock, remained available for dividends. After payment of the regular 7 per cent. on the preferred, the surplus of $273,748 was carried forward to profit and loss, bringing that account up to $488,200.

Earnings on the common stock of $4,250,000 were, therefore, at the rate of 6.44 per cent. for the year, while the accumulated surplus represents about 11.5 per cent. No dividends have yet been paid on the common.

Mr. G. A. Grier, president, in his report, states that:—

"It is yet too early to express a definite opinion as to the effect of prevailing conditions upon the operations of the current year, but it is feared that a further contraction of trade must be anticipated."

The 1914 results, however, are described as satisfactory by the president, having in view the general contraction of trade during the year, and the fact that the company's capacity was not fully employed.

No provision was made for depreciation in the year recently closed, but in addition to providing the first annual payment of $50,000 for the redemption of bonds, the sum of $175,682 was expended out of revenue upon repairs to factory and upon mould equipment.

The balance sheet shows a surplus of about one million dollars in current assets over current liabilities. The latter total $367,422, of which the larger items are $222,252 in "deposits and loans," and $77,765 in accounts payable. Current assets comprise $895,266 in inventories, etc., and $480,500 in accounts and bills receivable. Total assets are $9,773,437, of which $8,205,694 is in real estate, plant, patent rights, goodwill, etc.

The directors and officers were re-elected. They are Mr. G. A. Grier as president; Mr. C. B. Gordon, vice-president; Messrs. D. A. Gordon, Hon. Lionel Guest, Abner Kingman, T. B. Macaulay, Wm. McMaster, F. W. Ross and Sir Wm. Wiseman.

International Coal and Coke Company, Limited.—Mr. Farwell, president of the company, in the statements, as at October 31st, says:—The conditions referred to in our last statement still prevail, but to a greater extent. Our output since then has been further curtailed, reducing our profit as compared with the previous three months very materially.

In common with other industries we cannot look for any improvement until normal conditions obtain.

The work in connection with opening up the new level and installation of plant for same is still in progress, and we expect to have it completed by the close of the year. Due provision has been made for the cost of the same.

The statement of the company shows the following liabilities and assets:—

Liabilities.

Capital stock		.... $3,000,000
Current liabilities—		
Pay rolls	$ 16,220

Ontario Pulp and Paper Company.—As a result of representations made by the Ontario Pulp and Paper Company bondholders, the date of the bondholders meeting, called for December 23rd, to pass on a proposal to suspend two years' bond interest, has been postponed for 21 days.

Dominion Park Company.—The Dominion Park Company has declared the dividend for the last quarter of the current year at 1 per cent., compared with 1½ per cent. for the preceding quarter. The stock has been on a 6 per cent. basis for some years, but for three years on a stretch (1908-11) paid 5 per cent.

Canadian Western Natural Gas, Light, Heat and Power Company, Limited.—The annual report for the year ended September 30, 1914, shows gross total sales of gas to Calgary consumers for the year were 4,251,825,000 cubic feet, an increase of 44.3 per cent. over the sales of gas last year. This quantity of gas was sold for the net sum of $951,292, an increase of $327,010.01, or 52.4 per cent., over the amount realized last year. The average price obtained this year was 22.3 cents per thousand cubic feet, as against 21.2 cents last year. The statement of the combined earnings and expenditures of the company and its subsidiary, shows a revenue of $967,000. Of this amount $328,000 went to expenses and reserves, $225,000 to debenture interest and $320,000 to depreciation and loss, leaving $94,531 to be carried forward. The parent company has taken into its accounts the losses of the Calgary Sales Company during the past two years. The losses shown for this company in the previous year were $81,113, and for the year ending September 30, 1914, the loss was $91,808. The parent company paid a dividend of 1 per cent. on August 31, 1914, which took $80,000, and $14.531 was carried forward to balance. This is the only dividend paid in two years.

On October 1, the beginning of the current fiscal year, discontinued in part the discount formerly allowed consumers for prompt payment.

Vancouver Trust Company.—The following letter has been sent to the company's depositors:—"This company has decided to discontinue its savings department after December 31st, 1914. We regret, under these circumstances, we are obliged to notify you that after December 31st, no interest will be paid on your deposit, which now stands on our books as $ . ..... The accrued interest will be added to this up to date any time you desire to withdraw these funds. The directors of this company, in arriving at this decision, are guided by the unsettled state of affairs now existing, and, consistent with good business, we cannot invest these funds and have them on hand for immediate payment should depositors require them, and it is only under these circumstances, therefore, that this action is being taken for the protection of the depositors and also of ourselves.

"We trust that at some future time we shall have the pleasure of being able to handle other deposits for you in a different form, and are sorry that the pleasant relations existing between yourself and ourselves should be (we hope temporarily) discontinued."

The Monetary Times understands that the company has the cash with which to pay depositors in full. The company made the necessary deposit of $50,000 with the provincial government under the new trust companies act.

Dominion Bridge Company.—The company's report for the year ending October 31, 1914, shows the following figures:

"The trend of affairs has been towards a depressed condition of the steel business and since the empire became involved in war the depression has greatly increased. The company's shops were kept fairly well employed until the end of July, and the output from the various works for the 12 months ending October 31st, 1914, totalled 64,[illegible] tons, as compared with 76,073 tons for the year ending October 31st, 1913, a reduction of 11,1[illegible] tons.

"Owing to the small amount of business offering a number of contracts were necessarily taken at less profitable prices than were obtainable in recent years, and for the last three months it has also been necessary to make exceedingly low prices to procure work enough to keep the organization together.

"The extensions and improvements in plant, machinery and equipment at the various works of the company (Lachine, Ottawa, Toronto and Winnipeg), undertaken two years ago, have been practically completed during the year.

"The profits of the year, after making ample allowance for all bad and doubtful accounts receivable and for depreciation of buildings, plant and equipment wherever situated, are $629,968.

"During the past year dividends at the rate of 8 per cent. per annum were paid on November 15th, 1913, February 14th, 1914, May 15th, 1914, August 15th, 1914. Provision was also made out of the year's profits for a dividend of 1¼ per cent., or at the rate of 5 per cent. per annum, declared on October 28th, before the closing of the fiscal year, but not paid until November 14th. There has, therefore, been paid and set aside sufficient funds to cover five dividends, and for this reason the balance carried forward to profit and loss account is less than that of the corresponding date last year, the profit and loss statement showing a balance carried forward into the new year of $366,283.37, as against a balance of $409,276.32 a year ago.

"The directors regret having to state that the bridge and structural steel business is in a most unfavorable condition, and while the war continues it is not practicable to make any predictions as to the future. They are making every endeavor to keep the various shops as fully employed as circumstances permit on any class of work which it seems possible to undertake without loss. A contract has been closed for the manufacture of a number of shells for the War Office and for other articles for the manufacture of which the company has suitable plant, but which have not heretofore been manufactured by the company. Efforts are being made to obtain a share of such business as is offering in foreign countries and when European conditions improve we hope to be in a position to do some export business at a reasonable profit.

"The construction of the Quebec bridge, in which contract the company has a one-half interest is progressing favorably, and to December 1, about 42 per cent. of the material had been fabricated and about 18 per cent. erected, the programme laid out for the current year having been fully completed. Should the government see its way to make full appropriations to cover progress estimates, it is anticipated the work will be finished in good season and within the original estimates of cost."

◆

"The farm is the basis of all industry, but for many years this country has made the mistake of unduly assisting manufacture, commerce and other activities that centre in cities at the expense of the farm." James J. Hill.

LEGAL NOTICE

Associates Securities Company, Limited.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 27th day of November, 1914, incorporating James Steller Lovell, accountant, William Bain, bookkeeper, and Robert Gowans, Joseph Ellis and John Joseph Dashwood, solicitors' clerks, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(*a*) To purchase with the funds of the company or otherwise acquire, hold, sell, exchange or otherwise dispose of shares in the capital stock of any other corporation, also the bonds, debentures, debenture stock or other securities or evidence of indebtedness of any other corporation, notwithstanding the provisions of section 44 of the said Act; (*b*) To raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement guarantee or otherwise any corporation in the capital stock of which the company holds shares, or with which it may have business relations, and to act as employee, agent or manager of any such corporation and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (*c*) To manufacture, sell and deal in all kinds of cement, lime, limestone, plaster and artificial stone; (*d*) To procure for any corporation and to convey and assign or cause to be conveyed and assigned thereto any properties, real and personal, rights, privileges, powers, contracts, concessions and franchises which such corporations may be authorized or empowered to take or acquire. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Associates Securities Company Limited," with a capital stock of three million two hundred thousand dollars, divided into 32,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 27th day of November, 1914.

THOMAS MULVEY,
Under-Secretary of State.

THE BANK OF OTTAWA

FORTIETH ANNUAL MEETING

The Fortieth Annual Meeting of the Shareholders of the Bank of Ottawa was held at its banking house in the City of Ottawa at 3 p.m. on Wednesday, the 16th inst.

The President, Hon. GEORGE BRYSON, in the chair.

Report of the Directors

The Directors beg to submit the fortieth annual report, showing the result of the Bank's business for the year ended 30th November, 1914:

Balance at credit of Profit and Loss Account on 29th November, 1913, was	$202,759.4[illegible]	
Net profits for the year ended 30th November, 1914, after deducting all expenses of management, and making necessary provision for interest due to depositors, unearned interest on current loans, all bad and doubtful debts and for shrinkage in value of investments, and for contingencies	620,691.41	
		$823,[illegible]
Appropriated as follows:—		
Dividends Nos. 90, 91, 92 and 93, being at the rate of 12 per cent. per annum	$4[illegible]	
Appropriation for Patriotic Fund	2[illegible]	
Applied in reduction of Bank Premises and Furniture	7[illegible]	
Transferred to Officers' Pension Fund	1[illegible]	
		[illegible]
Balance carried forward at credit of Profit and Loss Account		[illegible]

[illegible]

GEORGE BRYSON, President.
GEORGE BURN, General Manager.

After remarks from the President and General Manager, the adoption of the report was moved by the President and Vice-President, and carried unanimously.

The usual resolutions [illegible] Directors and to the staff of the Bank were adopted, and a resolution appointing Messrs. A. B. Brodie and [illegible] Mark [illegible] of the firm of Price, Waterhouse & Company, auditors for the current year, [illegible] the remuneration of these auditors at a maximum sum of [illegible], was also passed.

The Scrutineers appointed at the meeting reported that all the members of the old Board had been re-elected, [illegible] of the newly elected Directors [illegible] subsequently, the Hon. George Bryson was elected President and Mr. John B. Fraser Vice-President for the ensuing year.

To the Shareholders of the Bank of Ottawa:

We have examined the books and accounts [illegible] investments.

A. B. [illegible]

Ottawa, 1[illegible] December, 1914. [illegible]

PERSONAL NOTES

Sir George Gibbons has been elected president of the London (Ontario) Gas Company in succession to the late Major Thomas Beattie, M.P.

Hon. C. J. Clark, the new premier of New Brunswick, last week completed the organization of a new government for the province. Only one new minister is appointed, J. B. M. Baxter, K.C., of St. John, who is given the portfolio of attorney-general. In addition to his position as premier, Hon. Mr. Clark will act as commissioner of lands and mines.

Mr. Frank Drayton Williams is the vice-president and managing director of the London Mutual Fire Insurance Company of Canada, of Toronto. He was born in London, England, on November 17th, 1876, and is the son of George Edward and Frances Louise (Hankey) Williams. His education was at Mostyn House, Parkgate, Cheshire, and at the Whitgift Grammar School, Croydon. After being with Lloyd's, of London, England, for 8½ years, 1895-1903, he engaged in estate management and insurance in London from 1903-1906, with G. J. Allen, of Croydon, Surrey. Mr. Williams then came to Canada, joining the staff of Allan, Killam and McKay, of Winnipeg, where he remained three years. He then became partner of Carson and Williams, insurance brokers, Winnipeg, 1909-1911. He received his present appointment in 1912. Mr. Williams is a member of the Toronto, Royal Canadian Yacht and Toronto Golf Clubs, as well as the Arts and Letters Society.

F. D. WILLIAMS,
Vice-president and managing director, London Mutual Fire Insurance Company.

Mr. Benjamin Garrett has resigned his position as manager of the insurance department of the Vancouver Trust Company, Vancouver, to accept a position as inspector for Messrs. Ceperley, Rounsefell and Company, general agents for the Phoenix, of London, Liverpool and London and Globe, [illegible] America. Mr. W. A. Ragsdale, late of the [illegible] has succeeded Mr. Garrett.

Mr. W. G. Jaffray, of Jaffray, Cassels and Biggar, stock brokers, Toronto, has been elected president of the Toronto Globe, in succession to his father, the late Senator Jaffray.

Mr. R. S. McLaughlin, of the McLaughlin Automobile Company, has been appointed a director of Loew's Canadian Theatre, Toronto, succeeding the late Mr. James Bicknell, K.C.

Mr. A. C. Stirrett, manager of the General Administration Society, Vancouver, and also manager of the Credit Foncier Franco-Canadien in that city, is the choice of the depositors of the Dominion Trust Company for permanent liquidator. He was the selection of the special committee appointed by the depositors a few weeks ago, and their recommendation has been adopted. Mr. Stirrett will now be recommended to the court as the unanimous choice of the British Columbia depositors for the permanent liquidatorship.

Mr. David Morrice, director of the Bank of Montreal and father of the Canadian cotton industry, died on December 19th. He was 85 years old. Mr. Morrice was born in Scotland on August 11, 1829. He came out from Scotland in early life, and entered business in Toronto. He went to Montreal in 1863, starting business there as agent for most of the cotton and woolen mills of the country. Mr. Morrice was also interested in many manufacturing concerns throughout the country, being president of the Canadian Cottons, Limited, president of Penmans, Limited, and of the Montreal Freehold Company. Mr. Morrice leaves five sons, Messrs. W. J. Morrice, D. M. Morrice, Jas. W. Morrice, honorary non-resident of the Royal Canadian Academy of Arts, who for many years has resided in Paris; R. B. Morrice, who has just returned from England; and A. A. Morrice, of Toronto; and one daughter, Mrs. Allan Law, of Montreal.

Mr. Grant Hall, vice president and general manager of the western lines of the Canadian Pacific Railway, has announced the following promotions. Mr. D. C. Coleman, at present general superintendent of the Alberta division, to be assistant general manager. Mr. C. E. Stockdill, at present chief clerk, to be assistant to the vice-president and general manager. Mr. J. A. Dewolfe, at present chief clerk in engineering department, to be chief clerk in the office of the vice-president and general manager. Mr. A. E. Stevens, at present assistant general superintendent of the British Columbia division, to be general superintendent of the Alberta division. Mr. J. M. Cameron, superintendent of the Medicine Hat district, to be assistant general superintendent of the British Columbia division. Mr. W. A. Mather, at present superintendent at Kenora, to be superintendent of the Medicine Hat district. Mr. A. Halkett, at present train master at Moose Jaw, to be superintendent at Kenora. Mr. A. F. Hawkins, at present train master at Medicine Hat, to be terminal train master at Moose Jaw. Mr. J. N. Murphy, who has been an engineer on construction, to be train master at Medicine Hat.

AUDITORS' CERTIFICATE

We Report to the Shareholders of The Royal Bank of Canada:

That we have obtained all the information and explanations required by us.

That in our opinion the transactions of the Bank which have come under our notice have been within the powers of the Bank.

That we have checked the cash and verified the securities of the Bank at the Chief Office at 30th November, 1914, as well as at another time, as required by Section 56 of the Bank Act, and that we found they agreed with the entries in the books in regard thereto. We also during the year checked the cash and verified the securities at the principal branches.

That the above Balance Sheet has been compared by us with the books at the Chief Office and with the certified returns from the Branches, and in our opinion is properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs according to the best of our information and the explanations given to us and as shown by the books of the Bank.

B. E. WALKER, President. ALEXANDER LAIRD, General Manager.

Report of the Auditors to the Shareholders of The Canadian Bank of Commerce.

In accordance with the provisions of sub-sections 19 and 20 of Section 56 of the Bank Act, 1913, we report as follows:

We have audited the above Balance Sheet with the books and vouchers at Head Office and with the certified returns from the branches, and have obtained all the information and explanations that we have required, and we are of the opinion that the transactions of the Bank which have come under our notice have been within the powers of the Bank.

We have checked the cash and verified the securities representing the investments of the Bank at its chief office and principal branches at a date other than and in addition to the verification at 30th November and found that they were in agreement with the entries in the books of the Bank relating thereto.

In our opinion the Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the affairs of the Bank according to the best of our information and the explanations given to us, and as shown by the books of the Bank.

Report of the Proceedings of the Ninth Annual General Meeting of Shareholders

Held at the Banking House, Winnipeg, on Wednesday, 16th December, 1914.

The Ninth Annual General Meeting of the Shareholders of the Northern Crown Bank was held at the Banking House, Winnipeg, on Wednesday, 16th December, 1914, at 12 o'clock noon. A large representation of shareholders was present.

It was moved by Mr. John Stovel, seconded by Mr. H. T. Champion, that the President, Sir D. H. McMillan, K.C.M.G., take the chair. The following Report was then read by the General Manager, who acted as secretary:

THE REPORT

The Directors of the Northern Crown Bank beg to submit to the Shareholders, the Ninth Annual Report, showing the result of the bank's business for the year ended 30th November, 1914, together with the usual Statements of Assets and Liabilities as at that date.

Other Assets not included in the foregoing	62,528.77	
		$12,738,526.59
		$18,299,763.22

D. H. McMILLAN, President. R. CAMPBELL, General Manager.

TO THE SHAREHOLDERS OF THE NORTHERN CROWN BANK

In accordance with the provisions of sub-sections 19 and 20 of section 56 of The Bank Act, I report as follows:

I have audited the Balance Sheet with the books at the Head Office and the certified returns from the Branches.

I have obtained all the information and explanations that I have required and am of the opinion that the transactions of the Bank, which have come under my notice, have been within the powers of the Bank.

I have checked the cash and verified the securities representing the investments of the Bank at its offices in Winnipeg, Vancouver and Toronto at a date other than and in addition to the verification of November 30th, and find that they are in agreement with the entries in regard thereto in the books of the Bank.

In my opinion, the Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs, according to the best of my information and the explanations given to me, and as shown by the books of the Bank.

D. DEWAR, C.A.
(Of the firm of Marwick, Mitchell, Peat & Co.)
Auditor.

Since the last Annual Meeting, a branch has been opened at Ste. Rose de Lac, Man., and branches have been closed at Oak Bay Junction (Victoria, B.C.) and Wolseley, Sask.

All the branches of the Bank, including Head Office, have been inspected during the year, except a few unimportant ones, which are now being inspected.

The statement bears for the first time the certificate of Mr. Douglas Dewar, of the firm of Marwick, Mitchell, Peat & Co., the auditor appointed by the Shareholders at the last Annual Meeting, as called for by the new Act. He is eligible for re-election. The liquid assets of the Bank continue to be maintained at a satisfactory figure.

The usual dividend of 6 per cent. has been paid to Shareholders.

In moving the adoption of the Report, Sir D. H. McMillan, the President, said in part as follows:

We meet again this year under most unusual conditions—conditions which are world-wide. The financial world is facing a situation which has seldom been paralleled in history.

Under these conditions it is not to be expected that we can come to you with as favorable a statement as it has been our good fortune to do in previous years. At the same time, I am glad to say that the Bank has passed through the trying conditions which preceded the actual breaking of the present war, and the critical situation which has since obtained, with credit.

The Profits for the year are disappointing, as compared with previous years, but this is due to causes largely beyond our control. The extreme financial stringency which existed prior to the war was accentuated by the breaking out of hostilities, and we have naturally not escaped the influences which have affected the financial and business interests throughout the whole world. It has been necessary to maintain our reserves at a high figure, but this cannot be done without sacrificing profits. For the past two months, our Cash Reserves and Balances with Correspondents have been between $3,000,000 and $4,000,000, and now stand at $3,500,000. Our Quick Assets are $5,561,236.

The restriction of trade brought about by the conditions I have mentioned, the cessation of the flow into this country of British and foreign money for investment, the very early marketing of the West's crop, upon which we so largely depend for our profits, the consequent paying off of loans almost a month earlier than usual, combined with the crop failure through drought in certain districts, have all contributed to a result which was unforeseen.

This year the call money outlet was also closed to us, and we had to keep the surplus funds reserved for the redemption of our circulation on deposit with our Correspondents and Agents at unremunerative rates.

A policy of [illegible] economy will be necessary to offset these conditions which we trust will not be of long duration.

In order to place the affairs of the Bank in a position to adequately meet a longer continuance of present conditions than we anticipated, your Directors have deemed it prudent to take $200,000 from the [illegible] Rest Account, which has been applied in wiping off $117,000 of [illegible] which have hitherto been regarded as possibly recoverable, but which now appear to be of so doubtful a nature as to make it unwise to [illegible] from their realization; also $56,000 for depreciation in Stocks and [illegible] caused by the present world-wide financial conditions. It is hoped, and expected, that a considerable portion of these appropriations may eventually be recovered. $100,000 has also been carried to Contingent Account from Profit and Loss, to provide for possible future emergencies.

Our policy will be to keep the liquid assets of the Bank strong, rather than to strive after large profits during the unsettled conditions through which we are passing.

In the West the favorable weather of the fall of 1914 has enabled the farmers to prepare a largely increased acreage for cultivation, and this, with the prospect of high prices for grain and farm products next year, and the continued advance in mixed farming justifies us in our expectation of renewed prosperity throughout Western Canada, in which the Bank will certainly participate.

The belief has recently been publicly expressed by men high in the financial and business world, that Western Canada is in a sound position, and I strongly concur in their views. If there is any country in the world which is in a position to take advantage of the present demand at high prices for farm products of all kinds, it is Western Canada

In seconding the adoption of the report, Mr. J. H. Ashdown said

In rising to second the adoption of the report, it is not necessary to say much. I regret the absence of the Vice-President, who would have made this motion—he is absent in the West.

The bad and doubtful debts are the result of an accumulation of the past. I suppose anyone in business here understands the difficulties of commercial life in this respect. There are accounts originated in 1911 and 1912 or an earlier date, which were supposed to be perfectly good, but owing to the change in circumstances, have proved to be otherwise.

Anyone in business or connected with an incorporated company or financial institution that requires a dividend, understands the difficulty, in times like the present, of putting a statement before the shareholders that will provide for a dividend. As far as the Bank is concerned, there will be strict economy to meet the situation

The Northern Crown Bank has been enterprising in opening new branches, and they were justified as the country was situated a few years ago, but some of these branches may not be justified to-day, and a meeting of the Directors is to be held to consider this question, and put it into proper shape

The audit of the Bank has been a strict one. The amendment of the Bank Act which was carried through about twelve months ago, and under the provisions of which the banks have been regulated, is strict.

On motion of Mr Alex Reid, Mr Douglas Dewar, of the firm of Marwick, Mitchell, Peat & Co., was re-elected auditor.

The election of Directors for the ensuing year was then proceeded with, resulting in the following gentlemen being elected J H Ashdown, Sir D. C Cameron, A. McT Campbell, H T Champion, W J Christie, Sir D. H McMillan, Capt Wm Robinson, John Stovel

At a subsequent meeting of the Board of Directors, Sir D. H. McMillan K C.M G., was re-elected President and Capt. Wm. Robinson Vice President

◆

The London Stock Exchange will reopen during the first week in January, it is said, but trading, under heavy restrictions.

Get ready some good resolutions for next week, based on the principle that it never helps to lose faith.

"If there is one lesson of history that is unmistakable it is that national strength lies very near the soil."—Daniel [illegible]

Because a long overdue economic readjustment and an [illegible] war hit us both at the same time, is no reason to forget what it takes to be a man.

[illegible] think nearer home.

Nobody loves [illegible] man, either, if he's a pessimist.

Hon. W. J. Bowser has stated that the British Columbia government proposed at the coming session of the provincial legislature to pass legislation providing for a limited moratorium. It will apply only to overdue real estate payment. It is not the government's intention to interfere with ordinary contracts.

British Columbia

Contains 252,800,000 acres of rich farm and fruit lands, timber, mineral and coal lands, which railroads now building will open up to settlers and investors.

We specialize on British Columbia Investments, and can tell you about opportunities to GET IN AT THE BEGINNING in town lots, townsite subdivisions or farm, timber, mineral, coal lands and water powers, wholesale or retail.

SUDBURY NICKEL OUTPUT

The following statement has been issued by Mr. Ambrose Monell, president of the International Nickel Company:—

"In view of the widespread comment in the Canadian daily and technical press as to the destination of shipments of nickel made and being made by the International Nickel Company and obtained from material of Canadian origin, as well as the references to a European controlling influence in its affairs, the company begs to submit to the Canadian public the following statements of facts:—

"(1) There is absolutely no influence exerted in the conduct of the affairs of the company or of any of its subsidiaries by any European steel manufacturing or similar industry, nor by any individual connected with them, nor by anyone in European financial circles.

"(2) Full information as to the destination of shipments of nickel made by the company has been in the possession of the Dominion Government since the outbreak of the European war, and they are constantly kept cognizant of all exports of nickel, as well as of all local shipments made by the company.

"(3) While recognizing that refining at the point of production of the nickel is the ideal condition, economic conditions and costs affecting cost of production, have dictated the present location of nickel refining; and with the present state of the art any material change in such economic conditions would react in a manner most detrimental to the Canadian nickel industry."
